ADMINISTRATION AND PROGRESS REPORT

HOSPITALS AND DISPENSARIES

UNDER THE

GOVERNMENT OF BOMBAY.

FOR THE YEAR 1884.

133224

ED IN THE OFFICE OF THE SURGEON GENERAL WITH THE GOVERNMENT OF BOMBAY.

By

SURGEON D. A. PATTERSON, M.D.,

SECRETARY TO THE SURGEON GENERAL.

Bombay:
AT THE GOVERNMENT CENTRAL PRESS.

1885.

00133224

No. $\frac{S\ B}{169}$ of 1885.

[redacted]SURGEON-GENERAL

[redacted]WITH THE GOVERNMENT OF BOMBAY,

[redacted]HE SECRETARY TO GOVERNMENT,

GENERAL DEPARTMENT.

Bombay, 5th June 1885.

SIR,

[redacted]ave the honour to submit for the information of His Excellency the [redacted]r in Council the Administration Report on the Civil Hospitals and [redacted]saries of this Presidency for the year 1884.

2. The general plan of the report remains the same as in former years; [redacted]n accordance with the orders of Government the report is again illustrated [redacted]sketch maps of the provinces into which the Presidency is divided.

3. In addition to the summaries of the reports of the Medical Officers, [redacted]e are given as Appendix II. Summaries of the reports by the Superintendents [redacted]he Medical Schools at Poona, Ahmedabad, and Hyderabad in Sind. These [redacted]ools continue to make satisfactory progress. The Hyderabad School complet- its third year in September 1884, and 8 Native Medical Pupils and 8 [redacted]igh School Pupils passed out and were admitted to the Subordinate Medical [redacted]epartment. The latter obtained employment in Civil Medical Institutions in Sind.

In Appendix V. is given an interesting memorandum by Surgeon-Major Gray, Senior Surgeon of the Jamsetji Jijibhoy Hospital, on the treatment of surgical wounds at that institution.

Buildings, Civil Hospitals, and Dispensaries.

4. The buildings and their surroundings have in most cases been fully reported upon as to their state of repair and suitability for the purpose for which they are used. In general the report is favourable. The First Physician, Jamsetji Jijibhoy Hospital, again refers to the inadequacy of the Obstetric ward and female out-patient department; certain alterations have been sanctioned by Government, which will improve this section of the hospital.

New hospitals are required at Thána; at Ahmednagar a subscription is being made to erect a new building to the memory of the late Viceroy the Marquis of Ripon. At Násik under recent orders plans and estimates for a new hospital are being prepared. At Belgaum the present building is quite unsuitable for an hospital. A new building has been proposed for the European General Hospital, Aden. At Dápoli, Pandharpur, Háveri, Kolhápur, Rámdurg, Kheirgaon, Mahudha, Ankleshvar, Vágra, and Sehwan new buildings have been occupied during the year. At Bassein, Bhiwndi, Honávar, Saundatti, Ajra, and Tando new buildings are in course of erection. Some dispensaries are still lodged in unsuitable houses, and that at Shikárpur is reported to be old and in a ruinous condition.

Classification.

5. On December 31st, 1883, the total number of Civil Hospitals and Dispensaries was 202, classified as directed in the Government of India Resolution No. 3-163-74, dated May 7th, 1883, into

Class	I.	43
,,	II.	128
,,	III.-A.	20
,,	III.-B.	11
		202

During the year under review 6 new dispensaries were op[redacted] grant-in-aid at Indi in the Kaládgi Collectorate, Akluj in the S[redacted] torate, at Dhulia in Khándesh, and Kavi in the Broach Collector[redacted] pensaries in Native States, one at Gargoti in the Kolhápur State[redacted] at Dumas in the Sachin State.

At the end of the year the classification stood as follows :—

Class	I.	47
„	II.	33
„	III.-A.	25
„	III.-B.	103
		208

These figures differ considerably from those given last year, chiefly [redacted] many grant-in-aid dispensaries were then placed in Class II. "Local Fu[redacted] stitutions" have this year, after consultation with the Accountant General, placed in Class III.-B. "Institutions supported by private subscriptio[redacted] guarantee, but receiving aid from Government or Local Funds."

Attendance of Patients.

7. The total number of patients treated at the various institutions, [redacted] in-door and out-door, amounted to 1,491,170 as c[redacted] pared with 1,372,249 in the year 1883. Of t[redacted] 36,402 were in-door and 1,454,768 out-door patients, against 36,255 and 1,335,[redacted] respectively in the previous year. The large increase of 118,921 was thus chie[redacted] among out-door patients, namely, 118,774, the increase of in-patients being on[redacted] 147. Of the in-patients 25,740 were "cured," 3,611 were "relieved," 2,565 were "discharged otherwise," and 2,553 "died," the ratio per cent. of deaths to total treated being 7·0, the same as in 1883. The number of beds available was 3,335, an increase of 127 over the previous year, and the daily average number of sick was 1772·6 as compared with 1,784·2 in 1883. The daily average according to sex was 1,401·6 men, 264 women, and 107 children. Of the total number of out-door patients, 327,128 were treated at civil hospitals and 1,127,640 at dispensaries, against 304,455 and 1,031,539 respectively in 1883. The daily average attendance at civil hospitals was 3,053·6 and at dispensaries 11,750·2, total 14,803·8, as compared with 2,746·8 and 11,041·2 and 13,788 respectively in the preceding year.

Epidemics.

7. From Statement No. III. it appears that cholera was less prevalent during the year under report than in 1883, but that small-pox prevailed to a greater extent. The total number of patients applying for treatment for cholera was 1,943 against 6,215 in the previous year, and for small-pox 1,099 against 845. These numbers cannot by any means be taken as showing the actual amount of these diseases. Cholera was present in all the divisions of the Presidency : of the total cases 661 occurred in the Deccan, 585 in Gujarát, 432 in the Konkan (of these 307 occurred in Bombay), and 265 in Sind. Of small-pox 640 occurred in the Deccan, 356 in the Konkan, 46 in Gujarát, 56 in Sind, and one case in foreign stations.

Malarious Fevers.

The number treated for malarious fevers is as usual higher than from any other disease, namely, 274,762, or 18·4 per cent. of the total treated as compared with 251,111 or 18·3 respectively in 1883. The ratio per cent. in the various divisions of the Presidency was in the Konkan 23·5, in the Deccan 13·1, in Gujarát 18·0, in Sind 24·8, and in foreign institutions 25·3, against 22·9, 14·4, 17·5, 22·6, and 23·3 respectively in the previous year. Thus fevers were relatively more prevalent in the Konkan, Sind Gujarát, and foreign stations, but less so in the Deccan.

Venereal Diseases.

The number treated for syphilis was 19,960 as compared with 19,906 in 1883 and 20,141 in 1882. Of the total 4,407 were in the Konkan, 6,060 in the Deccan, 6,087 in Gujarát, 3,210 in Sind, and 196 in foreign institutions. Of the cases in the Konkan 2,951 occurred in Bombay. Taken together with gonorrhea the total treated was 33,181 or 2·2 per cent. of the total treated as compared with 33,071 and 2·4 respectively in the year 1883. The percentage to treated in the divisions of the

Presidency was 2·5 in the Konkan, 1·8 in the Deccan, 2·2 in Gujarát, 2·6 in Sind, and 2·0 in foreign stations, the percentages in 1883 being 2·5, 1·9, 2·6, 2·8, and 2·2 respectively.

Respiratory Affections. Rheumatic do.

The number treated for diseases of the organs of respiration was 83,494, or 5·5 per cent of the total treated, as compared with 76,394 or 5·5 in the previous year. For rheumatic affections 44,860 patients were treated or 3 per cent. of the whole; in the year 1883 the figures were 43,007 and 3·1 respectively.

Diarrhœa and Dysentery.

The number of cases of dysentery and diarrhœa were 21,091 of the former and 36,447 of the latter, as compared with 19,764 and 35,571 in the previous year.

Intestinal Parasites.

For disease caused by the presence of worms the number treated was 115,276 or 7·7 of the total treated. This form of disease is very prevalent in the Deccan, where the number treated was 59,470 or 51·5 per cent. of the total number of these cases and 11·1 per cent. of the total number of patients treated in that province. In the Konkan parasitic disease is also very prevalent, the proportion of cases being 11·4 of the total treated in that division.

Skin Diseases.

These diseases continue to increase in number. They gave a total of 217,715 or 14·6 per cent. of the total from all diseases as compared with 175,439 and 12·7 respectively in 1883. They are chiefly prevalent in Gujarát and the Deccan, where the percentages to total treated are 18·8 and 17·5 respectively. This class of disease is much less prevalent in Sind, where it is only 5 per cent. of the treated.

Diseases of the Eye.

The number treated for diseases of the eye was 134,134 or 8·9 per cent. of the total treated. These diseases are relatively most common in the Deccan and in Sind, the percentages to total treated being 12·1 and 12 respectively.

Diseases of the Ear.

For these diseases the number treated was 39,424 or 2·6 per cent. of the total.

8. In Statement III.-A. is shown the number and results of major surgical operations performed during the year. There remained under treatment on 1st January 1884, 131 cases, 4,182 operations were performed, making a total of 4,313 against 4,540 in the previous year. Of these 3,651 were discharged "cured," 231 were "relieved," 107 were "discharged otherwise," 172 died, and 152 remained under treatment. According to provinces 1,752 were performed in the Konkan including 1,517 in Bombay City, 1,000 in the Deccan, 762 in Gujarát, 666 in Sind, and 133 in foreign institutions. Of the total number of operations 3,074 were performed in civil hospitals and 1,239 at dispensaries. Of the operations performed during the year 1,256 were upon the eye and its appendages; they include 1,109 performed at the Cowasji Jehángir Ophthalmic Hospital. Of operations on joints there were 437 performed, chiefly reduction of dislocations and including 123 of the shoulder, 91 of the elbow, 81 of the jaw, 22 of the hip, and 27 of the wrist. There were 292 amputations performed, the most important being 3 of the shoulder-joint, 24 of the thigh, 57 of the leg, 19 of the arm, and 25 of the forearm. Lithotomy was performed 504 times with 27 deaths, and lithotrity 26 times with two deaths.

Minor Surgical Operations.

The total number of minor surgical operations was 76,546 as compared with 75,422 in previous year. Of the total number 12,134 were performed in the Konkan, 20,970 in the Deccan, 26,167 in Gujarát, 15,648 in Sind, and 1,627 at foreign hospitals. These operations continue to increase in number year by year, and although individually they are of little importance, yet collectively they represent the relief, temporary or permanent, from much physical suffering.

Sex and caste, &c., of patients treated.

9. Statement No. IV. shows the sex and caste of the patients treated. Of the total number 697,591 were men, 258,021 were women, 535,558 were children, being in the proportion 46·8, 17·3, and 35·9 per cent respectively as compared

with 47·2, 17·8, and 35 in the previous year. The following table shows the ratio per cent. of men, women, and children treated at the institutions in the different provinces :—

Province.	Men.	Women.	Children.
Konkan	47·4	18·2	34·4
Deccan	43·3	16·1	40·6
Gujarát	44·8	19·4	35·8
Sind	57·4	14·4	28·2
Foreign	59·4	20·4	20·2

As regards caste, of the total treated 67·6 were Hindus, 25·6 Mahomedans, 2·9 Native Christians, 2·4 Pársis, Europeans 0·5, Eurasians 0·3, and Other castes 0·7.

Income and Expenditure.

10. Statement No. V., Part I., gives the income and expenditure of civil hospitals and dispensaries. The total income during the year was Rs. 11,65,592-4-7. Deducting from this the cash balance in hand at the commencement of the year, the net income amounted to Rs. 10,31,872-10-10 as compared with Rs. 9,81,768-11-2 in 1883. Of this the amount contributed by Government was Rs. 7,99,821-5-6 and that from local and municipal funds and other miscellaneous sources was Rs. 2,10,623-11-8. The interest on invested capital amounted to Rs. 13,842-13-2 and the subscriptions from Europeans to Rs. 966 and from Natives to Rs. 6,618-12-6. The total expenditure, after deducting sums remitted to the Treasury on account of paying patients, &c. (Rs. 15,134-8-6) and the amount invested during the year (Rs. 7,500), amounts to Rs. 10,28,243-13-8 against Rs. 9,23,294-2-1 in 1883. The increase is under the heads of Establishments, Bázár Medicines, European Medicines, Diets, and Miscellaneous Charges. The average cost of each patient was Re. 0-12-3 against Re. 0-11-10 in the previous year. According to provinces the cost per patient is shown in the following table :—

Province.	1884.	1883.
	Rs. a. p.	Rs. a. p.
Konkan	1 9 5	1 8 3
Deccan	0 8 7	0 7 10
Gujarát	0 7 5	0 7 5
Sind	0 8 11	0 8 11
Foreign	2 8 1	2 5 4

The percentage of the total cost paid by Government was 77·7 against 84·3 in the previous year, and if the cost of the Native State institutions be added to that of the others it amounts to 71·6 as compared with 78·6 in 1883. The cost of dispensaries alone to Government amounts to 37·9. The average cost of each diet was Re. 0-2-5 against Re. 0-2-4 in the year 1883.

11. Statement No. V., Part II., shows the amount of invested capital. On the 1st January 1883 there was a balance of Rs. 3,32,400. Rs. 7,500 were invested during the year, making a total invested capital of Rs. 3,39,900 remaining at the close of the year. The closing balance given in the report for the year 1883 was Rs. 3,200 in excess of the amount actually invested. This discrepancy was owing to Rs. 2,500 at the dispensary at Mirpur Batoro and Rs. 500 at Supa being shown in the returns as invested capital when these sums were really only deposited in the Government Treasury or Savings' Bank, and the Hospital Assistant, Dispensary Sháhápur, having erroneously entered the sum of Rs. 3,500 instead of Rs. 3,300.

12. In conclusion, I beg to append a memorandum by Surgeon-General Beatty on his last tour of inspection.

I have the honour to be,
Sir,
Your most obedient Servant,
W. J. MOORE, C.I.E.,
Surgeon General.

Report by Surgeon-General Beatty on his Tour of Inspection.

During the past year 22 Civil charges were visited and the working of each carefully inspected. As on previous occasions my inspection commenced with Poona, where the Sassoon Hospital under the care of Surgeon-Major Cook was found in a satisfactory condition.

The Civil Hospitals at Sholápur, Dhulia, Násik, and Nagar were next visited. At the last named, I was particularly pleased at the strict attention paid to his duties by Surgeon-Major DeTatham, and at the time of my annual inspection at this station arrangements were entered into, in conjunction with the Collector, for convening a meeting in view to collecting subscriptions for the purpose of building a new Civil Hospital in commemoration of Lord Ripon. Lately intimation has been supplied by the Collector stating that a sum of Rs. 35,000 had been collected for the erection of this much-needed institution, but as a sum of Rs. 50,000 will be required, it is trusted that Government will be pleased to supplement the sum subscribed by the native inhabitants, and sanction a grant-in-aid of Rs. 15,000 to complete the building. Continuing my tour the Civil Station at Rájkot was next visited, where the duties were found to be very efficiently carried out by Surgeon-Major Barker.

At Ahmedabad the popularity and usefulness of the Civil Hospital and Cyramji Jijibhoy School were maintained, Surgeon-Major Robb having proved himself eminently fitted for the post he holds. At the remaining Civil Hospitals of Gujarát at Kaira, Broach, Godhra, and Surat the duties (with the exception of Broach already brought to the notice of Government) were satisfactorily conducted, as were also those at Thána, Mátherán, and Mahábaleshvar. The above remark applies to the civil stations of Sátára, Belgaum, and Dhárwár.

A very careful and prolonged inspection was made of the several large institutions at the Presidency.

Commencing with the Jamsetji Jijibhoy Hospital it was found that since last inspection the addition to the male dispensary, a much-needed want, had been provided. Further contemplated improvements in regard to the better lighting of the operating theatre, the flooring of the untiled wards, and alterations to the obstetric hospital have been the subject of separate communications to Government. Nothing could exceed the careful and efficient manner in which the responsible duties of this large institution were conducted by Brigade-Surgeon Cook, and I was especially struck with the successful results of the surgical practice in the hands of Surgeon-Major Gray and Surgeon Hatch, who have more than maintained the reputation of the hospital for successful surgery. The nursing of the cases in the surgical wards has been continued by the Sisters as heretofore whose services, as reported by the Senior Surgeon, are "beyond praise."

The First Physician reports very favorably on the conduct of Mr. Fearn, House Surgeon, and the other members of the subordinate staff.

At the Cowasji Jehanghirji Hospital, owing to the reputation which Surgeon-Major Maconachie, the Ophthalmic Surgeon, has justly gained, a large increase in the attendance, especially in cases requiring surgical assistance, has taken place, in consequence of which Dr. Maconachie reports that his subordinate staff has now become insufficient to meet the demands on their time.

Government has already been addressed on the subject and the substitution of a passed instead of an unpassed pupil recommended.

I found the Gokaldas Tejpal Hospital working to entire satisfaction under the superintendence of Brigade-Surgeon Carter, who has again pointed out the necessity for an increase to the permanent staff as the scheme for employing Honorary Assistant Surgeons, for reasons already brought to the notice of Government, has proved to be a failure. Dr. Carter reports most favorably on all the medical subordinates, but specially brings to notice Mr. C. Easdon, House Surgeon, as being both "able and assiduously attentive."

At my inspection this year of the European General Hospital, I had the advantage of the presence of Surgeon-Major Blanc, the Physician in charge who has conducted his duties with skill and attendance. He particularly calls attention to the benefit the sick derived from the nursing they received from the Sisters of the St. John's Mission, and for whom accommodation has now been provided within the hospital premises. Under their intelligent administration nursing and attending to the welfare of the sick has, in the short time they have been attached to the institution, already reached a high degree of perfection, and this system I would be glad to see extended to the other hospitals in the Presidency. Dr. Blanc speaks in high terms of commendation regarding Surgeons McCartie and Manser, both having performed the duties entrusted to them with marked zeal and ability.

Deputy Surgeon-General Bruce again inspected the civil charges at Aden and reports favorably on them all,—whilst those in the Sind Division were under the immediate administrative control of Deputy Surgeon-General Pinkerton, who has performed his duties in a manner meriting the commendation of Government. He has mentioned favourably the names of those officers and subordinates referred to in the Appendix under Sind; and especially refers to the manner in which Surgeon Dimmock has performed his duties at the Shikárpur Jail.

The result of this my last tour of inspection has been highly satisfactory and I have no little pleasure in being able to assure Government that the civil duties entrusted to medical officers are performed zealously and efficiently.

The dispensaries have been visited and inspected by Civil Surgeons and by the Deputy Sanitary Commissioners. Their reports have been of much value to me as they supply information regarding the manner in which subordinates perform the duties entrusted to their charge. Copies of these reports have been sent to Collectors and have led to correspondence between these officers and Civil Surgeons tending to the removal of sanitary and other defects brought to notice

APPENDIX I.

SUMMARIES OF THE ANNUAL REPORTS

OF THE

CIVIL HOSPITALS AND DISPENSARIES

OF THE

BOMBAY PRESIDENCY AND SIND,

FOR THE YEAR 1884.

KONKAN.

BOMBAY CITY.

EUROPEAN GENERAL HOSPITAL.—*In charge of* Surgeon-Major H. J. BLANC, M.D.

Conservancy and Water Supply—Are both good. The reclaimed land to the east of the pital is no longer in the insanitary condition formerly reported.

Buildings.—The improvement of the main building has been continued by the erection new roof over wards Nos. 3 and 4. The measles ward has been enlarged and will be by the nursing sisters. The faulty construction of the obstetric ward is again referred wing to an outbreak of seplicæmia it became necessary to cease to use it.

General Health of the City.—During the year 1884 the health of the city has been fairly Cholera and small-pox, which were epidemic in 1883, were mild in their manifestations e year under report.

Details of Treated.—There were 1,312 in-patients and 1,145 out-patients treated as pared with 1,415 and 1,074 respectively in the previous year. The decrease among atients is due to the less frequency of cholera and small-pox. Of the total in-door ents 793 were males, 375 females, and 144 children, and of them 962 were Europeans and Eurasians. The figures in the previous year were 975 males, 324 females, and 116 dren, and 1,149 Europeans and 260 Eurasians.

Prevailing Diseases.—The diseases causing the greatest number of admissions were malarious fevers, syphilis, rheumatism, diarrhœa, dysentery, and phthisis. Among other diseases treated were 11 cases of small-pox, 33 of measles, 20 of enteric fever, 3 of cholera, and 49 cases of disease of the liver. There were 63 admissions into the obstetric ward as compared with 56 in 1883. The deliveries numbered 50, being 5 more than in the previous year.

Mortality and its causes.—There were 65 deaths against 73 in the previous year, the chief causes being fevers, phthisis, respiratory affections, dysentery, and liver diseases.

Surgical Operations.—Major operations 31 and minor 645 were performed during the year as compared with 29 and 847 respectively in the year 1883.

Conduct of Establishment.—Surgeons Manser and McCartie performed their duties with marked zeal and ability. The Physician in charge speaks in high terms of the Sisters of St. John's Mission, who have recently taken charge of the nursing of the hospital. The subordinate staff and servants are favourably reported on.

Cost.—The total cost was Rs. 78,979-9-9 as compared with Rs. 74,442-4-0 in the preceding year. The total income amounted to Rs. 10,651-13-4, out of which Rs. 10,564-15-0 were received from paying patients as compared with Rs. 12,973-6-6 and Rs. 12,767-3-0 respectively in 1883.

JAMSETJI JIJIBHOY HOSPITAL—MEDICAL SECTION.

Brigade-Surgeon H. COOK, M.D., *First Physician.*

Conservancy and Water Supply.—The much-needed drainage of the compound has been taken in hand and is rapidly approaching completion. The conservancy of the hospital is well attended to. The water-supply since the introduction of an intermittent supply has been

found to be defective. To remedy this, plans and estimates for two large tanks have b prepared, and submitted to Government for sanction.

Buildings.—The ventilation of the wards in the upper story of the hospital is alm completed. Additional accommodation for patients attending the male dispensary has b provided. The sanction of Government to the erection of a laundry, to the substitution tiles for the earthen floor in the remaining seven wards, and to improvements in the ligh of the operating theatre has been received. The condition of the obstetric ward has been subject of a special recommendation. The furniture and fittings are in good order.

Total Treated.—The total number of in-door patients was 6,498 as compared with 6,(and the daily average 383·7 as compared with 388·3 in the previous year. There w 28,942 out-door patients treated against 24,551. The slight decrease among in-patie may be due to the fact that three wards were under repair for some weeks. The incre among out-patients was great, and was probably owing to improved accommodation at male dispensary.

Prevailing Diseases.—Among in-door patients the diseases causing the greate number of admissions were malarious fevers, diseases of the respiratory system includi phthisis, surgical injuries, syphilis, skin diseases, and bowel complaints. Among o patients fevers, skin diseases, diseases of the respiratory system, syphilis and gonorrhc and rheumatism.

Mortality and its causes.—The total number of deaths was 866 or a percentage of dea to treated of 13·3. The principal causes of mortality were cholera, enteric catarrh diarrhœa, phthisis and other diseases of the respiratory system, and dysentery.

Conduct of Establishment.—The First Physician states that he has "enjoyed the cordial support and assistance from every member of the staff." He also reports favou on the members of the subordinate staff.

Surgical Section.—Surgeon-Major W. Gray.

Sanitary.—The surgical wards have maintained their usual good sanitary state. in the previous year there has not been a single instance of disease which can be attrib to unhealthy ward conditions.

Injuries, &c., admitted.—The following were the chief kinds treated, fractures dislocations of the lower extremity 66, of the upper extremity 44, burns and scald fractures of the skull 13, fractured ribs 12, multiple injury 9, dislocations and fracture facial bones 7, injuries of the spine and cord 3, and rupture of viscera 2.

Operative Surgery.—During the year 202 major and 1,347 minor operations were formed on in-patients. Among the chief major operations, there were 4 amputati the thigh, one at the knee-joint, 11 of the leg, 2 of the foot, 2 at the shoulder joint, 6 arm, 3 of the forearm, and one of the hand. Herniotomy 11 times. Lateral lith 30 cases. Lithotrity 12 cases. Ovariotomy one (successful), and seven large tumours removed.

Nursing.—The two Sisters have, as before, rendered most valuable help in the sur wards. Their services are beyond praise.

Obstetric Section.—Surgeon-Major Arnott.

There were 172 puerperal cases treated during the year. Of these 108 were natural 11 were premature, and 53 operative. Of the total 59 were Native Christians, 66 were Hindus, 30 Mahomedans, and 13 Párs, 2 Jews, 1 European, and 1 Eurasian. There were 166 admissions for uterine and other diseases. The total number of major surgical operations was 58 as compared with 64 in the previous year. They included 24 cases of craniotomy; forceps were used in 15 cases, version was performed in 15, cæsarian section was performed once with a fatal result. The large number of Mahomedans with severe deformity is remarkable. Of the cases requiring craniotomy, 15 belonged to this caste.

Five soldiers' wives have been attached to the hospital for training and their conduct has been good, but instruction to these students is much intercepted by the sickness of their families. The defects of the hospital building have been brought to notice before; it is hoped they will be remedied by proposed alterations recently submitted to Government for sanction.

Cost.—The total cost was Rs. 1,72,009-14-2, the cost per patient Rs. 4-13-7 as compared with Rs. 1,54,927-3-11 and Rs. 4-15-8 respectively in the previous year. Rs. 123-2-0 were received from paying patients.

Cowasji Jehangier Ophthalmic Hospital.—*In charge of* Surgeon-Major G. H. Maconachie, M.D.

The total number of patients treated was 7,295 as compared 6,526 in the previous year. The increase was chiefly among native patients, but there was also some increase in the number of European out-door patients. The operations performed have increased in the same proportion, 1,461 in the year under report as compared with 1,119 in 1883. The increase was spread over nearly all the diseases for which patients sought advice. Examining the different classes of disease separately we find that those of the conjunctivæ form

y half the total out-patients. Ophthalmic practice, conjunctivitis, and granular ophthalmia the bulk of these affections. Diseases of the cornea, chiefly ulcers and opacities following , suppurative keratitis in badly fed and neglected children is common. In diseases of is there is an increase too great to be proportional with the general increase. This is to gretted, as it probably points to an increase of syphilis in Bombay, as so many cases a syphilitic history. There is a large increase in diseases of the lens and capsule. es to the eye are increasing at a rapid rate; they are chiefly found in metal workers stone dressers. Extraction of the lens for cataract has been the most frequent and important operation performed, 180 were performed against 127 in the preceding year, ry considerable increase; the other major operations were artificial pupils 58, iridectomy xtraction of foreign bodies 489, and puncture of the globe 339. The new anasthetic ne has been tried in some of the most severe operations with excellent results. The r-supply and sanitary arrangements are unchanged. A railing round the unprotected of the verandah and a porch at the door of the male latrine has been sanctioned. Ap- ment of the Honorary Assistant Surgeon was cancelled for reasons already reported. ital Assistant D'Cruz performed his duties satisfactorily.

GOKULDAS TEJPAL HOSPITAL.—*In charge of* Brigade-Surgeon H. V. CARTER, M.D.

Conservancy and Water Supply.—There are no complaints regarding conservancy, but ater-supply being liable to interruption through non-filling of the tanks, it is understood gements are now being made for a separate connection with the water main.

Hospital Buildings—Are kept in good repair, additional gas-lamps have been erected compound. The altered blocks for out-door patients have come into use and they both ample and convenient accommodation. Some improvement in ventilation, a dispensing room, better light in the operating room, a suitable enclosure of the grounds, especially a separate ward for emergencies, and upon each floor one for s of isolation. The furniture and fittings are in good order, but the door and window gs are inconvenient.

tail of Treated.—The total number treated was 2,374 in-door and 17,964 as compared 09 and 16,848 respectively in the previous year. The daily average in hospital was compared with 107·8 in 1883. The daily average of out-patients was 153·3 as con- with 122·9 in 1883. Of the total in-patients 1,863 were discharged cured, 109 relieved, wise, and 262 died. Of the total out-patients 9,993 were men, 2,960 were women, and re children. The numbers last year were 9,594, 2,916, and 4,338, and it is interesting that the attendance of women and children has not fallen off though a dispensary for them has been opened not far off.

vailing Diseases.—Among in-patients were injuries 574, malarious fevers 249, c affections 177, respiratory affections 132, poisons and poisoned wounds 130, y 106, and rheumatic affections 100. Among out-patients injuries, malarious fevers, eases, and local affections.

or Surgical Operations.—The total number performed was 104 with 15 deaths as ed with 97 and 14 deaths in the previous year. Among them were 29 amputations, cisions of the breast and one of the tongue, 2 excisions of joints, the chest was aspirated mes and opened by the knife twice, and there were three lithotomies.

Mortality and its causes.—The total number of deaths was 262; of these 46 died within hours and 60 others within four days of admission. The chief causes of death were hisis 46, remittent fever 32, dysentery 26, debility 25, diarrhœa 22, pneumonia 10, nus 9, and 39 after severe injuries.

Hospital Staff and conduct of Establishment.—Brigade-Surgeon Carter resumed charge m Surgeon-Major Hojel on 7th May. On 22nd July the two Honorary Assistant Surgeons ndered their resignations under circumstances already reported. The House Surgeon, Mr. sdon, continues to give entire satisfaction in the performance of his duties. The other mbers of the establishment are favourably reported upon.

Cost.—The total cost was Rs. 51,258-0-3 and the cost per patient Rs. 2-8-3 as compar- with Rs. 43,435-12-11 and Rs. 2-3-5 in 1883.

BYCULLA CENTRAL SCHOOLS.—*In charge of* Surgeon-Major G. Y. HUNTER.

Conservancy arrangements are good. The water-supply is from Vehar. The hospital ildings are in good repair. There are no means for the separation of infectious cases. he furniture and fittings are in good condition. The number of cases treated (all in-patients) s been more than last year by 42. Prevailing diseases have been malarious fever of a termittent and remittent type (495 admissions); the number of admissions into hospital as been 87 more than last year. Three deaths occurred, 2 among the boys and 1 in a girl. rom acute peritonitis 1, acute rheumatism 1, and remittent fever 1. No child has been dmitted into the schools who has not been vaccinated or re-vaccinated. The conduct of the stablishment is good. The schools last year went to Devláli for 3 months.

GRANT-IN-AID DISPENSARY.

J. N. WADIA DISPENSARY, MÁHIM.—*In charge of* Mr. NUSSARWANJEE JEHANGIRJEE, L.

The dispensary building is suitable and is in a good state of repair. The nece furniture and fittings are provided. Members of the committee visit the dispensar casionally. Conservancy is satisfactory, the water supply chiefly from wells and partly Vehar, the former brackish and liable to contamination from soakage. The total treate 8,946 (all out-patients) as compared with 7,042 in the previous year. The average attendance was 69·3. The prevailing diseases were malarious fevers, diarrhœa, worms, diseases, respiratory and rheumatic affections, and dysentery. Cholera occurred during second half of the year, 21 cases were treated. Vaccination is compulsory and is perfo by the municipal vaccinators. The total cost was Rs. 2,366-9-1, and the cost per pa Re. 0-4-2 as compared with Rs. 1,778-10-9 and Re. 0-4-0 respectively in 1883.

THA'NA COLLECTORATE.

THÁNA CIVIL HOSPITAL.—*In charge of* Surgeon K. R. KIRTIKAR.

Conservancy and Water Supply—The conservancy of the town is defective as repo in previous years. The water-supply is good and abundant.

Buildings.—The hospital building is in good repair but is condemned as unsuit There is still a prospect of a new building by private munificence.

General health of the Town—Has been generally good. There were no epidemi few cases of measles occurred.

Attendance of Patients.—There were 292 in-door and 2,681 out-door patients tre compared with 259 and 2,594 respectively in the previous year.

Prevailing Diseases.—The most common diseases are malarious fevers, respirat bowel affections, skin diseases, and ear affections.

Mortality.—The mortality was 9·9 per cent. of the total number of in-patients. patients, mendicants and wandering prilgrims, are brought to hospital suffering from tion and exposure and these considerably swell the death rate.

Major Surgical Operations.—There were 21 major surgical operations perform wo deaths.

Vaccination—Is carried on by the municipal vaccinator in a fairly satisfactory

Medico-legal cases.—Five medico-legal cases of minor importance were exami reported upon during the year.

Conduct of Establishment.—The conduct of the medical subordinates is fa reported upon; they are both painstaking and trustworthy.

Cost.—The total cost was Rs. 10,956-7-3, the cost per patient Rs. 3-10-11 Rs. 10,271-14-1 and Rs. 3-9-7 respectively in 1883.

GRANT-IN-AID DISPENSARIES.

SIR COWASJI JEHANGIR DISPENSARY, BÁNDRA.—*In charge of* Assistant Surgeon J. F. GONSALVES, L.M.

The building is in good repair, but the accommodation is not sufficient for the la attendance. There is a prospect of a new building, a gentleman of the town having offe a handsome sum towards it. There were four meetings of the committee during the y Conservancy arrangements are not satisfactory, especially in the neighbourhood of the B bay municipal slaughter yard, and the water-supply indifferent. The total treated 18,220 out-door and 3 in-door patients as compared with 16,742 and 2 respectively in year 1883. The prevailing diseases were malarious fevers, intestinal worms, bowel co plaints, respiratory and rheumatic affections, and skin diseases. A few cases of chol occurred in September and October, there were also cases of small-pox, measles, and ho ing cough. There were 311 primary vaccinations and 76 re-vaccinations. Thirteen m operations were performed. Three *post-mortem* examinations were made at the reques the police. The Civil Surgeon inspected the dispensary twice. The total cost Rs. 5,496-1-5, the cost per patient Re. 0-4-9 against Rs. 5,377-1-1 and Re. 0-5-2 respe ively in the previous year.

BASSEIN.—*In charge of* Assistant Surgeon F. A. MOOS, L. M. & S.

A new building is to be erected at a cost of Rs. 15,000. The committee ha visited the dispensary at frequent intervals. Sanitary arrangements are fairly attend to, the water supply is indifferent and liable to contamination. The total trea was 16,638 out-door and 26 in-door patients as compared with 15,127 and 15 spectively in the previous year. The most common diseases were fevers, intestinal worn bowel complaints, respiratory affections, and skin diseases. There was no epidem disease in the town or neighbourhood. Eleven major operations were performed. T number of vacinations was 142. Four *post-mortem* examinations were made at the reque

of the police. The dispensary was inspected twice by the Civil Surgeon. The total cost was Rs. 5,145-11-6, the cost per patient Re. 0-4-11 as compared with Rs. 3,083-15-10 and Re. 0-3-3 respectively in the year 1883.

DINSHAW MANECKJI PETIT DISPENSARY, BHIWNDI.—*In charge of* Assistant Surgeon D. H. MOTIWALA, L.M. & S.

The same hired house is still in use, the new building is not yet ready. The committee inspect the institution every month. The sanitary arrangements of the town are in many ways defective. The water-supply though abundant is liable to pollution. The general health was good. The total treated was 8,824 as compared with 9,685 in the previous year. The most common diseases were malarious fevers, intestinal worms, skins diseases, and bowel complaints. Cholera prevailed during the months of March, August, September, October and December, 41 were treated of whom 11 died. Six major operations were performed. Four *post-mortem* examinations were made at the request of the police. The institution was inspected by the Civil Surgeon in July. The total cost was Rs. 3,044-10-4, the cost per patient Re. 0-5-6 against Rs. 3,391-5-8 and Re. 0-5-7 respectively during 1883.

KELVA MA'HIM.—*In charge of* Hospital Assistant RAJARAM BALKRISHNA.

The building is in fair repair. A dead-house is being built, increased accommodation for in-patients is much required, a kitchen and servants' quarters are also wanted. The furniture and fittings are complete. The committee visit the dispensary regularly once a month. The sanitary arrangements of the town are unsatisfactory. The water-supply though plentiful is different in quality. The total treated was 9,780 out-door and 44 in-door patients as compared with 9,510 and 47 respectively in the previous year. The prevailing diseases were malarious fevers, bowel complaints, respiratory and rheumatic affections, intestinal worms, and skin diseases. Small-pox prevailed in the months of April and May. Three major surgical operations were performed. House-to-house vaccination is practised: 104 persons were successfully vacinated. Five *post-mortem* examinations were made. The dispensary was inspected twice by the Civil Surgeon. The total cost was Rs. 3,203-0-8, the cost per patient Re. 0-5-2 against Rs. 3,442-6-2 and Re. 0-5-9 respectively in the year 1883.

SHA'HA'PUR.—*In charge of* Hospital Assistant MORO NILKANT.

The building is only in fair repair, the floor and roof have been attacked by white ants. The furniture and fittings are good and sufficient. The chairman of the committee visits the institution occasionally, the other members on rare occasions. Sanitary arrangements are fairly attended to, the water-supply is abundant and of good quality. The total treated was 7,503 out-door and 13 in-door patients against 7,306 and 44 respectively in the previous year. The prevailing diseases were malarious fevers, respiratory and rheumatic affections, diseases of the stomach and bowels, and skin diseases. Small-pox prevailed in the town in the month of May. Two major surgical operations were performed. Eighty-three successful vaccinations and 7 re-vaccinations were performed. Seven *post-mortem* examinations were made at the request of the police. The Civil Surgeon inspected the dispensary on 26th January and on 6th September. The total cost was Rs. 1,595-4-5, the cost per patient Re. 0-3-4 against Rs. 694-3-8 and Re. 0-1-5 respectively in the previous year.

CHINCHNI.—*In charge of* Hospital Assistant BHIMJI YADOW.

The building is in good repair: there is no dead-house: the furniture and fittings are sufficient and in good order. The dispensary was regularly visited by the committee during the year. The sanitary condition of the town is not satisfactory. The water supply is from wells which are liable to contamination by soakage. The total treated was 12,166 out-door and 48 in-door patients as compared with 11,968 and 21 respectively in the previous year. The more common complaints were malarious fevers, intestinal worms, skin diseases, bowel complaints, and respiratory affections. Measles prevailed in the town and neighbourhood. Vaccination meets with much opposition, 42 persons were successfully vaccinated. Nine *post-mortem* examinations were made during the year. The institution was inspected by the Civil Surgeon on two occasions. The total cost was Rs. 2,299-5-11, the cost per patient Re. 0-3-0 against Rs. 1,059-2-7 and Re. 0-1-3 respectively in the previous year.

ENDOWED DISPENSARIES.

RUSTOMJI WADIA DISPENSARY, THA'NA.—*In charge of* Hospital Assistant BHAGWANT RAMCHANDRA.

The building was not repaired during the year, and the roof leaked in the monsoon. The committee visit the dispensary every month. The sanitary condition of the town is defective. The water supply is good and abundant. The total treated was 9,683, all out-patients, against 7,766 in the year previous. The more common complaints were malarious fevers, skin diseases, respiratory affections, intestinal worms, diarrhœa, and dysentery. A few cases of cholera occurred during October. Vaccination is carried on by a municipal vaccinator. The dispensary was inspected by the Surgeon General on 20th December, and on two occasions by the Civil Surgeon. The total cost was Rs. 1,536-0-1, the cost per patient Re. 0-2-6 as compared with Rs. 1,545-8-0 and Re. 0-3-2 respectively in the preceding year.

RUKHMABAI DISPENSARY, KALYÁN.—*In charge of* Assistant Surgeon PESTANJI BOMANJI, G.G. M.C.

The buildings are in very good order. Some articles of bedding are worn out and are to be replaced. There are no regular meetings of the committee; the chairman occasionally visited the dispensary. The town is improving in sanitation, the water-supply is principally from wells and is not satisfactory. The total treated was 5,341 out-door and 37 in-door patients against 5,242 and 38 respectively in the previous year. The prevailing diseases were malarious fevers, intestinal worms, skin diseases, and respiratory affections. Cholera appeared in epidemic form at the end of the year. Eighteen major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. The institution was inspected by the Civil Surgeon in June. The total cost was Rs. 5,137-9-8, the cost per patient Re. 0-15-3 as compared with Rs. 5,344-10-2 and Re. 1-0-2 respectively in 1883.

MITHIBAI DISPENSARY, KURLA.—*In charge of* Assistant Surgeon D. B. VALLES, L. M.

The building is in very good repair and conveniently situated. Accommodation for in-door patients is required. The furniture and fittings are old and insufficient and require repairs and additions. The verandahs which serve as waiting rooms are exposed to the weather. The committee meet regularly once a month. The sanitary arrangements are improving. The water-supply is partly from Vehar, but chiefly from wells, and this is bad and insufficient. The total treated was 11,876, all out-door patients, as compared with 12,412 in the previous year. The more common diseases were malarious fevers, rheumatism, respiratory affections, dysentery, diarrhœa, intestinal worms, and skin diseases. Measles and hooping cough prevailed during the early part of the year. The Assistant Surgeon performed 283 vaccinations and 2 revaccinations. A large number of alleged homicidal injuries were examined, and 4 *post-mortem* examinations were made at the request of the police. The Civil Surgeon inspected the dispensary in May. Total cost was Rs. 4,538-0-3, the cost per patient Re. 0-6-1 as compared with Rs. 4,850-6-1 and Re. 0-6-3 respectively in 1883.

GOVERNMENT DISPENSARY.

MA'THERA'N.—*In charge of* Surgeon-Major E. H. R. HAY, M.D.

A room in the Superintendent's office is used as a dispensary and answers the purpose. There is no committee. The sanitary state of the station is satisfactory. The water supply is good and satisfactory. The total treated was 604, all out-patients, as compared with 784 in the preceding year. The more common diseases were intestinal worms, malarious fevers, bronchitis, and diarrhœa. There was no epidemic. Vaccination was performed 26 times, noted as successful in 2 only, the mothers not having returned with their children. The total cost was Rs. 819-15-11, the cost per patient Re.1-5-8 as compared with Rs. 782-13-8 and Re. 0-15-11 respectively in the previous year.

KOLA'BA COLLECTORATE.

GRANT-IN-AID DISPENSARIES.

PEN.—*In charge of* Hospital Assistant B. R. KUDDUM.

The buildings are in good repair and in every way suitable. The committee visited the dispensary only once during the year. The sanitary condition of the town is fairly good, and the water supply is good and abundant. The total treated was 9,962 out-door and 31 in-door patients against 8,669 and 45 respectively in 1883. The most common diseases treated were malarious fevers, skin diseases, intestinal worms, and affections of the respiratory system, stomach, and bowels. Cholera appeared in the month of July; there were 16 cases and 5 deaths. There were 70 primary vaccinations and one re-vaccination. The dispensary was inspected by the Assistant Surgeon, Alíbág, in May and in October. The total cost was Rs. 2,039-9-9, the cost per patient Re. 0-3-3 against Rs. 1,439-8-2 and Re. 0-2-9 respectively in the previous year.

MAHÁD.—*In charge of* Hospital Assistant NARSAPPA RAMSWAMI NAIDU.

The building and out-houses are in good repair, the furniture and fittings are sufficient and in good order. The chairman and members of the municipality visit the dispensary frequently. There is some improvement in the sanitary condition of the town. The water supply is liable to pollution and is scanty in the hot season. The total treated was 7,109 out-door and 29 in-door patients against 8,193 and 52 respectively in the previous year. The more common diseases were intestinal worms, malarious fevers, skin diseases, respiratory and rheumatic affections. Cholera was epidemic in the months of March and April; there were 57 cases and 28 deaths. There were 103 primary vaccinations and 3 re-vaccinations. Ten *post-mortem* examinations were made. The total cost was Rs. 1,285-3-0, the cost per patient Re. 0-2-10 as compared with Rs. 2,099-0-4 and Re. 0-4-0 respectively in 1883.

PANVEL.—*In charge of* Hospital Assistant AARON SAMSON.

The building is suitable, the out-houses require repair, the committee contemplate purchasing the building; they visit the institution frequently. The sanitary condition of the town is fair. The water-supply is insufficient in the hot months and is bad in quality. The total treated was 7,273 out-door and 30 in-door patients as compared with 5,916 and 29 respectively in the previous year. The prevailing diseases were skin affections, malarious

fevers, intestinal worms, and diseases of the respiratory system. Four cases of cholera with 2 deaths occurred in August, there was no other epidemic disease. Fifty-four children were successfully vaccinated. Five *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Thána, by the Deputy Sanitary Commissioner K. R. D. and W. R. D., and twice by the Assistant Surgeon, Alíbág. The total cost was Rs. 1,374-11-1, the cost per patient Re. 0-3-0 against Rs. 866-10-10 and Re. 0-2-3 respectively in 1883.

ENDOWED DISPENSARY.

P. DeSouza Dispensary, Uran.—*In charge of* Assistant Surgeon N. Dhanjibhai, G.G.M.C.

The building is unsuited for the purpose, there is no accommodation for in-patients, the arrangements for out-patients are defective and there are no servants' quarters. A few articles of furniture which were wanting have been supplied. The committee meets frequently. The town is kept fairly clean. The water supply is insufficient but liable to pollution. The total treated was 6,079, all out-patients, against 5,641 in the previous year. The more common complaints were malarious fevers, intestinal worms, skin disease, respiratory affections, and bowel complaints. Cholera prevailed from May to September, there were 72 cases and 25 deaths. Eight major operations were performed. Forty-six persons were vaccinated. The total cost was Rs. 5,662-7-3, the cost per patient Re. 0-14-10 as compared with Rs. 5,180-9-5 and Re. 0-14-8 in the previous year.

GOVERNMENT DISPENSARY.

Aliba'g.—*In charge of* Assistant Surgeon M. F. Pereira, L.M.

The building is in good repair, certain of the floors have been laid with asphalt, a plan has been prepared for a female ward. There is no suitable accommodation for the treatment of sick prisoners who for want of a jail hospital have to be treated at the dispensary. There is no committee. The sanitary arrangements of the town are satisfactory. The water supply is good and abundant. The total treated was 10,954 out-door and 79 in-door patients as compared with 9,136 and 100 respectively in the previous year. The more common diseases were malarious fevers, skin diseases, intestinal worms, respiratory affections, and bowel complaints. There was no epidemic. Four major surgical operations were performed. One hundred and thirteen primary and 3 re-vaccinations were performed. Seven *post-mortem* examinations were made at the request of the police. The total cost was Rs. 4,966-7-8, the cost per patient Re. 0-7-2 as compared with Rs. 4,785-10-9 and Re. 0-8-4 repectively in the previous year.

RATNA'GIRI COLLECTORATE.

Ratna'giri Civil Hospital.—*In charge of* Surgeon H. McCalman, M.D.

Conservancy and Water Supply.—Conservancy has not undergone any improvement over previous years. The water supply is excellent in quality but deficient in the hot months. Means are being taken to remove this evil.

Hospital Buildings—Are in tolerably good repair. The windows in the wards are to be fitted with glass instead of the present shell material. The furniture and fittings are in good order.

General health of the Town.—The general health has been good. Small-pox prevailed in the early part of the year.

Attendance of Patients.—The number treated was 156 in-door and 6,096 out-door patients as compared with 187 and 5,677 respectively in the previous year.

Prevailing Disease.—The most common diseases among in-patients have been malarious fevers, diseases of the lungs, and injuries. Among out-patients malarious fevers, respiratory affections, diseases of the stomach and bowels, worms, skin diseases, and injuries.

Major Surgical Operations.—These were 36 in number, including 14 upon the eye, and four tumours removed.

Mortality and its causes.—There were 6 deaths in hospital from hepatitis, liver abscess, typhus fever, pneumonic phthisis, pneumonia, and tetanus.

Vaccination.—This is attended to by the táluka vaccinator.

Conduct of Establishment.—The conduct of the establishment, with one exception, has been very favourably reported upon.

Cost.—The total cost was Rs. 10,950-8-11, the cost per patient Rs. 1-12-0 as compared with Rs. 9,715-8-11 and Rs. 1-10-6 respectively in the previous year.

Dinshaw Manekji Petit Leper Hospital, Ratna'giri.—*In charge of* Surgeon H. McCalman, M.D.

The buildings together with furniture and fittings are in good repair. The want of a suitable bathing place is again noticed. Conservancy on the dry-earth system is satisfactory. The water-supply is sufficient and of excellent quality. There were 38 patients in hospital at the beginning of the year, 29 were admitted, 24 males and 5 females. Of these

16 were discharged relieved at their own request, 9 absented, 5 died, and 37 remain under treatment. The average daily sick was 41·5. The new admissions were by caste 27 Hindus and 2 Musalmans; by occupation 18 cultivators, 2 servants, 2 artisans, 1 dhobi, 1 trader, 1 sailor, 1 mendicant, and 3 married women. Sixteen were married to non-leprous persons and 5 to lepers. With one exception none declared relationship (beyond marriage) with a leprous person. Of the 21 married, 17 had healthy children. The percentage of deaths to treated was 7·5 against 8·6 in 1883. The causes of death were old age and general debility, dysentery and exhaustion, bronchitis, ulcers and debility, and suicidal drowning. The conduct of the establishment has been satisfactory.

CIVIL HOSPITAL, DA'POLI.—*In charge of* Apothecary J. PREM.

Conservancy and Water Supply.—Conservancy arrangements are carefully attended to The water-supply is good and abundant.

Buildings.—The new hospital was opened on 1st April, it is commodious, well ventilated, and has accommodation for 12 patients, 8 males and 4 females. The out-houses consist of a kitchen, latrine, and dead-house. The furniture and fittings are sufficient and satisfactory. There are no servants' quarters.

General health of the Town.—The general health has been more satisfactory. There were no epidemics.

Attendance of Patients.—The total number treated was 112 in-door and 3,987 out-door patients as compared with 119 and 8,638 respectively in the previous year.

Prevailing Diseases.—The most common diseases were malarious fevers, respiratory affections, bowel complaints, and skin diseases.

Mortality and its causes.—There were three deaths during the year. One from confluent small-pox; the second from exhaustion after acute rheumatism followed by abscess; the third was a case of suicidal cut-throat.

Vaccination.—There were 73 primary successful vaccine operations performed. There is much difficulty in carrying on vaccination owing to caste prejudices.

Medico-legal cases.—Nine *post-mortem* examinations were made during the year.

Conduct of Establishment.—The conduct of the subordinate establishment is favourably reported upon.

Cost.—The total cost was Rs. 2,998-6-9, and the cost per patient Re. 0-11-8 as compared with Rs. 4,744-14-1 and Re. 0-8-8 respectively in 1883.

CIVIL HOSPITAL VENGURLA.—*In charge of* Apothecary J. MCINTYRE.

Conservancy and Water Supply.—No change has been made in the conservancy of the town, but since the outbreak of cholera sanitation have received more attention. The water-supply is good and ample.

Buildings.—The hospital building is in a good state of repair and the accommodation is ample. The building used as a dead-house is unsuited for the purpose. With the exception of a *post-mortem* table the furniture is sufficient and in good order.

General Health.—The general health of the town and neighbourhood has improved, there has been less malarious fever. Cholera appeared in the town in July, there were 26 admissions and 12 deaths.

Attendance of Patients.—The total number treated was 20 in-door and 1,876 out-door patients as compared with 33 and 2,346 respectively in the previous year.

Prevailing Diseases.—The most common diseases were fevers, rheumatism, syphilis, intestinal worms, skin diseases, and respiratory affections.

Surgical Operations.—Two major and 37 minor surgical operations were performed during the year.

Mortality and its causes.—There were 16 deaths reported among out-patients of which 12 were from cholera.

Vaccination.—There were 62 children successfully vaccinated; great difficulty is experienced in obtaining children for vaccination.

Conduct of Establishment—Has been satisfactory.

Cost.—The total cost was Rs. 6,002-7-5, and the cost per patient Rs. 3-2-7 against Rs. 6,675-10-6 and Rs. 2-12-10 respectively in 1883.

CIVIL HOSPITAL, SA'VANTVA'DI.—*In charge of* D. G. DALAGADO, M.D.

Conservancy and Water Supply.—Considerable attention is paid to conservancy by the municipality, and the water-supply is good and abundant.

Buildings.—The hospital buildings are in good repair. Plans have been prepared for a new hospital, the present site being objectionable. There is also a leper asylum, and the infectious wards are finished and open for the treatment of patients. The lunatic asylum is also completed.

General Health.—The general health of the town was much improved as compared with previous years. Small-pox prevailed more or less from the commencement of the year to the end of May, 112 cases were treated.

Attendance of Patients.—The total number treated was 401 in-door and 4,458 out-door against 390 and 4,474 respectively in the previous year.

Prevailing Diseases.—The most common diseases were malarious fevers, intestinal worms, diseases of the lungs, skin diseases, diarrhœa, and rheumatism.

Surgical Operations.—There were 15 major surgical operations performed, including 6 amputations, and 1 trephining of the skull.

Mortality and its causes.—Among in-patients there were 15 deaths. The causes of death were small-pox 2, paralysis 1, remittent fever 1, chronic dysentery 1, phthisis 1, and other affections 9.

Vaccination.—There were 218 primary and 33 re-vaccinations. 97·7 per cent. of the former were successful.

Medico-legal cases.—Twenty medico-legal cases, including 3 *post-mortem* examinations, were reported upon.

Conduct of Establishment—Has been very good.

Cost.—The total cost was Rs. 7,323-2-1, the cost per patient Rs. 1-8-1 against Rs. 7,162-8-8 and Rs. 1-7-4 respectively in the year preceding.

KA'NARA COLLECTORATE.

CIVIL HOSPITAL, KA'RWA'R.—*In charge of* Surgeon W. H. HENDERSON.

Conservancy and Water Supply.—The conservancy of the town is well looked after. The water-supply is plentiful but is liable to contamination.

Buildings.—The hospital buildings are in excellent repair, the new quarters for the servants have been completed and are now occupied.

General Health.—The health of the town and district has been on the whole good. Fevers have been less prevalent. Small-pox was present but not in an epidemic form.

Attendance of Patients.—The total number treated was 320 in-door and 5,061 out-door patients as compared with 364 and 5,523 respectively in the previous year.

Prevailing Diseases.—The most common diseases were malarious fevers, diseases of the respiratory and digestive systems, and skin diseases.

Major Surgical Operations.—There were 18 major operations performed.

Mortality and its causes.—Among in-patients there were 17 deaths, the chief causes were phthisis, anæmia, remittent fever, and bronchitis.

Vaccination.—There were 997 successful vaccinations and 217 re-vaccinations.

Conduct of Establishment—Is satisfactorily reported upon.

Cost.—The total cost was Rs. 10,075-10-5, the cost per patient Rs. 1-13-11 as compared with Rs. 9,177-3-10 and Rs. 1-8-11 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

KUMTA.—*In charge of* Assistant Surgeon K. B. COOPER, L.M.

The dispensary buildings are in very good order, and the furniture and fittings are sufficient. The dead-house has been completed. The committee met nine times, the members frequently visit the dispensary and take great interest in it. Conservancy is well attended to by the municipality. The water supply is abundant and of fair quality. The total treated was 8,564 out-door and 118 in-door patients as compared with 6,249 and 124 respectively in the previous year. The prevailing diseases were malarious fevers, rheumatic, syphilitic, and respiratory affections, intestinal worms, and skin-diseases. Small-pox was epidemic for the greater part of the year. 570 cases and 84 deaths were recorded. Thirty-nine major surgical operations were performed. Vaccination is carried out by a special vaccinator; there were 278 successful vaccine operations. Two *post-mortem* examinations were made at the request of the police. The dispensary was inspected on 19th March and 16th October by the Civil Surgeon, Kárwár. The total cost was Rs. 5,941-3-10, the cost per patient Re. 0-10-11 against Rs. 4,710-0-10 and Re. 0-11-9 respectively in 1883.

HONA'VAR.—*In charge of* Hospital Assistant SHIVRAM NARAYAN.

The building is in fair condition. It is hoped that the new building will soon be ready for occupation. The furniture is in good order. The committee visited the dispensary several times. The sanitary condition of the town is fair. The water supply sufficient chiefly from private wells, their surroundings are bad. The total treated was 5,360 out-door and 52 in-door patients against 4,368 and 69 respectively in the previous year. Malarious fevers, rheumatic, syphilitic and respiratory affections, bowel complaints, and skin diseases were the chief causes of admission. Small-pox prevailed during the year, there were 61 cases and 10 deaths. There were 319 persons vaccinated and 32 re-vaccinated. The *post-mortem* examinations were made at the request of the police. The Civil Surgeon,

Kárwár, inspected the dispensary in February and November. The total cost was Rs. 632-5-9, the cost per patient Re. 0-1-10 as compared with Rs. 641-7-8 and Re. 0-2-3 respectively in the previous year.

SUPA.—*In charge of* Hospital Assistant DATTATRAYA GANESH.

The buildings are in good repair, the furniture and fittings complete and in good order. The committee visit the dispensary every month. The sanitary condition of the town is unsatisfactory, the water supply abundant but of inferior quality. The total number treated was 1,365 out-door and 66 in-door patients against 1,293 and 52 respectively in the previous year. The most common complaints were malarious fevers, intestinal worms, and skin diseases. Small-pox prevailed; there were 221 cases. There were 94 primary vaccinations performed. Two *post-mortem* examinations were made. The total cost was Rs. 1,014-11-9, the cost per patient Re. 0-11-4 against Rs. 714-1-6 and Re. 0-8-5 respectively in the previous year.

HALIYA'L.—*In charge of* Hospital Assistant BENJAMIN SOLOMON.

The buildings are in good repair, and the furniture and fittings sufficient. The committee held four meetings during the year. Conservancy receives considerable attention. The water-supply is sufficient and of good quality. The total number treated was 2,885 out-door and 85 in-door patients as compared with 4,754 and 86 respectively in the previous year. Malarious fevers, intestinal worms, skin diseases, ophthalmia, and respiratory affections were the most common diseases. Small-pox was epidemic in the town. Cholera caused 76 deaths in one village in the táluka. There were 172 children vaccinated. Five *post-mortem* examinations were made at the request of the police. The total cost was Rs. 1,444-10-11, the cost per patient Re. 0-7-9 against Rs. 1,025-15-2 and Re. 0-3-4 respectively in 1883.

YELLA'PUR.—*In charge of* Hospital Assistant ABRAHAM SHALOM.

The building is in good repair, the furniture in good order. The committee meets monthly. The sanitary state of the town is good; the water-supply good and ample. The total treated was 2,351 out-door and 96 in-door patients as compared with 2,870 and 108 respectively in the previous year. The most common diseases were malarious fevers, intestinal worms, and skin diseases. Small-pox was prevalent from March to June. There were 147 successful vaccinations and 53 re-vaccinations. The Surgeon General inspected the dispensary in February. The total cost was Rs. 1,476-0-10, the cost per patient Re. 0-9-7 as compared with Rs. 1,010-7-3 and Re. 1-4-0 in the previous year.

SIRSI.—*In charge of* Assistant Surgeon P. P. MULAN, L. M. & S.

The buildings are in good repair. A dead-house has been built; quarters for servants are required. The furniture and fittings are in good order. The sanitary condition of the town is unsatisfactory. The water-supply is abundant, but liable to pollution from cesspools in close proximity to the wells. The total treated was 8,527 out-door and 109 in-door patients as compared with 6,752 and 123 respectively in 1883. The most common diseases were malarious fevers, skin diseases, intestinal worms, and respiratory affections. Eleven major surgical operations were performed. Small-pox existed throughout the year; there were 45 cases with 11 deaths. One hundred and seventy-nine successful primary vaccinations and 5 re-vaccinations were performed. The total cost was Rs. 4,422-11-2, the cost per patient Re. 0-8-2 as compared with Rs. 3,223-14-7 and Re. 0-7-6 respectively in the preceding year.

SIDDAPUR.—*In charge of* Passed Pupil D. NARAYEN.

The building is in a good state of repair. Part of the furniture is to be shortly renewed. The committee visited the dispensary regularly once a month. The town is kept clean. The water-supply is ample, but of indifferent quality. The total treated was 2,508 out-door and 22 in-door patients as compared with 1,833 and 30 respectively in the previous year, The more common diseases were skin diseases, malarious fevers, intestinal worms, and respiratory affections. Small-pox, chicken-pox, and measles occurred during the year. Seventy-two primary and 5 re-vaccinations were performed. Five *post-mortem* examinations were made at the request of the police. The total cost was Rs. 1,025-10-3, the cost per patient Rs. 0-6-5 as compared with Rs. 657-6-1 and Re. 0-5-9 respectively in the preceding year.

GOVERNMENT DISPENSARY.

MUNDGOD.—*In charge of* Hospital Assistant RAMCHANDRA BALAJI.

The building is in thorough repair. A cook-room and servants' quarters are being erected. Some articles of furniture are worn out. The Collector, Assistant Collector, and other local officers have visited the dispensary. The sanitary condition of the town is good and the water-supply sufficient. The total treated was 2,039 out-door and 59 in-door patients as compared with 2,315 and 81 respectively in the previous year. The prevailing diseases were malarious fevers, intestinal worms, skin diseases, and ophthalmia. Cholera prevailed to some extent in August and September, and small-pox was present in the surrounding villages. Fifty-six successful primary and 4 re-vaccinations were performed. Two *post-mortem* examinations were made at the request of the police. The total cost was Rs. 820-6-11, the cost per patient Re. 0-6-3 as compared with Rs. 875-6-5 and Re. 0-5-10 respectively in the previous year.

DECCAN.

POONA COLLECTORATE.

SASSOON GENERAL HOSPITAL, POONA.—*In charge of* Surgeon-Major H. COOK, M.D.

Conservancy and Water-Supply.—There has been no change in the city or cantonment establishments, but six new public urinals have been built. The water-supply continues the same.

Buildings.—The buildings are in good order. Certain minor alterations and improvements have been made, which add to the convenience of the patients and staff. Further improvements to the latrines on the upper floor are being carried out. A hospital for the treatment of infectious diseases is still wanted.

General health of the Town.—The general health of the town and its vicinity was good A few cases of cholera and small-pox occurred, but there was no epidemic.

Details of Treated.—The total number treated was 2,459 in-door and 14,327 out-door patients as compared with 2,290 and 12,134 respectively in the previous year. Of the in-patients 1,759 were cured, 451 relieved, 156 died, and 93 remained.

Prevailing Diseases.—The principal causes of admissions among in-patients were malarious fevers, syphilitic affections, respiratory affections, diseases of the alimentary canal, rheumatism, ulcers, general debility, abscesses, poisons, and injuries; among out-patients intestinal worms, malarious fevers, skin diseases, diarrhœa, dysentery, rheumatism, syphilis and gonorrhœa, abscesses, ulcers, and injuries.

Mortality and its causes.—The total number of deaths among in-patients was 156. The chief diseases causing this mortality were dysentery, phthisis, general debility, diarrhœa, remittent fever, and chronic bronchitis.

Major Surgical Operations.—The total number of major surgical operations performed was 56, including 16 operations for stone, 9 amputations, 5 removals of tumours, and 2 excisions of the eyeball.

Vaccination.—Vaccination is regularly performed once a week at the hospital, calf lymph being used.

Medico-legal cases.—There were 91 *post-mortem* examinations performed, and many other medico-legal cases were examined and reported upon to the police authorities.

Conduct of Establishment.—Surgeon-Major Cook reports that the Assistant Civil Surgeon's duties have been performed to his entire satisfaction by Surgeons McCloghry, Davidson, Barry, and Párakh. Assistant Surgeons Bhicajee and Desai, and Apothecaries DeSouza and Gallagher, have given great satisfaction.

Cost.—The total cost was Rs. 39,644-7-6, the cost per patient Rs. 2-5-9 as compared with Rs. 34,083-13-9 and Rs. 2-5-9 respectively in the previous year.

ROMAN CATHOLIC ORPHANAGE SCHOOL, POONA.—*In charge of* Surgeon-Major K. H. BATTY.

The general health of the children of this institution has been very good, with the exception of a slight outbreak of measles (14 cases) in August and September. Conservancy has been well attended to, and the water-supply from Khadakvásla is abundant and good. The total number of children treated was 509 as compared with 642 in the preceding year. The most common diseases were bronchial catarrh, ague, and sorethroat. There were no deaths. Vaccination is carefully attended to, all children being vaccinated on admission if not protected. The conduct of the establishment has been most satisfactory. The total cost was Rs. 1,261-8-0, the cost per patient Rs. 2-7-7 as compared with Rs. 1,218-15-8 and Rs. 1-14-4 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

SÁSVAD.—*In charge of* Passed Medical Pupil M. PRASADA.

The buildings are in every way suitable, only the latrine requiring repair. The furniture and fittings are sufficient. The committee visited the dispensary regularly every month. The sanitary condition of the town is fairly good. The water-supply, insufficient in the hot season, is said to be good, but is liable to pollution. The total treated was 6,578 out-door and 26 in-door patients as compared with 5,517 and 20 respectively in the previous

year. The most common complaints were intestinal worms, malarious fevers, skin diseases, respiratory affections, and ophthalmia. The town was free from epidemic disease. Two major surgical operations were performed. The number of persons vaccinated was 134. The dispensary was inspected once by the Deputy Sanitary Commissioner and twice by the Civil Surgeon. The total cost was Rs. 1,075-3-9, the cost per patient Re. 0-2-7 as compared with Rs. 706-7-3 and Re. 0-2-0 respectively in the previous year.

JEJURI.—*In charge of* Hospital Assistant CHATURJI NARAYAN.

The building, a hired one, is very unsuitable and very much in need of repair. The necessary furniture has been supplied. The sanitary condition is very indifferent, especially when the town is crowded with pilgrims. The water-supply is sufficient, but of indifferent quality. The total treated was 5,392 out-door and 5 in-door patients as compared with 4,754 and 3 respectively in the year 1883. The prevailing diseases were malarious fevers, ophthalmia, skin diseases, intestinal worms, and respiratory affections. One hundred and nineteen children were vaccinated and 2 re-vaccinated. Two *post-mortem* examinations were made at the request of the police. The dispensary was inspected twice by the Civil Surgeon and once by the Deputy Sanitary Commissioner. The total cost was Rs. 942-15-5, the cost per patient Re. 0-2-9 as compared with Rs. 1,031-15-11 and Re. 0-3-5 respectively in the previous year.

BÁRÁMATI.—*In charge of* Hospital Assistant GUNGA DEEN.

The building, a hired one, answers its purpose fairly well. It is kept in good repair. The committee visit the dispensary every month. The sanitary condition of the town is fairly good. There is no drainage or public latrines. The water-supply from the river Karrha is good, but deficient in the hot season. The total treated was 3,587 out-door and 9 in-door patients against 4,081 and 13 respectively in the previous year. The prevailing diseases were malarious fevers, skin diseases, ophthalmia, respiratory affections, and ulcers. One hundred and twenty-five persons were successfully vaccinated. Five medico-legal cases were reported on at the request of the police. The dispensary was inspected in January by the Sanitary Commissioner and in January and October by the Civil Surgeon. The total cost was Rs. 1,233-3-11, the cost per patient Re. 0-5-5 as compared with Rs. 1,063-6-3 and Re. 0-4-2 in the previous year.

INDÁPUR.—*In charge of* Native Doctor RAMJEE MULHAR.

The building, a hired one, is in good repair. The furniture and fittings are sufficient and in good order. The committee visited the dispensary ten times during the year. The sanitary condition of the town is indifferent. The water-supply is abundant, but liable to pollution. The total treated was 6,202 out-door and 8 in-door patients as compared with 5,300 and 6 respectively in the preceding year. The most common diseases were ophthalmia, malarious fevers, skin diseases, boils, and ulcers. During the year 156 children were successfully vaccinated. Four *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Sanitary Commissioner, the Deputy Sanitary Commissioner, and twice by the Civil Surgeon. The total cost was Rs. 1,423-13-4, the cost per patient Re. 0-3-8 as compared with Rs. 834-4-1 and Re. 0-2-6 respectively in the year 1883.

JUNNAR.—*In charge of* Hospital Assistant BAPUJI JANARDHAN.

The building is not suited for in-patients. There is no dead-house or quarters for the staff. A latrine is under construction. The furniture is sufficient. The committee visited the dispensary ten times during the year. The sanitary condition of the town is not satisfactory. The water-supply is good, but scanty in the hot weather. The total treated was 5,665 out-door and 9 in-door patients as compared with 6,392 and 9 in the previous year. Ophthalmia, skin diseases, malarious fevers, worms, and respiratory affections were the most common complaints. One hundred and fifty-five children were successfully vaccinated. The dispensary was inspected in January and October by the Civil Surgeon and in March by the Deputy Sanitary Commissioner. The total cost was Rs. 1,455-1-10, the cost per patient Re. 0-4-1 against Rs. 764-13-0 and Re. 0-1-10 in the previous year.

KHED.—*In charge of* Passed Pupil SHAIK ABDUL RUZAK.

The building is in good repair and is provided with the necessary furniture and fitting. Quarters for the staff are required. The dispensary was visited by the committee six times during the year. The sanitary condition of the town is unsatisfactory. The water-supply is sufficient, but liable to contamination. The total treated was 3,651 out-door and 12 in-door patients as compared with 4,187 and 20 respectively in the previous year. The prevailing diseases were ophthalmia, skin diseases, worms, malarious fevers, rheumatic affections, and ulcers. Six *post-mortem* examinations were made at the request of the police. The dispensary was inspected twice by the Civil Surgeon and once by the Deputy Sanitary Commissioner. The total cost was Rs. 1,502-1-11, the cost per patient Re. 0-6-6 as compared with Rs. 693-1-7 and Re. 0-2-7 respectively in the year 1883.

TALEGAON DABHADA.—*In charge of* Passed Medical Pupil KRISHNAJI GAWALKER.

The building requires repair to the roof, and accommodation for female in-patients, and quarters for the establishment are needed. The dispensary was visited regularly during the year by the committee. Attention is paid to conservancy. The present water-supply is indifferent, but new water-works are now under construction. The total treated was 5,203 out-door and 3 in-door patients as compared with 5,609 and 10 respectively in the previous year. Ophthalmia, malarious fevers, skin diseases, and intestinal worms are the most common diseases. Measles was prevalent in March, the patients did not apply for treatment. Eleven major surgical operations were performed. Eighty-nine persons were successfully vaccinated. One *post-mortem* examination was made. The dispensary was inspected by the Civil Surgeon in January and October. The total cost was Rs. 1,460-4-11, the cost per patient Re. 0-4-5 as compared with Rs. 662-2-5 and Re. 0-1-10 respectively in the previous year.

TALEGAON DHAMDHERA.—*In charge of* Hospital Assistant NARAYEN POCHAYA.

The building, a hired one, is in good repair; there is no place suitable for holding a *post-mortem* examination. The furniture and fittings are complete. The committee meet quarterly; individual members visit the dispensary frequently. The conservancy arrangements are indifferent. The water-supply is scanty and liable to pollution. The total treated was 4,079 out-door and 6 in-door patients as compared with 4,724 and 4 respectively in 1883. The more common complaints were skin diseases, intestinal worms, malarious fevers, respiratory affections, and ophthalmia. The number of children successfully vaccinated was 94. Two major surgical operations were performed. The Civil Surgeon inspected the dispensary twice. The total cost was Rs. 1,034-14-6, the cost per patient Re. 0-4-0 as compared with Rs. 575-10-2 and Re. 0-1-11 respectively in the previous year.

ALANDI.—*In charge of* Hospital Assistant BHUYA SING.

A portion of the dharmshala is still used as a dispensary. It is in good repair, but quite unsuited for the purpose. There is no dead-house or quarters for the establishment. Two members of the committee visit the dispensary monthly. The sanitary condition of the town is very indifferent. The water-supply from the river and wells is abundant but liable to pollution. The total treated was 4,190 out-door and 7 in-door patients as compared with 1,537, all out-patients, in the previous year. The most common diseases were those of the skin, intestinal worms, ophthalmia, respiratory affections, and malarious fevers. Two cases of cholera with one death occurred in November. Sixty-seven children were successfully vaccinated. Two *post-mortem* examinations were made at the request of the police. The Civil Surgeon inspected the dispensary in January and October. The total cost was Rs. 1,406-15-4, the cost per patient Re. 0-5-4 as compared with Rs. 604-6-8 and Re. 0-6-3 respectively in 1883.

ENDOWED DISPENSARY.

KHA'N BAHA'DUR PESTONJI SORABJI DISPENSARY, POONA.—*In charge of* Assistant Surgeon VISHRAM RAMJEE GHOLAY.

The building is conveniently situated, is well provided with furniture and fittings, and is in good repair. There was no regular meeting of the committee, but the Collector and Deputy Collector visited the dispensary. The total treated was 19,649 out-door and 53 in-door patients as compared with 18,217 and 51 respectively in the previous year. The prevailing diseases were malarious fevers, diseases of the stomach and bowels, the eyes, chest, and skin. Measles and small-pox prevailed slightly. Many major surgical operations were performed, including 8 lithotomies and 9 operations for cataract. The dispensary was inspected twice during the year by the Civil Surgeon. The total cost was Rs. 5,391-7-0, the cost per patient Re. 0-4-4 as compared with Rs. 5,295-14-9 and Re. 0-4-7 respectively in the previous year.

AHMEDNAGAR COLLECTORATE.

CIVIL HOSPITAL, AHMEDNAGAR.—*In charge of* Surgeon-Major H. DETATHAM, M.D.

Conservancy and Water Supply.—The general conservancy of the town is well maintained. As regards latrine accommodation there is still much room for improvement, and the system of drainage is faulty and needs attention. The water-supply is good and is at present about 9 gallons per head per diem.

Buildings.—The hospital building is unchanged and, as before reported, unsuitable. There is a proposal to erect a new hospital to perpetuate the memory of His Excellency Lord Ripon. The furniture and fittings are in fairly good order.

General health of the Town and District—Has been good, no special outbreak of any disease having taken place.

Attendance of Patients.—The total number treated was 372 in-door and 17,182 out-door patients, as compared with 315 and 13,677 respectively in the previous year.

Prevailing Diseases.—The most common complaints were, as usual, ague, conjunctivitis, and skin diseases. Admissions from the last two constitute the greater part of the large increase in attendance.

Major Surgical Operations.—Thirty-nine major operations were performed with one death; they included 11 lithotomies and 5 amputations.

Mortality and its causes.—There were 21 deaths in hospital, 3 were in a dying state when admitted. The chief causes of death were phthisis, dysentery, and debility.

Vaccination—Is performed by a vaccinator, who works under municipal arrangements, no difficulty is experienced.

Medico-legal cases.—Twenty-four *post-mortem* examinations were made at the request of the police, and 72 persons were sent for treatment or for examination and report by the same authority; and several articles were also examined and reported upon.

Conduct of Establishment.—The conduct of the establishment is favourably reported on.

Cost.—The total cost was Rs. 13,079-3-0, the cost per patient Re. 0-11-11 against Rs. 12,565-6-11 and Re. 0-14-4 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

SANGAMNER.—*In charge of* Hospital Assistant HARI KAKAJI.

The dispensary building is in good order and suited to the purpose; the furniture and fittings are sufficient. The committee visited the institution once only. Considerable attention is paid to sanitary matters. The water-supply is from the river, and is abundant and good. The total treated was 12,774 out-door and 66 in-door patients as compared with 9,544 and 51 respectively in the previous year. Skin diseases, ophthalmia, malarious fevers, intestinal worms, and respiratory affections were the most common diseases. Ten major surgical operations were performed. Vaccination is carried on by the Local Fund vaccinator. Twenty-seven medico-legal cases, including 7 *post-mortem* examinations, were reported upon. The dispensary was inspected twice by the Civil Surgeon and once by the Deputy Sanitary Commissioner, N. D. R. D. The total cost was Rs. 1,055-10-0, the cost per patient Re. 0-1-3 as compared with Rs. 925-4-3 and Re. 0-1-6 respectively in 1883.

NEVA'SA.—*In charge of* Hospital Assistant PARBUTSING DOWLUTSING.

The building itself is in good order, but the quarters of the establishment require repair. The committee visited the dispensary four times; the chairman shows much interest in the working of the institution. The sanitary condition of the town is fairly good, and the water-supply from the river good and abundant. The total treated was 3,950 out-door and 22 in-door patients against 3,834 and 19 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, skin diseases, respiratory affections, and intestinal worms. One major surgical operation was performed. During the year 127 children were successfully vaccinated. Three *post-mortem* examinations were made at the request of the police. The Civil Surgeon inspected the dispensary twice in February and November. The total cost was Rs. 805-9-1, the cost per patient Re. 0-3-2 as compared with Rs. 971-6-8 and Re. 0-4-0 respectively in the previous year.

SHEVGAON.—*In charge of* Hospital Assistant SUBRAYA BUSAPA.

The buildings are in good order. A latrine has been erected. Quarters for the staff and a cook-room are still required. The furniture is complete. The committee visited the dispensary twice during the year. The conservancy is not satisfactory; the water-supply is good and abundant. The total treated was 2,596 out-door and 34 in-door patients as compared with 2,038 and 20 respectively in 1883. Ophthalmia, malarious fevers, and skin diseases cause the greatest number of admissions. One hundred children were successfully vaccinated. Three *post-mortem* examinations were made at the request of the police. The Civil Surgeon inspected the dispensary in February and October. The total cost was Rs. 862-10-10, the cost per patient Re. 0-5-2 as compared with Rs. 827-9-6 and Re. 0-6-5 respectively in the previous year.

NA'SIK COLLECTORATE.

CIVIL HOSPITAL, NA'SIK.—*In charge of* Honorary Surgeon JOHN LEAHY.

Conservancy and Water Supply.—Conservancy arrangements met with considerable attention, but there is room for improvement, especially in the sanitary condition of the court-yards of many private houses. A scheme for an improved water-supply is now before the Irrigation Department.

Buildings.—The unsuitableness of the building now in use has been frequently mentioned. Under recent orders of Government plans and estimates are to be prepared for a new hospital.

General Health.—The general health of the town and district has been fair. Cholera was present from February to June and again in September and October. There were 55

cases and 26 deaths; the disease was not epidemic in the district. A few cases of small-pox occurred.

Attendance of Patients.—The total number treated was 177 in-door and 12,154 out-door patients as compared with 165 and 11,712 respectively in the previous year.

Prevailing Diseases.—The most common diseases were malarious fevers, ophthalmia, respiratory affections, intestinal worms, dysentery, diarrhœa, and skin diseases.

Surgical Operations.—Twenty-eight major surgical operations were performed, including 9 lithotomies.

Mortality and its causes.—Twenty-five deaths occurred among in-patients and 31 were reported among out-patients, the chief causes being cholera, diarrhœa, phthisis, remittent fever, and dysentery.

Vaccination.—Is performed by the municipal vaccinator with good results. There were 672 successful vaccinations and 9 re-vaccinations.

Conduct of Establishment.—Has with one or two unimportant exceptions been good.

Cost.—The total cost was Rs. 9,386-12-1, the cost per patient Re. 0-12-2 as compared with Rs. 10,123-7-0 and Re. 0-13-7 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

MA'LEGAON—*In charge of* Hospital Assistant PARASHRAM NAGESH.

The building is in good order; quarters for the establishment and a dead-house are still required. The committee meet every month. The sanitary condition of the town is fairly good. The water-supply is ample and of good quality. The total treated was 11,010 out-door and 24 in-door patients as compared with 8,878 and 18 respectively in the previous year. The more common diseases were malarious fevers, skin diseases, ophthalmia, intestinal worms, and respiratory affections. Fifty children were vaccinated during the year. The dispensary was inspected by the Civil Surgeon in March and November. The total cost was Rs. 1,441-15-3, the cost per patient Re. 0-2-1 as compared with Rs. 1,391-5-11 and Re. 0-2-6 respectively in the previous year.

YEOLA.—*In charge of* Hospital Assistant SHAIK SURFRAZ HAKIM.

The building, a hired one, is in good repair; a dead-house is required. The furniture and fittings are sufficient. The committee visit the dispensary frequently. The sanitary condition of the town is fairly good. The water-supply is deficient in the hot season. A scheme for an improved water-supply is under consideration. The total treated was 11,752, all out-door patients, as compared with 9,585 in the previous year. The more common diseases are malarious fevers, ophthalmia, skin diseases, intestinal worms, and respiratory affections. During the year 459 primary vaccine operations and one re-vaccination were performed. Five major surgical operations were performed. Nine *post-mortem* examinations were made and opinion given on 15 other medico-legal cases. The dispensary was twice inspected by Civil Surgeon, Násik, and twice by the Deputy Sanitary Commissioner. The total cost was Rs. 1,686-7-5, the cost per patient Re. 0-2-3 as compared with Rs. 1,050-7-1 and Re. 0-1-9 respectively in the previous year.

DINDORI.—*In charge of* Hospital Assistant BASWANT SING.

The building is in good order. A dead-house has been supplied; quarters for the establishment and some furniture are still required. The meetings of the committee are held every month. The conservancy is carefully attended to. The water-supply from the river and wells is good and plentiful. The total treated was 5,031 out-door and 22 in-door patients against 5,516 and 16 respectively in the previous year. The prevailing diseases were ophthalmia, skin diseases, malarious fevers, intestinal worms, and respiratory affections. One hundred and twenty-one children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Násik, in August. The total cost was Rs. 1,090-10-4, the cost per patient Re. 0-3-5 as compared with Rs. 905-4-4 and Re. 0-2-9 respectively in 1883.

SINNAR.—*In charge of* Hospital Assistant VITHAL BHIKAJI.

The building is in good repair. A dead house is to be erected. Some articles of furniture are required. The committee meet regularly every month. The town is kept clean. Water supply is fair from rivers and wells. The total number treated was 6,270 out-door and 11 in-door patients as compared with 5,894 and 26 respectively in the previous year. The prevailing diseases were those of the skin, malarious fevers, ophthalmia, intestinal worms, and respiratory affections. A few cases of small-pox occurred. Two hundred and twenty-four vaccine operations were performed. Opinion was given to the police in 9 medico-legal cases. The dispensary was inspected once by the Civil Surgeon and twice by the Deputy Sanitary Commissioner. The total cost was Rs. 981-5-4, the cost per patient Re. 0-2-6 as compared with Rs. 841-5-9 and Re. 0-2-3 respectively in 1883.

SATA'NA.—*In charge of* Hospital Assistant EBRAHIM KHAN.

The building, a hired one, is in good repair, but is entirely unsuited to the purpose. A new building is under construction. The committee meet every quarter; the chairman inspects the dispensary every month. The sanitary condition of the town is not satisfactory. The water-supply from the river is plentiful, but liable to contamination. The total treated was 5,264 out-door and 33 in-door patients against 4,759 and 33 respectively in the previous year. Ophthalmia, skin diseases, intestinal worms, and malarious fevers were the most common diseases. Small-pox prevailed in the táluka throughout the year. Three major surgical operations were performed. One hundred and nineteen children were successfully vaccinated. Sixteen medico-legal cases including six *post-mortem* examinations were reported on at the request of the police. The total cost was Rs. 1,000-6-10, the cost per patient Re. 0-3-0 as compared with Rs. 1,055-0-3 and Re. 0-3-6 respectively in the previous year.

PIMPALGAON BASWANT.—*In charge of* Hospital Assistant VINAYEK DIVAKAR.

The dispensary buildings are in good repair, the furniture in good order, but some more chairs and cots are required. The committee visit the dispensary every month, quarterly meetings are also held. The town is kept fairly clean. The water supply is obtained from the river and is ample and of good quality. The total number treated was 8,776 out-door and 37 in-door patients as compared with 9,392 and 45 respectively in the previous year. The more common complaints were skin diseases, intestinal worms, ophthalmia, and malarious fevers. There were 54 vaccine operations performed. Thirteen *post-mortem* examinations were made, and opinion was given in 18 other medico-legal cases at the request of the police. The dispensary was inspected by the Civil Surgeon, Násik, in October. The total cost was Rs. 1,319-1-6, the cost per patient Re. 0-2-4 as compared with Rs. 1,086-12-2 and Re. 0-1-10 respectively in 1883.

GOVERNMENT DISPENSARY.

PEINT.—*In charge of* Hospital Assistant LAXUMON BAYAJEE.

The building is in good repair, quarters for servants, a dead-house, and a latrine for in-patients are required. There is no committee, the Mámlatdár inspects the dispensary frequently. The sanitary arrangements of the town are unsatisfactory, the water-supply is bad in quality and insufficient in the hot months. The total number treated was 3,837 out-door and 40 in-door patients as compared with 2,844 and 34 respectively in 1883. The most common complaints were intestinal worms, malarious fevers, ophthalmia, skin diseases, and respiratory affections. Eighty-three children were successfully vaccinated. The total cost was Rs. 1,736-6-6, the cost per patient Re. 0-7-1 as compared with Rs. 784-6-10 and Re. 0-4-4 respectively in the previous year.

KHA'NDESH COLLECTORATE.

CIVIL HOSPITAL, DHULIA.—*In charge of* Surgeon A. F. FERGUSON.

Conservancy and Water Supply.—Conservancy is fairly well attended to, but there is great room for improvement. The water supply is unsatisfactory, being liable to pollution.

Buildings—Are in excellent order, but there are no suitable quarters for medical subordinates. Were such provided, the hospital would be perfect.

General health of the Town and District.—During the year the health of the town and surrounding district has been remarkably good. There has been no epidemic. A few cases of small-pox only were observed in April.

Attendance of Patients.—The total number treated was 438 in-door and 1,679 out-door patients as compared with 465 and 3,393 respectively in the preceding year. The decrease is due chiefly to the establishment of a branch dispensary in the town.

Prevailing Diseases.—The more common complaints were malarious fevers, skin diseases, eye affections, vesical calculus, inflammation of the ear, and syphilitic affections.

Mortality and its causes.—There were 24 deaths in hospital, many deaths occurred in destitute people brought to hospital in a moribund state. Six deaths occurred after operation.

Surgical Operations.—Seventy-eight major operations were performed, they include 45 lithotomies, 1 lithotrity, and 11 amputations. The minor operations numbered 221.

Vaccination—Is performed by a municipal vaccinator.

Medico-legal cases.—There were 12 *post-mortem* examinations made and report was made in 8 other medico-legal cases.

Conduct of Establishment—Has been satisfactory.

Cost.—The total cost was Rs. 10,317-11-9, the cost per patient Rs. 4-13-11 as compared with Rs. 9,538-0-3 and Rs. 2-7-6 respectively in 1883.

GRANT-IN-AID DISPENSARIES.

DHULIA.—*In charge of* Hospital Assistant VENAYEK BHIKAJI MOGHE.

The buildings are hired, they are suitable, but require repair. The furniture is in good order. The committee visit the dispensary nearly every week. The institution was opened on the 16th June for the treatment of out-patients only, since that date 2,594 have been treated. Malarious fevers, ophthalmia, and skin diseases caused the greatest number of admissions. The Civil Surgeon frequently visited the dispensary. The total cost was Rs. 527-13-2, and the cost per patient Re. 0-3-3.

PA'ROLA.—*In charge of* Hospital Assistant SEETAL SING.

The roof of the building requires repair. The furniture and fittings are sufficient and in good order. The committee meets every month. The sanitary condition of the town is not satisfactory, though some attention is paid to conservancy by the municipality. The water-supply is deficient in the hot season, and of inferior quality. The total treated was 6,277 out-door and 2 in-door patients as compared with 7,573 and 3 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, skin diseases, and bowel complaints. Eighteen major surgical operations were performed. There were 734 persons successfully vaccinated. Fifteen *post-mortem* examinations were made at the request of the police. The total cost was Rs. 1,842-14-10, the cost per patient Rs. 0-4-8 as compared with Rs. 917-11-9 and Re. 0-1-11 respectively in the previous year.

ERANDOL.—*In charge of* Hospital Assistant MAHOMED HUSSAIN.

The building is in good repair. The construction of quarters for the establishment and of a latrine is under consideration. The committee visit the dispensary every month. Some attention is paid to conservancy. The water-supply is good but deficient in the hot season. The total number treated was 8,751 out-door and 15 in-door patients as compared with 7,688 and 8 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, ophthalmia, diseases of the ear, and of the respiratory system. Measles and hooping cough prevailed during January, February, and May. Four major surgical operations were performed. Four hundred and eighty-four children were successfully vaccinated. Opinion was given in seven medico-legal cases. The total cost was Rs. 1,402-2-8, the cost per patient Re. 0-2-6 as compared with Rs. 1,067-11-11 and Re. 0-2-2 respectively in the previous year.

CHOPDA.—*In charge of* Hospital Assistant HANMON SING.

The building is in good repair, quarters for the compounder and a latrine have been completed this year. Estimates for a dead-house have been sanctioned. The committee visit the dispensary every month. Conservancy is attended to. The water-supply is insufficient and of inferior quality. The total treated was 5,065 out-door and 2 in-door patients as compared with 5,100, all out-patients, in the previous year. Malarious fevers, rheumatic affections, eye diseases, and respiratory and bowel complaints were the most common diseases. Vaccination is carried out by the Local Fund vaccinator. The total cost was Rs. 1,647-2-10, the cost per patient Re. 0-5-2 as compared with Rs. 1,227-1-7 and Re. 0-3-10 respectively in the previous year.

SUNDAR MULJI DISPENSARY, JALGAON.—*In charge of* Assistant Surgeon NARAYEN ANANT, G.G.M.C.

The buildings are in good repair, the latrine has been roofed with iron. The furniture and fittings are in good order and complete. The committee meets regularly every month. Conservancy has been fairly well attended to. Improvements are undertaken when funds are available. The water-supply from the Mehroon Tank is good and abundant, but it does not reach some parts of the town in the hot season. The total number treated was 4,849 out-door and 27 in-door patients as compared with 4,281 and 25 respectively in the previous year. The prevailing diseases were malarious fevers, skin diseases, respiratory affections, ophthalmia, and intestinal worms. Three major surgical operations were performed. Vaccination is carried on by a special vaccinator. Thirteen *post-mortem* examinations were made at the request of the police. The total cost was Rs. 5,907-15-1, the cost per patient Rs. 1-3-4 as compared with Rs. 4,987-7-10 and Rs. 1-2-6 respectively in 1883.

NANDURBA'R.—*In charge of* Hospital Assistant GOPAL KRISHNA PENDHARKUR.

The present hired building is not suited for a dispensary. There is no committee, but the chairman (of the municipality) visited the institution twelve times. The sanitary condition of the town is fair; the water-supply is scanty but of good quality. The total number treated was 6,844 out-door and 3 in-door patients against 5,096 and 3 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, intestinal worms, respiratory and rheumatic affections. A few cases of measles and hooping cough were the only epidemic diseases. Thirteen major surgical operations were performed. Six *post-mortem* examinations were made and opinion given in twelve other medico-legal cases. One hundred and forty-three persons were vaccinated. The dispensary was inspected by the Civil Surgeon in February and by the Deputy Sanitary Commissioner

in January. The total cost was Rs. 1,673-2-9, the cost per patient Re. 0-3-10 against Rs. 1,040-14-4 and Re. 0-3-3 respectively in the previous year.

SHIRPUR.—*In charge of* Hospital Assistant TRIMBAK LAXUMON.

The present hired building is in good repair. Proposals for a new dispensary are under consideration. A dead-house is being built but a latrine is still wanted. Tables for *post-mortem* examinations and surgical operations are required. The committee visit every month. Conservancy arrangements are defective. The water-supply is good and sufficient. The total treated was 5,235 out-door and 7 in-door patients against 4,433 and 11 respectively in the previous year. Malarious fevers, skin diseases, ophthalmia, diseases of the ear, and respiratory and rheumatic affections are the most common complaints. Cholera appeared in a neighbouring village; there were 10 cases with 3 deaths. Seven major surgical operations were performed. There were 305 successful vaccine operations. Eight *post-mortem* examinations were made and opinion given in 4 other medico-legal cases. The dispensary was inspected in January by the Civil Surgeon. The total cost was Rs. 1,688-14-4, the cost per patient Re. 0-5-1 as compared with Rs. 1,045-11-4 and Re. 0-3-9 respectively in 1883.

BHADGAON.—*In charge of* Hospital Assistant DAJI DHONDEO.

The building is in good order, quarters for the establishment, a dead-house, and latrine are required. Cots and clothing for in-patients are also needed. The committee visited the dispensary every month. The sanitary condition of the town is well attended to. Water supply from the river Girna and wells is good and abundant. The total treated was 2,861 out-door and 7 in-door patients as compared with 3,591 and 7 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, intestinal worms, ophthalmia, and respiratory affections. One major surgical operation was performed. The number of children successfully vaccinated was 137. Two *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon in February. The total cost was Rs. 1,291-6-8, the cost per patient Re. 0-7-2 as compared with Rs. 1,058-6-11 and Re. 0-4-8 respectively in 1883.

PIMPALNER.—*In charge of* Passed Medical Pupil SESUYAH KASIRAM.

The building is in good repair, quarters for the medical officer are required. The requisite furniture and fittings are supplied. The chairman and individual members of the committee visit frequently. Sanitation is well attended to. The water-supply is good and abundant. The total treated was 5,198 out-door and 11 in-door patients against 4,038 and 6 respectively in the previous year. The prevailing diseases were malarious fevers, intestinal worms, skin diseases, ophthalmia, and respiratory affections. Small-pox prevailed during the months of February, March, April, and May. Seven major surgical operations were performed. One hundred and twenty-five children were successfully vaccinated. Two *post-mortem* examinations were made and opinion given in 5 other medico-legal cases. The Civil Surgeon inspected the dispensary in January. The total cost was Rs. 1,141-7-3, the cost per patient Re. 0-3-6 as compared with Rs. 1,037-14-0 and Re. 0-4-1 respectively in the previous year.

SHAHADA.—*In charge of* Hospital Assistant LAXUMON SAWUNT.

The new building is finished, and latrines and cook-room are under construction, there is no dead-house or quarters for the establishment. The furniture is sufficient. The committee visited the dispensary 9 times. There is much room for improvement in sanitation. The water supply is abundant but liable to pollution. The total number treated was 3,252 out-door and 10 in-door patients as compared with 2,427 and 4 respectively in the previous year. Skin diseases, malarious fevers, respiratory affections, and ulcers were the most common complaints. Chicken-pox occurred in the month of March. Eight major surgical operations were performed. There were 125 successful vaccinations. One *post-mortem* examination was made. The Civil Surgeon inspected the dispensary in February. The total cost was Rs. 1,549-2-3, the cost per patient Re. 0-7-7 as compared with Rs. 834-11-0 and Re. 0-5-5 respectively in 1883.

TALODA.—*In charge of* Hospital Assistant KESHEO HARI.

The building, a hired one, is suitable, a dead-house and latrine are required. The furniture is in good order. The committee visit the dispensary frequently. The sanitary condition of the town is fair. The water-supply is bad. The total number treated was 4,328 out-door and 3 in-door patients against 4,261 and 5 respectively for the eleven months the dispensary was open in 1883. The prevailing diseases were skin diseases, malarious fevers, ulcers, ophthalmia, and diarrhœa. Measles were prevalent from March to May. Three major surgical operations were performed. There were 183 successful vaccinations. Three *post-mortem* examinations were made. The Civil Surgeon inspected the dispensary in February. The total cost was Rs. 1,820-7-9, the cost per patient Re. 0-6-8 as compared with Rs. 1,015-6-4 and Re. 0-3-9 respectively in 1883.

SÁTÁRA COLLECTORATE.

CIVIL HOSPITAL, SÁTÁRA.—*In charge of* Surgeon H. B. BRIGGS, M.B.

Conservancy and Water Supply.—The conservancy arrangements of the town receive considerable attention. The present water-supply is of fair quality but somewhat deficient. The new water works are approaching completion, and will furnish an abundant supply of excellent water.

Hospital Buildings.—The situation of the hospital is good and convenient but the surroundings are somewhat objectionable. The accommodation is sufficient.

General Health.—The general health of the town and district has been fairly good, though both cholera and small-pox appeared during the year.

Attendance of Patients.—The total number treated was 527 in-door and 14,548 out-door patients as compared with 438 and 9,047 respectively in the previous year.

Prevailing Diseases.—The most common complaints were intestinal worms, skin diseases, malarious fevers, ulcers, and respiratory affections.

Surgical Operations.—There were 44 major surgical operations and 730 minor performed. Among the former were 7 lithotomies.

Mortality and its causes.—There were 19 deaths in hospital including 3 from small-pox, and six after operation for abscess, 2 hepatic abscess, amputation of the thigh, and lithotomy.

Medico-legal cases—Numbered 56 cases, including 18 *post-mortem* examinations and 28 articles supposed to contain poison.

Vaccination—Is carried on by the municipal vaccinator.

Conduct of Establishment.—Has been good, as a rule the duties being satisfactorily performed.

Cost.—The total cost was Rs. 11,933-12-10, the cost per patient Re. 0-12-7 against Rs. 12,192-1-5 and Rs. 1-4-6 respectively in the previous years.

CONVALESCENT HOSPITAL, MAHÁBALESHVAR.—*In charge of* Surgeon-Major JAMES DAVIDSON, M.B.

Conservancy and Water Supply.—The system of conservancy in force cannot be pronounced good, but the heavy rainfall thoroughly cleanses the hill every year. The water supply after March becomes insufficient. Steps to protect the wells are being taken.

Buildings.—Are kept in good repair, the hospital is conveniently situated and the accommodation sufficient.

General Health.—Of the station and surrounding district has been very good. There was no epidemic.

Attendance of Patients.—The total number treated was 31 in-door and 6,296 out-door patients as compared with 10 and 5,937 respectively in the previous year.

Prevailing Diseases.—The most common diseases were parasitic diseases, constipation, scabies, fever, conjunctivitis, bronchitis, and rheumatism.

Surgical Operations.—Two major surgical operations were performed with success.

Mortality and its causes.—There were two deaths in hospital, one from general dropsy, the other from pneumonia.

Vaccination—Is carried on by the táluka vaccinator, who visits the hill periodically.

Conduct of Establishment.—Has been very satisfactory.

Cost.—The total cost was Rs. 10,596-0-11 and the cost per patient Rs. 1-10-9 against Rs. 10,977-0-1 and Rs. 1-13-6 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

WÁI.—*In charge of* Hospital Assistant BHAGU MAHADU.

The building has been repaired during the year and is in good order. The chairman visited the dispensary six times and the committee seven times. Conservancy is well attended to. The water-supply is abundant. The total treated was 9,962 out-door and 34 in-door patients against 6,724 and 21 respectively in the previous year. The most common diseases were skin diseases, intestinal worms, ophthalmia, malarious fevers, and respiratory and rheumatic affections. Two major surgical operations were performed. The number of persons vaccinated was 232. Ten *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon in January and August and by the Sanitary Commissioner in May last. The total cost was Rs. 2,261-14-3, the cost per patient Re. 0-3-7 as compared with Rs. 1,168-12-7 and Re. 0-2-9 respectively in 1883.

KARÁD.—*In charge of* Hospital Assistant HARI RAGHUNATH.

The buildings are in need of repair. The furniture and fittings are in good order and complete. The committee visit the dispensary very often. The sanitary condition of the town is unsatisfactory. The water-supply is good and sufficient. The total number treated was 5,430 out-door and 9 in-door patients against 5,852 and 11 respectively in the previous year. Ophthalmia, skin diseases, malarious fevers, and intestinal worms were the most common diseases. Small-pox occurred in March and April. One major surgical operation was performed. There were 327 successful vaccinations. Nineteen *post-mortem* examinations were made. The Civil Surgeon inspected the dispensary in January and in October. The total cost was Rs. 1,725-11-7, the cost per patient Re. 0-5-0 as compared with Rs. 1,005-7-3 and Re. 0-2-8 respectively in the previous year.

ISLÁMPUR.—*In charge of* Hospital Assistant RAMCHANDRA PURBHUNE.

The building is in a good state of repair, the necessary furniture and fittings are supplied and are in good order. The committee inspect the dispensary every month. The town is kept fairly clean but the establishment is insufficient. Water-supply is deficient in the hot season, the quality is indifferent. The total number treated was 6,152 out-door and 15 in-door patients as compared with 5,515 and 27 respectively in 1883. Skin diseases, intestinal worms, malarious fevers, ophthalmia, and rheumatic and respiratory affections are the most common diseases. Small-pox occurred in the early part of the year. Two major surgical operations were performed. The number of primary vaccine operations was 235. Six *post-mortem* examinations were made and opinion given in 22 other medico-legal cases. The Civil Surgeon inspected the dispensary in February and in November. The total cost was Rs. 1,132-13-7, the cost per patient Re. 0-2-11 as compared with Rs. 792-7-7 and Re. 0-2-3 respectively in 1883.

PUSESÁVLI.—*In charge of* Hospital Assistant BHAU TUKARAM.

The building is in good repair, the furniture in good order and sufficient, quarters for the Hospital Assistant have been built. The committee met eleven times. The town is clean. Public latrines are in course of erection. The water-supply is abundant and good. The total number treated was 3,453 out-door and 14 in-door patients as compared with 3,638 and 10 respectively in the previous year. Malarious fevers, ophthalmia, skin diseases, and intestinal worms, are the most common diseases. Small-pox prevailed in February, March, and April. One hundred and seventeen persons were successfully vaccinated. Nine *post-mortem* examinations were made at the request of the police. The Civil Surgeon inspected the dispensary in September. The total cost was Rs. 1,524-8-11, the cost per patient Re. 0-7-0 as compared with Rs. 1,442-12-11 and Re. 0-6-3 respectively in 1883.

MHASVAD.—*In charge of* Hospital Assistant GANPAT RAMCHANDRA KAKDE.

The buildings are in good order and repair and the furniture and fittings suitable. The chairman and secretary to the municipality visit the dispensary every month, the other members occasionally. The town is kept fairly clean. Latrines have been erected, but are not used by the people. The water-supply is scanty and liable to pollution. The total number treated was 4,524 out-door and 19 in-door patients as compared with 4,121 and 32 respectively in the previous year. The most common diseases were ophthalmia, skin diseases, malarious fevers, and intestinal worms. Small-pox prevailed from February to June, 179 cases were treated. Ten major surgical operations were performed. One hundred and twenty-seven persons were successfully vaccinated. Seven *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon in February and by the Deputy Sanitary Commissioner in December. The total cost was Rs. 2,053-3-1, the cost per patient Re. 0-7-2 against Rs. 592-1-6 and Re. 0-2-3 respectively in the previous year.

PÁTAN.—*In charge of* Hospital Assistant MOHANLAL NANAKRAM.

The buildings are in good repair, the furniture and fittings sufficient and in good order. The committee met nine times. The sanitary condition of the town is indifferent; there are no arrangements for surface cleanliness. The water-supply is abundant but liable to pollution. The total number treated was 4,201 out-door and 9 in-door patients as compared with 4,362 and 10 respectively in the previous year. Ophthalmia, intestinal worms, skin diseases, and malarious fevers are the most common diseases. Small-pox prevailed in the town and district from February to June. The total vaccinations were 160 including 22 re-vaccinations. Five *post-mortem* examinations were made. The Civil Surgeon inspected the dispensary in September. The total cost was Rs. 1,484-11-9, the cost per patient Re. 0-5-7 as compared with Rs. 1,632-12-8 and Re. 0-5-11 respectively in 1883.

TÁSGAON.—*In charge of* Hospital Assistant GOVIND GOPAL.

The building is in good repair. Cots and clothing for in-door patients are required. The members of the committee visit the dispensary occasionally. Conservancy is well attended to. The water-supply is good but scanty in the rains. The total number treated was 2,876 out-door and 8 in-door patients as compared with 2,867 and 3 respectively in the previous year. Skin diseases, intestinal worms, respiratory and rheumatic affections and

malarious fevers were the most common diseases. There were 277 successful vaccinations. Ten *post-mortem* examinations were made. The total cost was Rs. 1,015-13-10, the cost per patient Re. 0-5-7 as compared with Rs. 934-10-1 and Re. 0-5-2 respectively in the previous year.

SHOLÁPUR COLLECTORATE.

CIVIL HOSPITAL, SHOLÁPUR.—*In charge of* Apothecary W. R. SCROGGIE.

Conservancy and Water Supply.—There has been no change in the conservancy arran ge ments of the town, and though considerable attention is paid to sanitation the re is stil great room for improvement. The water-supply is sufficient and of good quality.

Buildings.—The hospital buildings are in good repair, and the accommodation is adequate. Ceiling cloths are still required to the wards. Quarters for the medical pupil and second class servants are under construction.

General health of the Town.—The general health has been satisfactory and the town and district have been nearly free from epidemic diseases.

Attendance of Patients.—The total number treated was 309 in-door and 7,595 out-door patients as compared with 379 and 5,889 respectively in the previous year.

Prevailing Diseases.—The most common complaints were skin diseases, diseases of the stomach and bowels, malarious fevers, respiratory affections, and injuries.

Surgical Operations.—There were 68 major surgical operations performed, they included 7 lithotomies, 3 cataract operations, 2 iridectomies, and 3 amputations.

Mortality and its causes.—Sixteen deaths occurred among in-patients: dysentery, pneumonia, and empyæmia being the chief causes.

Vaccination—Is performed by the municipal vaccinator. There were 2,051 successful primary and 249 re-vaccinations.

Medico-legal cases.—There were 3 *post-mortem* examinations made and opinion was given in several other cases at the request of the police.

Conduct of Establishment.—With one exception the conduct of the establishment has been satisfactory.

Cost.—The total cost was Rs. 7,734-5-5, the cost per patient Re. 0-15-7 against Rs. 6,546-7-3 and Rs. 1-0-8 respectively in 1883.

MUNICIPAL DISPENSARIES.

SHOLÁPUR.—*In charge of* Hospital Assistant HANMUNTRÁO GHORPARAY.

The building is in good repair; the furniture and fittings complete and in good order. The committee visit the dispensary frequently. The total treated was 15,222 out-door and 93 in-door patients as compared with 14,087 and 97 respectively in the previous year. The prevailing diseases were malarious fevers, skin diseases, ophthalmia, and respiratory affections. Small-pox and measles appeared in the town. Eight major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. The Apothecary in civil medical charge, Sholápur, inspected the dispensary occasionally, and it was also inspected by the Deputy Sanitary Commissioner. The total cost was Rs. 4,085-9-4, the cost per patient Re. 0-4-3 as compared with Rs. 2,055-8-7 and Re. 0-2-3 respectively in the previous year.

PANDHARPUR.—*In charge of* Assistant Surgeon SHANTARAM VINAYEK, L.M.

The new buildings have been completed and were occupied at the end of the year: they are centrally situated. The furniture and fittings are according to requirements. The dispensary is visited every month by the committee. The sanitary condition of the town is fairly good. The water-supply is abundant and good. The total treated was 12,101 out-door and 40 in-door patients against 10,350 and 56 respectively in the previous year. Malarious fevers, ophthalmia, intestinal worms, and skin diseases are the most common complaints. Three cases of cholera occurred, but the disease was not epidemic. Five major surgical operations were performed. Twelve *post-mortem* examinations were made, and in four cases substances were forwarded to the Chemical Analyser to Government. The dispensary was inspected by the Sanitary Commissioner in January, by the Apothecary in medical charge, Sholápur, in February and November, and by the Deputy Sanitary Commissioner in July and December. The total cost was Rs. 5,646-7-10, the cost per patient Re. 0-7-5 as compared with Rs. 4,726-7-9 and Re. 0-7-3 respectively in the previous year.

BÁRSI.—*In charge of* Hospital Assistant NARSU GURAPA.

The building is in good order, and the furniture and fittings are complete and in good condition. The committee visited the dispensary every month. The town is kept fairly clean, the water-supply from numerous wells is plentiful but liable to pollution. The total number treated was 13,339 out-door and 43 in-door patients as compared with 13,698 and

46 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, intestinal worms, skin diseases, and respiratory affections. A few cases of small-pox and measles occurred in the months of March, April, and May. Vaccination is performed by the municipal vaccinator. Five *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Apothecary in medical charge, Sholápur, in February and in October. The total cost was Rs. 2,725-11-1, the cost per patient Re. 0-3-3 as compared with Rs. 2,025-10-0 and Re. 0-2-4 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

KARMÁLA.—*In charge of* Hospital Assistant S. M. AHMED.

The building is in good repair, a latrine and cook-room have been completed, quarters for establishment are still required. The furniture and fittings are sufficient and in good order. The committee visited the institution every month. The sanitary condition of the town is fairly good. The water-supply is insufficient and is liable to pollution. The total number treated was 7,904 out-door and 35 in-door patients as compared with 7,860 and 42 respectively in 1883. The most common diseases were ophthalmia, malarious fevers, intestinal worms, skin diseases, and respiratory affections. Cholera appeared in the district but not in the town. Six major surgical operations were performed. There were 260 successful vaccinations. Seven *post-mortem* examinations were made and opinion was given in 13 other medico-legal cases. The dispensary was inspected by the Apothecary in medical charge, Sholápur, in February and September. The total cost was Rs. 2,139-10-1, the cost per patient Re. 0-4-3 as compared with Rs. 1,366-5-8 and Re. 0-2-9 respectively in the previous year.

AKLU'J.—*In charge of* Hospital Assistant ABAJI BAPUJI.

The dispensary was established on 13th August 1884. The building is the old municipal office and is not very suitable for the purpose. The furniture is sufficient. There is no committee; the Mámlatdár frequently visits the dispensary. The sanitary condition of the village is unsatisfactory. The water supply from the river Nira is sufficient but liable to pollution. The total treated was 1,734 out-door and 3 in-door patients. The chief diseases were skin affections, malarious fevers, ophthalmia, and intestinal worms. Vaccination is performed by the táluka vaccinator. The dispensary was inspected in December by the Apothecary in medical charge, Sholápur. The total cost was Rs. 550-14-2 and the cost per patient Re. 0-5-0.

NATIVE STATE DISPENSARY.

AKALKOT.—*In charge of* Hospital Assistant GUNGADEEN.

The building is in good repair. There is no committee, the Political Resident and the State Kárbhári visit the dispensary occasionally. The sanitary condition of the town is fair, the water-supply insufficient and of indifferent quality. The total treated was 6,011 out-door and 18 in-door patients as compared with 6,673 and 15 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, intestinal worms, respiratory affections, and skin diseases. The number of children successfully vaccinated was 232. The dispensary was inspected by the Deputy Sanitary Commissioner in December. The total cost was Re. 2,228-7-6, the cost per patient Re. 0-5-10 as compared with Rs. 1,870-11-9 and Re. 0-4-5 respectively in the previous year.

BELGAUM COLLECTORATE.

CIVIL HOSPITAL, BELGAUM.—*In charge of* Surgeon-Major D. HUGHES.

Conservancy and Water Supply.—Conservancy arrangements are fairly attended to, the nightsoil is converted into poudrette by admixture with the ashes of street sweepings. The water supply will be improved by the construction of a well in a district in which there was occasional scarcity.

Buildings.—Have been before reported as utterly unsuitable for the purpose, and they remain the same.

General Health.—Has been good on the whole. Small-pox and cholera were both epidemic, there were 69 cases of the former and 14 of the latter disease.

Attendance of Patients.—The total number treated was 374 in-door and 2,807 out-door patients as compared with 254 and 3,320 respectively in the previous year.

Prevailing Diseases.—Ague, parasitic diseases, conjunctivitis, skin diseases, and respiratory affections were the most common complaints.

Mortality and its causes.—There were 43 deaths among in-patients, including 10 from cholera, 9 from small-pox, 6 from diarrhœa, 3 each from dysentery and pneumonia, and 2 from debility.

Surgical Operations.—There were 24 major surgical operations performed, including 2 amputations and 12 extractions of cataract.

Vaccination.—Is regularly practised by the municipal vaccinator.

Conduct of Establishment.—The conduct of the subordinates is very favourably reported upon.

Cost.—The total cost was Rs. 12,635-6-1, the cost per patient Rs. 3-15-6 as compared with Rs. 15,533-9-9 and Rs. 4-4-6 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

BELGAUM.—*In charge of* Hospital Assistant HARI VITHAL.

The building is in good order, the furniture and fittings are sufficient and in good condition. The committee visited the dispensary eight times. The total number treated was 7,354 patients, all out-door, as compared with 7,582 out-door and 3 in-door in the previous year. The prevailing diseases were skin diseases, malarious fevers, ophthalmia, respiratory affections, and intestinal worms. Cholera was epidemic in July and August: 30 cases were reported with 22 deaths. Small-pox, which was epidemic in the previous year, disappeared in the early part of the year under report. The dispensary was inspected by the Civil Surgeon in June and December, also by the Sanitary Commissioner in February, and the Deputy Sanitary Commissioner in July. The total cost was Rs. 1,908-6-1, the cost per patient Re. 0-4-1 as compared with Rs. 1,227-11-8 and Re. 0-2-7 respectively in the previous year.

GOKÁK.—*In charge of* Hospital Assistant SHIVU BHAGU.

The building is in good repair, there are no quarters for dispensary servants, the furniture and fittings are sufficient and in good order. The committee visited the institution several times. The sanitary condition of the town is fairly good, the water supply is sufficient. The total number treated was 3,548 out-door and 37 in-door patients as compared with 3,229 and 18 respectively in the previous year. The most common diseases were ophthalmia, skin diseases, intestinal worms, ulcers, and malarious fevers. Small-pox and cholera prevailed during the year. The number of persons vaccinated was 418, re-vaccinated 8. The dispensary was inspected by the Sanitary Commissioner and by the Civil Surgeon, Belgaum. The total cost was Rs. 1,516-15-11, the cost per patient Re. 0-6-9 as compared with Rs. 3,231-10-3 and Re. 0-15-11 respectively in the previous year.

ATHNI.—*In charge of* Hospital Assistant RAMCHANDRA DAJI.

The buildings, furniture, and fittings are in good order. The committee visited the dispensary twelve times. The sanitary condition of the town is well attended to. The water, supply is from wells, but owing to scanty rainfall many of them are dry. The water is of fair quality. The total number treated was 5,484 out-door and 14 in-door patients as compared with 5,185 and 17 respectively in the previous year. The most common diseases were ophthalmia, intestinal worms, skin diseases, respiratory affections, malarious fevers, and ulcers. Cholera appeared in the town in September, 8 cases occurred: small-pox prevailed there were 135 cases. In the táluka 504 cases of cholera occurred with 226 deaths. One major surgical operation was performed. There were 335 successful vaccinations. The Sanitary Commissioner inspected the dispensary in January. The total cost was Rs. 1,473-13-9, the cost per patient Re. 0-4-3 as compared with Rs. 2,068-2-10 and Rs. 0-6-4 respectively in the previous year.

SAUNDATTI.—*In charge of* Hospital Assistant MORO RAMCHANDRA.

A new building is in course of erection at a cost of Rs. 9,285. The dispensary is regularly visited by the committee. The sanitary condition of the town is fairly good. The water supply from wells is sufficient and good. The total number treated was 2,082, all out-patients, as compared with 2,176 in the previous year. The most common diseases were skin diseases, malarious fevers, intestinal worms, ophthalmia, and ulcers. Small-pox was epidemic from January to July. Six major surgical operations were performed. Two hundred and sixty children were successfully vaccinated. Seven *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon in February. The total cost was Rs. 1,257-9-4, the cost per patient Re. 0-9-7 as compared with Rs. 852-15-8 and Re. 0-6-3 respectively in the previous year.

CHIKODI.—*In charge of* Hospital Assistant HANMANTRÁV CHAWAN.

The building is old and requires frequent repair; the roof is in a dilapidated condition. Some necessary articles of furniture are required. Surface conservancy is very good. The water-supply from the river is sufficient. The total treated was 2,625 out-door and 28 in-door patients as compared with 3,435 and 29 respectively in the previous year. The more common diseases were skin diseases, malarious fevers, intestinal worms, respiratory and rheumatic affections, and ophthalmia. Small-pox, 76 attacks and 6 deaths, and cholera, 27 attacks and 10 deaths, were both epidemic. Five major surgical operations were performed. One hundred and ninety-three children were successfully vaccinated. Nineteen *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Belgaum, in December. The total cost was Rs. 2,234-0-4, the cost per patient Re. 0-13-5 as compared with Rs. 1,522-10-9 and Re. 0-7-0 respectively in 1883.

DHA'RWA'R COLLECTORATE.

CIVIL HOSPITAL, DHÁRWÁR.—*In charge of* Surgeon-Major G. BAINBRIDGE.

Conservancy and Water Supply.—The streets of the town are kept fairly clean and the scavenging is well done, but the sanitary condition of the place is not satisfactory. The water-supply is most uncertain, and often very deficient, and always very impure.

Buildings.—The hospital buildings are in good order.

General Health.—Small-pox, which prevailed in the previous year, died out in the beginning of 1884. Cholera in an epidemic form appeared in June, abated in September, but did not subside until December. In the town there were 261 cases and 142 deaths. The total number of cases in the collectorate was about 9,077 with 4,820 deaths.

Attendance of Patients.—The total number treated was 267 in-door and 5,353 out-door patients as compared with 361 and 7,172 respectively in the previous year.

Prevailing Diseases.—The most common diseases were ague, conjunctivitis, intestinal worms, and skin affections.

Surgical Operations.—There were 9 major and 145 minor surgical operations performed; the most important were 1 amputation of the thigh and 3 lithotomies.

Mortality and its causes.—Fourteen patients died in hospital, the chief causes being cholera and diarrhœa.

Vaccination.—Is carried on by the municipal vaccinator, and there has been some improvement in the work.

Medico-legal cases.—The total number of cases reported on was 40; they included 13 *post-mortem* examinations.

Conduct of Establishment.—With one exception was most satisfactory.

Cost.—The total cost was Rs. 16,853-10-2, the cost per patient Rs. 2-15-11 against Rs. 12,364-13-10 and Rs. 1-10-3 respectively in 1883.

GRANT-IN-AID DISPENSARIES.

HUBLI.—*In charge of* Assistant Surgeon D. N. SELKE.

The building is in good order. The construction of a bath-room is sanctioned; other additions and alterations are delayed for want of funds. The committee meet regularly every month. Conservancy is carefully looked after. The water-supply is abundant, but liable to pollution. The total number treated was 14,526 out-door and 144 in-door patients against 15,896 and 142 respectively in the previous year. The more common diseases were ophthalmia, skin diseases, malarious fevers, intestinal worms, respiratory and syphilitic affections, and ulcers. Small-pox prevailed throughout the year. Cholera was epidemic from June to August, 101 cases were treated with 28 deaths; measles also prevailed, 80 cases with 5 deaths were treated. Eighteen major surgical operations were performed. The total number of primary vaccinations was 1,910 and of revaccinations 70. Nineteen *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon in November. The total cost was Rs. 6,240-14-11, the cost per patient Re. 0-6-9 as compared with Rs. 3,372-11-8 and Re. 0-3-4 respectively in the previous year.

GADAG.—*In charge of* Assistant Surgeon D. CARDOZ.

The building is in a good state of repair, and the furniture and fittings are sufficient and in good order; the ventilation of the wards is defective, but improvement in this respect is about to be made. The committee visited the dispensary every month. The sanitary condition of the town is not satisfactory; the water-supply is abundant, but the wells are liable to pollution. The total number treated was 13,059 out-door and 55 in-door patients against 13,911 and 34 respectively in the previous year. The most common complaints were skin diseases, ophthalmia, malarious fevers, respiratory affections, diarrhœa, dysentery, and intestinal worms. Cholera was epidemic from May to September, 279 cases and 134 deaths. Small-pox was prevalent in the early part of the year. Forty-two major surgical operations were performed. Seventeen *post-mortem* examinations were made. The dispensary was inspected by the Deputy Sanitary Commissioner. The total cost was Rs. 4,980-9-9, the cost per patient Re. 0-6-0 as compared with Rs. 3,846-3-4 and Re. 0-4-4 respectively in the previous year.

HAVERI.—*In charge of* Hospital Assistant RAJANA LOKAJI.

The new building was occupied in June. It is in good order. The committee visited the dispensary twice during the year. The sanitary condition of the town is fair; the water-supply is insufficient and liable to pollution. The total number treated was 7,074 out-door and 51 in-door patients as compared with 7,928 and 28 respectively in the previous year.

The most common diseases were skin diseases, intestinal worms, and malarious fevers. Cholera prevailed in June, July, and August; 32 cases were treated with 10 deaths. Twenty-eight major surgical operations were performed. Sixty-two persons were successfully vaccinated. Twenty-six *post-mortem* examinations were made and medico-legal opinion given in 33 other cases. The dispensary was inspected by the Civil Surgeon, Dhárwár, in May. The total cost was Rs. 1,706-15-6, the cost per patient Re. 0-3-9 as compared with Rs. 2,347-8-9 and Re. 0-4-10 respectively in the previous year.

KALA'DGI COLLECTORATE.

CIVIL HOSPITAL, KALÁDGI.—*In charge of* Assistant Surgeon J. P. WADIA, L.M. & S.

Conservancy and Water Supply.—Conservancy arrangements of the town continue satisfactory. The water-supply is good in quantity and fairly abundant.

Hospital Buildings.—These are in good repair.

General Health.—The general health was satisfactory. Cholera occurred in June, 8 persons were attacked and 3 died. Small-pox also prevailed, 41 deaths were reported from this disease.

Attendance of Patients.—The total number treated was 142 in-door and 2,537 out-door patients as compared with 187 and 2,483 respectively in the year previous.

Prevailing Diseases.—The most common diseases were disorders of the stomach and bowels and intestinal worms, eye and skin diseases, and fevers.

Surgical Operations.—Five major and 93 minor surgical operations were performed during the year.

Mortality and its causes.—Six deaths occurred, the causes being cholera, phthisis, dropsy, heart and liver diseases, and debility.

Vaccination.—Is performed by the táluka vaccinator.

Medico-legal cases.—Seventeen *post-mortem* examinations were made at the request of the police.

Conduct of Establishment.—With one exception the members of the establishment have performed their duties satisfactorily.

Cost.—The total cost was Rs. 4,424-11-6, the cost per per patient Rs. 1-10-5 against Rs. 3,793-4-8 and Rs. 1-6-8 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

ILKAL.—*In charge of* Hospital Assistant RAMJI BAPUJI.

The buildings are in good repair, the furniture and fittings complete. The committee visit the dispensary quarterly. The sanitary condition of the town is unsatisfactory. The water-supply is plentiful but liable to pollution. The total treated was 2,984 out-door and 41 in-door patients as compared with 2,940 and 78 respectively in the previous year. The prevailing diseases are ophthalmia, skin diseases, malarious fevers, intestinal worms, and rheumatic affections. Cholera was prevalent in the neighbourhood, but did not visit the town. Small-pox occurred in the town: there were 32 cases with one death. Measles was also epidemic. There were 416 primary and 6 re-vaccinations. Five *post-mortem* examinations were made and opinion given in 22 other medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner and the Assistant Surgeon, Kaládgi. The total cost was Rs. 1,723-9-5, the cost per patient Re. 0-9-1 against Rs. 1,566-14-2 and Re. 0-8-3 respectively in the previous year.

BA'GALKOT.—*In charge of* Hospital Assistant SITARAM DAJI.

The buildings are in good repair. The furniture is sufficient. The committee met four times during the year. The sanitary condition of the town is much improved. The water supply is abundant and of good quality. The total treated was 5,693 out-door and 46 in-door patients against 6,542 and 57 respectively in the previous year. Intestinal worms, malarious fevers, skin diseases, and ophthalmia were the most common diseases. Cholera prevailed to a slight extent, and small-pox extensively. Four *post-mortem* examinations were made. The dispensary was inspected by the Deputy Sanitary Commissioner once and by the Assistant Surgeon, Kaládgi, twice during the year. The total cost was Rs. 2,511-6-1, the cost per patient Re. 0-7-0 as compared with Rs. 1,521-9-9 and Re. 0-3-8 respectively in the previous year.

BIJA'PUR.—*In charge of* Hospital Assistant KRISHNAJI LAXUMAN.

The buildings are much in need of repair. The committee visited the dispensary several times. The sanitary condition of the town is fair. The water-supply is ample and of good quality. The total number treated was 10,718 out-door and 49 in-door patients as compared with 11,337 and 62 respectively in the previous year. The prevailing diseases were malarious fevers, skin diseases, ophthalmia, and intestinal worms. Cholera prevailed in the

neighbourhood, but only 4 cases with 1 death were treated at the dispensary. One major operation was performed. Vaccinations 142, re-vaccinations 2. Six *post-mortem* examinations were made. The dispensary was inspected by the Assistant Surgeon, Kaládgi, in February and in October. The total cost was Rs. 1,269-8-8, the cost per patient Re. 0-1-10 against Rs. 1,144-6-4 and Re. 0-1-7 in 1883.

MUDDEBIHA'L.—*In charge of* Hospital Assistant VENKAJI DEVJI.

The building is in good repair, some articles of furniture are required. The committee meets quarterly, individual members visit the dispensary frequently. Sanitary arrangements are poor; the water-supply is scanty and of doubtful quality. The total number treated was 2,392 out-door and 17 in-door patients as compared with 2,138 and 13 respectively in the previous year. Malarious fevers, skin diseases, ophthalmia, intestinal worms, diarrhœa, and respiratory affections were the most common complaints. One case of cholera occurred. Small-pox was prevalent. Eight major surgical operations were performed. Vaccinations 133, re-vaccinations 11. The dispensary was inspected by the Deputy Sanitary Commissioner and by the Assistant Surgeon, Kaládgi. The total cost was Rs. 996-2-5, the cost per patient Re. 0-6-7 against Rs. 1,131-13-7 and Re. 0 8-5 respectively in the previous year.

BA'GEVA'DI.—*In charge of* Hospital Assistant DATTU PANDURANG.

Some repairs are required to the buildings, the furniture and fittings are sufficient. Quarterly meetings were held by the committee. The sanitary condition of the town is unsatisfactory. The water-supply is sufficient and of fair quality. The total number treated was 2,806 out-door and 23 in-door patients against 1,949 and 11 respectively in the previous year. The more common diseases are ophthalmia, skin diseases, intestinal worms, and malarious fevers. Cholera prevailed during September and October, 56 cases with 18 deaths. Small-pox was prevalent from January to March, 52 cases and 14 deaths. Vaccinations 257. Four *post-mortem* examinations were made and opinion given in four other medico-legal cases. The dispensary was inspected by the Assistant Surgeon, Kaládgi, in April and December and by the Deputy Sanitary Commissioner in December. The total cost was Rs. 640-13-6, the cost per patient Re. 0-3-7 as compared with Rs. 657-12-0 and Re. 0-5-4 respectively in the previous year.

SINDGI.—*In charge of* Hospital Assistant RAMRAO JANU.

The building is in good repair, some articles of furniture are still required. The committee visited the dispensary many times during the year. The sanitary condition of the town is fair, the water-supply from wells is of inferior quality but abundant. The total treated was 2,269 out-door and 38 in-door patients as compared with 2,017 and 40 respectively in the previous year. Ophthalmia, skin diseases, malarious fevers, and intestinal worms were the most common complaints. There was no epidemic. Fifteen major surgical operations were performed. There were 108 successful vaccinations. Six *post-mortem* examinations were made. The dispensary was inspected by the Deputy Sanitary Commissioner. The total cost was Rs. 829-10-2, the cost per patient Re. 0-5-9 against Rs. 665-2-10 and Re. 0-5-2 respectively in the previous year.

INDI.—*In charge of* Hospital Assistant CHINTAMAN SAKHARAM.

A new dispensary opened at the beginning of the year. The buildings are in every way suitable as are the furniture and fittings. The committee have met regularly every month since July. The sanitary condition of the town is unsatisfactory. The water-supply is sufficient but of inferior quality. The total treated was 2,357 out-door and 20 in-door patients. The more common diseases were malarious fevers, ophthalmia, skin diseases, and intestinal worms. Cholera was prevalent in the district from August to November: 5 cases occurred in the town, 3 proving fatal. Three major surgical operations were performed. There were 142 successful vaccinations. Five *post-mortem* examinations were made. The dispensary was inspected by the Assistant Surgeon, Kaládgi, in April and in November The total cost was Rs. 1,016-9-1 and the cost per patient Re. 0-6-10.

KOLHA'PUR AND SOUTHERN MARA'THA AGENCY.

CIVIL HOSPITAL, KOLHA'PUR.—*In charge of* Darbár Surgeon GEORGE SINCLAIR.

Conservancy and Water Supply.—Great attention is paid to the cleanliness of the town. The water supply is abundant and of good quality.

Buildings.—The "Albert Edward Hospital" was completed and occupied on 3rd July last. It is in every way suited for the purposes of a hospital.

General Health.—The general health of the town and district was not satisfactory. Small-pox, which was epidemic in 1883, continued to increase up to October, causing 10,056 attacks with 2,056 deaths. Cholera also prevailed from June to November, there were 1,027 attacks and 441 deaths.

Attendance of Patients.—The total number treated was 1,260 in-door and 22,483 out-door patients as compared with 1,084 and 16,841 respectively in the previous year.

Prevailing Diseases.—The most common diseases were malarious fevers, respiratory affections, diseases of the stomach and bowels, intestinal worms, and affections of the eye and skin.

Major Surgical Operations.—There were 165 major surgical operations performed, including 11 on the eye, 15 amputations, 11 lithotomies, and 29 removal of tumours.

Mortality and its causes.—Forty-seven deaths occurred in hospital, the chief causes of death were remittent fever, cholera, diarrhœa, and pneumonia.

Vaccination.—A municipal vaccinator has been appointed; 1,940 primary and 338 re-vaccinations were performed.

Medico-legal cases.—One hundred and seventy-three medico-legal cases were sent for report, they included 27 *post-mortem* examinations.

Conduct of Establishment.—Has been entirely satisfactory.

Cost.—The total cost was Rs. 20,176-4-6, the cost per patient Re. 0-13-7.

NATIVE STATE DISPENSARIES.

Gad Hinglaj.—*In charge of* Hospital Assistant D. Parashram.

The buildings are in good order, the furniture and fittings complete and in good condition. There is no committee, the officers of the Kolhápur Agency frequently visit the dispensary. The sanitary condition of the town is unsatisfactory. The water-supply is scarce in the hot weather and of indifferent quality. The total number treated was 6,532 out-door and 34 in-door patients as compared with 7,660 and 32 respectively in the previous year. Skin diseases, intestinal worms, malarious fevers, ophthalmia, and rheumatic and respiratory affections were the most common diseases. Cholera was epidemic from June to September, there were 403 cases and 171 deaths. There were 125 successful vaccinations and 25 re-vaccinations. The dispensary was inspected by the Darbár Surgeon in March and in December. The total cost was Rs. 1,360-10-1, the cost per patient Re. 0-3-3 as compared with Rs. 1,366-0-7 and Re. 0-2-10 respectively in the previous year.

Miraj.—*In charge of* Mr. Trimback Sakharam, L.M..

The buildings are in good repair. The furniture and fittings are in good order. The members of the municipality visit the dispensary. Conservancy is carefully attended to. The water supply is good and sufficient. The total number treated was 10,651 out-door and 47 in-door patients as compared with 10,438 and 50 respectively in the previous year. The most common diseases were skin diseases, intestinal worms, ophthalmia, respiratory and rheumatic affections, and malarious fevers. Small-pox, which was epidemic in the previous year, continued during the first quarter of the year under report; there were 298 attacks and 58 deaths. Seven major surgical operations were performed. There were 1,018 primary and 16 re-vaccinations successfully performed. Twenty-seven medico-legal cases were reported upon, including 3 *post-mortem* examinations made. The total cost was Rs. 11,353-0-5, the cost per patient Rs. 1-1-0 as compared with Rs. 5,627-1-1 and Re. 0-8-7 respectively in the previous year.

Mudhol.—*In charge of* Mr. Kashinath Krishna.

The dispensary buildings are in good repair, the furniture and fittings sufficient and in good order. Conservancy is well attended to. The water-supply is insufficient. The total treated was 7,507 out-door and 17 in-door patients as compared with 7,341 and 7 respectively in the previous year. The most common diseases were ophthalmia, intestinal worms, skin diseases, and malarious fevers. Small-pox and cholera were epidemic during the year. Ninety children were successfully vaccinated. Three *post-mortem* examinations were made and opinion given in 18 other medico-legal cases. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in November. The total cost was Rs. 2,562-11-0, the cost per patient Re. 0-5-5 as compared with Rs. 1,336-9-1 and Re. 0-2-10 respectively in 1883.

Malkápur.—*In charge of* Hospital Assistant Dattatraya R. Sathe.

The building is not suitable and requires repair. The necessary furniture is provided. There is no committee; the officers of the Kolhápur State visit occasionally. Sanitary arrangements are unsatisfactory. The water-supply is indifferent in quality and insufficient. The total number treated was 7,222 out-door and 24 in-door patients as compared with 4,428 and 20 respectively in the previous year. The most common complaints were skin diseases, intestinal worms, malarious fevers, and respiratory and rheumatic affections. Small-pox was epidemic from January to September. Sixty-seven primary vaccinations were performed. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in March. The total cost was Rs. 1,322-13-8, the cost per patient Re. 0-2-11 as compared with Rs. 1,496-9-3 and Re. 0-5-4 respectively in the previous year.

RÁMDURG.—*In charge of* Mr. D. A. PATWARDHAN, L. M. & S.

The new building was occupied in November. The furniture and fittings are complete. The dispensary is frequently visited by the State officials, and annually by the Political Agent and his Assistant. Conservancy was carefully attended to, and the water-supply was ample and of fair quality. The total treated numbered 8,756 out-door and 75 in-door patients, as compared with 2,805, all out-patients, in 1883. The more common diseases were skin diseases, malarious fevers, respiratory affections, intestinal worms, and ophthalmia. Cholera and small-pox were epidemic; of the former there were 30 cases and 11 deaths, of the latter 144 cases. and 24 deaths. Fifty-four major surgical operations were performed. Four *post-mortem* examinations were made and opinion given in 58 medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner and by the Darbár Surgeon, Kolhápur. The total cost was Rs. 1,746-15-6, the cost per patient Re. 0-3-2 as compared with Rs. 1,017-0-10 and Re. 0-5-9 respectively in the previous year.

KÁGAL.—*In charge of* Hospital Assistant NARSU LINGU.

The building is suitable and in good repair. The necessary furniture and fittings are provided. The dispensary was frequently visited by the Chief of Kágal, his Secretary, and the State Kárbhári. The sanitary arrangements are fairly good. The water-supply is good and sufficient. The total number treated was 1,763, all out-door patients, as compared with 1,814 in the previous year. The most common diseases were intestinal worms, ophthalmia, skin diseases, respiratory affections, and malarious fevers. Small-pox was epidemic from January to May, and cholera from July to October. Vaccination is performed by the State vaccinator. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in March and in December. The total cost was Rs. 668-12-3, the cost per patient Re. 0-6-1 as compared with Rs. 571-13-9 and Re. 0-6-0 respectively in 1883.

A'JRA.—*In charge of* Hospital Assistant MAROTI NANA CHOWAN.

A new building is being erected. The furniture and fittings at present provided are sufficient and in good order. There is no committee, but the officers of the Kolhápur Regency frequently visit the dispensary. The sanitary condition of the town is not satisfactory. The water-supply is plentiful, but of indifferent quality. The total number treated was 4,925 out-door and 13 in-door patients. The more common diseases were skin diseases, intestinal worms, malarious fevers, ophthalmia, and respiratory and rheumatic affections. Cholera prevailed in July and August, 19 attacks and 13 deaths; and small-pox in January and February, 50 attacks and 7 deaths. There were 142 primary and 12 re-vaccinations. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in March and in December. The total cost was Rs. 1,708-7-4 and the cost per patient Re. 0-5-6. The dispensary was only opened in November of the previous year, so no comparison can be made.

GÁRGOTI.—*In charge of* Hospital Assistant D. W. KARMARKAR.

The dispensary was opened in November and is situated in a dharamshála. The furniture and fittings are sufficient. There is no committee; the Mámlatdár occasionally visits the institution. Conservancy is well attended to. The water-supply is abundant, but of indifferent quality. Since the opening 1,371 patients, all out-door, have been treated. The more common complaints were skin diseases, respiratory and rheumatic affections, and malarious fevers. There was no epidemic. Fourteen children were vaccinated. The dispensary was inspected by the Darbár Surgeon in December. The total cost was Rs. 1,452-7-4 and the cost per patient Re. 1-0-11.

GUJARA'T.

SURAT COLLECTORATE.

COWASJI JEHANGIER CIVIL HOSPITAL, SURAT.—*In charge of* Surgeon-Major S. O'B. BANKS.

Conservancy and Water Supply.—Conservancy arrangements are carefully attended to. The water-supply is abundant, but of inferior quality. A scheme for a new water-supply is now being considered.

Buildings.—The hospital building is in every way suitable. The hospital latrines require more ventilation.

General Health.—The general health has been on the whole good, though cholera prevailed from March to May, 130 cases with 83 deaths.

Attendance of Patients.—The total number treated was 640 in-door and 7,585 out-door patients as compared with 600 and 7,900 respectively in the previous year.

Prevailing Diseases.—The most common diseases were malarious fevers, cutaneous affections, parasitic diseases, and respiratory affections.

Surgical Operations.—Twenty major and 467 minor surgical operations were performed.

Mortality and its causes.—There were 46 deaths among in-patients. The chief causes of death were bowel complaints and malarial diseases. Cholera caused 5 deaths.

Vaccination.—Is carried on under the Sanitary Department. There were 3,089 successful primary and 46 re-vaccinations.

Medico-legal cases.—There were 7 *post-mortem* examinations made and report given in 191 other medico-legal cases.

Conduct of Establishment.—The conduct of the members of the establishment has been very favourably reported on, especially that of 1st class Hospital Assistant Narayenráo Jadhow.

Cost.—The total cost was Rs. 14,776-13-2, the cost per patient Rs. 1-12-8 as compared with Rs. 16,603-6-8 and Rs. 1-15-3 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

PÁRAKH DISPENSARY, SURAT.—*In charge of* Assistant Surgeon DOSÁBHAI PESTONJI, G.G.M.C.

The buildings are in good repair; the compound has been much enlarged. The furniture and fittings are in accordance with the regulations. The committee visit the dispensary every month. Conservancy is carefully attended to. The water-supply is abundant, but of inferior quality. The total number treated was 12,288 out-door and 13 in-door patients as compared with 11,991 and 20 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, inflammation of the ear, and respiratory affections. Cholera occurred in April and May; 48 cases were treated and 9 died. Eight major surgical operations were performed. The dispensary was inspected in June by the Civil Surgeon, Surat. The total cost was Rs. 6,767-5-3, the cost per patient Re. 0-8-9 as compared with Rs. 5,056-13-5 and Re. 0-6-8 respectively in the previous year.

OLPAD.—*In charge of* Hospital Assistant MANOHAR HARI BARVE.

The buildings require repair; the furniture is in good order and sufficient. The committee visited the dispensary twelve times during the year. Conservancy arrangements continue very defective; the water-supply is obtained from wells, it is sufficient, and of good quality. The total number treated was 4,450 out-door and 36 in-door patients as compared with 3,956 and 38 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, bowel complaints, conjunctivitis, and respiratory affections. Only two cases of cholera occurred in the town, but the disease was epidemic in the district. Vaccination was performed by the táluka vaccinator. Two *post-mortem* examinations were made. The total cost was Rs. 1,047-2-2, the cost per patient Re. 0-3-8 against Rs. 658-1-5 and Re. 0-2-7 respectively in the previous year.

BÁRDOLI.—*In charge of* Hospital Assistant GOVINDRAO POWAR.

Ordinary repairs to the building have been executed. The committee visited the dispensary eleven times. Conservancy arrangements are very defective; water-supply, chiefly from wells, is of fair quality. The total number treated was 5,497 out-door and 49 in-door patients as compared with 5,316 and 41 respectively in the previous year. The most common diseases were malarious fevers, respiratory affections, dysentery, diarrhœa, intestinal worms, and skin diseases. No epidemic occurred in the town. Cholera appeared in the neighbourhood in April. One

hundred and twenty-six children were successfully vaccinated. The total cost was Rs. 951-1-10, the cost per patient Re. 0-2-8 as compared with Rs. 909-4-4 and Re. 0-2-8 respectively in 1883.

CHIKHLI.—*In charge of* Hospital Assistant GOVIND KESHAV.

The buildings, furniture, and fittings are all in good order. The dispensary was visited several times by the committee. Conservancy is not well attended to. The water-supply is abundant and of good quality. The total number treated was 7,273 out-door and 18 in-door patients as compared with 6,900 and 14 respectively in the previous year. The more common complaints were malarious fevers, skin diseases, affections of the stomach and bowels, diseases of the respiratory system, and rheumatic affections. One major surgical operation was performed. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 1,332-9-2, the cost per patient Re. 0-2-11 as compared with Rs. 1,086-3-9 and Re. 0-2-6 respectively in the previous year.

PÁRDI.—*In charge of* Hospital Assistant MORESHWAR TRIMBAK.

The building is under repair, and the dispensary is at present in a hired house in the town. Some furniture to replace that worn out and sold is required. The dispensary has been visited by the Collector, the Deputy Collector, and Mámlatdár. Conservancy arrangements are very defective. The water-supply is insufficient and is liable to pollution. The total number treated was 9,610 out-door and 51 in-door patients as compared with 8,586 and 70 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, intestinal worms, respiratory and rheumatic affections. Eight cases of cholera were admitted, but the disease did not appear in an epidemic form. Eleven major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 722-10-0, the cost per patient Re. 0-1-2 as compared with Rs. 2,160-11-10 and Re. 0-4-0 respectively in the previous year.

MÁNDVI.—*In charge of* Hospital Assistant RAMCHANDRA ATMAJI.

The buildings are in good repair and the furniture and fittings in good order. The committee visited the dispensary nine times during the year. The sanitary arrangements of the town are fairly good. The water-supply from the river Tápti and wells is ample. The total number treated was 3,566 out-door and 85 in-door patients as compared with 4,322 and 75 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, respiratory affections, and skin diseases. One major surgical operation was performed. Vaccination is carried on by the táluka vaccinator. Four *post-mortem* examinations were made and opinion given in 12 other medico-legal cases. The total cost was Rs. 679-10-2, the cost per patient Re. 0-2-11 as compared with Rs. 652-9-5 and Re. 0-2-4 respectively in the previous year.

RÁNDER.—*In charge of* Hospital Assistant PURSHOTAM YADOW.

The dispensary, two small ill-ventilated rooms, is quite unsuited for the purpose, though kept in repair. The furniture and fittings are in good order. The committee visit the institution every month. The sanitary condition of the town is not satisfactory. The water-supply from the Tápti is abundant. The total number treated was 8,286, all out-door patients, as compared with 7,270 in the previous year. The most common diseases were malarious fever, bronchitis, inflammation of the ear, diseases of the lungs, and skin diseases. Thirty-three cases of cholera were treated with 7 deaths. There were 161 successful vaccinations. The dispensary was inspected by the Civil Surgeon, Surat, in June. The total cost was Rs. 1,722-7-6, the cost per patient Re. 0-3-3 as compared with Rs. 824-12-10 and Re. 0-1-9 respectively in the previous year.

NUSSERWANJI MANOCKJI PETIT DISPENSARY, KHAIRGAUM—*In charge of* Hospital Assistant NARSAPPA ERAPPA.

The new building was occupied in March. There is no dead-house; the furniture and fittings are sufficient. The committee visit the dispensary quarterly. The sanitary condition of the town is unsatisfactory. The water-supply is ample and of good quality. The total number treated was 2,704 out-door and 7 in-door patients as compared with 3,134 and 2 in the previous year. The most common diseases were malarious fevers, respiratory affections, bowel complaints, and skin diseases. There was no epidemic. Vaccination is performed by the táluka vaccinator. The total cost was Rs. 884-0-5, the cost per patient Re. 0-5-2 as compared with Rs. 954-12-10 and Re. 0-4-10 respectively in the previous year.

ENDOWED DISPENSARY.

VICTORIA DISPENSARY, NAVSÁRI.—*In charge of* Assistant Surgeon JAMSETJI BYRAMJI, G.G.M.C.

The building is in good repair, accommodation sufficient, the requisite furniture and fittings are supplied. The committee meet regularly once a month. The sanitary condition of the town is fair and the water-supply good. The total number treated was 8,777

out-door and 38 in-door patients as compared with 8,758 and 40 respectively in the previous year. The most common diseases were malarious fevers, respiratory and rheumatic affections, ulcers, inflammation of the ear, ophthalmia, intestinal worms, and skin diseases. Nineteen major surgical operations were performed. One hundred and thirty-one children were successfully vaccinated. The total cost was Rs. 2,820-1-11, the cost per patient Re. 0-5-1 as compared with Rs. 3,065-13-1 and Re. 0-5-6 respectively in the previous year.

GOVERNMENT DISPENSARY.

DINSHA MANOCKJI PETIT DISPENSARY, BULSÁR.—*In charge of* Assistant Surgeon R. R. DADINA, L.M. & S.

The buildings are in good repair, accommodation sufficient, the furniture and fittings are in good order. The members of the committee paid frequent visists to the dispensary. The sanitary arrangements of the town are fairly satisfactory. The water-supply is sufficient and of fair quality. The total number treated was 14,253 out-door and 97 in-door patients as compared with 14,216 and 80 respectively in the previous year. The most common diseases were malarious fevers, intestinal worms, skin diseases, eye affections, and lung diseases. One case of cholera only was treated during the year. Eleven major surgical operations were performed. There were 311 primary and 11 re-vaccinations. Six *post-mortem* examinations were made and opinion was given in 26 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Surat, in June. The total cost was Rs. 4,052-0-6, the cost per patient Re. 0-4-6 as compared with Rs. 4,328-5-8 and Re. 0-4-10 respectively in the previous year.

NATIVE STATE DISPENSARIES.

BÁNSDA.—*In charge of* Hospital Assistant BHAU GOVIND.

The buildings are in a fair state of repair, they furnish sufficient accommodation, the furniture and fittings are sufficient. There is no committee. Care is taken to preserve surface cleanliness, but sanitary arrangements in general are defective. The water-supply is sufficient but of inferior quantity. The total treated was 5,366 out-door and 37 in-door patients as compared with 5,198 and 22 respectively in the previous year. The prevailing diseases were malarious fevers, respiratory affections, dysentery, diarrhœa, intestinal worms, and skin diseases. Measles was epidemic in the town. Seven major surgical operations were performed. Vaccination is carried on by a State vaccinator. The total cost was Rs. 2,252-1-9, the cost per patient Re. 0-6-8 as compared with Rs. 2,397-6-4 and Re. 0-7-4 respectively in the previous year.

DUMAS.—*In charge of* Hospital Assistant ISAC AARON.

This dispensary was opened on 22nd February 1884. The buildings are complete with the exception of a cook-house, the furniture and fittings are sufficient. Sanitary arrangements are very defective; there is no conservancy establishment of any kind. The water-supply is ample and good. The total number treated was 2,825 out-door and 5 in-door patients. The most common diseases were malarious fevers, skin diseases, respiratory and rheumatic affections, and bowel complaints. Cholera was epidemic during the month of March, April, and May: 17 cases were treated with 8 deaths. Seven major operations were performed. Vaccination is performed by a vaccinator from Surat. The dispensary was inspected by the Civil Surgeon, Surat, in July. The total cost was Rs. 1,694-8-5, the cost per patient Re. 0-9-6.

BROACH COLLECTORATE.

CIVIL HOSPITAL, BROACH.—*In charge of* Surgeon-Major S. B. HALIDAY.

Conservancy and Water Supply.—The conservancy arrangements of the town are not satisfactory, drainage is very defective. The water-supply from wells and river and rain water stored in reservoirs is defective.

Buildings.—The hospital buildings are in good repair, accommodation is sufficient, the ventilation good, quarters for the medical subordinates are required.

General Health.—The general health of the population was fair, but cholera prevailed from February to June; there were 295 attacks with 121 deaths.

Attendance of Patients.—The total number treated was 383 in-door and 9,590 out-door patients as compared with 444 and 9,717 respectively in the previous year.

Prevailing Diseases.—The most common diseases treated are malarious fevers, skin diseases, respiratory affections, ear diseases, rheumatic and syphilitic affections, and affections of the stomach and bowels.

Surgical Operations.—There were 43 major and 1,169 minor operations performed during the year.

Mortality and its causes.—There were 31 deaths in hospital, the chief causes were debility, cholera, and diarrhœa.

Vaccination.—Is carried on by the municipal vaccinator.

Medico-legal cases.—Nine *post-mortem* examinations were made, and opinion was given in 40 other medico-legal cases.

Conduct of Establishment.—Has given satisfaction.

Cost.—The total cost was Rs. 14,239-14-7, the cost per patient Rs. 1-6-10 as compared with Rs. 14,052-7-4 and Rs. 1-6-1 respectively in 1883.

GRANT-IN-AID DISPENSARIES.

ANKLESHVAR.—*In charge of* Hospital Assistant LAXUMON ANANT.

The new building has been completed and was occupied in April 1884. The accommodation is sufficient. The committee held quarterly meetings. The town is kept fairly clean. The water-supply is good and abundant. The total number treated was 12,327 out-door and 17 in-door patients as compared with 11,696 and 4 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, respiratory and rheumatic affections, diarrhœa, and ophthalmia. Cholera prevailed in the town and neighbourhood in March, April, and May. Vaccination is carried on by the táluka vaccinator, 203 children were vaccinated. Three *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Broach, in January, June, and December. The total cost was Rs. 1,722-15-5, the cost per patient Re. 0-2-2 as compared with Rs. 1,413-12-8 and Re. 0-1-0 respectively in the previous year.

ILÁV.—*In charge of* Hospital Assistant PHEROZSHA DINSHAJI COOPER.

The urgent repairs to the building have been executed, quarters for the servants are still required. The committee visited the dispensary six times during the year. The sanitary condition of the town is unsatisfactory. The water-supply is ample and of good quality. The total number treated was 4,645 out-door and 5 in-door patients as compared with 4,549 and 5 respectively in the previous year. The prevailing diseases were malarious fevers, skin diseases, respiratory affections, ophthalmia, and diarrhœa. Small-pox and measles prevailed during the months of August, September, and October. Ninety-one children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Broach, in January, June, and December. The total cost was Rs. 1,054-13-2, the cost per patient Re. 0-3-7 as compared with Rs. 956-5-4 and Re. 0-3-4 respectively in the previous year.

HÁNSOT.—*In charge of* Hospital Assistant GANESH GOPAL.

The dispensary is situated in a hired house: the question of erecting a new building is under consideration. Furniture and fittings are according to the regulations. The institution was visited four times by the committee during the year. Sanitary arrangements are not attended to. The water-supply is abundant and of good quality. The total number treated was 5,505, all out-door patients, as compared with 5,129 in the previous year. The prevailing diseases were malarious fevers, skin diseases, respiratory affections, ophthalmia, and inflammation of the ear. Cholera was present in the months of March, April, and May. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Broach, in January, June, and December. The total cost was Rs. 1,308-10-9, the cost per patient Re. 0-3-9 as compared with Rs. 1,336-5-11 and Re. 0-4-2 respectively in the previous year.

JAMBUSAR.—*In charge of* Hospital Assistant MALHAR SITARAM.

The building is conveniently situated, and is in good repair. The furniture is sufficient and serviceable. The committee visited the dispensary sixteen times and take much interest in the institution. The town is kept fairly clean: public latrines have been established. The water-supply is plentiful and of good quality. The total number treated was 8,452 out-door and 70 in-door patients as compared with 7,638 and 90 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, inflammation of the ear, respiratory and rheumatic affections, and ophthalmia. Cholera prevailed in May, June, and July, there were 323 cases and 155 deaths. Four *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Broach, in January, June, and December. The total cost was Rs. 2,144-13-9, the cost per patient Re. 0-4-0 as compared with Rs. 1,023-5-6 and Re. 0-2-1 respectively in the previous year.

A'MOD.—*In charge of* Hospital Assistant BHÁSKER SITÁRÁM.

The building is suitable and in good order, there is no latrine. Furniture is sufficient. The committee visited the dispensary twelve times during the year. The sanitary condition of the town is unsatisfactory, the water-supply is abundant and good. The total number treated was 4,305 out-door and 14 in-door patients as compared with 4,198 and 4 respectively in the previous year. The prevailing diseases were skin diseases, malarious fevers, inflamma-

tion of the ear and respiratory affections. Five cases of cholera occurred, 3 proved fatal. Three *post-mortem* examinations were made during the year. The dispensary was inspected by the Civil Surgeon, Broach, in January, June, and December. The total cost was Rs. 1,591-13-1, the cost per patient Re. 0-5-10 as compared with Rs. 1,778-0-9 and Re. 0-6-9 respectively in the previous year.

VÁGRA.—*In charge of* Passed Pupil TUKARAM NARAYAN.

The new building was occupied on the 1st April 1884. Individual members of the committee visit the dispensary frequently. The sanitary condition of the town is unsatisfactory. The water-supply from wells is insufficient and liable to pollution. The total number treated was 2,765 out-door and 12 in-door patients as compared with 3,215, all out-patients, in the previous year. Skin diseases, malarious fevers, ophthalmia, and respiratory affections were the most common diseases. There was no epidemic in the village. Vaccination is carried on by the táluka vaccinator. One *post-mortem* examination was made. The dispensary was inspected by the Civil Surgeon, Broach, in January, June, and November. The total cost was Rs. 601-14-0, the cost per patient Re. 0-3-5 as compared with Rs. 551-12-4 and Re. 0-2-8 respectively in the previous year.

KAVI.—*In charge of* Passed Pupil CHUNILAL RAMDAS.

This dispensary was opened on the 9th June 1884. The building occupied is in a good state of repair. The furniture is in good order. There is no committee, but the Police Patel visited the dispensary four times. Conservancy arrangements are not satisfactory. The water-supply is abundant and of good quality. The total number treated was 2,936 out-door and 2 in-door patients. Malarious fevers, skin diseases, respiratory affections, and inflammation of the ear were the most common diseases treated. Nine major operations were performed. The dispensary was inspected by the Civil Surgeon, Broach, in December. The total cost was Rs. 659-7-7, the cost per patient Re. 0-3-7.

KAIRA COLLECTORATE.

CIVIL HOSPITAL, KAIRA.—*In charge of* Surgeon W. A. CORKERY.

Conservancy and Water Supply.—The town is kept fairly clean and conservancy arrangements attended to, but there is still room for improvement. The water-supply from the rivers and wells is abundant and of good quality.

Buildings.—The hospital is conveniently situated and is kept in good repair. Improvements in the ventilation of the dead-house and in the lighting of the operating room are required. The erection of quarters for the subordinates would increase the accommodation of the hospital.

General Health.—The general health of the town and district compares favourably with last year. Cholera prevailed in parts of the district but not in the town.

Attendance of Patients.—The total number treated was 280 in-door and 3,964 out-door patients as compared with 316 and 4,305 respectively in the previous year.

Prevailing Diseases.—The most common diseases were malarious fevers, skin diseases, diseases of the ear, eye, and lungs, and syphilitic and rheumatic affections.

Surgical Operations.—There were 19 major surgical operations performed, they include 2 lithotomies and 3 amputations.

Mortality and its causes.—There were twelve deaths in hospital, of these 5 died within 48 hours of admission, being in a hopeless condition from the first.

Vaccination.—Is carried on by a public vaccinator under the Sanitary Department.

Medico-legal cases.—Twenty eight *post-mortem* examinations were made, and opinion was given in several other medico-legal cases.

Conduct of Establishment.—The conduct of the members of the subordinate staff and of the hospital servants has been satisfactory.

Cost.—The total cost was Rs. 9,902-13-0, the cost per patient Rs. 2-5-4 as compared with Rs. 8,860-7-10 and Rs. 1-14-8 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

MEHMADABAD.—*In charge of* Hospital Assistant VITHAL BALVANT.

The buildings are kept in good repair, quarters for the medical officer are required. The furniture and fittings are complete. The committee met eleven times during the year. The sanitary condition of the town is fairly good. The water-supply is good and abundant.

The total number treated was 10,867 out-door and 104 in-door patients as compared with 11,130 and 77 respectively in the previous year. The most common diseases were malarious fevers, rheumatic affections, eye diseases, bowel complaints, and respiratory and skin affections. There was no epidemic. Two major surgical operations were performed. There were 220 successful vaccinations. The dispensary was inspected by the Civil Surgeon, Kaira, in February and in August. The total cost was Rs. 2,058-11-11, the cost per patient Re. 0-3-0 as compared with Rs. 1,658-7-9 and Re. 0-2-4 respectively in the previous year.

NADÁID.—*In charge of* Hospital Assistant RAMSING.

The building is in good repair, is well suited for the purpose, and is provided with the necessary furniture. The committee visited the dispensary fourteen times during the year. The sanitary condition of the town is fairly good. The water-supply is ample and of good quality. The total number treated was 17,563 out-door and 117 in-door patients as compared with 16,007 and 99 respectively in the previous year. The most common diseases were skin diseases, malarious fevers, ophthalmia, and respiratory affections. Four cases of cholera occurred in the town: the disease prevailed in some of the surrounding villages. Several major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. Twelve *post-mortem* examinations were made and opinion given in numerous other medico-legal cases. The dispensary was inspected in February and July by the Civil Surgeon, Kaira. The total cost was Rs. 3,140-6-11, the cost per patient Re. 0-2-10 as compared with Rs. 1,534-14-5 and Re. 0-1-6 respectively in the previous year.

BORSAD.—*In charge of* Hospital Assistant S. SOLOMON.

The building is in good repair and the furniture and fittings are sufficient. The committee meet quarterly. The sanitary condition of the town is indifferent, the water-supply abundant and good. The total number treated was 9,351 out-door and 150 in-door patients as compared with 8,477 and 105 respectively in the previous year. The most common complaints were skin diseases, ophthalmia, malarious fevers, inflammation of the ear, and rheumatic and respiratory affections. Cholera prevailed in June, July, and August. Five major surgical operations were performed. There were 270 successful vaccinations. The dispensary was inspected by the Civil Surgeon, Kaira, in January and October. The total cost was Rs. 1,963-14-7, the cost per patient Re. 0-3-3 as compared with Rs. 1,302-13-11 and Re. 0-2-5 respectively in the previous year.

MADHA.—*In charge of* Hospital Assistant SAYANA BALU.

The new building has been occupied: there are no quarters for the medical officer and servants. The furniture and fittings are in good order and sufficient. The members of the committee visit the dispensary frequently, the chairman occasionally. The sanitary condition of the town is unsatisfactory. The water-supply is abundant and good. The total number treated was 7,467 out-door and 22 in-door patients as compared with 6,926 and 26 respectively in the previous year. The most common diseases were those of the skin, ophthalmia, malarious fevers, respiratory affections, and diarrhœa. Cholera prevailed in July and August: 30 cases were treated with 18 deaths. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Kaira, in January and September. The total cost was Rs. 1,233-4-7, the cost per patient Re. 0-2-7 as compared with Rs. 777-14-0 and Re. 0-1-9 respectively in the previous year.

DÁKOR.—*In charge of* Hospital Assistant RAMCHANDRA GANPAT.

The buildings are in good order, the furniture and fittings are sufficient and serviceable. Meetings of the committee are held quarterly. The sanitary condition of the town is fairly good. The water-supply is good and abundant. The total treated was 9,405 out-door and 163 in-door patients as compared with 9,867 and 145 respectively in the previous year. The prevailing diseases were skin diseases, malarious fevers, respiratory affections, ophthalmia, rheumatic and syphilitic affections, and diarrhœa. Thirteen cases of cholera with 4 deaths were treated during the year. The dispensary was inspected by the Civil Surgeon, Kaira, in January and August. The total cost was Rs. 1,999-3-1, the cost per patient Re. 0-3-4 as compared with Rs. 1,394-11-10 and Re. 0-2-2 respectively in 1883.

KAPADVANJ.—*In charge of* Hospital Assistant BALAJI MAKUND.

The buildings are in good state of repair. The committee visit the dispensary every month. The sanitary condition of the town is fairly good. The water-supply is good and abundant. The total number treated was 16,240 out-door and 78 in-door patients as compared with 13,485 and 53 respectively in the previous year. The most common complaints were skin diseases, malarious fevers, ophthalmia, inflammation of the ear, and rheumatic and respiratory affections. Small-pox appeared in March and April, and cholera occurred from May to August; there were 37 cases and 16 deaths. There were 530 successful vaccinations. The dispensary was inspected by the Civil Surgeon, Kairá, in January and in October. The total cost was Rs. 2,057-10-5, the cost per patient Re. 0-2-0 as compared with Rs. 1,009-13-5 and Re. 0-1-2 respectively in the previous year.

PANCH MAHA'LS.

CIVIL HOSPITAL, GODHRA, PANCH MAHÁLS.—*In charge of* Surgeon K. S. NARIMAN.

Conservancy and Water Supply.—The sanitary arrangements of the town are very defective though the municipality are endeavouring to improve them. The water-supply from wells, the river, and a tank is abundant, but that from the tank is liable to pollution.

Buildings.—The buildings are those formerly used as a dispensary with certain alterations and additions. The pauper ward is low and not well suited for the accommodation of the sick. The police ward is also very low and badly ventilated. There are no quarters for the 2nd class servants.

General Health.—The general health of the town and district was better than in former years, though both cholera and small-pox occurred. There were 24 deaths from the former and 15 from the latter disease.

Attendance of Patients.—The total number treated was 353 in-door and 7,507 out-door patients as compared with 413 and 6,179 respectively in the previous year.

Prevailing Diseases.—The most common diseases were malarious fevers, rheumatic affections, eye and ear diseases, and affections of the lungs, bowels, and skin.

Surgical Operations.—Eighteen major surgical operations were performed and included 3 operations for stone in the bladder.

Mortality and its causes.—There were 13 deaths among in-patients. The chief causes were diarrhœa and remittent fever.

Vaccination.—Is carried on by the Local Fund vaccinator.

Conduct of Establishment.—Is reported as being highly satisfactory.

Remark.—The Civil Hospital was removed from Dohad to Godhra on the 18th March, the dispensary formerly at Godhra being established at Dohad.

Cost.—The total cost was Rs. 10,321-11-8, the cost per patient Rs. 1-5-0 as compared with Rs. 9,814-7-0 and Rs. 1-7-0 respectively in the previous year.

GOVERNMENT DISPENSARY.

DOHAD.—*In charge of* Assistant Surgeon KASIM VIRJI PATEL, L. M.

During the year the civil hospital was moved from Dohad to Godhra and the dispensary from Godhra to Dohad. It occupies the old hospital buildings which are in a good state of repair, but a dead-house is much wanted. There is no committee. Conservancy is fairly well attended to, but there is still room for improvement. The water-supply is abundant but liable to contamination. The total number treated was 5,120 out-door and 429 in-door patients. The prevailing diseases were malarious fevers, ophthalmia, skin diseases, intestinal worms, and respiratory affections. Cholera appeared in April and July. There were 305 successful primary and 57 re-vaccinations. This duty is carried out by the Local Fund vaccinator. The dispensary was inspected by the Civil Surgeon, Panch Mahâls, on the 11th November. For the period that the dispensary was at Godhra before its removal, namely, from the 1st January to 17th March, the number treated was 1,773 out-door and 69 in-door patients. The most common diseases were malarious fevers, skin diseases, intestinal worms, respiratory and rheumatic affections, and ophthalmia. One major operation was performed. Small-pox was epidemic. The dispensary was inspected by the Civil Surgeon on the 29th February.

AHMEDABAD COLLECTORATE.

HATTESING PREMABHAI CIVIL HOSPITAL, AHMEDABAD.—*In charge of* Surgeon-Major JOHN ROBB, M.D.

Conservancy and Water Supply.—No change has taken place in the conservancy of the city. Considerable attention is paid to sanitary matters. The water-supply is abundant but of inferior quality.

Buildings.—The present buildings are in good repair, the question of adding to the accommodation is still under consideration. The furniture and fittings are in fair condition.

General Health.—The general health of the city and district has been on the whole good. A few cases of small-pox occurred and cholera occurred in June but did not assume an epidemic form.

Attendance of Patients.—The total number treated was 1,782 in-door and 18,930 out-door patients as compared with 1,927 and 17,973 respectively in the previous year.

Prevailing Diseases.—The most common diseases treated were malarious fevers, skin diseases, ulcers, ophthalmia, abscess, and respiratory affections.

Surgical Operations.—There were 130 major surgical operations performed; they include 22 lithotomies and 23 amputations.

Mortality and its causes.—Among in-patients 94 deaths were recorded. The chief causes of death were bowel complaints, respiratory diseases, cholera, fevers, and injuries.

Vaccination.—Is carried on by the municipal vaccinator; the number of successful vaccinations was 4,133.

Medico-legal cases.—Exclusive of 14 *post-mortem* examinations made, 422 medico-legal cases were sent for report.

Conduct of Establishment.—The medical officer expresses general satisfaction with the conduct of the establishment, and especially mentions for favourable notice the conduct of 1st class Hospital Assistant Luxmonsing Arjoonsing.

Cost.—The total cost was Rs. 24,903-4-5, the cost per patient Rs. 1-3-2 against Rs. 24,260-6-1 and Rs. 1-3-6 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

RÁIPUR.—*In charge of* Hospital Assistant BHAU SAKHARAM.

The buildings are in good repair. The furniture and fittings are serviceable. The committee visited the institution twelve times. The sanitary arrangements of the town are well attended to. The water-supply is good and abundant. The total treated was 15,159 out-door and 32 in-door patients as compared with 14,078 and 36 respectively in the previous year. The prevailing diseases were malarious fevers, skin diseases, ophthalmia, and diseases of the ear, respiratory and rheumatic affections, diarrhœa and dysentery. Four cases of cholera were treated with 3 deaths. Sixteen major surgical operations were performed. Vaccination is performed by a municipal vaccinator, 624 children were successfully vaccinated at the dispensary. The institution was inspected by the Surgeon General in December and by the Civil Surgeon, Ahmedabad, in May and in November. The total cost was Rs. 3,635-4-2, the cost per patient Re. 0-3-9 as compared with Rs. 1,656-15-3 and Re. 0-1-10 respectively in 1883.

SANAND.—*In charge of* Passed Pupil JOSEPH BENJAMIN.

The building is in good repair, the accommodation is sufficient. The furniture is sufficient. The dispensary was frequently visited by the Mámlatdár. The sanitary condition of the town is bad. The water-supply is abundant and of fair quality. The total treated was 8,324 out-door and 61 in-door patients as compared with 9,177 and 39 respectively in the previous year. The most common complaints were skin diseases, malarious fevers, ophthalmia, ulcers, and respiratory diseases. Vaccination is carried on by the táluka vaccinator. Two major surgical operations were performed. The dispensary was inspected by the Civil Surgeon of Ahmedabad in January and October. The total cost was Rs. 700-15-10, the cost per patient Re. 0-1-4 as compared with Rs. 1,319-14-1 and Re. 0-2-3 respectively in the previous year.

VIRAMGÁM.—*In charge of* Hospital Assistant NARSU SAYAJI.

The buildings are in good order, the furniture and fittings are sufficient. The committee visit the dispensary every month. The sanitary arrangements are defective. The water-supply is insufficient and liable to pollution. The total number treated was 8,004 out-door and 134 in-door patients as compared with 6,480 and 153 respectively in the previous year. The prevailing diseases were malarious fevers, skin diseases, ophthalmia, and respiratory and rheumatic affections. Cholera prevailed in May, August, and September; there were 61 attacks with 22 deaths. Vaccination is carried on by the táluka vaccinator. Five *post-mortem* examinations were made. The dispensary was inspected in March and October by the Civil Surgeon, Ahmedabad. The total cost was Rs. 2,259-8-8, the cost per patient Re. 0-4-5 as compared with Rs. 2,189-0-4 and Re. 0-5-3 respectively in the previous year.

DHOLKA.—*In charge of* Hospital Assistant RAMCHANDRA GOVIND.

The buildings are in fair repair. Some petty repairs to the roof are required. The furniture is in good condition and sufficient. The committee visit the dispensary once a month. The sanitary condition of the town is unsatisfactory: measures for its improvement are being taken. The water-supply is abundant and of fair quality. The total treated was 7,811 out-door and 126 in-door patients as compared with 8,835 and 77 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, ulcers, respiratory affections, and diseases of the eye and ear. There was no epidemic. Vaccination is carried on by a municipal vaccinator. Ten *post-mortem* examinations were made at the request of the police. The dispensary was visited by the Civil Surgeon, Ahmedabad, in January and in December. The total cost was Rs. 2,106-5-7, the cost per patient Re. 0-4-2 as compared with Rs. 1,171-7-6 and Re. 0-2-1 respectively in the year 1883.

DHANDHUKA.—*In charge of* Hospital Assistant BABURAV NARAYAN.

The buildings are in good repair, with the exception of the dead-house and latrine. The furniture and fittings are sufficient and in good order. The sanitary condition of the town is fair. The water-supply is good and sufficient. The total number treated was 6,003 out-door and 70 in-door patients as compared with 6,785 and 80 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, ulcers, inflammation of the ear, rheumatism, ophthalmia, and lung diseases. There was no epidemic. Vaccination is performed by a Local Fund vaccinator. Five *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Deputy Sanitary Commissioner, Eastern Gujarát Circle, on 29th November. The total cost was Rs. 1,645-6-3, the cost per patient Re. 0-4-4 as compared with Rs. 1,762-14-7 and Re. 0-4-1 respectively in the previous year.

DHOLERA.—*In charge of* Passed Pupil HARGOVANDAS NATHUBHAI.

The building, a hired one, is not well suited to the purpose. There is no dead-house. The furniture is sufficient. The committee visited the dispensary four times. The sanitary condition of the town is hardly satisfactory, but conservancy is attended to so far as funds are available. The water-supply is deficient, but steps are being taken to improve it. The total number treated was 4,548 out-door and 91 in-door patients against 4,030 and 90 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, rheumatic and respiratory affections, and inflammation of the ear. Small-pox prevailed in March and April. There were 296 successful vaccinations. The total cost was Rs. 1,425-14-9, the cost per patient Re. 0-4-11 as compared with Rs. 1,168-8-5 and Re. 0-4-6 respectively in the year 1883.

PARÁNTIJ.—*In charge of* Hospital Assistant ANNAJI PANDURANG.

Some repairs are required to the roof of the building. The furniture and fittings are sufficient. The dispensary is frequently visited by members of the committee. The sanitary condition of the town is unsatisfactory. The water-supply is ample and of good quality. The total treated was 6,980 out-door and 50 in-door patients as compared with 4,738 and 37 respectively in the previous year. The most common complaints were skin diseases, malarious fevers, ophthalmia, and respiratory affections. Cholera was present from May to August; 12 cases were treated. Vaccination is carried on by the táluka vaccinator. Three *post-mortem* examinations were made. The total cost was Rs. 1,483-6-3, the cost per patient Re. 0-3-4 against Rs. 1,120-0-3 and Re. 0-3-9 respectively in the previous year.

MODÁSA.—*In charge of* Hospital Assistant RAMA MALUP.

The building is in good order. Some additions are required, and certain articles of furniture are wanting. The committee met every month. There is room for improvement in the sanitation of the town. The water-supply is abundant and of fair quality. The total number treated was 9,158 out-door and 68 in-door patients against 7,308 and 80 respectively in the previous year. The most common complaints were skin diseases, malarious fevers, ophthalmia, rheumatism, and inflammation of the ear. There was no epidemic. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 1,676-3-7, the cost per patient Re. 0-2-10 as compared with Rs. 1,581-15-6 and Re. 0-3-5 respectively in the previous year.

RANCHHODLAL DISPENSARY, AHMEDABAD.—*In charge of* Assistant Surgeon NILKANTH DAYABHAI, L.M. & S.

The buildings are in good order. The furniture and fittings are complete. The committee visited the dispensary eleven times, and it was frequently visited by Mr. Ranchhodlal, the founder. The sanitary condition of the district in which the dispensary is situated is on the whole good. The water-supply is sufficient and of fair quality. The total number treated was 11,250 out-door and 74 in-door patients as compared with 8,313 and 58 respectively in the previous year. The most common complaints were malarial fevers, skin diseases, inflammation of the ear, ophthalmia, and respiratory and rheumatic affections. Cases of cholera occurred in July, August, and September. Thirty-three major surgical operations were performed. Vaccination is performed by a municipal vaccinator. The dispensary was inspected by the Civil Surgeon, Ahmedabad, in May and in November. The total cost was Rs. 3,545-14-11, the cost per patient Re. 0-5-0 as compared with Rs. 2,122-1-3 and Re. 0-4-0 respectively in the year 1883.

ENDOWED DISPENSARY.

BAICHARDAS DISPENSARY, AHMEDABAD.—*In charge of* Assistant Surgeon K. B. COOPER.

The buildings are in very good order; a dead-house and a separate ward are to be provided. There were four meetings of the committee. The sanitary condition of the neighbourhood is defective; the water-supply is sufficient, but liable to pollution. The total number treated was 12,013 out-door and 93 in-door patients against 11,139 and 109 respec-

tively in the previous year. The most common diseases were skin diseases, ophthalmia, malarious fevers, and respiratory affections. There was no epidemic. Fifty-five major surgical operations were performed including 12 lithotomies. The dispensary was inspected by the Civil Surgeon in April and in November. The total cost was Rs. 5,134-12-11, the cost per patient Re. 0-6-9 against Rs. 5,684-9-4 and Re. 0-8-1 respectively in the year 1883.

MISSION DISPENSARY.

GOGHA.—*In charge of* Mr. H. DOBSON OSBORNE, L.R.C.P. & S.E.

The buildings are kept in thorough repair. The committee visited the dispensary six times, and individual members many times during the year. No improvement has been made in the conservancy and sanitation during the year. The water-supply is good. The total treated was 7,012 out-door and 37 in-door patients as compared with 5,725 and 34 respectively in the previous year. The most common diseases were ague, rheumatism, eye, ear, respiratory, and bowel complaints, intestinal worms, and skin diseases. Some cases of small-pox and measles occurred in February and March. Three major surgical operations were performed. There were 304 successful vaccine operations. The total cost was Rs. 1,410-12-2, the cost per patient Re. 0-3-2 against Rs. 1,136-10-9 and Re. 0-3-2 respectively in the year 1883.

GOVERNMENT DISPENSARY.

KARAGHODA.—*In charge of* Assistant Surgeon B. H. NANAVATI, L.M. & S.

The building is in good repair. The furniture is in good order. The accommodation is not sufficient. There is no dispensary committee. The sanitary arrangements of the village are not satisfactory. The water-supply is of very inferior quality. The total number treated was 2,975 out-door and 74 in-patients as compared with 2,635 and 174 respectively in the previous year. The most common complaints were malarious fevers, skin diseases, ophthalmia, and respiratory affections. There was an outbreak of small-pox in April; 20 patients were treated. Thirty-eight children were vaccinated successfully. The dispensary was inspected in February and December by the Civil Surgeon, Ahmedabad. The total cost was Rs. 2,224-5-9, the cost per patient was Re. 0-11-8 against Rs. 1,336-14-4 and Re. 0-[illegible]7 respectively in the year 1883.

MAHI KA'NTHA.

CIVIL HOSPITAL, SÁDRA.—*In charge of* Assistant Apothecary J. MASCARENHAS.

Conservancy and Water Supply.—The conservancy of the camp is fairly satisfactory, but that of the village continues unsatisfactory, though steps have been taken to improve it. The water-supply is ample and of good quality.

Buildings.—The hospital building is well situated and in good repair. A separate cholera ward has been built in a convenient place. The furniture is in good condition.

General Health.—The general health has not been so good; there was greater prevalence of malarial fevers, and both small-pox and cholera appeared to a slight extent.

Attendance of Patients.—The total number treated was 19 in-door and 5,489 out-door patients as compared with 25 and 4,821 respectively in the previous year.

Prevailing Diseases.—The most common complaints were malarious fevers, skin diseases, ophthalmia, bronchitis, diarrhœa, and dysentery.

Surgical Operations.—Two major and 390 minor surgical operations were performed during the year.

Mortality and its causes.—There were no deaths in hospital, among out-patients 8 were recorded, including 2 from tetanus and 3 from bronchitis.

Vaccination.—There were 137 successful primary and 9 re-vaccinations.

Conduct of Establishment.—Has been very satisfactory.

Cost.—The total cost was Rs. 3,181-11-8, the cost per patient Re. 0-9-2 against Rs. 3,435-11-8 and Re. 0-11-3 respectively in 1883.

KA'THIA'WA'R.

CIVIL HOSPITAL, RAJKOT.—*In charge of* Surgeon-Major F. C. BARKER.

Conservancy and Water Supply.—Conservancy arrangements continue to be efficiently carried out. The water-supply was sufficient, though much diminished in the hot season owing to deficient rainfall in the previous year.

Buildings.—Improvements in the shape of erecting an operating room and re-roofing are being carried out. Some additional furniture has been supplied.

General Health.—The public health has been good, no epidemic having occurred.

Attendance of Patients.—The total number treated was 510 in-door and 4,229 out-door patients as compared with 615 and 4,170 respectively in the previous year.

Prevailing Diseases.—The most common diseases were fevers, bronchial affections, eye and ear diseases, stomach and bowel complaints, intestinal worms, and skin diseases.

Surgical Operations.—Fifty-five major surgical operations were performed, including 24 lithotomies, 11 removal of tumours, and 4 amputations of the breast and 4 of the leg.

Mortality and its causes.—There were 22 deaths among in-patients. Four deaths occurred after operation; the others were from various causes.

Vaccination.—Is performed by a special establishment under the Superintendent of Vaccination, Western Gujarát Circle.

Conduct of Establishment.—With one exception has given satisfaction.

Cost.—The total cost was Rs. 14,775-9-5, the cost per patient Rs. 3-1-10 as compared with Rs. 1,9294-4-6 and Rs. 4-0-6 respectively in the year preceding.

WADHWÁN DISPENSARY.—*In charge of* Assistant Surgeon THAKURDAS KIKABHAI DALAL, L.M. & S.

The buildings are in a good state of repair; the furniture is in good order. The dispensary is visited from time to time by the Political officers. The sanitary condition of the town is good. The water-supply is brackish. The total number treated was 4,347 out-door and 100 in-door patients against 4,048 and 106 respectively in the previous year. The most common diseases were malarious fevers, skin diseases, intestinal worms, ophthalmia, rheumatic and respiratory affections, and bowel complaints. There was no epidemic. Fifteen major surgical operations were performed. 113 children were successfully vaccinated. Two *post-mortem* examinations were made at the request of the police. The dispensary was visited by the Surgeon-General in December. The total cost was Rs. 3,854-6-8, the cost per patient Re. 0-13-10 as compared with Rs. 3,909-12-10 and Re. 0-15-0 respectively in the year 1883.

CUTCH.

CIVIL HOSPITAL, BHUJ.—*In charge of* Mr. DORABJI HORMASJI, G.G.M.C.

Conservancy and Water Supply.—Considerable attention is paid by the municipality to sanitary arrangements. The water-supply is from wells in the neighbourhood of two large tanks; it is abundant and good.

Buildings.—The hospital buildings are well suited for the purpose, accommodation sufficient, they are in good repair, the furniture and fittings are in good order.

General Health.—The general health of the town and district was satisfactory, with the exception of a slight prevalence of small-pox and measles. There was no epidemic, and admissions from fevers were less numerous.

Attendance of Patients.—The total number treated was 449 in-door and 12,962 out-door patients against 436 and 12,081 respectively in the previous year.

Prevailing Diseases.—The most common causes of admission were ague, rheumatism, syphilis, conjunctivitis, diseases of the ear, bronchitis, intestinal worms, and ulcers.

Surgical Operations.—Sixty major surgical operations were performed, they included 28 lithotomies and 11 amputations.

Mortality and its causes.—There were 16 deaths among in-patients; phthisis, dysentery, disease of the spleen, vesical calculus, and gangrene being the chief causes of death.

Vaccination.—Is performed by the State vaccinator. The number of primary vaccinations was 911, of re-vaccinations 241.

Conduct of Establishment.—All the members of the establishment conducted themselves satisfactorily.

Cost.—The total cost was Rs. 12,110-14-7, the cost per patient Re. 0-14-5 as compared with Rs. 13,023-5-11 and Rs. 1-0-7 respectively in the previous year.

CUTCH MA'NDVI.—*In charge of* Mr. B. J. DAMANIA.

The building is in good repair, the accommodation ample, and the furniture and fittings complete. There is no committee. Attention is paid to conservancy and sanitary arrangements. The water-supply is good and sufficient. The total number treated was 19,971 out-door and 179 in-door patients, as compared with 19,896 and 132 respectively in the previous year. The most common diseases were intestinal worms, skin diseases, ophthalmia, malarious fevers, respiratory affections, and inflammation of the ear. There was no epidemic. There were 927 persons successfully vaccinated. Several major surgical operations were performed. The total cost was Rs. 7,566-5-11, the cost per patient Re. 0-6-0 as compared with Rs. 6,634-15-9 and Re. 0-5-3 respectively in the year 1883.

CUTCH ANJA'R.—*In charge of* Native Doctor TULSIDA'S HARICHAND.

The building is in good order; the furniture and fittings complete; a new store-room has been built. There is no committee. The sanitary arrangements of the town are well looked after. The water-supply is abundant and of good quality. The total number treated was 17,140 out-door and 73 in-door patients against 16,393 and 76 respectively in the previous year. The most common complaints were skin diseases, malarious fevers, ophthalmia, intestinal worms, and respiratory affections. Small-pox, measles, and chicken-pox prevailed from February to May. Ten major surgical operations were performed. Vaccination is carried on by a State vaccinator. The total cost was Rs. 3,279-11-2, the cost per patient was Re. 0-3-0 as compared with Rs. 3,271-3-8 and Re. 0-3-2 respectively in the previous year

CUTCH NALIYA.—*In charge of* Native Doctor A'TMA'RA'M KESHAV.

The building is in good order, and the furniture and fittings complete. There is no committee. Sanitation is carefully attended to. The water-supply is abundant. The total number treated was 5,613, all out-door patients, as compared with 5,483 in the previous year. The most common diseases were skin diseases, ophthalmia, malarious fevers, and respiratory affections. There was no epidemic. Vaccination is carried on by a State vaccinator. The total cost was Rs. 1,401-0-6, the cost per patient Re. 0-3-11 as compared with Rs. 1,353-3-6 and Re. 0-3-11 respectively in the year 1883.

CUTCH RA'PUR.—*In charge of* Native Doctor JANATALLY PIRMAHOMED.

The buildings are in good repair, the furniture and fittings sufficient. There is no committee. Some attention is paid to conservancy. The water-supply is good and abundant. The total number treated was 4,079 out-door and 27 in-door patients as compared with 3,798 and 31 respectively in the previous year. The more common complaints were skin diseases, intestinal worms, ophthalmia, malarious fevers, and respiratory and rheumatic affections. There was no epidemic. Vaccination is carried on by a vaccinator employed by the State. The total cost was Rs. 1,277-12-4, the cot per patient Re. 0-4-11 as compared with Rs. 1,648-2-1 and Re. 0-6-10 respectively in the previous year.

BHACHAO.—*In charge of* Native Doctor HIRJI HANSRAJ.

The building is new and suitably furnished. There is no committee. The sanitary condition of the town is indifferent. The water-supply is not satisfactory. The total number treated was 2,835, all out-door patients. The most common complaints were skin diseases, intestinal worms, respiratory affections, malarious fevers, ulcers, and ophthalmia. There was no epidemic. Vaccination is carried on by a State vaccinator. The total cost was Rs. 6,196-1-10, the cost per patient Rs. 2-2-11.

MHOW.

ENDOWED DISPENSARY.

DORABJI PESTONJI DISPENSARY, MHOW.—*Superintended by* Surgeon-Major W. J. SAUNDERS, *and in charge of* Hospital Assistant KRISHNAPPA.

The buildings, furniture and fittings are all in excellent order. The wards have been paved with stone. The Superintendent visits the dispensary every day. Conservancy is carefully attended to. The water-supply was abundant. The total treated was 7,204 out-door and 45 in-door patients as compared with 7,335 and 55 respectively in the previous year. The more common complaints were malarious fevers, respiratory affections, ophthalmia, skin diseases, and bowel complaints. A few cases of cholera and small-pox occurred. The total cost was Rs. 2,123-15-4, the cost per patient Re. 0-4-8 as compared with Rs. 4,233-13-3 and Re. 0-9-1 respectively in the year 1883.

SIND.

In Administrative Charge of Deputy Surgeon-General J. PINKERTON, M.D.

Deputy Surgeon-General J. Pinkerton brings to notice the names of the officers and subordinates who are, in his opinion, deserving of special commendation:—Surgeons-Major Keelan and Keith, Surgeon Dimmock, Assistant Surgeon Dadáchánji, Apothecaries D'Lima and Mullen, Assistant Apothecary Machado, and Hospital Assistants Rodrigues, Shaik Shabudin, Hanmantráo Bhoslay, and Pursonsing.

KARA'CHI COLLECTORATE.

CIVIL HOSPITAL, KARÁCHI.—*In charge of* Surgeon-Major J. F. KEITH, M.D.

Conservancy and Water Supply.—The conservancy of the town is stated to be as good as circumstances admit, but it is noted that a system of cesspools is in force. There are public latrines which are carefully attended to and there is an Inspector of private latrines. Certain public stables in the Sadar Bázár are mentioned as offensive, and it is suggested they should be removed outside. In April 1883, the works by which water is brought into Karáchi from the Mullir river were opened, and the municipality has consented to lay on distribution pipes to the hospital. This Mallir water has been tested by the Chemical Analyser, and reported good.

Hospital Buildings.—Are in good condition and fairly adapted for the purpose. One of the wards has been lately flagged, and the medical officer suggests the same addition to the other two wards and verandahs. A railing has also been put up to fence the verandahs of the eastern wing. The hospital latrines are complained of as "thoroughly saturated with excrementitious products," so that thorough disinfection is impossible; the condition entailing, when the wind is easterly, an offensive smell throughout the hospital. Latrines of bamboo and matting are suggested which might be destroyed or moved. A further desideratum is a fence round the compound.

Public Health.—Excepting a slight outbreak of small-pox in the early part of the year, no epidemic disease has occurred, so that the general health of the town and environ may be regarded as having been good.

Details of Treated.—The total number of in-door patients (including remaining) treated during the year was 914, a decrease of 96 on the previous twelve months. Of out-door patients there were 9,173, being an increase of 1,190. The decrease among in-door patients occurs principally under the headings poisoning, respiratory affections, abscesses, debility, and syphilis. The increase of out-door attendance chiefly under malarious fevers, ulcers, rheumatic affections, and anæmia.

Prevailing Diseases.—Malarious fevers, ophthalmic affections, rheumatic maladies, affections of the respiratory organs, abscesses, and boils.

Surgical Operations.—There were 140 operations coming under the heading "major," among them 18 operations for stone in the bladder. From an analysis of these 18 cases given by Surgeon-Major Keith it appears that the average time taken over each operation was 6·8 minutes, the average weight of the stones taken away was 149·8 grains, while the age of the patients varied from 2 years to 45. It is satisfactory to add that all these cases recovered.

Mortality and its causes.—Among the in-door patients there were 54 deaths, the greatest number, *viz.* 7, occurring from remittent fever. From diarrhœa there were 6 deaths and from pneumonia 4. From dysentery 3 deaths are recorded, while accidents of various kinds give 5.

Vaccination.—Is performed by the Sanitary Department, the Civil Hospital being the principal vaccination station.

Conduct of the Hospital Establishment.—Has been good, with the exception of that of the compounder, who has now resigned. The medical officer however complains of office work absorbing too much time.

Cost.—The total cost was Rs. 18,729-1-0, the cost per patient Rs. 1-13-8 as compared with Rs. 21,634-2-3 and Rs. 2-6-5 for the previous year.

CIVIL HOSPITAL, KOTRI.—*In charge of* Apothecary E. H. COOKE.

Conservancy and Water Supply.—Kotri is described as an exceptionally clean town with efficient conservancy arrangements. Water is from the Indus and is said to be comparatively free from impurities.

Hospital Buildings.—The hospital is sufficient as regards accommodation, conveniently situated, and well ventilated.

Public Health.—Epidemic cholera prevailed from the 16th October to the 4th November. Eighty-three cases were treated from the hospital, the mortality being upwards of 68 per cent. In explanation, it is mentioned that many of the cases had been previously

treated by Syeds and Hakims, who use charms. It is also mentioned that unsanitary causes do not account for this outbreak of disease, but there had been an unusual rise of the Indus, and the weather throughout October was more than ordinarily damp. The Apothecary in charge acknowledges the cordial assistance he received from Mr. Shuvindass, the Deputy Collector. With the exception of this epidemic the general health was satisfactory.

Details of Treated.—There were 1,299 in-patients and 15,456 out-patients against 1,173 and 16,184 for the former year.

Prevailing Diseases.—The most common diseases among the in-patients were malarious fevers, rheumatic and syphilitic affections, diseases of the respiratory and digestive organs, and of the cutaneous system including ulcers. A large number of injuries were also treated including fractures, dislocations, contusions, and wounds. The out-door attendance furnished the same class of maladies as the in-door.

Surgical Operations.—One hundred and seven major and 1,887 minor operations were performed. Among the former are enumerated reduction of dislocation of the humerus of two months' standing, abscess of the liver, compound fracture of the upper jaw, and mammary abscess.

Mortality and its causes.—The percentage of deaths to in-door patients treated was 0·8; three dying from diarrhœa, three from injuries, and one from pneumonia.

Vaccination.—This is conducted by the táluka vaccinator under the orders of the Deputy Sanitary Commissioner.

Conduct of the Hospital Establishment.—The conduct and working of the establishment has been satisfactory.

Cost.—The total cost was Rs. 7,838-8-3, the cost per patient Re. 0-7-5 as compared with Rs. 7,768-9-8 and Re. 0-7-1 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

KARÁCHI BANDAR ROAD.—*In charge of* Hospital Assistant HANMANTROW BHOSLE.

The buildings require repair. The furniture with the exception of some articles is in a serviceable condition. The committee visit the dispensary every month. The sanitary condition of the locality is fairly good. The water-supply is good and abundant. The total number treated was 13,334, all out-door patients, as compared with 13,858 in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin diseases, and respiratory affections. Vaccination is carried on under the orders of the Sanitary Department. The dispensary was inspected by the Civil Surgeon, Karáchi, in July and December, and by the Deputy Surgeon General, Sind, in November. The total cost was Rs. 2,533-15-1, the cost per patient Rs. 1-14-4 as compared with Rs. 2,083-15-1 and Re. 0-2-4 respectively in the year 1883.

KARÁCHI LAYARI.—*In charge of* Hospital Assistant PEERÁJEE SEWÁJEE.

The building has been improved by the erection of an aditional verandah. The furniture and fittings are sufficient. Two members of the committee visit the dispensary every month. The sanitary condition of the locality is fair. The water-supply is good and abundant. The total number treated was 12,442, all outpatients, against 11,485 in the previous year. Malarious fevers, ophthalmia, skin diseases, and bowel complaints are the most common diseases. Small-pox and measles were epidemic in the first quarter of the year. The dispensary was inspected by the Civil Surgeon, Karáchi, in July and in December, and by the Deputy Surgeon General, Sind, in November. The total cost was Rs. 2,191-0-11, the cost per patient Re. 0-2-9 as compared with Rs. 1,162-11-8 and Re. 0-1-7 respectively in the previous year.

EDULJEE DINSHAW DISPENSARY, KARÁCHI SADAR BÁZÁR.—*In charge of* Hospital Assistant E. BENJAMIN.

The building is in very good order, the furniture and fittings serviceable and sufficient. Two members of the committee visit the dispensary every month. The sanitary condition of the locality is fairly good. The water-supply is good and abundant. The total number treated was 12,457, all out-door patients, as compared with 13,162 in the previous year. The most common diseases are malarious fevers, eye diseases, respiratory affections, and skin diseases. Vaccination is carried on under the orders of the Sanitary Department. The dispensary was inspected by the Civil Surgeon, Karachi, in July and in December, and by the Deputy Surgeon General, Sind, in November. The total cost was Rs. 2,291-0-1, the cost per patient Re. 0-2-11 as compared with Rs. 1,196-4-6 and Re. 0-1-5 respectively in 1883.

JAMNABAI DISPENSARY, TATTA.—*In charge of* Apothecary A. H. MULLEN.

The usual annual repairs to the buildings are required. A dead-house is needed, the old one having fallen down. The furniture and fittings are in fair condition. The sanitary condition of the town is indifferent. The water-supply is abundant but of inferior quality. The total number treated was 6,648 out-door and 18 in-door patients as compared with 5,733 and 23 respectively in the previous year. The prevailing diseases are malarious

fevers, rheumatism, diseases of the eye, respiratory system, stomach, and bowels and skin. There was no epidemic. There were 142 successful vaccinations. The dispensary was inspected by the Deputy Sanitary Commissioner in March and by the Civil Surgeon in July and December. The total cost was Rs. 4,427-2-1, the cost per patient Re. 0-10-7 as compared with Rs. 3,774-7-0 and Re. 0-10-6 respectively in the previous year.

KETI BANDAR.—*In charge of* Hospital Assistant WÁMAN GANESH.

The building is in a good state of repair. The furniture is sufficient, some articles require repair. The committee meets quarterly; a sub-committee of two visits the dispensary every month. Sanitary arrangements are attended to. The water-supply is abundant and of good quality. The total number treated was 1,755 out-door and 2 in-door patients against 1,660 and 2 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, respiratory affections, ulcers, skin diseases, and rheumatism. Three cases of small-pox occurred; all recovered. There were 71 successful primary vaccinations performed. The total cost was Rs. 1,097-3-1, the cost per patient Re. 0-9-11 as compared with Rs. 715-3-4 and Re. 0-6-11 respectively in the previous year.

JERRUCK.—*In charge of* Hospital Assistant S. A. RYMON.

The building is in good repair, the furniture is sufficient. The committee meet quarterly. The sanitary condition of the town is fair; the water-supply from the Indus is good and abundant. The total number treated was 1,002 out-door and 8 in-door patients as compared with 1,176 and 7 respectively in 1883. The most common diseases were ophthalmia, malarious fevers, ulcers, and skin diseases. There were 34 successful primary vaccinations and one re-vaccination. The dispensary was inspected by the Deputy Sanitary Commissioner in March, and by the Civil Surgeon, Karáchi, in December. The total cost was Rs. 705-10-0, the cost per patient Re. 0-11-2 as compared with Rs. 995-8-8 and Re. 0-13-5 respectively in the previous year.

MIRPUR BATORO.—*In charge of* Passed Pupil SUTRAMDAS RAMCHAND.

The building, a hired one, is quite unsuitable for the purpose. The furniture and fittings are sufficient but old. The committee meets once a month or more frequently if necessary. The sanitary condition of the town receives attention. The water-supply is ample and good. The total number treated was 5,064 out-door and 108 in-door patients as compared with 2,884 and 19 respectively in the previous year. The most common diseases were malarious fevers, conjunctivitis, lung diseases, and bowel complaints. Cholera appeared in November. Forty-seven primary and 4 re-vaccinations were performed. The total cost was Rs. 2,450-10-3, the cost per patient Re. 0-7-6 as compared with Rs. 1,435-2-11 and Re. 0-7-10 respectively in the year 1883.

PARUMAL KHUBCHAND DISPENSARY, SEHWAN.—*In charge of* Hospital Assistant A. X. DESOUZA.

The new building was completed and was occupied on the 8th December. The furniture and fittings are sufficient. The committee visit the dispensary regularly. The sanitary condition of the town is fair. The water-supply is good and abundant. The total number treated was 3,619 out-door and 53 in-door patients as compared with 2,808 and 59 respectively in the previous year. The most common diseases are malarious fevers, ophthalmia, ulcers, rheumatism, and skin diseases. A few cases of cholera occurred in December. Twenty-three major surgical operations were performed. There were 53 primary and 6 re-vaccinations. Five *post-mortem* examinations were made at the request of the police. The Civil Surgeon, Karáchi, inspected the dispensary in December. The total cost was Rs. 2,713-9-1, the cost per patient Re. 0-11-9 as compared with Rs. 6,570-8-11 and Rs. 2-4-8 respectively in the previous year.

GOVERNMENT DISPENSARIES.

THÁNO BULA KHÁN.—*In charge of* Native Doctor M. D'SOUZA.

The buildings are in a fair state of repair, quarters for servants and a dead-house are required. Benches are needed for the convenience of out-patients. There is no committee. There is no system of conservancy, the water-supply is good. The total number treated was 1,025 out-door and 8 in-door patients as compared with 879 and 7 respectively in the previous years. The most common diseases were ophthalmia, malarious fevers, skin diseases, respiratory and rheumatic affections. There was no epidemic. Twenty-two persons were vaccinated. Two *post-mortem* examinations were made. The total cost was Rs. 928-14-4, the cost per patient Re. 0-14-4 as compared with Rs. 734-4-7 and Re. 0-13-3 respectively in the previous year.

MANORA.—*In charge of* Assistant Apothecary J. A. JUDD.

The building is in good repair, some articles of office furniture are required. There is no committee. The sanitary condition is fairly good. The water-supply from the Karáchi mains is good. The total number treated was 1,447, all out-door patients, against 1,007 in the previous year. The most common diseases were malarious fevers, ophthalmia, respiratory affections, diarrhœa, and skin diseases. Two cases of small-pox were imported. Vaccination is carried out under the Sanitary Department. The dispensary was visited by

the Deputy Surgeon General, Sind, in January and May, and by the Civil Surgeon, Karáchi, in July and December. The total cost was Rs. 1,920-0-1, the cost per patient Rs. 1-5-2 as compared with Rs. 1,680-15-10, and Rs. 1-10-8 respectively in 1883.

HYDERABAD COLLECTORATE.

CIVIL HOSPITAL, HYDERABAD.—*In charge of* Surgeon-Major HOLMESTED *to 7th of April; of* Surgeon-Major OGILVIE *to 13th April; of* Surgeon-Major B. C. KEELAN *to end of the year.*

Conservancy and Water Supply.—The conservancy of the city is described as fairly satisfactory. There is a sanitary sub-committee of which the chairman is the civil surgeon. The committee consists of 7 members, two-thirds of whom must be present to form a quorum. The Civil Surgeon however recommends the committee should consist of 3 members only. Water is obtained from the Hyderabad water works, and is pure and wholesome.

Hospital Buildings.—Are conveniently situated and in a thorough state of repair, while the accommodation is all that can be desired.

Public Health.—Was not so good as in the previous year, which is attributed to floods from the Indus overflowing. Cholera appeared on the 24th of October, lasting till the 13th of November, during which period 55 cases were treated, of which number 41 died. The Civil Surgeon acknowleges the support received from the Municipal Commissioner in endeavours to prevent the spread of the disease.

Details of Treated.—The total number of out-patients treated during 1884 was 25,538 against 25,969 for the previous twelve months; of in-door patients there were 908 against 828 for the previous year.

Prevailing Diseases.—The most common diseases among out-door patients were malarious fevers amounting to 12,137 or upwards of 47 per cent. on the total: bowel complaints gave 2,074 cases, and eye and ear affections 2,188. Among in-door patients malarious fevers were also most prevalent.

Surgical Operations.—One hundred and seventy-three major operations were performed, 145 being for stone in the bladder, among whom only one death occurred. The patients' ages varied from 1½ years to 60. From one individual as many as ten stones were removed. Other operations comprise 6 of lithotrity, 2 excisions of the eyeball, three for cataract, and 1 craniotomy. Of minor operations there were 2,677.

Mortality and its causes.—Nineteen casualties occurred, the greater number among pilgrims and wanderers brought to the hospital in an exhausted state. The causes of deaths were 1 after the operation for lithotomy, 1 after the operation for tracheotomy, 1 after removal of cancer, 1 after paracentisis, 1 from remittent fever, 1 jaundice, 1 burn, 1 snake bite, 1 apoplexy, 1 dysentery, 4 diarrhœa, 1 ascitis, 1 gangrene, and 3 pneumonia and among out-door patients 41 died from cholera.

Vaccination.—Is carried out by the municipal vaccinator who performed 1,296 primary and 615 re-vaccinations successfully.

Conduct of the Hospital Establishment.—The medical officers Surgeon-Major Keelan brings to the notice of the Deputy Surgeon General the valuable services rendered by Assistant Surgeons Aquino and Bocaro, and by 1st class Hospital Assistant Samson David. He also states "all the establishment worked well during the year".

Cost.—The total cost was Rs. 13,052-15-4, the cost per patient Re. 0-7-10 as compared with Rs. 12,610-12-1 and Rs. 0-7-6 respectively in the previous year.

TANDO ALAHYAR.—*In charge of* Hospital Assistant E. JACOB.

The buildings are in good repair, and the furniture and fittings are complete. The committee visit the dispensary every month. Conservancy is attended to. The water-supply is good and abundant. The total number treated was 5,160 out-door and 34 in-door patients as compared with 4,690 and 40 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, inflammation of the ear, respiratory, and skin diseases. A few cases of small-pox occurred in the town. Two major surgical operations were performed. One hundred and six persons were successfully vaccinated. Two *post-mortem* examinations were made and opinion given in one other medico-legal case. The dispensary was inspected by the Civil Surgeon, Hyderabad, in January and October. The total cost was Rs. 2,316-11-5, the cost per patient Re. 0-7-1 as compared with Rs. 2,584-4-8 and Re. 0-8-8 respectively in the previous year.

TANDO MAHOMED KHÁN.—*In charge of* Hospital Assistant GOVIND TATIA.

The buildings are in good repair, quarters for the medical officer are under construction and quarters for second class servants are required. The furniture and fittings are complete. The committee meets once a month. The sanitary condition of the town is good. The water-supply is good and abundant. The total number treated was 6,594 out-door and 97 in-door patients as compared with 5,525 and 105 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, skin diseases, and respira-

tory and rheumatic affections. Cholera was epidemic in October and November, 41 cases and 25 deaths. Small-pox was also present in the town. Three major surgical operations were performed. There were 118 primary and 12 re-vaccinations during the year. The dispensary was inspected in January and August by the Civil Surgeon, Hyderabad. The total cost was Rs. 2,526-0-4, the cost per patient Re. 0-6-0 as compared with Rs. 872-10-1 and Re. 0-2-6 respectively in the previous year.

HALA.—*In charge of* Passed Pupil PESTONJI DORABJI TALATI.

The buildings are in good repair, there is no dead-house. The furniture and fittings are in good order and sufficient. The sanitary condition of the town is unsatisfactory, the water-supply is sufficient but liable to pollution. The total number treated was 3,885 out-door and 25 in-door patients as compared with 3,748 and 13 respectively in the previous year. The most common diseases were malarious fevers, ulcers, ophthalmia, respiratory and rheumatic affections, and skin diseases. There was no epidemic. One major surgical operation was performed. There were 67 successful vaccinations. Three *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Hyderabad, in January and October, and by the Deputy Sanitary Commissioner, Sind, in November. The total cost was Rs. 1,351-2-0, the cost per patient Re. 0-5-6 as compared with Rs. 1,158-5-3 and Re. 0-4-11 respectively in the previous year.

THÁRU SHÁH.—*In charge of* Hospital Assistant SAMUEL DAVID.

The building is in need of repair; the furniture and fittings are good and sufficient. The committee meets once a month. The sanitary condition of the town is fair. The water-supply is good and abundant. The total number treated was 2,455 out-door and 44 in-door patients as compared with 2,050 and 24 respectively in the previous year. The most common diseases were ophthalmia, ulcers, malarious fevers, and respiratory affections. There was no epidemic. Ninety-four persons were vaccinated. Two major surgical operations were performed. The dispensary was inspected by the Civil Surgeon in January. The total cost was Rs. 1,693-10-10, the cost per patient Re. 0-10-10 as compared with Rs. 1,063-4-2 and Re. 0-8-2 respectively in 1883.

TANDO ADAM.—*In charge of* Passed Pupil TEJMAL DHALAMAL.

A new building is in course of erection. The committee visit the dispensary every month. Conservancy is fairly attended to. The water-supply is good and abundant. The total number treated was 3,439 out-door and 7 in-door patients as compared with 1,328 and 13 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, ulcers, skin diseases, inflammation of the ear, and lung diseases. Small-pox was prevalent throughout the year—161 cases with 53 deaths. There were 28 successful vaccinations. The dispensary was inspected by the Civil Surgeon, Hyderabad, in January and October, and by the Deputy Sanitary Commissioner, Sind, in December. The total cost was Rs. 1,040-7-7, the cost per patient Re. 0-4-9 as compared with Rs. 857-0-2 and Re. 0-5-10 respectively in 1883.

MIRPUR KHÁS.—*In charge of* Passed Pupil KHIAMAL HUSHMATRAI.

The buildings are in good repair, they have been improved by the addition of verandahs and a cook-room. Some articles of furniture are required. The committee meet regularly every month. The sanitary condition of the town is unsatisfactory. The water-supply, chiefly from wells, is good and abundant. The total number treated was 2,336 out-door and 18 in-door patients against 1,885 and 23 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, ulcers, skin diseases, and respiratory affections. Small-pox prevailed in the town. Five major surgical operations were performed. There were 15 successful primary and 3 revaccinations. The total cost was Rs. 1,521-3-10, the cost per patient Re. 0-10-4 as compared with Rs. 697-7-1 and Re. 0-5-10 respectively in the previous year.

BOULTON DISPENSARY, TANDO BÁGO.—*In charge of* Hospital Assistant B. EZEKIEL.

The buildings are in good repair; a cook-house is wanted. The furniture and fittings are in good condition and sufficient. The committee meets once a month. Sanitation is fairly attended to; the water-supply is sufficient but of indifferent quality. The total number treated was 2,765 out-door and 60 in-door patients as compared with 2,873 and 55 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, respiratory affections, skin diseases, and ulcers. Two cases of cholera occurred in November. There were 88 primary and 3 revaccinations. Four *post-mortem* examinations were made at the request of the police. The total cost was Rs. 1,387-11-4, the cost per patient Re. 0-7-10 as compared with Rs. 779-13-8 and Re. 0-4-3 respectively in the previous year.

THAR AND PÁRKAR.

GRANT-IN-AID DISPENSARIES.

UMARKOT.—*In charge of* Passed Pupil D. DESILVA.

The buildings are conveniently situated, and the accommodation is ample. The committee meets once a month. The sanitary condition of the town is fair. The water-supply is plentiful and good. The total number treated was 1,728 out-door and 190 in-door patients as compared with 1,328 and 116 respectively in the previous year. The prevailing diseases are malarious fevers, ophthalmia, and respiratory affections. There was no epidemic. Fifty-six children were successfully vaccinated. The total cost was Rs. 1,916-4-9, the cost per patient Re. 0-15-11 as compared with Rs. 1,393-15-9 and Re. 0-15-5 respectively in the previous year.

KHIPRA.—*In charge of* Passed Pupil PERMÁNAND VISHANDÁS.

The dispensary is still located in old grass huts quite unsuited for the purpose and in bad repair. One meeting of the committee was held; individual members occasionally visit the dispensary. The sanitary condition of the town is fair. The water-supply is good and sufficient. The total number treated was 3,043 out-door and 51 in-door patients against 2,284 and 31 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, ulcers, and respiratory affections. A few cases of small-pox occurred from January to April. Eleven successful primary and 1 re-vaccination were performed. The dispensary was inspected by the Deputy Sanitary Commissioner, Sind, in December. The total cost was Rs. 1,782-12-11, the cost per patient Re. 0-9-2 as compared with Rs. 767-3-6 and Re. 0-5-3 respectively in 1883.

MITTI.—*In charge of* Hospital Assistant SHREEPUT NICKUM.

The building is in good repair. A dead-house is wanted. The furniture and fittings are sufficient. The committee visit the dispensary every month. The sanitary condition of the town is satisfactory; the water-supply is abundant and of fair quality. The total number treated was 2,685 out-door and 25 in-door patients as compared with 2,346 and 49 respectively in the previous year. The most common complaints were malarious fevers, skin diseases, ulcers, respiratory affections, and bowel complaints. There was no epidemic. There were 63 primary successful vaccine operations performed. The total cost was Rs. 1,795-0-5, the cost per patient Re. 0-10-7 as compared with Rs. 1,338-7-7 and Re. 0-8-1 respectively in the previous year.

NAGAR PÁRKAR.—*In charge of* Hospital Assistant MAHADEO NARAYEN RAJE.

The buildings are in good repair, the furniture and fittings are sufficient. The committee meets every month, and the chairman visits the dispensary every week. Conservancy is well attended to; the water-supply is abundant and of good quality. The total number treated was 2,218 out-door and 9 in-door patients as compared with 2,254 and 8 respectively in the previous year. The chief diseases were ophthalmia, malarious fevers, and skin diseases. There was no epidemic. Two major surgical operations were performed. Seventy-nine children were successfully vaccinated. The total cost was Rs. 1,262-11-8, the cost per patient Re. 0-9-0, as compared with Rs. 762-6-11 and Re. 0-5-5 respectively in the previous year.

SHIKÁRPUR COLLECTORATE.

CIVIL HOSPITAL, SHIKÁRPUR.—*In charge of* Surgeon H. P. DYMMOCK.

Conservancy and Water Supply.—The conservancy is satisfactory so far as carried out by the Municipality, but the arrangements for private houses are the reverse, the roofs being usually the family latrine, where excreta is allowed to dry. The street sweepings, it is stated, are not so carefully burnt as they should be. The water is obtained from wells, and said to be good.

Hospital Buildings.—The hospital is in a satisfactory condition, but its position is unfavourable on account of distance for the attendance of people from the town.

Public Health.—There were epidemics of both small-pox and measles in April and July, and the general health does not appear to have been so satisfactory as usual. It is noted that the hot weather was much prolonged, followed by an unusual quantity of rain, which may account for the statement made by the Civil Surgeon of the general health and physique being below the average.

Details of Treated.—The total number treated during the year were 3,468 out-patients and 598 in-patients against 2,071 out and 587 in for the year 1883.

Prevailing Diseases.—The principal diseases among both classes of patients were ague, rheumatism, syphilis, anæmia, eye and ear affections, and diseases of the respiratory system.

Surgical Operations.—Fifteen major operations were performed, all successfully, which result the Civil Surgeon attributes to the careful employment of antiseptic precautions.

Mortality and its causes.—There were 17 deaths amongst in-patients; the causes were rheumatic affections, anæmia, phthisis, dropsy, and abscess.

Conduct of the Hospital Establishment.—All the subordinates performed their duties satisfactorily.

Cost.—The total cost was Rs. 8,025-2-7, the cost per patient Rs. 1-15-6 as compared with Rs. 9,139-0-7 and Rs. 3-7-0 respectively in the previous year.

CIVIL HOSPITAL, SUKKUR.—*In charge of* Surgeon M. L. BARTHOLOMEUZ, M.B.

Conservancy and Water Supply.—The conservancy arrangements are not so satisfactory as they might be, owing to the roofs of the houses being used as latrines, and the Civil Surgeon suggests periodical cleansing under a halálkhor system. The water-supply is both from the river and from wells, the former being of better quality than the latter.

Hospital Buildings.—The Civil Hospital is at present located in an old barrack. With the exception of ill-fitting doors, the buildings are in a fair state of repair, and the accommodation is ample. The want of fire-places in some of the wards is mentioned, the hospital being greatly exposed to north winds during the cold season. The hospital latrine is also spoken of as "indifferent" and too far away.

Public Health.—The general health was good up to the end of August, after which malarious fevers prevailed, attributed to much rain and overflow of the river. Cholera also appeared on the 2nd of October, lasting till 14th of November, during which interval there were 110 cases. Of these 39 cases among in-patients were treated with a mortality of 64·1 per cent. A few cases of measles also presented during the last month of the year.

Details of Treated.—Of in-door patients 493 were treated against 327 for the former year, and of out-patients 5,553 against 3,582.

Prevailing Diseases.—Malarious fevers, affections of the respiratory organs, ophthalmia, diarrhœa, dysentery, rheumatic maladies, and skin diseases.

Surgical Operations.—There were 51 major surgical operations during the year of which 38 were for stone. Of the stone cases 4 died and the remainder were discharged cured. Among the other operations was one removal of the os calcies.

Mortality and its causes.—55 deaths occurred, of which cholera accounts for 31, diarrhœa and dysentery for 7, and accidents for 3.

Vaccination.—Is performed by a male and female vaccinator under the orders of the Sanitary Department, and paid by the municipality.

Conduct of Hospital Establishment—Has been good. The medical officer brings to notice the zeal and intelligence displayed by 1st Class Hospital Assistant P. Rodrigues.

Cost.—The total cost was Rs. 9,301-4-7, the cost per patient Rs. 1-8-7 as compared with Rs. 8,588-15-9 and Rs. 2-3-1 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

SHIKÁRPUR.—*In charge of* Assistant Surgeon M. S. POSTWALLA, L.M.

The building is old, and in a ruinous condition. Some articles of furniture require repair. The committee meets once a quarter. Sanitary arrangements are defective. The water-supply is abundant and of fair quality. The total number treated was 12,183 out-door and 114 in-door patients as compared with 10,325 and 115 respectively in the previous year. The most common diseases were malarious fevers, diseases of the ear and eye, ulcers, and skin diseases. There was no epidemic. Seventeen major surgical operations, including 7 lithotomies, were performed. Vaccination is carried on by a municipal vaccinator. The dispensary was inspected by the Civil Surgeon in December, by the Deputy Surgeon-General, Sind, in March and November, and by the Deputy Sanitary Commissioner, Sind, in February and September. The total cost was Rs. 5,112-15-9, the cost per patient Re. 0-6-7 as compared with Rs. 3,928-10-8 and Re. 0-6-0 respectively in the previous year.

SUKKUR.—*In charge of* Hospital Assistant PARSON SING.

The buildings, the furniture, and fittings are in a satisfactory condition. The committee hold monthly meetings. The sanitary condition of the town is fair. The water-supply is from the river and from wells, the former only is of good quality. The total number treated was 9,035 out-door and 142 in-door patients as compared with 7,678 and 159 respectively in the previous year. The most common diseases were malarious fevers, rheumatism, ophthalmia, respiratory affections, bowel complaints, and skin diseases. Cholera was present in the town during the year. Vaccination is carried on by a municipal vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner, Sind, in February and November, by the Deputy Surgeon-General, Sind, in December, and by the Civil Surgeon, Sukkur, in March and September. The total cost was Rs. 3,592-7-3, the cost per patient Re. 0-6-3 as compared with Rs. 2,954-0-10 and Re. 0-6-0 respectively in the previous year.

ROHRI.—*In charge of* Hospital Assistant BALAJI KADAM.

The building is in good repair. The committee meets every month. The sanitary condition of the town is fairly good. The water-supply from the Indus is good and abundant. The total number treated was 2,451 out-door and 93 in-door patients as compared with 2,713 and 88 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, inflammation of the ear, and respiratory affections. Cholera prevailed in October and November. There were 259 successful primary and 263 re-vaccinations performed. The dispensary was inspected by the Deputy Surgeon-General, Sind, in December, by the Civil Surgeon, Sukkur, in March and September, and by the Deputy Sanitary Commissioner, Sind, in March and October. The total cost was Rs. 1,756-1-1, the cost per patient Re. 0-11-0 as compared with Rs. 1,415-9-0 and Re. 0-8-1 respectively in the previous year.

LARKHANA.—*In charge of* Assistant Apothecary A. RODRIGUES.

The buildings are in a good state of repair. The furniture and fittings are ample. The sanitary condition of the town is fairly good. The water-supply is abundant and of good quality. The total number treated was 12,570 out-door and 177 in-door patients as compared with 14,045 and 133 respectively in the previous year. Ophthalmia, malarious fevers, diseases of the skin and subcutaneous tissue, and respiratory and rheumatic affections were the most common complaints. Two cases of cholera occurred in the town; the disease prevailed in the neighbourhood. Two major surgical operations were performed. Vaccination is performed by a municipal vaccinator. Five *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Deputy Surgeon-General, Sind, in December, and by the Civil Surgeon, Shikárpur, in March and November. The total cost was Rs. 4,216-6-6, the cost per patient Re. 0-5-3 as compared with Rs. 1,913-3-4 and Re. 0-2-1 respectively in 1883.

MEHAR.—*In charge of* Hospital Assistant M. SHALOMJI.

The buildings are in good order. The furniture and fittings are sufficient. The committee meets every month. The sanitary condition of the town is fair. The water-supply is ample and good. The total number treated was 5,902 out-door and 35 in-door patients as compared with 5,496 and 54 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, ulcers, and respiratory affections. There was no epidemic. Twenty-seven successful vaccine operations were performed. Seven *post-mortem* examinations were made. The dispensary was inspected by the Deputy Sanitary Commissioner, Sind, in January, and by the Civil Surgeon, Shikárpur, in March and December. The total cost was Rs. 2,083-11-8, the cost per patient Re. 0-5-7 as compared with Rs. 1,208-1-1 and Re. 0-3-6 respectively in the previous year.

KAMBAR.—*In charge of* Hospital Assistant JOSEPH ISRAEL.

The building is in good order and fulfills all requirements. The committee meets once a month. The sanitary condition of the town is fair. The water-supply is sufficient, but of indifferent quality. The total number treated was 7,758 out-door and 161 in-door patients. The most common diseases were malarious fevers, ulcers, ophthalmia, respiratory affections, and skin diseases. There was no epidemic. Four major surgical operations were performed. The dispensary was inspected by the Deputy Sanitary Commissioner, Sind, in January and by the Civil Surgeon, Shikárpur, in March and November. The total cost was Rs. 2,048-5-5, the cost per patient Re. 0-4-1.

UPPER SIND FRONTIER.

GOVERNMENT DISPENSARY.

JACOBABAD.—*In charge of* B. N. KOYAJI.

The buildings are under repair. The furniture is in good order. The committee meets every month. The sanitary condition of the town is fairly good. The water-supply is good and plentiful. The total number treated was 5,511 out-door and 230 in-door patients as compared with 4,059 and 284 respectively in the previous year. The most common diseases were malarious fevers, respiratory affections, eye and ear diseases, and rheumatism. Small-pox was prevalent in the district. Twenty-seven major surgical operations, including 13 lithotomies, were performed. The dispensary was inspected by the Deputy Surgeon-General, Sind, in November. The total cost was Rs. 3,800-4-3, the cost per patient Re. 0-10-7 as compared with Rs. 4,067-8-1 and Re. 0-14-11 respectively in the previous year.

GRANT-IN-AID DISPENSARY.

KASHMOR.—*In charge of* Passed Pupil SAWALSING MANAKRAI.

The building is in good repair. Quarters for the medical officer have been built. The committee meets once a month. The sanitary condition of the village is fair. The water-supply is abundant, but of inferior quality. The total number treated was 1,232 out-door and 52 in-door patients as compared with 1,283 and 20 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, ulcers, and respiratory affections. Cholera prevailed in the town and neighbourhood. The total cost was Rs. 1,637-15-7, the cost per patient Rs. 1-4-4 as compared with Rs. 1,504-0-4 and Rs. 1-2-5 respectively in the previous year.

FOREIGN.

ADEN.

EUROPEAN GENERAL HOSPITAL, ADEN.—*In charge of* Surgeon-Major E. COLSON.

Conservancy and Water Supply.—The conservancy of the public roads and other places is well attended to. The water is condensed.

Hospital Buildings.—The hospital is an old bungalow constantly requiring repair, and it may be hoped a more suitable structure will be sanctioned.

Public Health.—No contagious disease excepting a few cases of modified small-pox.

Details of Treated.—There were 95 in-door patients against 92 for the previous year; of out-patients 1,831 against 2,270.

Prevailing Diseases.—The diseases of in-patients in the order of frequency were dysentery, diarrhœa, febricula, continued and remittent fever, debility, and stricture.

Surgical Operations.—No operation of importance presented.

Mortality and its causes.—One case of dysentery and one of diarrhœa proved fatal. Two French soldiers also died, who were received into hospital with 15 others from the wreck of the French transport "Aveyran" off Cape Guardafui.

Vaccination.—Is not under this hospital.

Cost.—The total cost was Rs. 8,878-9-0, the cost per patient Rs. 4-9-9 as compared with Rs. 8,509-13-8 and Rs. 3-9-7 respectively in the previous year.

CIVIL HOSPITAL, ADEN.—*In charge of* Surgeon C. MONKS.

Conservancy and Water Supply.—The external conservancy is well looked after by the municipality so far as public roads and places are concerned. The drinking water is condensed.

Hospital Buildings.—The hospital and out-buildings are in good condition, the latter having been recently re-roofed.

Public Health.—The health of the community was good, and there was no epidemic. Three cases of small-pox occurred in the town, which was at once isolated for treatment at Steamer Point.

Details of Treated.—The number of patients admitted during the year was 541 in-door and 1,959 out-door against 562 and 1,951 for the previous twelve months.

Prevailing Diseases.—As usual "ulcer" was the principal cause of in-door admissions, giving 134 cases; other "local diseases" gave the next largest number, 92. Among out-door patients the prevailing diseases were ulcers and skin affections, respiratory maladies, rheumatic and eye affections.

Surgical Operations.—There were performed 55 major surgical operations among which 15 were for stone, and 9 amputations of lower extremities. Of minor operations there were 117.

Mortality and its causes.—There were 76 deaths. The diseases which proved most fatal were phthisis (15), privation (17), ulcers (8), injuries (8), debility (8). As usual many patients were admitted in a moribund condition.

Vaccination.—Has been carried on by the municipal vaccinator, assisted by one peon. There were 408 operations, of which 317 were successful, and in 44 instances the result could not be ascertained as the people left the Settlement.

Conduct of Hospital Establishment.—The conduct of the staff was satisfactory.

Cost.—The total cost was Rs. 19,464-10-3, the cost per patient Rs. 7-9-3 as compared with Rs. 17,989-0-11 and Rs. 7 respectively in the previous year.

GRANT-IN-AID DISPENSARY.

PRINCE OF WALES DISPENSARY, ADEN.—*In charge of* Assistant Surgeon K. S. ENGINEER, L. M. & S.

The building, a hired one, is kept in a fair state of repair. The sanitary condition of the immediate surroundings of the dispensary is very unsatisfactory. The meetings of the committee are held every month. The total number treated was 7,893, all out-door patients, as compared with 6,829 out-door and 2 in-door patients in the previous year. The most common diseases were skin diseases, malarious fevers, respiratory and rheumatic affections, bowel complaints, and ophthalmia. There was no epidemic. Many surgical operations, both major and minor, were performed. Vaccination is performed by the municipal vaccinator. The dispensary was inspected by Deputy Surgeon-General Bruce in November. The total cost was Rs. 5,099-14-10, the cost per patient Re. 0-10-4 as compared with Rs. 3,818-1-0 and Re. 0-8-11 respectively in the previous year.

MUNICIPAL DISPENSARY.

SHAIK OTHMAN, ADEN.—*In charge of* Hospital Assistant GULABKHAN.

The building is in a fair state of repair; quarters for 2nd class servants are required. The furniture and fittings are sufficient and in good order. There is no committee, but the dispensary is visited by the Civil Surgeon once a month. The conservancy arrangements are satisfactory. The total number treated was 2,088, all out-door patients, as compared with 2,495 in the previous year. The most common diseases were malarious fevers, respiratory and rheumatic affections, skin diseases, and ulcers. There was no epidemic. There were 123 successful vaccinations. The dispensary was inspected by Deputy Surgeon-General Bruce in November. The total cost was Rs. 1,559-0-5, the cost per patient Re. 0-12-3 as compared with Rs. 1,320-8-0 and Re. 0-8-6 respectively in the year 1883.

PERSIAN GULF.

CIVIL HOSPITAL, MUSKAT.—*In charge of* Surgeon-Major A. S. G. JAYAKAR.

Conservancy and Water Supply.—No attempt of any kind was made during the year to improve the bad sanitary condition of the town. The water-supply is however good.

Hospital Buildings.—The hospital building is now in good condition, having undergone some repairs during the year. It is well suited for the accommodation of the class of patients seeking relief.

Public Health.—Epidemic small-pox prevailed during the early part of the year. In May and June measles prevailed.

Details of Treated.—There were 53 in-door patients, being a decrease of 6 on the former year. Of out-door patients there were 3,539, being an increase of 142 over the number for 1883.

Prevailing Diseases were malarious fevers, rheumatic affections, respiratory maladies, diseases of the digestive organs and bowels, skin affections, and ulcers.

Surgical Operations.—Two major operations were performed, both for stone in the bladder.

Mortality and its causes.—There were 12 deaths among in-door patients, being 22·6 per cent. on the total treated. This high rate of mortality is attributed to the advanced stage of disease in which so many are admitted.

Vaccination.—64 operations were performed, of which 59 were successful.

Conduct of Hospital Establishment.—Was good throughout the year.

Cost.—The total was Rs. 10,926-15-1, the cost per patient Rs. 3-0-7 as compared with Rs. 10,820-15-11 and Rs. 3-2-1 respectively in the previous year.

CIVIL HOSPITAL, BUSHIRE.—*In charge of* Surgeon D. B. ROSS, M.D.

Conservancy and Water Supply.—No attention is paid to conservancy by the Persian authorities. The water-supply is stated to be abundant and good.

Hospital Buildings.—Are in a good state of repair.

Public Health.—Malarious fever prevailed to an extensive degree throughout the year. No epidemic of other disease.

Details of Treated.—The number of patients attending was 4,386, being a slight reduction on the attendance for the previous twelve months.

Prevailing Diseases.—As stated above, malarious fevers prevailed affording 2,150 cases, being upwards of 49 per cent. on the total. Respiratory, rheumatic, and scorbutic affections give the next highest ratios.

Surgical Operations.—The only surgical operation of importance was the removal of a large tumour from the parotid region of a young man.

Vaccination.—219 children were successfully vaccinated during the year.

Conduct of Hospital Establishment.—Satisfactory.

Cost.—The total cost was Rs. 10,360-6-3, the cost per patient Rs. 2-5-9 against Rs. 10,221-9-0 and Rs. 2-4-4 respectively in the previous year.

APPENDIX II.

SUMMARIES OF THE ANNUAL REPORTS

OF THE

MEDICAL SCHOOLS.

Byra'mji Jijibhoy Medical School, Poona.

The school was under the superintendence of Surgeon-Major Cook throughout the year. At the beginning of the year the pupils undergoing instruction numbered 61, namely, 19 first year, 18 second year, and 24 third year; of them 34 were native medical pupils, 12 stipendiary, 6 paying, 8 Native State, and 1 free pupil. Of the first-year pupils 15 were examined in April: of these 9 passed and 6 failed; 3 were permitted to recommence the course and 3 were dismissed. At the second examination in September 9 were examined and 9 passed. Of the second-year pupils 18 were examined in April, 12 passed, and 6 failed; 3 were put back a year and 3 were dismissed. At the second examination 12 were examined and 12 passed. Of the third-year pupils 23 were examined at the final examination in September; 22 passed and one failed and was put back for one year. Of the 22 who passed 15 were native medical pupils, 2 paying and 5 State pupils. No change was made in the course of instruction during the year. The entrance examination was held on the 25th October when 38 candidates appeared; 14 were native medical pupils; 19 boys from various schools competed for 7 stipends, 4 were paying pupils, and 1 a State pupil (Kolhápur). Of the 14 native medical pupils, 9 passed; of the competitors for stipends, 13 passed—the seven best were selected. Six native medical pupils who passed at Hyderabad (Sind) were admitted to the school, there being no room for them there. At the opening of the winter session on 1st November 1884 there were 23 first-year, 12 second-year, and 13 third-year students. By caste they were Bráhmins 19, Hindus 23, Musalmáns 3, Goanese 1. The behaviour of the pupils was good, no case of misconduct having occurred during the year. Since the opening of the current session one of the stipendiary pupils was allowed to resign, and a second-year free pupil (a female) was allowed to leave and join the female students' class at the Grant Medical College, Bombay. The Superintendent acknowledges the zeal and ability with which the teaching was carried on during the year by all concerned. The total amount of fees realized from paying pupils was Rs. 58-8.

Byra'mji Jijibhoy Medical School, Ahmedabad.

Surgeon-Major Banks was Superintendent of the School from 1st January to 19th April, when he was succeeded by Surgeon-Major Robb, who still retains the office. The fifth year opened with the winter session commencing 1st November 1883, with 52 students on the roll, comprising 14, 17, and 21 of the 3rd, 2nd, and 1st year respectively. There has been no change in the course of instruction during the year. At the end of the session in April 20 first-year and 17 second-year students were examined; of the 1st-year students 17 passed, 2 failed in anatomy and 1 in chemistry; of the 2nd year pupils, 15 passed and one failed in anatomy. The summer session commenced on the 15th June and ended on the 15th September, at its close all the pupils were examined. The third-year pupils appeared for their final examination; of these 14 in number, 13 passed and one was sick. Of the second-year pupils 17 were examined, 16 passed, and one failed and was put back. Of first-year pupils 21 were examined, 20 passed, and 1 failing was put back. Book prizes were allotted to two pupils of each year for general good conduct, and 5 scholarships were awarded to deserving pupils. An entrance examination was held on the 25th October at which 22 native medical pupils and 36 boys from various schools appeared; 12 of the native medical pupils passed and joined the school; 23 of the schoolboys passed, 9 withdrew, and 14 joined the school; of these 6 are paying, 5 belong to Native States, and three having elected to serve Government have become stipendiary pupils. Two students were struck off the rolls, and the year closed with 26 first-year, 21 second-year, and 16 third-year pupils, total 63. The school library is as yet small though useful. The receipts on account of fees realized from paying pupils amounted to Rs. 306. With the exception of the change in the Superintendent mentioned above, the teaching staff is the same, and all have conducted their responsible duties with success. The conduct of the pupils has given much satisfaction.

Hyderabad Medical School.

Surgeon-Major Holmested held the office of Superintendent from the 1st January to the 7th April, when as a temporary measure Surgeon-Major Ogilvie held charge until 13th April, on which date Surgeon-Major Kelan assumed charge. On the 1st January there were 38 pupils—18 third-year, 10 second-year, and 10 first-year; 19 were native medical pupils and 19 were high school pupils. Two first-year high school pupils left the school. At the final pass examination held in September 16 pupils passed and 2 failed and were put back for one year.

Of those who passed 8 were native medical pupils and 8 high school pupils. This examination completed the third year since the establishment of the school, and the results are very satisfactory. The 8 high school pupils were taken into the Civil Subordinate Medical Department as passed pupils and employed in Sind. An entrance examination was held in October, 13 high school pupils competed for 5 vacancies but only 4 qualified: 9 native medical pupils passed but only six were admitted, one of these to fill the vacancy in the high school class. Thus at the end of the year there were 30 pupils—10 first-year, 8 second-year, and 12 third-year, or 13 high school and 17 native medical pupils. The native medical pupils are natives of all parts of the Presidency, but the high school pupils are with one exception natives of Sind. Book prizes have been awarded to the most deserving pupils; the Collector of the district presided at a public distribution of prizes and presented the books to the successful pupils. The books, for which Rs. 214 were sanctioned, have now been received, they will form a nucleus of a library. The pupils are generally well-behaved and hard-working. The Deputy Surgeon General inspected the school in December and expressed his satisfaction at the progress which the students have made in their studies. The Superintendent brings to notice the valuable services of the teaching staff.

APPENDIX III.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT No. I.

Showing the Classification of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1884.

No. $\frac{S\ B}{142}$ of 1886.

FROM

THE SURGEON-GENERAL
WITH THE GOVERNMENT OF BOMBAY;

TO

THE SECRETARY TO GOVERNMENT,
General Department.

Bombay, 8th May 1886.

SIR,

I have the honour to submit, for the information of His Excellency the Governor in Council, the Administration and Progress Report on the Civil Hospitals and Dispensaries of this Presidency for the year 1885.

2. There has been no alteration in the plan of the report, and it is again illustrated by sketch maps of the provinces of the Presidency showing the places at which hospitals and dispensaries have been established.

3. Appendix I. contains the summaries of the report by Medical Officers in charge, and I have in them brought to notice the names of such subordinates as have been favourably reported upon for efficiency and zeal by superior Officers.

4. In Appendix II. are given the summaries of the reports by the Superintendents of the Medical Schools at Poona, Ahmedabad and Hyderabad, Sind. The schools continue to make satisfactory progress.

Below is attached a tabular statement showing the number of pupils in the three schools at the end of the year :—

CLASS OF STUDENTS.	POONA.				AHMEDABAD.				HYDERABAD.				TOTAL OF ALL THE SCHOOLS.			
	3rd Year.	2nd Year.	1st Year.	Total.	3rd Year.	2nd Year.	1st Year.	Total.	3rd Year.	2nd Year.	1st Year.	Total.	3rd Year.	2nd Year.	1st Year.	Total.
Native Military Pupils	4	7	17	28	4	13	16	33	5	6	10	21	13	26	43	82
Stipendiary Pupils	5	5	2	12	3	4	5	12	2	2	6	10	10	11	13	34
Native State do.	1	1	1	3	1	3	..	4	..	..	..	..	2	4	1	7
Paying Pupils	..	2	1	4	7	7	7	21	..	..	..	..	7	9	9	25
Free do.	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..
Total ..	10	15	22	47	15	27	28	70	7	8	16	31	32	50	66	148

The names of the teachers at the different schools and the subjects they teach are as follows, by which it will be seen that the teaching power is least at the Hyderabad School, where however there is the smallest number of pupils :—

Byramji Jijibhoy Medical School, Poona.

Surgeon-Major Cook teaches Medicine and Clinical Medicine and Therapeutics.
Surgeon D. N. Parakh teaches Surgery and Clinical Surgery and Midwifery.
Assistant Surgeon Bhikaji Amrit teaches Anatomy and Physiology.
" " Dattu Ganesh Subnis teaches Chemistry and Medical Jurisprudence.
Apothecary Gallagher teaches Materia Medica and Pharmacy.

Byramji Jijibhoy Medical School, Ahmedabad.

Surgeon-Major Robb teaches Medicine and Clinical Medicine and Therapeutics.
Assistant Surgeon B. H. Nanavati teaches Surgery and Clinical Surgery and Midwifery.
Assistant Surgeon N. Dayabhai teaches Anatomy and Physiology.
" " J. D. Khambata teaches Chemistry and Medical Jurisprudence.
Hospital Assistant Luximon Sing teaches Materia Medica and Pharmacy.

Medical School, Hyderabad.

Surgeon-Major DeTatham teaches Clinical Medicine and Surgery.
Assistant Surgeon Acquino teaches { Medicine and Chemistry in winter. / Midwifery and Physiology in summer.
" " Bocarro teaches { Surgery and Anatomy in winter. / Medical Jurisprudence and Materia Medica in summer.

The examinations of the students at the schools are both oral and written, and are held at the end of each term, that is, in April and September; the examinations of first and second-year pupils are conducted by the Superintendents and teachers of the schools assisted by one or more gentlemen either of the Medical Staff or Indian Medical Department who attend as assessors. The final examination of the third-year students is conducted in the same manner so far as the oral and practical part of the examination is concerned, but with the view of making the test at all the schools as equal as possible papers for the written examination are prepared, each of the Superintendents being called upon to submit to the Surgeon-General's office a set of questions in a particular subject, which at the proper time are distributed to all the schools, and thus all the pupils have the same final examination.

It having been found that the same text-books were not in use at all the schools, Superintendents were requested to give their opinions as to the different books which should be used, and as much as possible in accordance with these opinions a list of books was made which will henceforth be used in all the schools.

The good work done by the various teachers is brought to notice as mentioned by the different Superintendents, and it now remains to record the services of the latter. Surgeon-Major Cook, the Superintendent of the Poona School, is an excellent Principal over good subordinates. Surgeon-Major Robb, the Superintendent of the Ahmedabad School, takes great interest in his work and has conducted his duties in the most energetic, careful and efficient manner. Surgeon-Major DeTatham, the Acting Superintendent of the Hyderabad School, has also taken great interest in the school and has fully proved himself to be a capable *locum tenens* for Surgeon-Major Keelan.

(5). Appendix III. contains the usual statistical statements upon which I beg to offer the following remarks. Statement No. I. shows the classification of Civil Hospitals and Dispensaries according to the orders contained in Government of India Resolution No. 3-163-74, dated May 7th, 1883. On the 1st January the total number of institutions open was 208 classified as under:—

Class I.	... 47
„ II.	... 33
„ III. A.	... 25
„ III. B.	...103
	208

During the year 9 new dispensaries were opened, namely 4 grant-in-aid—Cowasjee Dinshaw Petit Dispensary at Umbargaon in the Thána Collectorate, at Amalner in Khándesh, at Dehej in the Broach Collectorate, Ghotki in the Shikárpur Collectorate—and 5 Native State at Lakshmeshar, Ráibág and Narsoba's Wádi in the Kolhápur State, at Mundra and Náráyan Sarovar in Cutch. One dispensary, Pánchghani, has for the first time been brought on to the returns. The Bijápur Dispensary was closed when the Civil Surgeoncy was transferred from Kaládgi to Bijápur.

The classification at the end of the year stood as follows:—

Class I.	... 47
„ II.	... 34
„ III. A.	... 31
„ III. B.	...105
	217

Statement No. II.—Attendance of Patients.

(4). The total number of patients treated at the various institutions, both in-door and out-door, amounted to 1,605,968 as compared with 1,491,170 in the year 1884. Of these 37,642 were in-door and 1,568,326 were out-door patients against 36,402 and 1,454,768 respectively in the preceding year—an increase in the total treated of 114,798—and of 1,240 among in-patients and 113,558 among out-patients. As compared with the year 1884 there has been a larger increase of in-patients but that of out-patients is not so great. Of the in-patients 27,151 were "cured," 4,241 were "relieved", 2,636 were "discharged otherwise" and 2,791 "died;" the ratio per cent. of deaths to total treated being 7·4 against 7 in 1884. The total number of beds available was 3,318 or 21 less

than in the previous year; the decrease is accounted for by the closing of the Kaládgli Civil Hospital where there were 24 beds available and the transfer of the Civil Surgeoncy to Bijápur where until the new civil hospital shall be built there is only accommodation for 3 patients. The daily average number of sick in hospital was 1,837·2 as compared with 1,772·6 in 1884. Of the total number of out-door patients 344,270 were treated at civil hospitals and 1,224,056 at dispensaries against 327,128 and 1,127,640 respectively in the previous year. The daily average attendance at civil hospitals was 3,118·5 and at dispensaries 12,856·5, total 15,975·0; as compared with 3,053·6 and 11,750·2 and 14,803·8 respectively in the year 1884.

Medical officers are expected to show in their monthly statements not only the number who came under treatment but how many have been discharged, cured, relieved, absented or otherwise, or died. Now this as regards out-door patients is impossible. One out-patient may apply once and never return, he may attend many days if treated and humoured according to his fancy. But an out-patient is generally ungrateful and rarely considers it necessary to report the result of his case. Yet dispensary returns declare a large number cured, a lesser number as relieved, a few as having ceased to attend, and others as having died. It is obvious that the deaths of out-patients can seldom be ascertained, and that the whole system must be more or less guess-work. Numerical statements should not be required when it is evident they cannot be truthfully made. The constant compilation of such documents must be deadening to the moral sense. Out-patients frequenting dispensaries may be roughly divided into three classes: *firstly*, those suffering from slight ailments from which they would recover whether they went to the dispensary or not; *secondly*, those suffering from uncurable ailments who will not get well whether they go to the dispensary or not; *thirdly*, those who by judicious treatment are prevented growing worse, or who are decidedly relieved, and who are cured. It would in my opinion be quite sufficient if numbers only were stated without the obligation of accounting for such numbers under one or other of the heads mentioned above.

In charitable hospitals and dispensaries in India, as a rule, a high rate of mortality will always be found to prevail. To them come the dregs of the population nurtured in an atmosphere of disease. To them congregate the victims of malaria, syphilis, leprosy, scurvy, and every form of zymotic malady, also of hereditary disease. If it were worth while, which it is not, instituting a comparison between the mortality of Indian and British hospitals, the former would be found the highest. But the class of patients ordinarily attending an Indian hospital is not the class of patients ordinarily attending a British hospital. For a parallel we must go to the poor law infirmaries or dispensaries of Great Britain, and there the rate of mortality would be more equal. It is not the upper section of the lower classes who ordinarily frequent Indian hospitals. It is ordinarily the lower section, represented in Great Britain by those coming under the treatment of paid poor law Surgeons, and under such officials admitted into poor law infirmaries and workhouse-hospitals which do not exist in India.

(5). From Statement No. III which shows the diseases for which patients were treated at the various institutions, it appears that small-pox was less prevalent than in the previous year, the number of patients applying for treatment being 153 against 1,099. Of the cases treated, 74 occurred in the Konkan, 75 in the Deccan, 2 in Sind, and 2 in foreign stations. It is to be remembered that but a very small portion of patients suffering from this disease ever apply for treatment. The number of patients applying for treatment for cholera was greater than in 1884, namely 5,360 against 1,943 in 1884. Cases are returned from all the divisions of the Presidency; 3,085 cases occurred in the Deccan, 1,146 in Sind, 612 in the Konkan (of these 242 occurred in Bombay), and 517 in Gujarát. With regard to cholera it may be mentioned that whatever views or theories medical officers hold with regard to the dissemination and origin of the disease, all are in perfect accord, that sanitary measures in their fullest sense are the great preventive means. Whether, as some would have us believe, it constantly originates in Bengal and thence spreads westerly over the world: whether, as others think, it originates spontaneously in any country

Small-pox.

Cholera.

but more frequently in the east: whether, as appears in some cases as certain as the exact sciences, it is imported from one place to another by human intercourse: or whether it can only spread in what has been called its endemic area; whichever of these views observers hold the utility of sanitary preventive measures is unquestioned. Village sanitation, however, means the outlay of much money which neither the inhabitants nor the State can afford to disburse, and moreover there are many towns and villages which through defects of site, position and construction never could be thoroughly sanitated. The alternative measure is increased endeavour to instruct the people in the elements of sanitation and hygiene, which should be persistently taught in the vernacular schools.

Malarious fevers.

Of malarious fevers, as usual, the most common diseases for which patients sought relief, there were 276,007 cases or 17·2 per cent. of the total treated as compared with 274,762 or 18·4 per cent. in 1884. The ratio per cent. in the various divisions of the Presidency were in the Konkan 23·8, the Deccan 11·6, Gujarát 16·2, Sind 25·2, and in foreign institutions 25·5; against 23·5, 13·1, 18·0, 24·8, and 25·3 respectively in the previous year.

Venereal Diseases.

The number treated for syphilis was 18,782 as compared with 19,960 in 1884. Of the total 3,417 were in the Konkan, 5,966 in the Deccan, 6,514 in Gujarát, 2,664 in Sind and 221 in foreign institutions. Of the cases occurring in the Konkan 2,091 were recorded in Bombay. Taken with gonorrhœa the total treated was 32,524 or 2 per cent. of the total treated as compared with 33,181 or 2·2 per cent. in the previous year. The percentages to treated in the provinces of the Presidency were 2·1 in the Konkan against 2·5 in 1884, 1·6 in the Deccan against 1·8, 2·2 in Gujarát against 2·2, 2·4 in Sind against 2·6 and 2·1 at foreign institutions against 2·0.

Respiratory affections.
Rheumatic do.

The number treated for diseases of the organs of respiration was 85,717 or 5·3 per cent. of the whole. For rheumatic affections there were 47,294 patients treated or 2·9 of the total treated. In the year 1884, 83,494 or 5·5 per cent. were treated for the former group of disorders and 44,860 or 3 per cent. for rheumatic diseases.

Dysentery and Diarrhœa.

The number of cases of dysentery was 28,834 or 1·8 of the total treated against 21,091 in the year 1884. Of diarrhœa there were 41,305 cases or 2·5 per cent. against 36,447 in 1884.

Intestinal Parasites.

For disease due to the presence of worms in the intestines there were 134,399 cases or 8·3 per cent. of the total treated, as compared with 115,276 or 7·7 per cent. in the previous year. Intestinal parasites are most prevalent in the Deccan where they reach 12·6 of the total treated; they are also very prevalent in the Konkan, 11 per cent. In Gujarát the percentage is 5, and in Sind only 0·5. The large number of cases returned as intestinal worms from the majority of the institutions, in some cases amounting to nearly half of the total, cannot fail to attract attention. As a rule, subject however to many exceptions, it will be found that institutions near the sea coast treat the largest number of intestinal worms. These worms are always the ascasis lumbricoides or round worm, and there is some reason to believe that the germs or ova of these worms are introduced into the system by some kinds of fish eaten as food and by vegetables not thoroughly washed. The matter is however one still requiring investigation, for we do not yet know the life cycle of the round worm as we are acquainted with that of the tape worm. In the mean time as preventive measures, it would be well if the people could be made to understand the desirability of thoroughly gutting and washing their fish, and of thoroughly washing their vegetables; both being effected in water which is not again returned into any well or receptacle whence it can afterwards be taken as drinking water.

Skin-diseases.

The number treated for skin-diseases was 233,139 or 14·5 per cent. of the total treated as compared with 217,715 or 14·6 per cent. in the previous year. These diseases are very

prevalent in Gujarát where percentage to total treated was 20; they also prevail to a large extent in the Deccan, 15·9 per cent. of the treated. They are less prevalent in the Konkan and Sind, the percentages being 9·8 and 4·8 respectively for these two provinces.

Diseases of the Eye.

These diseases chiefly returned as ophthalmia are very prevalent; 163,278 cases were recorded or 10·2 per cent. of the total treated. These diseases are relatively most prevalent in the Deccan and in Sind where they reach 14·1 and 12 per cent. respectively of the total treated.

Diseases of the Ear.

For diseases of the ear the number treated was 42,027 or 2·6 per cent. of the total as compared with 39,424 and 2·6 respectively in the previous year. These diseases are relatively more prevalent in Sind 3·8, and in Gujarát 3·3, of the total treated.

Statement III A.—Major Surgical Operations.

(6.) In this statement is given the number and results of major surgical operations performed and under treatment during the year. On the 1st January there remained under treatment 152 cases, 4,068 operations were performed, making a total treated of 4,220 as compared with 4,313 in the previous year. Of these 3,512 were "cured," 285 were "relieved," 90 were "discharged otherwise," 205 "died" and 128 remained under treatment According to provinces 1,637 were performed in the Konkan including 1,440 in Bombay City, 1,024 in the Deccan, 860 in Gujarát, 649 in Sind and 50 in foreign institutions. Of the total number 3,049 were performed in civil hospitals and 1,171 in dispensaries. Of the operations performed during the year 1,098 were upon the eye and its appendages and of these 947 were performed at the Cowasji Jehangir Ophthalmic Hospital. Of operations on joints 477 were performed, chiefly reduction of dislocations; among them were 131 of the jaw, 117 of the shoulder, 88 of the elbow, 29 of the wrist and 23 of the hip. There were 302 amputations performed, including 1 at the hip-joint, 15 of the thigh, 58 of the leg, 20 of the arm and 19 of the forearm. There were 557 operations for stone in the bladder including 522 cases of lithotomy with 60 deaths, and 22 cases of lithotrity with 4 deaths. The various reports show that there are districts in which calculus or stone in the bladder is much more common than in others. The relative frequency of the kinds of calculus also varies in different countries. Dr. H. V. Carter analysed upwards of 100 specimens in the Grant Medical College Museum showing that the percentage of calculi of the oxalate of lime variety is 38 in India and only 16 in England. Doubtless similar differences would be found to prevail in different Indian districts as calculus depends on peculiarities of race, constitution and diet. What the conditions of existence are which determine the exceptional prevalence of stone in certain districts is not fully understood. It may however be confidently stated that as with goitre, so with stone, both diseases are most common where lime is found in the water. Therefore it would be desirable for wells the water of which is notoriously impregnated with lime to be closed. It may be objected that water brackish or containing lime can only be obtained in different localities. This I do not believe until actually proved. I have seen a well containing a large quantity of lime water within a few yards of another affording pure water, and on the banks of the Loonee in Marwar there are scores of wells affording sweet water within a few yards of a brackish river. That stone in the bladder is susceptible of relief by surgical skill; that it is very frequently cured by surgical skill; that our mode of operating is infinitely superior to that of the Native "jurrahs" who "cut on the gripe" and very often kill their patients; that the success of Indian operators is greater than that of European—are no reasons why preventive measures should not be applied; and the principal preventive measure is as stated above *closure* of wells the water of which is notoriously lime-impregnated.

Sex, caste, &c., of patients treated.

(7). In Statement No. IV is given the sex, caste, daily average attendance and ratio per cent. according to sex of the patients treated. Of the total number 734,096 were males, 284,564 females and 587,308 children, being in the proportion of 45·7, 17·7 and 36·6 per cent. respectively as compared with 46·8, 17·3, and 35·9 in the previous year. The following table shows the ratio per

cent. of men, women and children treated at the institutions in the different provinces of the Presidency :—

Province.	Men.	Women.	Children.
Konkan	47·7	18·2	34·1
Deccan	41·9	16·8	41·3
Gujarát	44·1	19·8	36·1
Sind	56·1	14·7	29·2
Foreign	61·5	20·0	18·5

The percentage of women to total treated is the same in the Konkan in the year under report as in 1884, somewhat less in foreign institutions, and slightly increased in the Deccan, Gujarát and Sind. The attendance of women varies greatly at the different institutions throughout the Presidency, being as high as 33·6 per cent. of the total treated at the Cowasjee Jehangir Ophthalmic Hospital, Bombay; 29·3 at Borsad and Elav Dispensaries and 27·1 at the Baicherdas Dispensary, Ahmedabad; and as low as 8·4 at the Bhadgaon Dispensary, 9·4 at Erandol and 11·1 at Mundgod. The daily average attendance of women is large at some institutions, as at Bassein 53, the Baichardas Dispensary Ahmedabad 51·6, Bándra 41·9, Hubli 43·7 and Ráipur Ahmedabad 41·1.

With regard to caste 68·7 per cent. were Hindus, 25 Mahomedans, 2·8 Native Christians, 2·1 Párs is, 0·4 Europeans, 0·2 Eurasians and 0·8 other castes.

(8.) The total income during the year under report was Rs. 11,30,170-5-10. Deducting from this the cash balance in hand on the 1st January, the net income was Rs. 10,14,360-8-3, as compared with Rs. 10,31,872-10-10 in the previous year. The amount contributed by Government was Rs. 7,80,516-7-5, and that from Local and Municipal Funds and other miscellaneous sources was Rs. 2,05,989-14-4. The interest on invested capital amounted to Rs. 16,776-6-10, and subscriptions from Europeans to Rs. 1,061 and from Natives to Rs. 6,616-11-8. The expenditure, after deducting sums remitted to the Treasury on account of paying patients, &c., Rs. 17,126-2-3, and the amount invested during the year, Rs. 11,400, amounts to Rs. 9,65,445-9-2 against Rs. 10,28,243-13-8 in 1884. The decrease is under the heads Establishments, Diets, and epecially under that of European medicines; there has been a slight increase of expenditure on Bázár medicines, buildings and repairs and miscellaneous charges.

Statement No. V., Part I.—Income and Expenditure.

The expenditure on European medicines amounts to Rs. 89,336-12-0 and on Native medicines to Rs. 20,034-7-2. There is no doubt there are many indigenous drugs which are not used to the extent they deserve. Waring in his work on Indian Medicines only added about nine English drugs as decidedly required. But the fact is that the native poor cease to believe in us when we treat them with Indian drugs. And with the almost daily additions to the pharmacopœia made under the advanced chemistry of the period there is a growing disinclination on the part of medical practitioners to not only using Indian drugs, but even to using the drugs formerly prescribed in the pharmacopœia, the active principles of which are now supplied in a more portable, palatable, and effective form. Under these circumstances there is no probability that expenditure on the item European medicines will further decrease. The average cost of each patient was Re. 0-10-10 against Re. 0-12-3 in the year 1884. According to provinces the cost per patient is shown in the following table :—

Province.	1885.			1884.		
	Rs.	a.	p.	Rs.	a.	p.
Konkan	1	8	2	1	9	5
Deccan	0	7	3	0	8	7
Gujarát	0	6	3	0	7	5
Sind	0	7	11	0	8	11
Foreign	2	6	5	2	8	1

The percentage of total cost paid by Government was 80·8 against 77·7 in the previous year. And if the cost of Native State institutions be added, the percentage paid by Government is 74·4 as compared with 71·6 in 1884. The cost of dispensaries alone to Government is 44·6 per cent. against 37·9 in the previous year. The average cost of each diet was Re. 0-2-6 as compared with Re. 0-2-5 in 1884.

Statement No. V, Part II. —Invested Capital.

9. In this table is shown the amount of invested capital. On 1st January 1885 there was a balance of Rs. 3,39,900-0-0, Rs. 11,400 were invested during the year. The sum of Rs. 3,400 was withdrawn from investment on Panvel on account of building, leaving Rs. 3,47,900 invested at the close of the year. The closing balance given in 1884 is the same as the opening balance of 1885, but there are discrepancies in detail, thus the sum invested belonging to the Ranchodlal Dispensary at Ahmedabad should have been Rs. 20,500 and not Rs. 20,000, and Rs. 500 at the Pátan Dispensary should not have been returned as invested capital as the money was merely deposited in the Savings Bank.

10. During the year I inspected all the Civil Hospitals excepting those in Sind which were inspected with his usual care by Deputy Surgeon-General Pinkerton, Deputy Surgeon-General, Sind Circle, the Civil Hospitals at Aden, which were inspected by Deputy Surgeon-General Bruce, to whom my thanks are due, and the Civil Hospital, Kárwár, which I could not conveniently reach, as in consequence of the British India Company not permitting their vessels to call at Kárwár there is no steam communication. As, however, when Deputy Surgeon-General of the Presidency Circle I visited Kárwár annually, I am well acquainted with the locality and hospital. I also inspected a number of dispensaries (21) which I could reach on my line of tour.

I now proceed to mention the results of my inspection. Commencing with the largest hospital, the Jamsetji Jijibhoy, Bombay, which was visited on various occasions and formally inspected in February, I noted various improvements which I need not mention here as they are referred to in the abstract of the medical officers' reports. I have also to notice various wants. For instance, there are four wards remaining untiled, and tiled floors are a great gain to the sanitary well-being and satisfactory appearance of the hospital. A fumigation-room has been sanctioned but not yet commenced; when this is added there will not be the existing necessity for destroying infected clothing. A cattle-shed is wanted in the compound for the cattle supplying milk to the hospital.

The water-supply has not been satisfactory, this appearing to result from an increased city population without any adequate increase of water, leading, as Dr. Cook opines, to an increase of certain maladies.

As regards the obstetric hospital I need not comment. It has been improved but is not what it should be, and we now look hopefully forward to the commencement and completion of the new one to which Mr. Harkinsondass Nurotumdass has liberally contributed a lákh of rupees. In the meantime another female sweeper is required specially for this building.

As no one has yet offered to build a new ophthalmic hospital I may mention that here there is opportunity for beneficial expenditure. The female ward is too shut in, and not easily ventilated. The roof being iron, the interior, which must be closed to maintain comparative darkness for the benefit of the patients, becomes unbearably hot. The latrines are badly placed, ventilating in some directions of the wind into the hospital, while the position of the male latrine renders a walk along the whole length of the hospital necessary, not always easily performed by blind or semi-blind persons. A cook-room with fire-place is required. When hot water is wanted it must either be fetched from the main hospital or heated on a charcoal *sigri* in the verandah. To provide against an intermittent water-supply a special tank should be provided for this hospital. Office, consulting room, and operating theatre, consist of one apartment in which there are no seats for students witnessing operations.

Lastly there are no quarters for the subordinate servants.

I was accompanied round the premises by the First Physician, Deputy Surgeon-General Cook, whose efficient management of this large hospital with its medical school has been annually acknowledged. And I have the pleasure of stating that the surgical side has not suffered in the hands of Surgeon-Major Bainbridge who has been acting in the absence of Surgeon-Major Gray. Surgeon Hatch's work on the surgical side well supports that of the Senior Surgeon. The First Physician bears testimony to the continued services of the Sisters of all Saints and his remarks are quoted in the abstract of his report. Too great credit cannot be given to Surgeon-Major Arnott for his conduct of the obstetric institution in which various capital operations required for severe female complaints have been recently successfully performed. The Ophthalmic Surgeon, Surgeon-Major Maconachie, has attained a skill in his special department which usually causes his wards to be full of patients.

The Gokaldas Tejpal Hospital was visited several times and formally inspected in company with the Medical Officer, Brigade-Surgeon Carter, in February. This hospital is in excellent order, and no praise of mine can add to the reputation Brigade-Surgeon Carter has achieved for himself both as a scientific worker and as the administrator of a hospital. He much requires a second Surgeon or other permanent addition to the staff. Other wants are wards for isolating patients, an enlargement of the dispensary, and female nurses.

The European General Hospital, Bombay, was also visited on several occasions and formally inspected in February, in company with the Acting Physician, Surgeon-Major Hojel, and the Resident Surgeon, Surgeon Baker. This hospital, as Government is aware, was formerly a range of barracks, and although much has been done to render it suitable for the reception of sick, it is as a hospital altogether behind the times. The position alone is sufficient to condemn it, for on the one side is Mody Bay, the night-soil depôt, and localities from which the nuisances arise, and on the other are the railway premises from which the noise of train-shunting goes on most of the night. The female wards are the worst part of this hospital, and the place below, where the probationer nurses have rooms, is unfit for the habitation of European ladies. The old wood-work of the barracks also swarms with bugs. A new European Hospital worthy of Bombay is certainly a desideratum, and I would deprecate further expenditure of money on these old buildings, for they can never be made into the requirements of a modern hospital. As regards the conduct of the work I consider it in excellent hands while presided over by Surgeon-Major Hojel. As in the Jamsetji Jijibhoy Hospital so in the European General Hospital testimony is given to the excellent service performed by the nursing sisters under the superintendence of Sister Superior Gertrude Anne. It is hoped that recent measures will result in the formation of a nursing association or school from which other institutions or private persons may be supplied with skilled nursing aid.

The Sassoon Hospital, Poona, was visited on various occasions and formally inspected on the 25th of September. Surgeon-Major Cook and Surgeon Parakh have conducted their various duties in connection with the hospital and attached medical school with much ability. While admitting the many excellencies of this hospital I observe there is an urgent want of a suitable building for the treatment of infectious diseases. There is also a want of nursing arrangements which however has been sanctioned under Government Resolution No. 187, dated 16th January 1886. The medical officer mentions the great need there is of having the out-patient department separated from the General Hospital in a suitable building, and with this I agree. The present arrangements are objectionable and unsuitable for a large hospital; the out-patients are crowded together, there is little or no privacy, and the noise is so great as to seriously interfere with the conduct of the work, as well as being a nuisance to the in-patients.

The arrangements with regard to the dispensing of medicines are also unsatisfactory. The dispensary in the morning is occupied by a number of pupils compounding medicines without sufficient supervision. The medical officer thinks a Senior Hospital Assistant or an Assistant Apothecary might be added to the establishment for the supervision of dispensary work and of the pupils generally, and recommends he should reside in the pupils' quarters. The duties of the Apothecary are so multifarious that there is practically no supervision in their quarters. With all the above I also quite agree.

The Poona City Dispensary was also inspected. It is in good hands under Assistant Surgeon Ráo Sáheb Vishram Ramji Gholay, and is doing good work. But the place, an old house, is not the building one would expect to find in use as a dispensary in such a city as Poona, and owing to defects of construction it is almost impossible to maintain it in a good sanitary condition.

From Poona I went to the Southern Marátha Country inspecting Sátára *en route*. The Sátára civil surgeoncy had been just resumed by Surgeon Greany who returned from furlough. Although the Sátára Hospital serves its purpose there are several matters which might be improved. It is surrounded on two sides by huts the occupants of which are not cleanly. Although the accommodation is ample, the ventilation, only by doors and windows, is defective. The female ward is too near the main road. The dead-house is also too near a road and also to some dwellings. The cook-house requires a better receptacle for refuse. So does a latrine. The drainage from the subordinates' quarters is defective.

Next I inspected Sholápur on the 22nd of November. Although like Sátára the Sholápur Hospital serves its purpose, it still requires a considerable number of improvements. The hospital consists of 4 detached wards, 3 of which are thatched, there is no ceiling to two of the wards, and dust and debris falling from the thatch much annoy the patients, while the thatch becomes the abode of birds, &c., causing still more dirt. Certain cells used for lunatics and otherwise require boarding.* There is no bath-room in the hospital. An examination and operation-room is required. The flooring of the whole hospital is earthen and owing to the careless habits of the patients it becomes saturated with water and other fluids. The dead-house requires fittings. There is, in lieu of a table, a masonry platform which must become saturated with filth; there is no cistern for soiled water. Presses are wanted for medical stores and clothing. There is no dhobi. There is no female attendant, a midwife was once entertained but left for want of outside support. Mr. Apothecary W. R. Scorggie, M.R.C.S., in charge, is an able and efficient officer and conducts his duties most satisfactorily.

The Sholápur Dispensary was also inspected. This is a very good building and is doing good work under First Class Hospital Assistant Hunmuntrao Gorpary. A new latrine is much required here.

My next inspection was Bijápur. The place now used as a hospital is the old dispensary which is quite unsuited for the purpose, but as Government have sanctioned the construction of a new civil hospital on a very good adjoining site, I need not say more. At present the hospital servants have no quarters and a proposal* was made to Government to build the servants' quarters for the new hospital first, which will supply the existing need. Assistant Surgeon K. S. Engineer, temporarily in charge, was performing the duties satisfactorily.

From Bijápur I arrived at Dhárwár on the 28th of November and found everything satisfactory under the able superintendence of Surgeon-Major McConaghy. The hospital is in good order and well adapted for the purpose. New cots, however, are much required for the wards, and the addition of a compounder to the permanent establishment is a desideratum.

Belgaum was next inspected. The Belgaum Hospital buildings have been previously reported as unsuited for the purpose, and they remain the same. Now that the railway is approaching near, it is very possible sick Europeans may require treatment, and the accommodation is not fitting. Surgeon-Major Hughes in charge accompanied me in my inspection of the hospital, jail-hospital and city dispensary, and is most attentive to his duties. He represents the need of a compounder and with this I agree.

As regards the city dispensary I think a large place like Belgaum should be provided with a better one. At present it is a make-shift arrangement and not so convenient as it might be for the townspeople.

My next inspection was Ahmednagar under the able superintendence of Surgeon-Major Batty. This so-called hospital consists of buildings enclosing a

---

* Since sanctioned.

square which is objectionable for a hospital, even if the buildings themselves were at all fitted for the purpose, which they are not. The best part of it is an upper story on one side used as a police-ward. The other wards are merely low unventilated pendals particularly unsuited for the treatment of surgical cases. There is only one latrine building, common to males and females, and adjoining the cook-house. The dead-house, for want of space, is actually built outside in the public street. Accommodation for the hospital establishment is represented by a single house which is necessarily occupied by the Hospital Assistant, the other servants having to live outside in the town. Money has been subscribed for a new hospital, but it will require to be supplemented by Government—(*vide* Abstract of Ahmednagar Civil Hospital Report). I visited the site fixed on for a new hospital, which is convenient for the people, but unless certain buildings at the two corners are taken in, I fear it will be cramped, which opinion was expressed to the Collector. On the other hand, it is the best site available. The new hospital has been since sanctioned.

From Ahmednagar I proceeded *vid* Chálisgaon to Dhulia, arriving there on the 14th of December.

The medical officer remarks on the Dhulia Hospital as follows:—

"The Dhulia Hospital is perfect in every way except one, and that is, it is so far "from the town as to be not only inconvenient to get to, but for the poorer class of "patients an impossibility to reach, and much of the good that it might do is therefore "lost. So greatly is this inconvenience felt that a dispensary had to be established "last year in the town. But even though so far away many of the poor attend the "hospital in preference. A few years ago arrangements were almost completed to "hand it over to the Judicial Department and get the present court and civil jail "instead, and I regret this was not carried out. During the visit of the Surgeon-"General to this station last December I pointed out this defect to him and "showed him the compound and buildings of the Roman Catholic Church which "would form a suitable and convenient site for a civil hospital in case no "arrangement could be concluded to exchange with the Judicial Department, "and the Chaplain is willing to hand it over to Government on receiving compen-"sation. If the hospital were removed closer to the town it would also be a "saving to a certain extent, as it would not necessitate the keeping up of a "separate dispensary."

With all the above I agree. Surgeon Boyd, in medical charge of Dhulia, deserves great credit for his conduct of this hospital, and I beg to refer to the Abstract of the Report for an account of the good work done there.

The separate dispensary mentioned above was also inspected and found working satisfactorily.

From Dhulia I went to Málegaon. The institution there is a dispensary, not a civil hospital, but there were certain reasons why I desired to visit Málegaon which were brought to the notice of Government in my letter No. 145, dated 13th January 1886. I need only add that the Málegaon Dispensary is located in an old house, and as regards accommodation is as bad as can be.

I then proceeded to Násik. The hospital here is an old native house in the city quite unsuitable for a hospital. Several sites have been proposed for a new hospital, all of which I visited and made notes of. I have only to mention in addition that another servant is required for the Násik Hospital.

My next inspection was the Rukhmabai Dispensary at Kalyán in charge of Assistant Surgeon Pestonji Bamonji. It is in very good order under an able and careful medical officer. It is, however, placed too far from the town.

From Kalyán I reached Thána on the 23rd December. The hospital buildings are kept in good order and serve their purpose. Surgeon Kirtikar, in charge, performs his duties satisfactorily, and mentions there is some idea of obtaining subscriptions towards a new hospital.

The Rustomji Wadia Dispensary, Thána, was also inspected, being in charge of Assistant Surgeon Barjorji Ardesar, an able and conscientious officer. The building is unsuitable: there is no residence for the Assistant Surgeon, and it has been pro-

posed to add an upper story at a cost of Rs. 3,500. It would, however, be better to build a new dispensary and place it on the other side of the town, as at present the civil hospital and dispensary are close together. A better-paid compounder is required in this dispensary.

Passing through Bombay I proceeded towards Gujarát, stopping first at Bulsár and inspecting the Dinsha Manockji Petit Dispensary, in charge of Assistant Surgeon Dadina. I carefully inspected this dispensary in consequence of certain complaints having been made against the Assistant Surgeon and the following remarks were inserted on the visitors' book:—

"The dispensary is in good order in every respect. The attendance has "much increased during recent years (since my last inspection), and the percentage "of female attendance is much larger than at most other institutions. There is "no doubt Mr. Dadina performs his duties efficiently."

I next inspected the Broach Civil Hospital in temporary charge of Assistant Surgeon J. B. Unwala. This hospital is good, and in satisfactory order, the requirement being Hospital Assistant's quarters.

From Broach I went to Surat. The hospital was in charge of Assistant Surgeon Dosábhái Pestonji, Honorary Assistant Surgeon to the Viceroy, during the temporary absence of Surgeon-Major Banks on privilege leave who, however, returned before I left. The Surat Hospital is rather a pretentious building affording excellent accommodation, being kept very clean and in good order. Dr. Banks has improved the interior fittings of this hospital by the provision of receptacles fixed to the wall by each bed-head in which the patients may place medicines, &c. The arrangement in the lower ward for night-use is defective. There ought to be a semi-detached corner-room. The establishment has been unaovidably under-strength owing to the many demands on the Subordinate Medical Department.

The Parakh Dispensary in the city was also inspected. I found this dispensary much improved and enlarged, and there is a larger attendance of females than at most institutions of the kind. Now that the compound has been enlarged, another improvement would be the removal of the out-houses, especially the latrines, to a greater distance from the dispensary.

From Surat I proceeded to Godhra, Panch Maháls, under the charge of Surgeon Anderson. The hospital buildings are those formerly used as a dispensary. The main hospital is chiefly devoted to the police-ward. The pauper-ward is some distance away, being the place formerly occupied by the Assistant Surgeon. It only accommodates four patients. There are no quarters for 2nd class servants. A new hospital is much required.

My next visit was to Kaira, in charge of Surgeon Davidson, who had recently returned from officiating as Health Officer in Bombay. Altogether this hospital is fairly satisfactory, but there are some defects. The position of the latrines with reference to other buildings is very objectionable, windows are required for the wards, the lighting of the operating and post-mortem rooms is defective. There are no quarters for the Hospital Assistant. Four feet of one of the ward walls is being coated with Portland cement at the instance of Surgeon Davidson. He remarks: "One great difficulty which is experienced in Indian Hospitals is the "inability to keep the wards in that state of cleanliness which is maintained "under efficient supervision in English Hospitals, and with ordinary white or "colour-washed walls this is an impossibility. Patients of a certain class in "India will, and no power can prevent them doing so, soil occasionally the walls "of the wards. The walls are only white-washed twice, in some places only once "a year, and so the stains, expectoration of mucus or bloody or putrifying matter "will remain for six months without being effectually removed, and even then "very often it is taken away in a perfunctory manner, perhaps being only white-"washed over, whereas if the walls and floors are made of materials which can be "washed, or in moist climates dry-rubbed, they can be cleansed whenever dirty." It would be well if all the walls in every hospital were treated as above.

Returning from Kaira I visited the Mehmadabad Dispensary. Better accommodation for the Hospital Assistant in charge and a small ward for females here wanted.

Of the Hattesing and Premabhai Civil Hospital and attached Medical School I made a full inspection in company with Surgeon-Major Robb, the most able, careful and efficient Superintendent. There are too many defects apparent here. - The space in the main ward is encroached upon by a row of massive pillars acting as roof supports. There is no waiting room for patients; there is no means of separating male and female out-patients; patients are examined and prescribed for in public; there is no private office or room for examinations; there is no operating theatre; operations are performed in the dispensary which is too dark and affords no accommodation for the 69 students at the school. The female ward is too small. There are no servants' quarters, the latrines are too near the hospital. A hospital sufficiently important to warrant the attachment of a medical school certainly should not be stigmatised by imperfections as above.

While at Ahmedabad I inspected the leper asylum, the police hospital, the jail hospital, the Dhuliákot Jail Hospital, and the Raipur, Ranchodlal, and Baichardass Dispensaries. In the Raipur visitors' book I noted: "Dispensary in good "order. There is a large female attendance, 43 daily. A better store-room "is required." At the Ranchodlal Dispensary two new detached wards have been recently built which will prove a very acceptable addition. I noted that another compounder is required. At the Baichardass Dispensary the following remarks were inserted in the visitors' book:—"The dispensary is in very good order and "well adapted to the purpose. The books are well kept up to date, and show a "very large female attendance (from 45 to 59 daily). Some heaps of rubbish "ought to be removed from the dispensary enclosure." I consider the medical officers in charge of these three dispensaries, *viz.* Hospital Assistant Bhau Sakharam, Assistant Surgeon P. H. Dadachanji, and Assistant Surgeon K. B. Cooper, are doing very good work.

My next inspection was Wadhwán Dispensary. It is in good order, and the medical officer in charge, Assistant Surgeon Thakurdass Kikhabhai Dalal, is a very capable and efficient officer. More clothing is required at this dispensary for in-door patients.

Reaching Rájkot, the civil hospital there was visited on the 13th and 14th of January. This hospital has been much improved under the energetic superintendence of Surgeon-Major Barker. It has been re-roofed with sawn timber and Mangalore tiles, and the verandahs have been paved. An operating and surgical ward have been added which in arrangement and fittings may be regarded as a model. An eye-ward is still a desideratum, also a lowcaste-ward, and the enlargement of the women and children ward. The establishment is insufficient for the work and the requirements of this hospital were brought to notice in my letter No. 623, dated 5th February 1886, to Government in the General Department.

I next inspected the Residency Dispensary at Baroda. It is a small place consisting of one room near the Residency, but I suppose it meets the purposes for which it is wanted.

I then went to Bassein Dispensary, in charge of Assistant Surgeon F. A. Moos, where the following remarks were placed in the visitors' book:—"Evidently a "good deal of satisfactory work is being done. The large number of female patients, "some 52 daily for the past year, is a satisfactory feature. Attention should be "drawn to the exceedingly filthy state of the neighbouring premises." This place is really very unfitted for the purpose, and I visited the proposed site for a new dispensary which although well situated I consider too small.

My next inspection was Ratnágiri in charge of Surgeon McCalman. The hospital is sufficient for the purpose, but it is some distance from the town, and there are no servants' quarters, while the office, dispensary, operating-room consists of one apartment used for the three purposes.

The leper asylum at Ratnágiri was also inspected. It is in good order, but as usual in the cold season not so crowded as during the monsoon when more lepers seek admission This asylum is fully two miles from the station, and its attendance and superintendence is a tax on the Civil Surgeon for which he certainly ought to receive some extra allowance.

11. Some other requirements of different institutions which I note are as follows. At Sádra the accommodation for in-door patients is insufficient. At Karáchi water should be laid on to the hospital, wards and verandah should be paved, the latrines require re-construction, and a fence is wanted. At Hyderabad the plan of the office and dispensary is inconvenient for out-door practice, these two rooms having only one door for entrance and exit. At Sukkur ill-fitting doors and windows and want of fire-places render the old mud barracks utilized as a hopital unfitted for natives in the cold weather of Upper Sind. For Vingotla a proposal has been made by the Collector to convert the dispensary into a travellers' bungalow and the travellers' bunglow into a dispensary. Some dispensaries are lodged in unsuitable buildings as Mirpur Batoro, Dhollera, Uran, Junnar and Álandi. I also note that new buildings will probably soon be erected at Bandora, Bassein, Nandurbár and Akluj. At Satána, Tando Adam and Khipra new buildings have been occupied during the year. At Panvel the Committee has purchased the building.

12. In the foregoing remarks various medical officers have been mentioned as conducting their duties efficiently. And it affords me great satisfaction to state that with one or two comparatively trivial exceptions, disposed of departmentally, I have not had occasion to find fault with, or to reprimand, any medical officer under my administrative control. Many have performed onerous duties, some with short-handed establishments, and I now beg to mention the urgent existing necessity for an increase of the Subordinate Medical Establishment. Since the number of the establishment was fixed many new institutions have been opened, so that the calls on the department have been such that no more demands can be met, while grant of leave to subordinates has been generally difficult and in many cases quite impracticable. The necessity of increasing the establishment was brought to the notice of Government in my letter No. 6304, dated 1st December 1885.

13. I have now to add that during the year the establishments of the hospitals named have been below the sanctioned strength, there being no medical subordinate available, the result being that under the plea of extra work subordinates apply for extra allowances—

Names of Institutions.		What below sanctioned Strength.	
Kárwár	... 1	Passed Pupil or Hospital Assistant.	
Dhulia	... 1	Do.	do.
Ratnágiri	... 1	Do.	do.
Sholápur	... 1	Do.	do.
Surat	... 1	Do.	do.
Broach	... 1	Do.	do.
Shikárpur	... 1	Do.	do.
Sukkur	... 1	Do.	do.
Thána	... 1	Do.	do.
Kaira	... 1	Do.	do.
Ahmednagar	... 1	Do.	do.

But even if there were the sanctioned strength of Hospital Assistants the absence of the medical pupils formerly found in every civil hospital is much felt, so that there is a general cry for compounders. This, however, I hope to meet under Government Resolution No. 4403, dated 20th November 1885, General Department.

14. A matter to which I have given considerable attention is the excessive amount of clerical work which is entailed on the establishment of civil hospitals and especially of dispensaries. Various measures have been taken which will in some degree diminish the amount of writing now required.

I have the honour to be,

Sir,

Your most obedient Servant,

W. J. MOORE, C.I.E.,

Surgeon-General with the Government of Bombay.

APPENDIX I.

SUMMARIES OF THE ANNUAL REPORTS

OF THE

CIVIL HOSPITALS AND DISPENSARIES

OF THE

BOMBAY PRESIDENCY AND SIND,

FOR THE YEAR 1885.

KONKAN.

BOMBAY CITY.

EUROPEAN GENERAL HOSPITAL.—*In charge of* Surgeon-Major H. J. BLANC, M.D., *till March 1st, afterwards in charge of* Surgeon-Major A. N. HOJEL, *till end of year.*

Conservancy and Water-supply.—The conservancy as far as the hospital compound is concerned receives strict attention. Complaints have been made to the municipality of nuisance in the neighbourhood. The water-supply has been very defective, pressure not being sufficient to maintain the source tanks full.

Hospital Buildings.—The Medical Officer regards the buildings as unsuitable. He states originally the upper wards were barracks and the lower godowns and that the old wood work is full of bugs, which cannot be prevented attacking the patients at night. He complains of the bad surroundings of the hospital, the noise of the railway, the night-soil depôt, and the interception of the breeze by the new railway terminus. He also states "although a sum of money was sanctioned for alterations to the female ward, I was so fully impressed with the necessity of an entirely new hospital that the alterations were not carried out." The only alterations made were the raising of the lattice work of No. 7 ward verandah to the roof to prevent escape of delirious patients. The furniture has been improved by the provision of locks in No. 1 and 2 ward for each bed. Through the liberality of the Endowment Fund Committee the hospital has been placed in the circuit of telephone communication, so that in case of accident in any part of the town a message can be sent to the hospital where everything can be placed ready for the arrival of the sufferer.

Details of treated.—1,194 out-door and 1,433 in-door patients were treated during the year against 1,145 and 1,312 for the previous twelve months; of the in-door patients 1,003 were males, 309 females, 121 children: 1,115 being Europeans, 310 Eurasians and 8 others.

Prevailing Diseases.—The prevailing diseases were malarial fevers, diarrhœa, syphilis, rheumatism, dysentery and phthisis in very nearly similar proportion as for the previous year. There were 22 cases of enteric fever, 33 of remittent fever, 25 admissions for cholera, the bulk of the cases of this disease being admitted from the Royal Sailor Home, Apollo Road. The admissions for syphilis show a slight decrease, dysentery yielded 79 cases, diseases of the liver 62, alcoholism 124. The total number of admissions into the obstetric ward was 41 as compared with 63 for 1884, the decrease being accounted for by the closure of the ward during February and the early part of March in consequenee of an outbreak of puerperal fever. Of the 41 cases admitted 32 were deliveries.

Mortality and its Causes.—Eighty-one deaths occurred during the year against 65 in 1884, giving a percentage of 5·6 of deaths to in-door patients treated. Of these fatal cases 15 occurred within 24 hours after admission, 5 within 48 hours and 1 within 72 hours—a total of 21 cases chiefly from cholera. Other causes of death were phthisis, fevers, diseases of the liver and of the lungs, diarrhœa and dysentery.

Surgical Operations.—Thirty-three major and 823 minor surgical operations were performed against 31 and 645 respectively in 1884.

Conduct of Establishment.—The Acting Physician mentions that Mr. Church, the Apothecary in charge, continues to merit favourable report. Mr. Machado, Assistant Apothecary, is spoken of as painstaking and efficient. Mr. Summers, Assistant Apothecary, has not failed to

give satisfaction. The Acting Physician acknowledges the great obligations he is under to the Sister Superintendent and the Nursing Staff for the untiring way in which they have performed their duties. From a report by the Sister Superintendent it appears that since January 1885 there have been on duty in the hospital 7 nurses, besides the two ward sisters and the Sister Superintendent. In November last 4 trained nurses were brought out from England in order to supply the constant and increasing demand for nurses in private families. Thus the nucleus of a nursing association has been formed, the nurses at present working as needed either in the hospital or in private nursing.

The actual cost of the nursing establishment has been, inclusive of the passage money and outfit of four nurses, Rs. 9,968-8-10, and to meet this there has been—

Government grant	Rs.	4,080	
Endowment Fund grant	„	2,400	
Private nursing payments	„	1,711	
Advance by All Saints Community	„	1,777	8 10
	Rs.	9,968	8 10

Cost.—The total cost was Rs. 74,961-9-0 as compared with Rs. 78,979-9-9 in the previous year. The total income amounted to Rs. 13,733-9-0, out of which Rs. 13,677-3-9 were received from paying patients against Rs. 10,651-13-4 and Rs. 10,564-15-0 respectively in 1884.

Jamsetji Jijibhoy Hospital—Medical Section.

Deputy-Surgeon General H. Cook, M.D., *First Physician.*

Conservancy and Water-supply.—Matters under this head are dealt with by the municipality and no complaints are preferred.

Hospital Buildings.—The drainage of the compound and the filling in of the lower levels with earth were completed before the setting in of the monsoon, and the good effects were manifest in the cessation of the flooding which was usual during the rains and in the consequent greater freedom from damp of the locality. It is also noted that the effluvia from underground gutters after the rains was absent. A new laundry has been completed and is in full working order, thus preventing former difficulties in the way of return of clothing by the dhobis, and lessening the risk of infection from foul clothing at the public washing-places. The flooring of seven wards with Minton tiles has been completed, but four still remained untiled. The ventilation of the upper stories has been improved by ridge ventilation. The provision of two large iron tanks placed above the operating theatre has entirely obviated the inconvenience of an intermittent water-supply to the main hospital. The lighting of the operating theatre by glass roofing has proved, as was expected, a great boon by day; while the application of the albo-carbon apparatus to the existing gas light, which has been adopted, affords a clear brilliant light by night. Improvements in the obstetric hospital have been carried out during the year. The porch has been enclosed and fitted with windows, the floor raised and tiled; it has been fitted with platforms for students and now forms a fair operating room. A new examination-room has been constructed by building on to the old enclosed verandah a small transept to the main building. The building of quarters for nursing sisters has been commenced. The only sanctioned work not commenced is the fumigation-room. Plans have also been sanctioned for the conversion of the block presently occupied by the student on day and night duty in the hospital into a dispensary for females and children.

General Health of the City.—This subject is so fully treated on by the Health Officer of the municipality that it need only be glanced at here. Remittent fever, phthisis, bronchitis, and pneumonia appear to have been more destructive in 1884-85 than in 1883-84. Epidemic disease in the city seems to have been less prevalent, especially cholera, which decreased from 1,627 (deaths) in 1883-84 to 576 in 1884-85. A considerable decrease also occurred under the heads measles, and small-pox. On the other hand there was an increase of deaths from diphtheria. Deputy Surgeon General Cook remarks "Diphtheria is becoming more recognized as a cause of death."

Attendance of Patients.—The total amounted to 5,976 in-door patients, of whom 1,511 were females or children. This is a decrease on the former year when the total was 6,498. The decrease is accounted for by seven wards having been empty a considerable time while workmen were employed tiling the floors. The daily average number of sick was 390·4. There has been an increase in the number of out-door patients, the total being 29,025 as compared with 28,942 for 1884, which in its turn was considerably in excess of the number for 1883.

Prevailing Diseases.—Among in-door patients the diseases causing the greatest number of admissions were surgical injuries 447, diseases of the respiratory system 430, syphilis 419, ague 405, skin-diseases 287, dysentery 280, diarrhœa and enteric catarrh 254, cholera 209, phthisis 203, labonis 163. As regards epidemic diseases the admissions were less than for the previous year, there being 208 cases of cholera against 274. The largest number of admissions for cholera occurred in March (60) and February (30).

Deputy Surgeon-General Cook mentions that while ague, of which there were 405 admissions, "readily yields to treatment," there is "great difficulty experienced in subduing the remittent form of malarial fevers in Bombay, and this would seem to indicate a material difference in the nature of the *materies morbi*, while the characteristics and course of these fevers support this indication." Dr. Cook also mentions the steady increase in the number of cases of dysentery, the figures showing a progressive rise from 153 in 1881 to 280 in 1885. This marked proclivity to dysentery amongst the people "may possibly arise from the growing want of pure water in the city, as a result of an increasing population, with no commensurate addition to the supply."

The more common diseases among out-door patients were fevers, skin-diseases, syphilis, gonorrhœa, diseases of the respiratory system, dyspepsia, diarrhœa, dysentery, rheumatism, ulcers, uterine diseases, scurvy, neuralgia, phthisis, in the order named.

Mortality and its Causes.—Eight hundred and thirty-eight deaths occurred among in-door patients—636 males and 202 females. The percentage of deaths to treated was 14. Of the total deaths 127 were from cholera, which materially affects the death-ratio at this hospital. The death-rate to treated of cholera was 60·7. The next most fatal disease was phthisis with a death-rate of 43·3. The First Physician remarks: "patients rarely come for treatment in the earlier stages of this disease," and he refers to the greater relative frequency of phthisis in the city of Bombay as compared with the Mofussil to the factors of damp subsoil and overcrowding, leading to an increase of the malady. But he anticipates improvement when the drainage and sewerage system in progress is carried to completion, although the climatic conditions of heat and moisture combined, which cannot be improved, must always favour the disease. Diarrhœa and dysentery gave relatively 81 and 64 deaths. Hepatic abscess caused 42, thus showing that it is not, as has been supposed, mainly a malady affecting Europeans. Remittent fever caused a death-rate of 28·9. From tetanus there were 17 deaths, ratio to treated 48 per cent., diseases of the respiratory system 14·6 per cent.

Vaccination—Is performed at the Vaccination Station at the Hospital, by officers of the Department.

Conduct of the Establishment.—The First Physician reports "the duties of the various members of the staff have been carried on with regularity and efficiency and to my entire satisfaction." He speaks most favourably of Mr. Fearn, "who carries on the responsible duties of House Surgeon in a manner which fully justifies the confidence placed in him." Mr. Shephard, the Assistant Apothecary, has also merited commendation. Several changes took place in the staff. In February Surgeon-Major Gray proceeded on furlough, and Surgeon-Major Bainbridge took up the senior surgeoncy. In February also Surgeon-Major Hojel was transferred to the European General Hospital, and Surgeon-Major Waters became Acting Second Physician, while Surgeon Manser took up the duties of Third Physician and Registrar. Six Assistant Surgeons have from time to time been attached to the hospital, and were assigned charge of various wards as occasion required.

SURGICAL SECTION.—SURGEON-MAJOR G. BAINBRIDGE.

Sanitary.—The condition of the surgical wards was in the main very good. They were free from all septicæmic affections which could be attributed to the state of the hospital atmosphere, with the exception of erysipelas, which at various times appeared, but from which no deaths occurred. The women's wards, which are nearest to a privy, suffered most, but no special cause could be assigned.

Injuries and Diseases.—The principal injuries treated were as follows. Wounds of various kinds 129; contusions and sprains 101; fractures and dislocations, lower limbs 62. upper limbs 39; skull 11; spine 5; ribs 14; burns 22. Among surgical diseases were 23 cases of necrosed bone; 32 of stricture of the urethra; 6 of elephantiasis of the scrotum, 21 cases of strangulated hernia, and 11 of non-strangulated. Among out-patients were treated 132 fractures and dislocations.

Surgical Operations.—Two hundred and eighty-four major and 845 minor operations occurred among in-door patients, being 81 more and 224 less than in the year 1884. The more important operations were 32 amputations; 4 excisions of joints (one being of the hip); 2 ligatures of the femoral artery; 22 herniotomies, 86 lithotomies, 4 lithotrity; 14 plastic operations. In addition there were 2,242 minor operations among out-door patients.

Surgeon-Major Bainbridge states that for dressing a modified Listerism is now in use. He enumerates the materials used, and regrets to say the supply was limited, and seriously urges a more liberal supply of absorbent dressings.

Nursing of the Hospital.—Under this head the First Physician remarks: "The addition to the effective nursing establishment of the hospital when the four sisters who are expected shall have joined must prove of great benefit, as experience has shown that the nursing and general management of the wards already enjoying the advantage of the presence of two sisters has been materially benefited. The city of Bombay is, I think, greatly indebted to the disinterested labours of the Sisters of All Saints Society."

Obstetric Section.—Surgeon-Major J. ARNOTT, M.D.

The total treated in this department was 362 as compared with 338 for 1884. The number of puerperal cases was 162 against 172 for the previous year. Of these 153 were confined in hospital, of which 91 were cases of natural labour with no death—23 cases of premature labour with one death, and 48 cases requiring unusual help, of whom 10 died.

The work of the institution has been similar to that of former years with a large proportion of severe operations. The fatal cases include all deaths within a month after parturition and among them are the following. A (Hindu woman) case of contracted pelvis admitted in a hopeless condition. A Goanese woman admitted insensible with eclampsia. A Mahomedan female for hœmorrhage, 36 hours in labour. A Bania woman with extreme deformity of the pelvis, six days in labour. A Mahomedan woman admitted in a hopeless state from protracted labour. A Goanese admitted in much the same condition. Other cases were extreme deformity of the pelvis—rupture of the uterus, abortion complicated with bowel complaint—septicæmia after delivery. A Mahomedan woman injured by a native midwife. Dr. Arnott observes with reference to these fatal cases that however unpromising, he acted on the old maxim that no woman should die un-delivered and that he has operated with a good result when it would not have been difficult to argue that success was impossible.

Surgeon-Major Arnott makes remarks as regards various obstetrical operations some of which were communicated to the Obstetric Society of Edinburough, and he observes that certain cases met with in Bombay give an invaluable experience, greater perhaps than is afforded by any obstetric hospital at home. Surgeon-Major Arnott also mentions all the most recently approved practice and some new instruments he has adopted.

As a new hospital is to be built the Obstetric Physician refrains from again mentioning the defects of the present one, but he admits the alterations referred to in the First Physician's report have proved most useful.

Four women are in training at this hospital as midwives.

The Obstetric Physician represents the urgent necessity for a second female sweeper.

The total cost was Rs. 1,65,747, the cost per patient Rs. 4-11-9, as compared with Rs. 1,72,009-14-2 and Rs. 4-13-7 respectively in the previous year. Rs. 361-14-7 were received from paying patients against Rs. 123-2-0 in 1884.

COWASJI JEHANGIER OPHTHALMIC HOSPITAL.—*In charge of* Surgeon-Major G. A. MACONACHIE, M.D.

The Ophthalmic Surgeon mentions that during a part of the year the municipality had the streets near the hospital opened for sewers, &c., and a quantity of rubbish was deposited close by, which caused a nuisance and was not removed until after some correspondence with the municipality. He also notices that a number of metal-workers have opened shops near, and the noise is so great that at times ophthalmic examinations are made with great difficulty. The hospital buildings are in good order, but the female ward is much shut in and not easily ventilated. The roof is iron without a ceiling and the interiors get very hot. The position of the latrines, especially the male latrine, is very unsuitable. The intermittent supply of water is also a subject of complaint. A proper operating theatre is also required.

The total number treated was 6,558 less than last year but the average of several previous years. Of these 549 were in-door patients. Operations of all kinds amounted to 1,382. Diseases of the conjunctiva supplied 2,655 out and 52 in-door patients. Dr. Maconachie observes that in these cases he attempted the use of the last fashionable remedy, jequirity, but found it unsatisfactory. Only 16 cases of purulent ophthalmia occurred, and of these only 4 were gonorrhœal, which is a very small proportion. Diseases of the cornea gave 1,142 cases among out-door and 186 among in-door. Diseases of the iris gave 142 out and 48 in-door patients. Diseases of the lens gave 462 out and 146 in-door patients. Of the latter most were admitted for operation and 116 cataracts were removed, 106 by Grafe's, 9 by the linear, and one by the Scoop methods. For injuries of the eye there were 568 out-door and 13 in-door patients, comprising wounds, contusions, chemical injuries and burns. Of the average daily attendance 34 were males, 29 females and 14 children, and although the average of males was greatest, the daily attendance of women and children exceeded the males. The Ophthalmic Surgeon adds "from the number of females that attended and their castes there occurred no anxiety to escape from the treatment of a male surgeon."

Dr. Maconachie forwards a record of his operations of which there were 947 coming under the heading major and 460 minor. It has been already mentioned the 116 cataracts were removed and other operations were for artificial pupil, iridectomies, enucleations, abscissions, paracentesis, &c. Dr. Maconachie observes that on the whole there were fewer important operations than during the previous year which he thinks depends on the introduction of cocaine into ophthalmic surgery as he heard with the assistance of this agent various general practitioners are attempting operations on the eye who never did so before.

The number of Europeans attending the ophthalmic institution was almost identical with that for the former year. Dr. Maconachie does not believe Europeans in this country are

either more or less susceptible to eye diseases than natives, and they suffer from precisely the same complaints.

During the year a passed medical pupil was sanctioned as an addition to the Ophthalmic Hospital Establishment. Hospital Assistant G. J. D'Cruz has been on duty during the whole year and has performed his duties well as formerly.

GOCULDA'S TEJPA'L HOSPITAL.—*In charge of* Brigade-Surgeon H. V. CARTER, M.D., excepting during his absence on leave from the 1st March to the 31st May when Surgeon-Major Barry, M.D., held charge.

Conservancy and water-supply.—The conservancy arrangements are reported to work efficiently. Imperfections in the water-supply mentioned in last report are now remedied, and latterly the water pressure has been sufficient to fill both tanks on the roof of the hospital.

Hospital Buildings.—The Hospital buildings have been kept in good repair and as an improvement the dark teak roofings inside have been painted white. Gas is now supplied to the House Surgeon's quarters, and an additional lamp is placed in the compound. A stout bamboo fence has been erected along the main road aspect of the compound, but there should be a wall. A plan for increasing accommodation and isolating certain sick patients was formed but on financial grounds the proposals could not be sanctioned. The furniture and fittings of the hospital have been duly attended to.

Detail of treated.—The total treated in the wards was 2,763 as compared with 2,374 for the previous year, and there being 120 beds available it follows that during the year each bed accommodated 23 patients whose mean detention in hospital was 15·8 days, which must be considered a short period. Of out-door patients the total treated was 17,471 as contrasted with 17,964 for the previous year, showing a decrease of 593. Last year it was remarked that the attendance of women and children had not fallen off, although a dispensary specially for them had been opened not far away. This year the decrease noted above appears wholly caused by a falling off of women and particularly of children, the number of males attending the hospital out-patient department having increased from 9,993 to 10,033. As the female dispensary becomes known it is not matter of surprise that its proximity to the hospital should induce women who would otherwise frequent the latter to go themselves and take their children to the former. At present the number of in-door female patients has not been affected, but it will probably be reduced when the Cama Hospital is opened. The average daily number of sick was for in-door patients 115 and for out-door 160 as contrasted with 114 and 153 last year. Thus although the total number of out-door patients was less, the daily average number attending was greater.

Prevailing Diseases.—Among in-door patients there were 252 admissions for malarious fevers, 205 for syphilitic affections, 135 for affections of the respiratory organs, 126 for phthisis, 141 for dysentery and 64 for diarrhœa. There are also 3 admissions for relapsing fever. As compared with the previous year the numbers show an increase of malarious fevers, phthisis, dysentery, rheumatism, abscess and ulcers. The number of injuries admitted also rose from 574 to 618, among which there were 184 fractured bones, wounds and contusions 335, burns 21, dislocations 10, and multiple injuries 9. Among out-door patients the commoner diseases were malarious fever, bowel derangements, bronchial affections, syphilitic maladies, diseases of the eye.

Surgical operations.—There was a falling off of major surgical operations from 104 to 85. Many of the operations at this hospital are required for injuries and the Medical Officer remarks that injuries although more numerous were rather less severe. Among the major operations there were 21 amputations with only one death from tetanus. The eye-ball was extirpated three times with success; there were four cases of lithotomy, two of herniotomy and one case of excision of the whole of the shoulder blade. The mortality on the whole of the major operations was barely 11·8 per cent. which is satisfactory; although the medical officer refers to examples of erysipelas which have occurred as demonstrating the want of isolation wards in order to avoid the "hospitalism" which so often affects those subjected to operations. Of minor surgical operations there were 2,001 against 2,053 for the previous twelve months.

Medico-legal and Police Cases—Were frequent; the latter amounted to 2,347, while 33 inquests were held at the hospital: 26 on account of fatal injuries, 4 poisoning, and 3 other causes. The absence among poisoned wounds of dog-bites and the absence of hydrophobia is commented on by Brigade-Surgeon Carter as noteworthy. Also the prevalence of acute alcoholism (drunkenness) amongst the natives, there being 167 cases with two deaths against 111 and no death in the previous year. "It might, therefore, be thought that drinking habits are becoming more frequent of late among the lower classes of natives."

Mortality and its Causes.—There were 279 deaths or 10 per cent. of treated. Forty-seven deaths occurred within 24 hours after admission and 55 in the course of 4 days, showing the large proportion of cases admitted in a nearly hopeless state. The largest number occurred from phthisis pulmonalis, remittent fever, debility, dysentery and diarrhœa. Tetanus caused 11 deaths out of 15 treated, for this very destructive malady. There were 5 deaths from privation in 15 admissions under this heading.

Hospital Staff and Conduct of Establishment.—The fixed higher grade establishment is hardly equal to the requirements, and when available junior Assistant Surgeons have been attached for temporary duty, but the Medical Officer mentions frequent changes are disadvantageous. Nevertheless he names the following Assistant Surgeons who have afforded him valuable although temporary aid during the year. Messrs. E. Mackenzie, N. H. E. Sukhia, K.S., Engineer, J. B. Unwála and K. T. Gokhale. Of the House Surgeon Mr. C. Easdon (Apothecary) the Medical Officer reports as favourably as before and with the same commendation. The other members of the establishment are also favourably reported upon, all in general having done their work satisfactorily.

Cost.—The total cost was Rs. 52,037-10-9 and the cost per patient Rs. 2-9-1 as compared with Rs. 51,258-0-3 and Rs. 2-8-3 respectively in the previous year. The cost of each diet was Re. 0-3-5 as compared with Re. 0-3-10 for the previous year.

This hospital was formally inspected by the Surgeon-General in February and visited on various other occasions.

KHETWA'DI TEMPORARY HOSPITAL.—*In charge of* MISS EDITH PECHEY, M.D.

Conservancy and Water-supply.—As the two small bungalows used as wards were only taken as a temporary arrangement until the completion of the Cama Hospital, the alterations and improvements were limited to such as were absolutely necessary to secure a tolerably sanitary condition of the premises. The drainage is by no means perfect, but the entrance of sewage into the gutter has been prevented by the adoption of the pail system in the privies, and the daily emptying and cleansing of these has been carefully attended to. The water-supply is good.

Buildings.—A new staircase was made up to the room over the porch and various smaller alterations and improvements were made in order to fit the buildings for use as a hospital.

Attendance of Patients.—The number treated was 106 in-door and 5,998 out-door patients. The latter were seen in the Jaffir Suleman Dispensary near the Crawford Market. The average daily attendance was 90·22.

Prevailing Diseases.—Diseases of women and obstetric cases have formed the bulk of those treated and next to these respiratory affections.

Surgical Cases.—There have been no major operations.

Mortality.—Of the 106 in-patients 72 were cured, 32 relieved and 11 discharged otherwise and 1 died. This does not however correctly represent the mortality as in 3 or 4 cases patients were removed by their friends as soon as death appeared inevitable. Of the cases relieved several were cases of parametriti which did well, but who had not the patience to remain in hospital till recovery was complete. In the Out-patient Department the most common diseases were those of the genito-urinary system.

Conduct of Establishment.—This has been good.

Cost.—The cost to Government has been Rs. 2,430 for salaries and Rs. 4,596 for diets, the average cost of each diet being annas 8 pie 1. The Committee of the Medical Women for India Fund have paid the rent of the bungalow with the cost of alterations, the salary of the night-nurse and all minor expenses not allowed by Government.

BYCULLA CENTRAL SCHOOLS.—*In charge of* Surgeon-Major G. Y. HUNTER.

Conservancy arrangements are good. The water-supply is from Vehár. The hospital buildings are in good repair. There are no means for the separation of infectious cases. The furniture and fittings are in good condition. The number of cases treated (all in-patients) has been more than last year by 65. Prevailing diseases have been malarious fever of a intermittent type, chest-complaints and skin-diseases; the number of admissions into hospital has been 489 or 69 less than last year. No child has been admitted into the schools who has not been vaccinated or re-vaccinated. The conduct of the establishment was good. The schools last year went to Khandála on the 17th December 1885 for a month's change and returned much benefited thereby.

GRANT-IN-AID DISPENSARY.

J. N. WA'DIA, MA'HIM.—*In charge of* MR. NUSSERWANJEE JEHANGEERJEE, L.M.

The building is in good repair and is suitable. All necessary furniture is provided. Some members of the committee visit the dispensary occasionally. Sanitary condition of the village is satisfactory; the water is partly from Vehár but chiefly from wells, the latter being liable to contamination. The total number treated was 8,892, all out-door patients, as compared with 8,946 in the previous year. The more common diseases were malarious fevers, diarrhœa, respiratory affections, skin-diseases and worms. Cholera was slightly prevalent in the first two months of the year. Vaccination is performed by municipal vaccinators and 921 children have been vaccinated. The total cost was Rs. 2,049-4-10, the cost per patient Re. 0-3-8, as compared with Rs. 2,366-9-1 and Re. 0-4-2 respectively in the previous year.

THA'NA COLLECTORATE.

THA'NA CIVIL HOSPITAL.—*In charge of* Surgeon K. R. KITIKAR.

Conservancy and Water-supply.—The conservancy of the town is again reported as far from satisfactory. It is stated the municipality has changed hands, and is now entirely managed by the inhabitants without any official head. The Medical Officer reports after repeated applications last rains the gutters and drains that had been lying useless, choked with mud and other rubbish, were thoroughly cleaned throughout the principal parts of the town. People allow their children and even grown-up men to defecate in front of houses. Dust bins exist, but care is not taken to shoot rubbish into the bins. The Medical Officer also mentions that although a vegetable market exists in the shape of a shed constructed for the purpose it is not utilized; vegetables are sold on the steps of houses over open gutters, and the refuse is trodden under the feet of passers-by, or carried into the houses. The water-supply is good and abundant, and is a great boon to the town.

Hospital Buildings.—The hospital buildings are in fair repair but have long been regarded as unsuitable. It is dark; there is no operation-room; there is no accommodation for lunatics under observation. The hospital latrines have been improved. The Medical Officer again mentions there is a probability of a new hospital being built by private munificence.

General Health of the Town.—Cholera prevailed in the months of May, June, July, August and September. The Medical Officer remarks on the rapidity with which the disease proved fatal.

Attendance of Patients.—There were 325 in-door and 3,112 out-door patients against 292 and 2,681 for the previous year, thus showing a considerable increase.

Prevailing Diseases.—These are malarious fevers complicated with spleen and liver enlargements; malarial cachexia is a prominent symptom in most cases. Skin-diseases also prevail largely. Round worms is a malady also very prevalent. A case of drowning was successfully treated by Sylvester's process and the injection of *æther sulphuricas* subculaneously. The woman, who was pregnant, was under water certainly more than four minutes.

Mortality—Was over 10 per cent. on the number of in-door patients treated, but excluding cholera the proportion was a little over 8 per cent. The Medical Officer remarks: the bulk of admissions are chiefly paupers in an advanced stage of disease, and the mortality amongst this class contrasts strongly with the class of patients who come from the Police Corps whose death ratio is almost nil.

Major Surgical Operations.—Of these there were 10 and 100 minor. The proximity of Bombay with its large hospitals induces many who might otherwise apply at Thána to seek relief in the Presidency City.

Vaccination—Is carried on by a municipal vaccinator. The Medical Officer mentions the municipality do not appear to appreciate the importance of vaccination; instancing as proof their desire to dismiss the municipal vaccinator's peon, the reduction not being required on account of impecuniosity.

Medico-legal Cases.—Numbered 47 during the year, entailing 7 *post-mortem* examinations.

Conduct of the Establishment.—This is reported as having been satisfactory.

Cost.—The total cost was Rs. 11,364-11-6 and the cost per patient Rs. 3-4-10 as compared with Rs. 10,956-7-3 and Rs. 3-10-11 respectively in the previous year.

The Thána Hospital was inspected by the Surgeon-General on the 23rd of December 1885.

GRANT-IN-AID DISPENSARIES.

SIR COWASJI JEHANGIR DISPENSARY, BÁNDRA.—*In charge of* Assistant Surgeon J. F. GONSALVES, L.M.

The building is kept in good repair. It is probable a new building will be erected at an early date. The committee meet when there is business, four meetings were held. The sanitary condition of the town is capable of much improvement, there is a municipal establishment of sweepers. The water-supply is partly from Vehár; in some parts of the town the supply is scanty in the hot months and liable to pollution. The total number of patients treated was 18,154, all out-door, as compared with 18,220 out-door and 3 in-door patients in the year 1884. The more common diseases were malarious fevers, intestinal worms, respiratory affections and diarrhœa. Cholera occurred in Dánda village in August and September; there were 54 cases with 13 deaths. Measles and hooping cough were also prevalent. Seven major surgical operations were performed. Vaccination is carried out with calf lymph; there were 354 primary and 88 re-vaccinations. Ten dead bodies were examined at the request of the Police. The dispensary was inspected by the Civil Surgeon, Thána, in January and July. The total cost was Rs. 5,710-4-7, the cost per patient Re. 0-5-0, as compared with Rs. 5,496-1-5 and Re. 0-4-9 respectively in the previous year.

BASSEIN.—*In charge of* Assistant Surgeon F. A. Moos, L.M. & S.

A new building is about to be erected. The committee take considerable interest in the dispensary and visit it at frequent intervals. The sanitary condition of this town is not satisfactory and the water-supply is liable to contamination. The total number treated was 16,639 out-door and 8 in-door patients as against 16,638 and 26 respectively in the previous year. The most common diseases were fevers, worms, diarrhœa, respiratory affections and skin-diseases. There was no epidemic disease. Three major operations were performed. The number of vaccine operations was 146. There were 5 *post-mortem* examinations performed at the request of the Police. This dispensary was inspected twice during the year by the Civil Surgeon. The total cost was Rs. 3,936-12-6, the cost per patient Re. 0-3-9, as compared with Rs. 5,145-11-6 and Re. 0-4-11 in the previous year.

DINSHAW MANECKJI PETIT DISPENSARY, BHIWNDI.—*In charge of* Assistant Surgeon D. H. MOTIWALA, L.M. & S.

The building is new and conveniently situated. Quarters for servants are required. The committee inspect the institution regularly every month. Sanitation is defective; the water-supply is abundant; the tank at Verali and the dipping wells in the town require protection to prevent pollution. The total number treated was 10,151 out-door and 19 in-door patients against 8,824 all out-door in 1884. The most common diseases were malarious fevers, intestinal worms, ophthalmia, skin-diseases, diarrhœa and respiratory affections. Cholera appeared during the months of June, July and August. There were also 47 cases of small-pox. Four major surgical operations were performed. Two hundred and seventy-two children were vaccinated. Three *post-mortem* examinations were made at the request of the Police. The institution was inspected in February by the Civil Surgeon, Thána. The total cost was Rs. 3,036-12-5, the cost per patient Re. 0-4-9, as compared with Rs. 3,044-10-4 and Re. 0-5-6 respectively in 1884.

KELVA MA'HIM.—*In charge of* Hospital Assistant RÁJÁRÁM BÁLKRISHNA.

No alterations have been made in the building; it is in fair repair. A kitchen and servants' quarters are required. The furniture and fittings are complete. The committee met six times during the year. The sanitary condition of the town is indifferent. The water-supply chiefly from wells is brackish and liable to contamination by soakage. The total number treated was 8,286 out-door and 27 in-door patients as compared with 9,780 and 44 respectively in 1884. The more common complaints were malarious fevers, bowel-complaints, intestinal worms, respiratory and rheumatic affections and skin-diseases. Cholera prevailed among the fishing population in March and April, 14 cases with 7 deaths occurred. Four major surgical operations were performed. One hundred and fifty-two persons were successfully vaccinated. Four *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon in January and September. The total cost was Rs. 1,271-4-4, the cost per patient Re. 0-2-5, as compared with Rs. 3,203-0-8 and Re. 0-5-2 in the previous year.

SHA'HA'PUR.—*In charge of* Hospital Assistant MORO NILKANT.

The buildings are in a good state of repair, the furniture in good condition and sufficient. The dispensary is visited every month by the Chairman of the Local Board. The conservancy is fairly attended to, and the town is kept clean. The water-supply is abundant but liable to contamination. The total number of patients treated was 8,276 out-door and 19 in-door as compared with 7,503 and 13 respectively in the previous year. The prevailing diseases were malarious fevers, rheumatic and respiratory affections, worms, bowel-complaints and skin-diseases. Cholera prevailed in the village and neighbourhood. Small-pox was also present in epidemic form. Three major surgical operations were performed. There were 71 successful vaccinations. Five dead bodies were sent by the Police for examination. The dispensary was inspected by the Civil Surgeon, Thána, in March. The total cost was Rs. 1,592-0-10, the cost per patient Re. 0-3-1, as compared with Rs. 1,595-4-5 and Re. 0-3-4 respectively in the previous year.

BÁI SÁKARBÁI DISPENSARY, CHINCHNI.—*In charge of* Hospital Assistant BHIWJI YADOW.

The building is in good repair and is sufficient for the purpose; a dead-house is required; the furniture and fittings are in good order. The dispensary was visited four times by the committee. The sanitary condition of the town is very defective, and the water-supply from wells is liable to contamination. The total number treated was 11,079 out-door and 43 in-door patients as compared with 12,166 and 48 respectively in the previous year. The prevailing diseases were malarious fevers, worms and skin-diseases. Measles prevailed in the town, there was no other epidemic disease. The number of persons vaccinated was 96. Eight dead bodies were examined at the request of the Police. The institution was inspected twice by the Civil Surgeon who reports favourably of Hospital Assistant Bhiwji Yadow. The total cost was Rs. 1,775-6-10, the cost per patient Re. 0-2-6, as compared with Rs. 2,299-5-11 and Re. 0-3-0 in the year 1884.

COWASJI DINSHÁW PETIT DISPENSARY, UMBARGAON.—*In charge of* Hospital Assistant SHRIPAT HARI.

The dispensary was opened in the month of August 1885. The building is new and in good order. There is no cook-house for in-patients. The compound should be enclosed.

The committee visits the dispensary every month, and quarterly general meetings are also held. Sanitary matters are not attended to. The water-supply is abundant but brackish. The total treated was 4,131 out-door and 9 in-door patients. The prevailing diseases were malarious fever, worms, ophthalmia, skin-diseases, and respiratory affections. Cholera occurred in the town in August and September; there were 38 cases with 19 deaths. Eighteen children were vaccinated; there is some opposition to vaccination. The dispensary was inspected by the Civil Surgeon, Thána, on 25th October 1885. The total cost was Rs. 378-0-11, the cost per patient Re. 0-1-5.

ENDOWED DISPENSARIES.

RUSTOMJI WÁDIA DISPENSARY, THA'NA.—*In charge of* Assistant Surgeon BARJORJI ARDESIR, G.G.M.C.

The building is conveniently situated, but it is small and dark and there is no accommodation for the medical officer. Furniture is in fair order. The committee visit the dispensary every month. The sanitary condition of the town is indifferent; the water-supply is ample and of good quality. The total number treated was 9,510, all out-patients, as compared with 9,683 in 1884. The most common diseases were malarious fevers, skin-diseases, diarrhœa and dysentery, worms, respiratory and rheumatic affections. Cholera appeared in May and continued until September; there were 209 cases with 113 deaths. Vaccination is carried out by the municipal vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner, by the Civil Surgeon and by the Surgeon-General. The total cost was Rs. 4,346-5-8, the cost per patient Re. 0-7-3, as compared with Rs. 1,536-0-1 and Re. 0-2-6 respectively in the previous year.

RUKMÁBÁI DISPENSARY, KALYÁN.—*In charge of* Assistant Surgeon PESTONJI BOMANJI, G.G.M.C.

The buildings are in excellent order, the usual repairs were executed. The committee inspected the dispensary twice during the year. The sanitary condition of the town is bad; the water-supply is from tanks and wells; the tanks are polluted by bathing and washing and the wells contaminated by soakage. The total number treated was 80 in-door and 5,152 out-door patients as compared with 5,341 and 37 respectively in the previous year. The prevailing diseases were malarious fevers, intestinal worms, diseases of the skin and respiratory affections. Cholera was prevalent chiefly in the months of January, March, May, June and July; there were 212 cases with 153 deaths. Thirteen major surgical operations were performed. Vaccination is performed by a municipal vaccinator under the orders of the Sanitary Department. Several medico-legal cases were examined and reported upon, including 14 *post-mortem* examinations. The dispensary was inspected by the Civil Surgeon in January, the Deputy Sanitary Commissioner in March, and the Surgeon-General in December. The total cost was Rs. 5,438-13-4, the cost per patient Rs. 1-0-7, as compared with Rs. 5,137-9-8 and Re. 0-15-3 respectively in 1884.

BÁI MITHIBÁI DISPENSARY, KURLA.—*In charge of* Assistant Surgeon NUSSERWANJI DHANJISHA, G.G.M.C.

The building is conveniently situated and is in good order. Repair to the roof of the out-houses is required. Some articles of furniture require repair and renewal. The committee meet regularly every month. The town is kept fairly clean. The water-supply is partly from Vehár but chiefly from wells and a tank; it is insufficient and of bad quality. The total number treated was 9,442 out-door and 7 in-door patients as compared with 11,876, all out-door, in 1884. The most common diseases were malarious fevers, skin-diseases, respiratory affections, worms, rheumatic affections, diarrhœa and dysentery. Eleven cases of cholera and seven deaths occurred in the town; the disease also prevailed in the surrounding villages. There were also cases of measles and hooping cough. Three major surgical operations were performed. Vaccination was performed in 276 cases. A large number of medico-legal cases, including 5 *post-mortem* examinations, were reported upon at the request of the Police. The dispensary was inspected by the Civil Surgeon in March. The total cost was Rs. 4,575-15-1, the cost per patient Re. 0-7-8, as compared with Rs. 4,538-0-3 and Re. 0-6-1 respectively in the previous year.

GOVERNMENT DISPENSARY.

MÁTHERÁN.—*In charge of* Brigade-Surgeon H. R. MCDOUGALL, M.D.

There are no dispensary buildings, a room in the Superintendent's office is used and is found sufficient. There is no committee. The sanitary condition of the hill is good and the water-supply good and ample. The total number treated was 709, all out-patients, as compared with 604 in the previous year. The most common diseases were intestinal worms, malarial fevers, respiratory affections, skin-diseases, affections of the bowels, injuries and ophthalmia. There was no epidemic. Vaccination was performed thrice successfully. The dispensary was inspected by the Surgeon-General in March. The total cost was Rs. 1,030-10-8, the cost per patient Rs. 1-7-3, as compared with Rs. 819-15-11 and Rs. 1-5-8 respectively in the previous year.

KOLA'BA COLLECTORATE.

GRANT-IN-AID DISPENSARIES.

PEN.—*In charge of* Hospital Assistant BÁBÁJI RAOJI KUDDUM.

The building, with the exception of the dead-house which requires repair, is in good condition. The furniture is good and sufficient. The committee visited the dispensary once only. The sanitary condition of the town is fairly good, the water-supply abundant and of good quality. The total number treated was 11,439 out-door and 44 in-door patients as compared with 9,962 and 31 respectively in 1884. The prevailing diseases were worms, malarial fevers, skin-diseases, respiratory affections and ophthalmia. Cholera was epidemic in the neighbourhood, but only one case occurred in the town. Two major surgical operations were performed. Vaccination meets with opposition, 21 primary successful operations were performed. Four *post-mortem* examinations were made. The dispensary was inspected by the Assistant Surgeon, A'libág, in May and December. The total cost was Rs. 1,746-0-11, the cost per patient Re. 0-2-5, as compared with Rs. 2,039-9-9 and Re. 0-3-3 respectively in the previous year.

MAHA'D.—*In charge of* Hospital Assistant NARSAPPA RAMSWAMI NAIDU.

The buildings are in good order, the furniture and fittings sufficient. The committee visit the dispensary frequently. The sanitary condition of the town is not satisfactory. The water-supply is scanty and is liable to pollution. The total treated was 7,819 out-door and 31 in-door patients as compared with 7,109 and 29 respectively in the previous year. The more common complaints were worms, malarious fevers, skin-diseases and respiratory affections. Small-pox was prevalent in January, March and April. Cholera appeared in the neighbourhood but not in the town. Fifteen major surgical operations were performed. There were 97 successful primary vaccinations. Opinion was given in several medico-legal cases, and six *post-mortem* examinations were made. The total cost was Rs. 1,481-2-10, the cost per patient Re. 0-3-0, as compared with Rs. 1,285-3-0 and Re. 0-2-10 respectively in the previous year.

PANVEL.—*In charge of* Hospital Assistant AARON SAMSON.

The building has been purchased by the committee. Repairs are required. A dead-house, female ward and servants' quarters are also wanted. The committee visit the dispensary frequently. The sanitary condition of the town is defective. The water-supply from tanks and wells is liable to contamination. A new scheme for water-supply is progressing. The total number treated was 7,121 out-door and 23 in-door patients as compared with 7,273 and 30 respectively in 1884. The prevailing diseases were malarious fevers, skin-diseases, worms, and rheumatic and respiratory affections. Cholera was prevalent during the months of June and July, 53 cases were treated with 23 deaths. There were 5 major surgical operations. Vaccination is carried on by the municipal vaccinator, but 16 children were vaccinated at the dispensary. Seven *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Thána, and the Deputy Sanitary Commissioner, and twice by the Assistant Surgeon, A'libág. Hospital Assistant Aaron Samson is commended for the careful performance of his duties. The total cost was Rs. 5,515-12-6, the cost per patient Re. 0-12-4, as compared with Rs. 1,374-11-1 and Re. 0-3-0 respectively in the previous year.

ENDOWED DISPENSARY.

MRS. PASCOAL DESOUZA DISPENSARY, URAN.—*In charge of* Assistant Surgeon KASSIM VIRJI PATEL, L M.

The building is unsuitable and much in need of repair; the accommodation for the medical officer and patients is insufficient; there are no servants' quarters or dead-house. The committee met four times, but individual members visit the dispensary frequently. The town is kept fairly clean. The water-supply from wells and tanks is insufficient and liable to pollution. The total treated was 7,299, all out-patients, as compared with 6,079 in the previous year. The prevailing diseases were malarious fevers, skin-diseases, worms, respiratory affections and ophthalmia. Cholera prevailed in January, and there were 79 cases with 39 deaths. Six major surgical operations were performed. There were 156 successful primary vaccinations and 8 re-vaccinations. Two *post-mortem* examinations were made and opinion given in several other medico-legal cases. The total cost was Rs. 4,272-10-7, the cost per patient Re. 0-9-4, as compared with Rs. 5,662-7-3 and Re. 0-14-10 respectively in the previous year.

GOVERNMENT DISPENSARY.

ALIBA'G.—*In charge of* Assistant Surgeon M. F. PEREIRA, L.M.

The dispensary buildings are in good order. The building of the new female ward has been postponed owing to the want of funds. A cook-room is required, and some articles of furniture are wanted. There is no committee. The sanitary condition of the town is well attended to; the water-supply is of good quality and sufficient. The total number treated was 12,472 out-door and 62 in-door patients as compared with 10,954 and 79 respectively in the previous year. The more common diseases were malarious fevers, worms, respiratory affections and skin-diseases. Cholera was prevalent throughout the district but did not occur in

the town. One hundred and five vaccinations were performed at the dispensary. Six *post-mortem* examinations were made at the request of the Police. The total cost was Rs. 5,592-6-0, the cost per patient Re. 0-7-1, as compared with Rs. 4,966-7-8 and Re. 0-7-2 respectively in the previous year.

RATNA'GIRI COLLECTORATE.

RATNA'GIRI CIVIL HOSPITAL.—*In charge of* Surgeon H. McCALMAN, M.D.

Conservancy and Water-supply.—The general cleanliness of the town has been improved by more effective supervision, but no new sanitary measures have been introduced although their necessity is recognized but funds are not forthcoming. Night-soil carts are urgently needed and suitable latrine arrangements. The Náchni water-supply is reported as more unsatisfactory than it ever has been, although Rs. 16,000 have been spent on laying down new pipes. But from some cause there is only sufficient water for morning and evening distribution. The medical officer remarks the expediency of allowing surface drainage to enter the reservoir in the monsoon cannot be too strongly deprecated.

Hospital Buildings—Are in good order. The roof has been renewed throughout and glass windows have been substituted for shutters. Ventilators have also been introduced.

General Health of the Town.—This has been good. There were no epidemics. The municipal death register gives 16·9 *per mille* as the ratio.

Attendance of Patients.—There were 135 in-door patients, a slight decrease in the number from the previous year, and 6,808 out-door, an increase over the previous year.

Prevailing Diseases.—Malarial fevers, affections of the respiratory organs, skin-diseases, syphilitic maladies and intestinal worms, the latter amounting to 33·3 per cent. on the total of out-door applicants.

Major Surgical Operations.—There were 50 major operations including amputations, lithotrity, removal of tumours, reductions of dislocation of large joints, paracentesis thoracis and delivery by forceps.

Mortality and its Causes.—Eight deaths occurred in hospital, 1 from cholera, 1 from accident and 1 from each of the following maladies—hepatitis, remittent fever, snake-bite, extravasation of urine, Bright's disease, tetanus.

Vaccination—Is performed by the táluka vaccinators.

Conduct of Establishment—Has been uniformly good. It is mentioned that First Class Hospital Assistant Mahadev Caddum has performed his duties very faithfully and efficiently.

Cost.—The total cost was Rs. 9,494-0-1 and the cost per patient Rs. 1-5-10, against Rs. 10,950-8-11 and Rs. 1-12-0 respectively in the previous year.

Inspected by the Surgeon-General.

DINSHAW MANEKJI PETIT LEPER HOSPITAL, RATNA'GIRI.—*In charge of* Surgeon H. McCALMAN, M.D.

Conservancy and Water-supply.—The conservancy is by hand, and it is mentioned that the latrines constructed of stone and lime should be coated with asphalt. The night-soil is mixed with earth in an adjoining shed, and the resulting *poudrette* removed. There is a good well just outside the asylum compound.

Hospital Buildings—Are in excellent repair, and sufficient to accommodate 100 inmates. The separation of the male from the female portion is not sufficient. A bath-room is in course of construction.

Admissions of Patients.—Thirty-seven remained on the 1st January and 24 were admitted during the year, giving a total treated of 61. In the previous year the total was 67. The average number of daily sick was 42·1. Of the 24 admissions there were males and 6 females; by caste 20 Hindus and 4 Musalmáns; by occupation the greater number were cultivators. Of the 24 there were 18 married, and in every case to non-leprous persons. In eight cases there was a family history of leprosy. Of the different forms of leprosy 19 were cases of *lepra anæsthetica*, 4 of *lepra tuberculosa*, and 1 of mixed type. The average duration of the disease before admission was 5½ years, the maximum 12 years and the minimum 12 months.

Mortality.—This was 13·1 per cent. to treated, only one death occurring among the 24 new admissions. One leper committed suicide by tying a piece of bandage tightly round his neck. The average duration of the disease in all fatal cases was above 10 years.

Results of Treatment.—Of the 61 treated 3 were discharged relieved, 19 went away without leave, and 31 remained under treatment at the end of the year. The large number absented is in accordance with the experience of former years. The asylum is made use of by vagrant lepers during the monsoon, but with the return of fine weather they revert to their nomadic habits. The medical officer remarks :—

"The miserable creatures resorting to the asylum are fed, clothed, and relieved of their more urgent symptoms. They soon discover that a real cure is impossible; or finding their strength recruited, they and their ulcers healed, they tire of their surroundings and return to their villages to re-appear at some later date in a worse plight than ever. The good done to

individuals is undoubted, the real and ultimate benefit to the community is questionable. All experience goes to prove the continuance of leprosy by heredity and contagion."

Establishment.—The passed medical pupil attached, Ballaya Kooshaba, has performed his duties satisfactorily. Owing to the distance of the asylum from the station the subordinate medical charge is a responsible office, the lepers being irritable, peevish and impatient of control, a consequence of their malady. The conduct of the menial servants has been fairly good.

CIVIL HOSPITAL, SA'VANTVA'DI.—*In charge of* D. G. DALGADO, M.D.

Conservancy and Water-supply.—Considerable attention is paid to the conservancy, and the number of public latrines and dust-bins have been recently increased. The water-supply is abundant except in some of the more elevated localities, although it cannot be said to be always pure.

Hospital Buildings.—All the hospital buildings are reported in excellent repair, but the site is objectionable. The new hospital mentioned as proposed in last report is now in progress of construction.

General Health.—The general health of the town continues to be good. Neither cholera nor small-pox occurred, but early in the year a mild epidemic of measles and hooping cough presented. The death-rate was 17·4 *per mille* and the birth-rate 25·6. In some parts of the Sávantvádi district cholera occurred.

Attendance of Patients.—The total number treated was 367 in-door and 6,129 out-door against 401 and 4,458 respectively for the previous year. The decrease of in-door patients is due to the fact of some of the sepoys who formerly came to the hospital being now treated in the State dispensaries recently established at Bávda and Kudál.

Prevailing Diseases.—These were as usual malarious fevers, intestinal worms, bronchial affections, diarrhœa, rheumatic complaints and skin maladies. There were 357 cases of injuries.

Surgical Operations.—Five major operations were performed, three being obstetrical. Of minor operations there were 267.

Mortality and its Causes.—There were 12 deaths among the in-door patients caused by phthisis, burns, accident, extravasation of urine, leprosy, hemiplegia, bronchitis and enteritis.

Vaccination.—Vaccination, which is compulsory in the town, is performed by the hospital establishment. There were 191 primary and 23 re-vaccinations.

Medico-legal Cases.—Of these there were 27 entailing 9 *post-mortem* examinations.

Conduct of Establishment.—Reported as satisfactory as could be desired.

Cost.—Total cost was Rs. 7,424-9-8 against Rs. 7,323-2-1 for 1884. Average cost per patient Rs. 1-2-4 against Rs. 1-8-1 for the previous year.

GOVERNMENT DISPENSARIES.

DA'POLI.—*In charge of* Apothecary J. PRIM.

[illegible] carried on satisfactorily and any suggestion on sanitation made by the medical officer is attended to. Water-supply abundant and [illegible] of good quality. The dispensary is a new building having accommodation for [illegible] door patients and is in every way suited to requirements. [illegible] required. There is a latrine and dead-house, but there are no servants' quarters, which is [illegible]ear. The general health has been satisfactory. There was no epidemic during the year. The total number treated was 65 in-door and 4,421 out-door patients, showing a considerable decrease of in-door patients and an increase of out-door. The prevailing diseases were fevers, bronchial affections, skin-diseases and intestinal worms. The medical officer remarks there are only 10 per cent. of the inhabitants free from intestinal worms. There were 9 major and 111 minor surgical operations performed during the year. The major operations were as follows:—1 colotomy, 1 dislocation of shoulder reduced, 1 ditto hip joint, 1 delivery by version, 1 large abscess opened, 1 paracentesis abdominis, 1 excision of dead bone, 1 removal of large tumour. The medical officer gives a detailed account of these operations. (The number and importance of the operations at this hospital does not justify the remark made in Administration Report, Revenue Department, No. 10088 of 16th December 1885, that operations could not be performed at the Dápoli Hospital as there was no one to administer chloroform and which was dealt with by Government Resolution, General Department, No. 433, dated 4th February 1886). There were two deaths in the dispensary, 1 from dysentery and 1 from anæmia. Forty-four primary vaccine operations were successful during the year. There is a good deal of persuasion required before people submit to vaccination at Dápoli. Of medico-legal cases there were seven entailing 4 *post-portem* examinations. There are two servants only whose conduct has been good. The total cost, Rs. 3,249-6-7, and the cost per patient, Re. 0-11-7, as compared with Rs. 2,998-6-9 and Re. 0-11-8 respectively in 1884.

VENGURLA.—*In charge of* Hospital Assistant PARASHRAM NAGESH.

No change was made during the year in the conservancy arrangements, and sanitation on the whole has been better attended to, but public latrines are required. The water-supply is ample and the water good. The dispensary buildings are reported in a bad state of repair but the accommodation is sufficient. The medical store-room has no ceiling and therefore animals make their way inside. The dead-house has no door to prevent bodies from being attacked by animals. There is no accommodation for the Hospital Assistant. It is however proposed to convert this hospital, which is an old regimental one and far from the town, into a travellers' bungalow, utilizing the present travellers' bungalow which is near the town as a hospital. There was no epidemic either in the town or in the neighbouring villages. The total number of patients was 44 in-door and 1,925 out-door as compared with 20 and 1,876 respectively for the previous year. The medical officer remarks the cases admitted as in-door were most of them from Native Infantry who were generally on sick leave and from the Vengurla Police and he attributes a smaller attendance than might be expected from the size of the town to distance. The prevailing diseases were ague, diseases of the respiratory organs, diseases of the stomach and bowel and skin affections. Eighty-eight surgical operations were performed, nine coming under the head "Major". There were three deaths among in-door patients. Vaccination was attended to up to September 1885 in the dispensary, but since a special vaccinator has been employed by the Vengurla Municipality under the Sanitary Department. Seven dead bodies were examined during the year. Establishment consists of one bhisti, one goorgah, and one sweeper. Conduct fair. The total cost was Rs. 4,054-7-7 and the cost per patient Rs. 2-0-11 as compared with Rs. 6,002-7-5 and Rs. 3-2-7 respectively in the previous year.

KA'RWA'R COLLECTORATE.

CIVIL HOSPITAL, KA'RWA'R.—*In charge of* Surgeon W. G. H. HENDERSON.

Conservancy and Water-supply.—The cleanliness of the town receives careful and intelligent attention from the municipality. Private latrines are kept clean and public latrines thoroughly attended to. The position of two of the latrines is noted as bad, some drainage has been effected. The water-supply is copious but liable to pollution especially from cattle.

Hospital Buildings—Are in excellent repair.

General Health.—The health of the people, so far as epidemics are concerned, has been good. Syphilis in various forms is however very common. The medical officer comments on the large number of still-births and he states the more unhealthy the locality the greater the number.

Attendance of Patients.—There were 325 in-dooor patients and 5,694 out-door against 320 and 5,261 respectively for the previous twelve months.

Prevailing Diseases.—Malarious fevers afforded 1,592 cases; after malarious fevers rheumatic affections, anæmia, and syphilis were the most frequent maladies; diseases of the respiratory system contributed 429 cases and diseases of the digestive system 89. Skin-diseases amounted to 483.

Surgical Operations.—[redacted] Twenty major operations are reported.

Mortality and its Causes.—Eigteen deaths occurred in hospital, 4 being brought in moribund.

Medico-legal.—Four *post-mortem* examinations were required on bodies sent by the Police.

Vaccination.—There were 818 cases of vaccination, 163 of which were re-vaccinations. Of the total 674 were successful and 48 doubtful.

Conduct of Establishment.—First Class Hospital Assistant Ittoo Chowan has worked with zeal throughout the year. Jail Hospital Assistant Ganesh Babaji has given assistance as the establishment is short. Second class servants are reported on satisfactorily.

Cost.—The total cost was Rs. 10,618-7-4 and the cost per patient Rs. 1-12-2 as compared with Rs. 10,075-10-5 and Rs. 1-13-11 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

KUMTA.—*In charge of* Assistant Surgeon G. M. DIXON, L.M. & S.

The building and out-houses are in excellent order, the furniture and fittings are sufficient. The committee held nine meetings, the chairman paid frequent visits to the dispensary. Considerable attention is given to the cleanliness of the town. The water-supply is abundant, but the wells are liable to contamination by soakage. The total number treated was 6,784 out-door and 96 in-door patients as compared with 8,564 and 118 respect-

ively in the previous year. The prevailing diseases were malarious fevers, intestinal worms and skin-diseases. There was no epidemic. Two major surgical operations were performed. Vaccination is carried on by a local fund vaccinator; there were 217 successful primary vaccinations and 2 revaccinations. Several medico-legal cases including three *post-mortem* examinations were reported on. The dispensary was inspected by the Civil Surgeon, Kárwár, in April and October. The total cost was Rs. 2,729-11-0, the cost per patient Re. 0-6-4, as compared with Rs. 5,941-3-10 and Re. 0-10-11 respectively in the previous year.

HONÁVAR.—*In charge of* Hospital Assistant SHIVRAM NARAYAN.

The building is in fair condition. The new building is now ready for occupation but has not yet been taken into use. The necessary furniture is supplied. The committee held four regular meetings. Individual members visit the dispensary frequently. The sanitary condition of the town is fair; attention is paid to conservancy. Water-supply from wells, most of which are badly situated. The total treated was 5,256 out-door and 58 in-door patients as compared with 5,360 and 52 respectively in the previous year. Malarious fevers, skin-diseases and intestinal worms were the most common complaints. Small-pox was prevalent in the town and district. One hundred and seventy-four persons were vaccinated and 2 re-vaccinated. Vaccination is not well received. Three *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Kárwár, in March and November. Hospital Assistant Shivram Narayan is reported to be hard-working and attentive. The total cost was Rs. 628-14-2, the cost per patient Re. 0-1-10, as compared with Rs. 632-5-9 and Re. 0-1-10 respectively in the previous year.

SUPA.—*In charge of* Hospital Assistant DATTATRAYA GANESH.

The building is in need of repair; the out-houses are in good order; the furniture and fittings are satisfactory. The committee visited the dispensary every month. The village is clean and well looked after. The water-supply from the river is abundant but liable to contamination. The total number treated was 1,425 out-door and 59 in-door patients as compared with 1,365 and 66 respectively in the previous year. Malarial fevers, skin-diseases and worms were the most common complaints. Small-pox prevailed in the town and district; there were 246 cases with 44 deaths. Nine vaccinations and 4 re-vaccinations were performed; this duty has now been made over to the petha vaccinator. Two medico-legal cases were sent for report by the Police. The dispensary was inspected by the Deputy Sanitary Commissioner in February and by the Civil Surgeon in April and December. The total cost was Rs. 760-14-11, the cost per patient Re. 0-8-2, as compared with Rs. 1,014-11-9 and Re. 0-11-4 respectively in the previous year.

HALIYÂL.—*In charge of* Hospital Assistant BENJAMIN SOLOMON.

The buildings are in good order. The committee held four meetings. Conservancy has been more carefully attended to of late; the water-supply is sufficient and of good quality. The total number treated was 2,507 out-door and 91 in-door patients against 2,885 and 85 respectively in the previous year. The most common diseases were malarious fevers, worms, skin-diseases and ophthalmia. Cholera prevailed in the town and neighbourhood; there were also some cases of small-pox and measles. Twenty children were vaccinated. [illegible] the Deputy Sanitary [illegible] The dispensary was inspected by the [illegible] Commissioner. The total cost was Rs. 835, the cost per patient Re. 0-5-1, as compared with Rs. 1,444-10-11 and Re. 0-7-9 respectively in the previous year.

SIRSI.—*In charge of* Assistant Surgeon P. P. MULAN, L.M. & S.

The buildings, furniture and fittings are in good order. Quarters for servants are required. The committee visited the dispensary regularly every month. The sanitary condition of the town is still unsatisfactory. The water-supply is abundant but of inferior quality and liable to pollution. The total number treated was 8,910 out-door and 125 in-door patients as compared with 8,527 and 109 respectively in 1884. The most common diseases were malarious fevers, skin-diseases, worms and respiratory affections. Small-pox existed in the town throughout the year; only two cases of cholera were reported. Twenty-two major surgical operations were performed. Vaccination since 1st April has been entrusted to the táluka vaccinator; 157 successful primary and 3 re-vaccinations were performed. Four *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Deputy Sanitary Commissioner, Southern Registration District, in January, and by the Civil Surgeon, Kárwár, in October. The total cost was Rs. 3,663-12-2, the cost per patient Re. 0-6-5, as compared with Rs. 4,422-11-2 and Re. 0-8-2 in the previous year.

YELLÁPUR.—*In charge of* Passed Pupil SAMUEL SAMPSON.

The building is in a good state of repair. Some necessary articles of furniture are required. The committee visited the dispensary regularly once a month. The sanitary con-

dition of this town is good. The water-supply is sufficient and of good quality. The total treated was 2,173 out-door and 111 in-door patients as compared with 2,351 and 96 respectively in the previous year. The prevailing diseases were malarious fevers, worms and skin-diseases. There was no epidemic, but two cases of small-pox occurred in the month of June. One major surgical operation was performed. Thirty-nine children were vaccinated. One *post-mortem* examination was made at the request of the Police. The dispensary was inspected on the 25th January by the Deputy Sanitary Commissioner. The total cost was Rs. 1,034-5-3, the cost per patient Re. 0-7-2, as compared with Rs. 1,476-0-10 and Re. 0-9-7 respectively in the previous year.

SIDDÁPUR.—*In charge of* Passed Pupil D. NARAYAN.

The building is in good repair; the requisite furniture and fittings have been supplied. The committee visited the dispensary ten times. The town is kept fairly clean. The water-supply is sufficient but of indifferent quality. The total treated was 2,064 out-door and 26 in-door patients as compared with 2,508 and 22 respectively in the previous year. The prevailing diseases were worms, malarious fevers and skin-diseases. Small-pox prevailed in the town and neighbouring villages during the greater part of the year. Vaccination is much opposed by the people; 23 primary vaccinations were performed. One *post-mortem* examination was made at the request of the Police. The dispensary was inspected by the Deputy Sanitary Commissioner in May. The total cost was Rs. 889-6-5, the cost per patient Re. 0-6-9, as compared with Rs. 1,025-10-3 and Re. 0-6-5 respectively in the previous year.

GOVERNMENT DISPENSARY.

MUNDGOD.—*In charge of* Hospital Assistant RAMCHANDRA BALAJI.

The building is in good repair; some articles of furniture are worn out and should be replaced. The Collector and Assistant Collector and other local officers have visited the dispensary. The sanitary condition of the town is good and the water-supply sufficient. The total treated was 2,506 out-door and 101 in-door patients as compared with 2,039 and 59 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, worms and ophthalmia. Cholera prevailed in a neighbouring village in May, June and July but not in the town; small-pox was also present in the district. Thirty-five successful vaccinations were performed. Three dead bodies were sent by the Police for examination and report. The dispensary was inspected by the Deputy Sanitary Commissioner in June. The total cost was Rs. 925-1-11, the cost per patient Re. 0-5-8, as compared with Rs. 820-6-11 and Re. 0-6-3 respectively in the previous year.

DECCAN.

POONA COLLECTORATE.

SASSOON GENERAL HOSPITAL, POONA.—*In charge of* Surgeon-Major H. COOK, M.D.

Conservancy and Water-supply.—There has been no change in the conservancy establishment of the city. There are now 57 public latrines and 34 urinals and 7,011 private latrines. In the cantonment the conservancy department has been worked departmentally from the 1st of April and is likely to be profitable. The number of night-soil and rubbish carts have been increased from 22 to 28 and from 50 to 60. The water-supply is reported abundant and of good quality.

Hospital Buildings.—Are in good repair. Two new latrines have been constructed in connection with the upper storey of the hospital supported outside the building on pillars and arches and are a great improvement over the former state of affairs when the latrines were under the same roof as the wards. New wards for infectious cases are much required, the temporary hut provided for such cases being very unsuitable. The ventilation of the hospital has also been improved by an alteration of the manner by which the windows opened, which now secures ventilation without draught.

General Health.—The general health of the town and district has been fairly good though cholera has appeared in both. Small-pox was also somewhat prevalent. Malarious fevers seem to have increased owing to the irrigation of land allowed in the vicinity of the town. Scurvy and anæmia are also common conditions in patients who come under treatment for other disorders. Syphilis largely affects the population and is at the root of many cases coming under treatment for apparently quite different maladies and which are returned as such.

Details of treated.—The total number of in-door patients treated was 2,611 against 2,459 for the previous year; of out-door 12,354 against 14,327. Of the in-door patients 1,430 were discharged cured, 607 relieved, 281 absented or otherwise, 204 died and 89 remained under treatment.

Prevailing Diseases.—Among in-door patients malarious fevers, respiratory affections, syphilitic affections, diseases of the alimentary canal, rheumatism and general debility. Similar classes of patients were treated among out-door applicants; also many cases of intestinal worms and other diseases.

Mortality and its Causes.—Deaths among in-door patients amounted to 204. The medical officer submits a full list of causes of death, the principal being phthisis, dysentery, diarrhœa, cholera, injuries, fevers, respiratory affections, poisons, old age and debility. From the list mentioned above it is apparent that a large number of cases are brought to hospital in a hopeless condition from delay, want and negligence.

Surgical Operations.—Forty-seven major operations were performed, among them being 7 amputations, 12 for stone in the bladder, 4 of the latter being by lithotrity or crushing, 2 by the new or Bigelow's method. At one sitting 3 cases of strangulated inguinal hernia presented and were operated upon. In two cases thoracentesis was required. One case of hepatic abscess was aspirated. Four cases of cancer of the penis were operated upon, two by the new method of Jacobson or by the flap operation. Seven midwifery operations were performed, one the Cæsarian section on account of extreme pelvic deformity. The only death which occurred after and in consequence of operation was that of the woman subjected to the operation last mentioned. It is noted the condition of this patient when brought to the hospital was very bad. Among the other midwifery operations were three craniotomies, and one of version after injudicious attempts of Dhais to extract the child. The woman was discharged well. Of minor surgical operations there were 532.

Vaccination.—Vaccination is performed every Monday morning at the hospital from 7 to 10 o'clock. Both human and calf lymph have been used, but the quality of the latter is reported uncertain. The vaccination is not especially attached to the hospital, but working under the Sanitary Department at other places on other days of the week.

Medico-legal Cases.—Eighty-four dead bodies were examined during the year. The largest number, 20, were cases of drowning; nearly all young females; 11 cases of opium-poisoning occurred, in most cases young females. In addition to the above there were 4 cases of rape, while various articles of clothing, cooking utensils, suspected food, knives and weapons of sorts were examined for suspected poisoning or for blood stains.

Conduct of Establishment.—The medical officer cordially acknowledges the assistance rendered by the Assistant Civil Surgeon, Surgeon Párakh. He states Mr. Apothecary

Gallagher merits his best thanks and he acknowledges the care and attention with which Assistant Surgeons Bhicaji Desai and Sabnis who succeeded the latter in May last have performed their duties. With one exception the conduct of the second class establishment has been fairly satisfactory.

Cost.—The total cost was Rs. 43,077-14-4 and the cost per patient Rs. 2-14-0 as compared with Rs. 39,644-7-6 and Rs. 2-5-9 respectively in the previous year.

The Sassoon Hospital was personally inspected by the Surgeon-General on the 25th of September and visited on various other occasions.

ROMAN CATHOLIC ORPHANAGE, POONA.—*In charge of* Surgeon E. W. YOUNG, Staff Surgeon.

Conservancy and Water-supply—satisfactory. The general health of the inmates good throughout the year. Children suffering from severe illness are treated in a large and well ventilated upper-storey apartment. An out-house has been converted into an infectious ward. The total number of admissions during the year was 524, bronchial catarrh having been the most prevalent disorder. There were no deaths. All precautions are taken to see that all the children are properly vaccinated. First Class Hospital Assistant Shadickjee Israel has performed his duties well. The number of inmates was 102. The total cost was Rs. 1,186-5-6, and the cost per patient Rs. 2-4-1 against Rs. 1,261-8-0 and Rs. 2-7-7 respectively in 1884.

GRANT-IN-AID DISPENSARIES.

SÁSVAD.—*In charge of* Passed Medical Pupil M. PRASADA.

The buildings are in a good order. The committee visited the dispensary seven times. The town is kept fairly clean. The water-supply is from the river, good but insufficient, and from wells, brackish. The total number treated was 9,256 out-door and 5 in-door patients as compared with 6,578 and 26 respectively in the previous year. The most common diseases were worms, malarious fevers, ophthalmia and skin-diseases. No epidemic occurred in the town, but cholera attacked two villages in the neighbourhood. Four major surgical operations were performed. The number of vaccinations was 154. The dispensary was inspected by the Civil Surgeon, Poona, in March and October. Passed Pupil Mahabir Prasad is reported to be efficient and to take a careful and intelligent interest in his work. The total cost was Rs. 545-1-7 and the cost per patient Re. 0-0-11 as compared with Rs. 1,075-3-9 and Re. 0-2-7 respectively in the previous year.

JEJURI.—*In charge of* Hospital Assistant CHATURJI NARAYAN.

The present hired building is quite unsuitable and very much out of repair. The necessary furniture has been supplied. The dispensary was visited by the committee seven times. The sanitary condition of the town is very indifferent. The water-supply from a tank is sufficient but liable to contamination. The total was 6,311 out-door and 3 in-door patients as compared with 5,392 and 5 respectively in 1884. The most common diseases were skin-diseases, ophthalmia, worms and malarious fevers. There was no epidemic. Thirteen major surgical operations were performed. One hundred and thirty-four children were successfully vaccinated. Eight *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Poona, in March and in October. Hospital Assistant Chaturji Narayan is commended for the manner in which he conducts his duties. The total cost was Rs. 974-3-3 and the cost per patient Re. 0-2-5 as compared with Rs. 942-15-5 and Re. 0-2-9 respectively in the previous year.

BÁRÁMATI.—*In charge of* Hospital Assistant GUNGA DEEN.

The building, a hired one, is in good repair and is supplied with the necessary furniture. The committee visited the dispensary every month. The sanitary condition is fairly good. Conservancy is attended to; the water-supply from the river and pits dug in its bed is good but deficient in the hot weather. The total number treated was 5,154 out-door and 3 in-door patients as compared with 3,587 and 9 respectively in the previous year. The prevailing diseases were ophthalmia, skin-diseases, malarious fevers, worms, rheumatic and respiratory affections and bowel-complaints. Cholera broke out in October and continued till November—53 cases and 15 deaths. One major surgical operation was performed. There were 209 successful operations. Fifteen medico-legal cases, including 10 *post-mortem* examinations, were reported upon. The dispensary was visited by the Civil Surgeon in March and in December. Hospital Assistant Gunga Deen is reported to be well qualified and efficient, careful and assiduous. The total cost was Rs. 1,348-10-1, the cost per patient Re. 0-4-2 as compared with Rs. 1,233-3-11 and Re. 0-5-5 respectively in 1884.

INDÁPUR.—*In charge of* Native Doctor RAMJI MULHAR.

The building, a hired one, is in good order. The furniture is sufficient. The committee visited the dispensary nine times. Conservancy is attended to. The water-supply is abundant and said to be good. The total number treated was 6,212 out-door and 12 in-door patients as compared with 6,202 and 8 respectively in the previous year. The most common complaints are ophthalmia, skin-diseases, malarious fevers and rheumatic and respiratory

affections. Cholera prevailed in the town. During the year 125 children were successfully vaccinated. Four *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Poona, on two occasions. The total cost was Rs. 1,173-4-3, the cost per patient Re. 0-3-0, as compared with Rs. 1,423-13-4 and Re. 0-3-8 respectively in the previous year.

JUNNAR.—*In charge of* Hospital Assistant BAPUJI JANARDHAN.

The building is altogether unsuited for a dispensary. There is no accommodation for in-patients nor for the staff, nor is there a dead-house. The furniture is sufficient. The committee visited the dispensary 8 times. The sanitary condition of the town is not satisfactory. The water-supply is good but scanty in the hot season. The total number treated was 6,004 out-door and one in-door patients as compared with 5,665 and 9 respectively in the previous year. The most common diseases were ophthalmia, worms, skin-diseases, malarious fevers and respiratory affections. Ninety-eight children were successfully vaccinated. Since May vaccination has been entrusted to the táluka vaccinator. Four *post-mortem* examinations were made and opinion given in 11 medico-legal cases. The dispensary was inspected in March and November by the Civil Surgeon, Poona. The total cost was Rs. 856-14-9, the cost per patient Re. 0-2-3, as compared with Rs. 1,455-1-13 and Re. 0-4-1 respectively in the previous year.

KHED.—*In charge of* Passed Pupil SHAIK ABDUL RAJAK.

The building is in good repair; a latrine has been built, and quarters for the medical officers are to be erected. The necessary furniture and fittings are provided. The committee visited the dispensary seven times during the year. The sanitary condition of the town is not satisfactory. The water-supply is from the river, is sufficient, but liable to contamination. The total number treated was 6,868 out-door and 19 in-door patients as compared with 3,651 and 12 respectively in the previous year. The most common diseases were ophthalmia, skin-diseases, intestinal worms and malarious fevers. Cholera occurred in the town, 33 cases and 17 deaths. Five major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Opinion was given in several medico-legal cases, including 5 *post-mortem* examinations. The dispensary was inspected by the Civil Surgeon, Poona, in March and in November. Passed Pupil Shaik Abdul Rajak is reported to be thoroughly efficient and to take an interest in his dispensary. The total cost was Rs. 817-9-6, the cost per patient Re. 0-1-10, against Rs. 1,502-1-11 and Re. 0-6-6 respectively in the previous year.

TALEGAON DÁBHÁDA.—*In charge of* Passed Medical Pupil KRISHNAJI GOWALKAR.

The building is in good repair; accommodation for female in-patients, a cook-room and quarters for servants are required. The dispensary was visited regularly every month by the committee. The sanitary condition of the town is very unsatisfactory. The present water-supply from a tank is greatly contaminated; the new water works are not yet completed. The total number treated was 8,125 out-door and 27 in-door patients as compared with 5,203 and 3 respectively in the previous year. The prevailing diseases were ophthalmia, skin-diseases, malarious fevers, worms and respiratory affections. Cholera appeared in the town in the month of March. Eight major surgical operations were performed. There were 25 successful primary and 2 re-vaccinations. Five *post-mortem* examinations were made and opinion given in several other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Poona, in March and October, and by the Deputy Sanitary Commissioner in April. The total cost was Rs. 702-15-4, the cost per patient Re. 0-1-4 as compared with Rs. 1,460-4-11 and Re. 0-4-5 respectively in the previous year.

TALEGAON DHAMDHERA.—*In charge of* Hospital Assistant NARAYAN POCHAYA.

The building, a hired one, is in good repair; there is no dead-house. The furniture and fittings are complete. The committee meet quarterly; members visit the dispensary frequently. The sanitary condition of the town is bad. The water-supply from the river and wells in the bed of the river is scanty and subject to contamination. The total number treated was 4,084 out-door and 4 in-door patients as compared with 4,079 and 6 respectively in the previous year. The most common complaints were skin-diseases, worms, ophthalmia, and malarious fevers. Cholera prevailed from July to October—104 cases and 50 deaths. Forty-two children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Poona, in March and October. Hospital Assistant Narsapa Pochaya is reported to be intelligent, efficient and well conducted. The total cost was Rs. 880-12-2, the cost per patient Re. 0-3-5, as compared with Rs. 1,034-14-6 and Re. 0-4-0 respectively in the year 1884.

ÁLANDI.—*In charge of* Hospital Assistant BHAUYA SING.

The same building is still used; it is in good repair but quite unsuited for a dispensary. Qaurters for the Hospital Assistant, a latrine and dead-house are required. The furniture is in good order. The committee visit the dispensary every month. The sanitary condition of the town is unsatisfactory; there is apparently no attempt at conservancy. The water-supply is sufficient but exposed to contamination. The total treated was 5,424 out-door and 9 in-door patients as compared with 4,190 and 7 respectively in the previous year. The prevailing diseases were worms, ophthalmia, skin-diseases, respiratory affections and malarious

fevers. Cholera appeared in the months of March, July and August—19 cases and 10 deaths. Seventy-nine children were successfully vaccinated. One *post-mortem* examination was made. The dispensary was inspected by the Civil Surgeon, Poona, in April and in October and by the Deputy Sanitary Commissioner in March. The total cost was Rs. 669-13-11, the cost per patient Re. 0-1-11, as compared with Rs. 1,406-15-4 and Re. 0-5-4 respectively in the previous year.

KHÁN BAHÁDUR PESTONJI SORABJI DISPENSARY, POONA.—*In charge of* Assistant Surgeon VISHRAM RAMJI GHOLLAY.

The building is conveniently situated; it is in good repair and is fairly supplied with furniture and fittings. There was no meeting of the committee, but the Collector visited the dispensary once, and the Deputy Collector and City Magistrate ten times during the year. The total number treated was 21,015 out-door and 53 in-door patients as compared with 19,649 and 53 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, intestinal worms, respiratory affections, rheumatic affections, inflammation of the ear and ophthalmia. Measles and small-pox prevailed slightly. There were three out-breaks of cholera in February, in July and in December—364 cases and 146 deaths. Many major surgical operations were performed, including 7 for cataract, 6 lithotomies and one ovariotomy. The dispensary was inspected by the Surgeon-General once and by the Civil Surgeon, Poona, twice. The total cost was Rs. 5,445-3-10, the cost per patient Re. 0-4-1, as compared with Rs. 5,391-7-0 and Re. 0-4-4 respectively in the previous year.

AHMEDNAGAR COLLECTORATE.

CIVIL HOSPITAL, AHMEDNAGAR.—*In charge of* Surgeon-Major DETATHAM, M.D., till the 11th of June 1885, afterwards in charge of Surgeon-Major R. H. BATTY.

Conservancy and Water-supply.—The surface cleaning of the town appears fairly well attended to, but as remarked last year the public latrine accommodation is quite inadequate. Many private latrines, of which there are some 2,100, are objectionably situated. The night-soil is conveyed away by carts and converted into marketable poudrette, or in the rains burnt with the street sweepings in pits. The drainage of the city is very defective; the water-supply is from three sources, aqueducts constructed in former years, of which there are 5 in use from sources varying from two to six miles away; the private and public wells, of which there are about 211 in the city not used for drinking purposes; the River Sina used for washing and bathing. The aqueduct water recently examined by the Chemical Analyzer is pronounced good. When there is a scanty monsoon the supply is deficient.

Hospital Buildings.—The medical officer reports on the hospital buildings, as his predecessors have done, *viz.*, that they are quite unsuitable for the treatment of in-door patients, especially surgical cases. The medical officer reports that subscriptions for a new hospital to the amount of Rs. 26,900 have been promised, but that Rs. 16,400 more is required for the estimated total cost of Rs. 43,300. The medical officer further remarks that the above is the limit obtainable from subscriptions, that if not supplemented it is probable the money may be devoted to other purposes and he represents on the part of the inhabitants the urgent necessity which exists for a suitable hospital at Ahmednagar. He also furnishes a detailed account of the capabilities of a new hospital as designed.

General Health of the Town and District.—This has been good on the whole although cholera occurred in the city in August, when 41 persons were attacked. The death-ratio from all causes appears to have been 31 per 1,000.

Attendance of Patients.—There were 412 in-door and 17,508 out-door patients against 372 in-door and 17,182 out-door for 1884. The medical officer remarks: "I am convinced that with a suitable building and sufficient funds the number of in-door patients would be three times greater, for numbers have to be refused admission."

Prevailing Diseases.—Surgeon-Major Batty submits a table showing the relative prevalence of the more common diseases, which are malarious fevers, ophthalmic affections and skin-diseases. Diarrhœa and intestinal worms were also very prevalent.

Surgical Operations.—Thirty-four major operations were performed with three deaths. Among these operations were three of extraction of the lens, seven of lateral lithotomy, five of paracestesis of the abdomen, 1 craniotomy, 5 amputations, 1 hare lip, 1 perineal section, 1 occlusion of the vagina. The medical officer submits a full account of all his major surgery.

Mortality and its Causes.—Twenty-one deaths took place in hospital; among them two from fracture and dislocation of the spine. As before mentioned 3 deaths occurred after operations while other causes were remittent fever, dropsy, paralysis, debility, old age, &c.

Vaccination—Is performed at appointed stations and at regular periods under municipal control. The medical officer mentions that the work appears to be efficiently carried on.

Medico-legal Cases.—Fourteen *post-mortem* examinations were made on bodies brought to the hospital by the Police, and 69 persons were sent for treatment, examination and report; numerous articles and packets were also sent for examination and report.

Conduct of Establishment.—The Medical Officer mentions that the establishment has been below the sanctioned allowance and he commends the zeal and ability with which 1st Class Hospital Assistant Vithal Dhanaji attached to the Jail Hospital has worked also in the Civil Hospital. No complaint is made of the subordinate servants.

Cost.—The total cost was Rs. 12,336-5-1 and the cost per patient Re. 0-11-0 as compared with Rs. 13,079-3-0 and Re. 0-11-11 respectively in the previous year.

The Ahmednagar Civil Hospital was inspected by the Surgeon-General on the 10th of December.

GRANT-IN-AID DISPENSARIES.

SANGAMNER.—*In charge of* Hospital Assistant HARI KAKAJI.

The building is well suited to the purpose, is in good order and supplied with the necessary furniture and fittings. The committee visited the dispensary once only. The sanitary condition of the town receives considerable attention and is very satisfactory. The water-supply is abundant and good from the river, that from the numerous wells is liable to soakage. The total treated was 15,210 out-door and 60 in-door patients as compared with 12,774 and 66 respectively in the previous year. The prevailing diseases were ophthalmia, skin-diseases, malarious fevers and worms. Cholera appeared in the town in May and continued till August—87 cases with 37 deaths. An outbreak of small-pox occurred in February, March and April. Vaccination is carried on by the local fund vaccinator. Twenty-six *medico-legal* cases including 5 *post mortem* examinations were reported on. The dispensary was inspected in March and September by the Civil Surgeon, Ahmednagar, who reports favourably of Hospital Assistant Hari Kakaji, the medical officer. The total cost was Rs. 1,456-14-8, the cost per patient Re. 0-1-6, as compared with Rs. 1,055-10-0 and Re. 0-1-3 respectively in the previous year.

NEVÁSA.—*In charge of* Hospital Assistant PARBATSING DOWLATSING.

The building is in good repair, but the roof of the quarters for the medical officer was destroyed last August by a tree falling on it and it has not yet been repaired. The committee visited the dispensary four times. The sanitary condition of the town is most unsatisfactory. The water-supply from the river is good and abundant, that from wells is liable to pollution by soakage. The total number treated was 2,991 out-door and 30 in-door patients as compared with 3,950 and 22 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, skin-diseases, worms and respiratory affections. Cholera prevailed in the town in the month of July. During the year 227 children were successfully vaccinated. The dispensary was inspected in February and November by the Civil Surgeon, Ahmednagar. The total cost was Rs. 780-13-9, the cost per patient Re 0-4-1, as compared with Rs. 805-9-1 and Re. 0-3-2 respectively in the previous year.

SHEVGAON.—*In charge of* Hospital Assistant SUBRAYA BASAPA.

The buildings and the dead-house are in good repair but the latrine requires repair; quarters for the medical officer and servants and a cook-house are required. The committee visited the dispensary four times. The sanitary condition of the town is very unsatisfactory. The water-supply is abundant and reported good, but the wells from their position are liable to contamination. The total treated was 2,894 out-door and 25 in-door patients as compared with 2,596 and 34 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, skin-diseases and worms. Cholera prevailed in the town from May to October. Ninety-three children were successfully vaccinated. Five *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Ahmednagar, in March and November. The total cost was Rs. 1,048-12-9, the cost per patient Re. 0-5-8, as compared with Rs. 862-10-10 and Re. 0-5-2 respectively in the previous year.

NA'SIK COLLECTORATE.

CIVIL HOSPITAL, NÁSIK.—*In charge of* Honorary Surgeon JOHN LEAHY up to 15th July, Surgeon-Major C. T. PETERS up to 4th November and Surgeon H. P. DIMMOCK till end of year.

Conservancy and Water-supply.—The general sanitation of Násik is under the immediate control of a special health officer and is well conducted. Night-soil is conveyed to the depôt where it is manufactured into poudrette. There is much overcrowding during the period of pilgrimages, and domestic sanitation is bad. Water-supply is from the Godávari, from the Nasardi, and from wells. A scheme for the supply of better water is under thorough consideration.

Hospital Buildings.—The hospital is an old bungalow in the town and not at all fitted for the purpose. Several sites have been proposed for a new hospital but nothing has been decided.

General Health.—Bad cholera having prevailed to an unusual extent but chiefly among pilgrims. From February to September there were 632 cases and 403 deaths, which gave a percentage of 63·7 to the total attacked. Among those treated the percentage of deaths was 49·3; among those not treated it was 84·4.

Attendance of Patients.—Three-hundred and twenty-three in-door and 10,585 out-door patients were treated against 177 and 12,154 for the previous year.

Prevailing Diseases.—Malarious fevers, rheumatic affections, cholera, dysentery, abscesses, and boils, skin-diseases, injuries, syphilitic affections, ophthalmia.

Surgical Operations.—Thirteen major operations occurred.

Mortality and its Causes.—Fifty-two deaths occurred among in-door patients, 17 from dysentery, 11 from cholera, 7 from diarrhœa, 4 from remittent fever, 3 from general dropsy, 2 from phthisis, 2 from abscess, and one from each of the following causes—ozœna, pneumonia, peritonitis, vesical calculus, debility, opium-poisoning.

Vaccination.—Municipal. Six-hundred and eighty-seven operations were performed; there is much unwillingness to submit to the operation on the part of the Bráhmin class.

Conduct of Establishment.—Has been good.

The total cost was Rs. 9,212-13-9, the cost per patient Re. 0-13-6, as compared with Rs. 9,386-12-1 and Re. 0-12-2 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

MÁLEGAON.—*In charge of* Assistant Surgeon N. H. E. SUKHIA, L.M. & S.

The building is in a fair state of repair; quarters for the establishment and a dead-house are required. The committee visited the dispensary frequently. Sanitary arrangements are very defective. The water-supply from the river is not protected from pollution. The total number treated was 12,167 out-door and 21 in-door patients against 11,010 and 24 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, ophthalmia, rheumatic and respiratory affections, bowel-complaints and worms. Cholera was epidemic from March to July and in December, 146 cases with 75 deaths. Five major surgical operations were performed. During the year 118 children were vaccinated. One *post-mortem* examination was made and opinion given in 11 other medico-legal cases. The dispensary was inspected by the Surgeon-General in December. The total cost was Rs. 1,616-7-11, the cost per patient Re. 0-2-1, as compared with Rs. 1,441-15-3 and Re. 0-2-1 respectively in the previous year.

YEOLA.—*In charge of* Hospital Assistant SHAIK SURFRAZ HAKIM.

The building, a hired one, is in good repair. A new building is in course of erection. The furniture and fittings are sufficient. The committee visits the dispensary frequently. The town is fairly clean. The water-supply is deficient in the hot season. A scheme for an improved water-supply is under consideration. The total number treated was 13,854, all out-door patients, as compared with 11,752 in the previous year. The most common diseases were ophthalmia, malarious fevers, skin-diseases and worms. There was no epidemic. Four major surgical operations were performed. Two re-vaccinations and 446 primary vaccinations were performed. Nine *post-mortem* examinations were made and opinion given in 22 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Násik, in June. The total cost was Rs. 1,835-15-6, the cost per patient Re. 0-2-1, as compared with Rs. 1,686-7-5 and Re. 0-2-3 respectively in the year 1884.

DINDORI.—*In charge of* Hospital Assistant BASWANT SING.

The building is in good order. Quarters for the medical officer are required. Some necessary furniture should be supplied. The committee meets every month. There is no conservancy establishment, and the sanitary condition of the town is not satisfactory. The water-supply from the river and from wells is sufficient. The total number treated was 5,815 out-door and 26 in-door patients as compared with 5,031 and 22 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, skin-diseases, and worms. Cholera was epidemic from July to September. During the year 119 children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Násik, in May, and by the Deputy Sanitary Commissioner in November. The latter officer commends Hospital Assistant Baswant Sing for the manner in which he performs his duty. The total cost was Rs 1,054-7-10, the cost per patient Re. 0-2-10, as compared with Rs. 1,090-10-4 and Re. 0-3-5 respectively in the year 1884.

SINNAR—*In charge of* Hospital Assistant VITHAL BHIKÁJI

The roof of the building requires repair. A dead-house will soon be completed. Some articles of furniture are still required. A committee has been appointed but has not yet met. The sanitary condition of the town is fairly good. The water-supply is ample and said to be of good quality. The total number treated was 6,717 out-door and 44 in-door patients as compared with 6,270 and 11 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases and worms. Cholera was epidemic from June to August, 126 cases and 73 deaths. Three fatal cases of small-pox occurred. One major operation was performed. Two hundred and sixty-eight vaccinations were performed. Twelve medico-legal cases were reported upon at the request of the Police. The dispensary was inspected by the Civil Surgeon, Násik, in March. The total cost was Rs. 1,188-15-3, the cost per patient Re. 0-2-9, as compared with Rs. 981-5-4 and Re. 0-2-6 respectively in the year 1884.

SATÁNA.—*In charge of* Hospital Assistant EBRÁHIM KHÁN.

The new building was taken into use on the 5th May 1885, it is suitable, and some articles of furniture are still required. Monthly and quarterly meetings of the committee are regularly held. There is no attempt at sanitation. The water-supply is abundant but liable to be fouled. The total number treated was 7,117 out-door and 39 in-door patients as compared 5,264 and 33 respectively in the previous year. Ophthalmia, malarious fevers, skin-diseases and worms were the most common complaints. Cholera prevailed in the neighbourhood from March to July but did not appear in the town. During the year 152 successful primary vaccinations were performed. Thirty medico-legal cases including 5 *post-mortem* examinations were reported on. The total cost was Rs. 859-2-10, the cost per patient Re. 0-1-9, as compared with Rs. 1,000-6-10 and Rs. 0-3-0 respectively in the previous year.

PIMPALGAON BASWANT.—*In charge of* Hospital Assistant VINÁYAK DIVAKAR.

The buildings are in need of repair. Some articles of furniture are required. The committee meets every month and every quarter. The sanitary condition of the town is unsatisfactory. The water-supply from the river and numerous wells is abundant, but the well-water is liable to contamination by soakage. The total number treated was 10,051 out-door and 38 in-door patients as compared with 8,776 and 37 respectively in the previous year. The most common diseases were worms, skin-diseases, ophthalmia and malarious fevers. Cholera was epidemic in February and March, 45 cases were treated with 21 deaths. Eighty-one vaccine operations were performed. Ten *post-mortem* examinations were made and opinion given in 8 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Násik, in June, and by the Deputy Sanitary Commissioner in November. The total cost was Rs. 1,405-15-0, the cost per patient Re. 0-2-2, as compared with Rs. 1,319-1-6 and Re. 0-2-4 respectively in the previous year.

PEINT.— *In charge of* Hospital Assistant BÁLÁJI MAKUND.

The building is in good repair; a dead-house, latrine and cook-room are under construction. The furniture is sufficient but some bedding for in-patients is required. There is no committee but the Mámlatdár visits the dispensary frequently. The sanitary condition of the village is indifferent. The water-supply is deficient in the hot months and its quality is bad. The total number treated was 3,182 out-door and 44 in-door patients as compared with 3,837 and 40 respectively in the previous year. The prevailing diseases were worms, ophthalmia, skin-diseases and malarious fevers. Cholera was present in the month of March. Thirty-seven children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon in May and by the Deputy Sanitary Commissioner in November. The total cost was Rs. 1,909-6-9, the cost per patient Re. 0-9-5, as compared with Rs. 1,736-6-6 and Re. 0-7-1 respectively in the previous year.

KHA'NDESH COLLECTORATE.

CIVIL HOSPITAL, DHULIA.—*In charge of* Surgeon H. W. BOYD.

Conservancy and Water-supply.—During the past few years great care has been taken to improve the town of Dhulia. The new town is now in a very satisfactory state but the old part is still backward. There are 12 public latrines. Night-soil is removed and buried. Dust-bins are placed at convenient places. A fine market place has been established. There are a separate meat market and slaughter-houses. Water is procured from the river Pánjra from an irrigation nullah passing through the town, also from numerous wells. The water from the former is good, that from the latter bad. Better water-supply is much wanted.

Hospital Buildings.—The hospital is a fine building and complete in every way, but it is too far from the town, and so greatly was this inconvenience felt that last year a dispensary was established in the town.

General Health.—An epidemic of cholera broke out on the 16th of May and lasted intermittently till the 14th of August. There were 104 cases and 49 deaths. No other epidemic occurred.

Attendance of Patients.—In-door 574 as compared with 438 during the previous year. Out-patients 2,464 as compared with 1,679 for 1884; this shows a large increase of both classes.

Prevailing Diseases.—Ague, conjunctivitis, diseases of the intestines, diseases of the respiratory system, diseases of the skin, abscess, boils, and stone in the bladder.

Surgical Operations.—There were 101 major operations, the largest number ever performed during one year at this hospital. They include 44 cases of lithotomy and one of lithotrity, all successful excepting one. There were 7 cases of paracentesis abdominis, 8 amputations, 9 cases of extractions of the lens for cataract and various other operations on the eye. Dr. Boyd furnishes a tabular statement of major surgical operations from 1876, when there were 59, showing a gradual and steady increase till 1885, when there were 101; and he rightly thinks this is a proof that the hospital is well appreciated: and as a fact people come 200 miles here to seek relief. Dr. Boyd also furnishes "a second series of 50 consecutive operations for vesical calculus successfully performed, with remarks on a new knife and staff." This was thought before the Bombay Medical and Physical Society at a recent meeting. The knife and staff Dr. Boyd has brought forward is calculated to simplify the operation of lateral lithotomy, Of minor operations there were 277.

Mortality and its Causes.—There were 35 fatal cases during the year, 1 from small-pox, 5 from fevers, 4 from cholera, 2 from chronic syphilis and debility, 1 from leprosy, 2 from dropsy, 4 from chest-affections, 9 from dysentery or diarrhœa, and the remainder from various other causes.

Vaccination—Is carried on by the municipal vaccinator under the Sanitary Department.

Medico-legal.—Seven *post-mortem* examinations were made during the year.

Conduct of Establishment.—No complaint is made of the conduct of the servants, while Surgeon Boyd brings to notice the excellent work done by 1st Class Hospital Assistant Shaikh Dadoo.

Cost.—The total cost was Rs. 11,053-0-3, the cost per patient Rs. 3-10-2, as compared with Rs. 10,317-11-9 and Rs. 4-13-11 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

Dhulia.—*In charge of* Hospital Assistant V. B. Moghe.

The building, its furniture and fittings are all in good order and sufficient for the purpose. There is no committee, the dispensary being under the Civil Surgeon who frequently visits it. The total number treated was 5,790, all out-door patients. Malarious fevers, ophthalmia, skin-diseases, ulcers and inflammation of the eye being the most common diseases. The total cost was Rs. 769-0-0, the cost per patient Re. 0-2-1, as compared with Rs. 527-13-2 and Re. 0-3-3 respectively for the six months; the dispensary was opened in 1884.

Pa'rola.—*In charge of* Hospital Assistant Laxuman Bayajee.

The roof of the building requires repair. The furniture is sufficient and in good order. The committee visit the dispensary every month. The sanitary condition of the town is not satisfactory, though conservancy is attended to, to the extent that the municipality can afford. The water-supply from wells is deficient in the hot season and of inferior quality. The total number treated was 7,519 out-door and 5 in-door patients as compared with 6,277 and 2 respectively in the previous year. Ophthalmia, malarious fevers, worms, skin-diseases and rheumatic affections were the most common diseases. Cholera prevailed in the month of August; there were 51 cases. Ten major surgical operations were performed. There were 620 successful vaccinations. Four *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Dhulia, in January and in December. The total cost was Rs. 1,029-11-11, the cost per patient Re. 0-2-2, as compared with Rs. 1,842-14-10 and Re. 0-4-8 respectively in the previous year.

Erandol.—*In charge of* Hospital Assistant Mahomed Hussein.

The building is in good repair; the construction of quarters for the establishment and a latrine is still under consideration. The committee hold monthly and quarterly meetings. The sanitary condition of the town is not satisfactory, but some attention is paid to conservancy. The water-supply is good but deficient in the hot season. The total number treated was 10,075 out-door and 7 in-door patients as compared with 8,751 and 15 respectively in the previous year. The most common diseases were skin-diseases, ophthalmia, malarious fevers, abscesses and injuries. Cholera appeared in the town in July; 103 cases with 36 deaths. Four major surgical operations were performed. During the year 491 children were successfully vaccinated. Two *post-mortem* examinations were made and opinion given in 5 other medico-

legal cases. The dispensary was inspected in January and December by the Civil Surgeon, Dhulia. The total cost was Re. 1,136-2-4, the cost per patient Re. 0-1-9, as compared with Rs. 1,402-2-8 and Rs. 0-2-6 respectively in the previous year.

CHOPDA.—*In charge of* Hospital Assistant HANMON SING.

The building is in good order; the dead-house and the compound wall have been completed this year. The furniture is sufficient and in good order. The committee visit the dispensary every month. The sanitary condition of the town is attended to. The water-supply is insufficient and of inferior quality. The total number treated was 6,160 out-door and 1 in-door patients against 5,065 and 2 respectively in 1884. The prevailing diseases were ophthalmia, skin-diseases and malarious fevers. Cholera prevailed during July and August; 123 cases were treated with 65 deaths. Two major surgical operations were performed. Vaccination is carried out by the local fund vaccinator. Three *post-mortem* examinations were performed. The total cost was Rs. 1,272-7-2, the cost per patient Re. 0-3-3, as compared with Rs. 1,647-2-10 and Re. 0-5-2 respectively in the previous year.

SUNDARJI MULJI DISPENSARY, JALGAON.—*In charge of* Assistant Surgeon NARAYEN ANANT, G.G.M.C.

The buildings are in good repair, and the furniture sufficient. The committee visit the dispensary regularly every month. Conservancy is attended to by the municipality. The water-supply is abundant from the Mehroon tank, but it does not reach the higher parts of the town in the hot season. The total treated was 5,087 out-door and 26 in-door patients against 4,849 and 27 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, ophthalmia, respiratory affections and bowel-complaints. Four major surgical operations were performed. Vaccination is carried on by a special vaccinator. Five *post-mortem* examinations were made at the request of the Police. The total cost was Rs. 4,985-1-9, the cost per patient Re. 0-15-7, as compared with Rs. 5,907-15-1 and Re. 1-3-4 respectively in the previous year.

NANDURBÁR.—*In charge of* Hospital Assistant GOPAL KRISHNA PENDHARKAR.

The building is a hired one; a new building is to be provided. There is no committee but the chairman of the municipality visited the dispensary every month. The sanitary condition of the town is fair; the water-supply is scanty and liable to pollution by soakage. The total number treated was 8,242 out-door and 5 in-door patients as compared with 6,844 and 3 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, worms, respiratory affections and ophthalmia. Cholera prevailed in September and October—63 cases with 20 deaths. Five major surgical operations were performed. The number of persons vaccinated was 113. Six *post-mortem* examinations were made and opinion given in 10 medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner in January. The total cost was Rs. 1,283-4-0, the cost per patient Re. 0-2-5, as compared with Rs. 1,673-2-9 and Re. 0-3-10 respectively in the previous year.

SHIRPUR.—*In charge of* Hospital Assistant TRIMBAK LAXUMON.

The building, a hired one, is in good repair. Proposals to erect a new building or purchase the present one have been under consideration for a long time, but no decision has been arrived at. A latrine is much wanted. The committee visit the dispensary every month. Sanitary arrangements are very defective; the water-supply chiefly from wells is sufficient but is not protected from pollution. The total treated was 5,386 out-door and 10 in-door patients as compared with 5,235 and 7 respectively in the previous year. The prevailing diseases were skin-diseases, malarious fevers, ophthalmia and respiratory and rheumatic affections. Cholera occurred in the neighbourhood but was not epidemic in the town. There were 344 successful primary and 10 re-vaccinations. Two *post-mortem* examinations were made and opinion given in several medico-legal cases. The dispensary was inspected by the Civil Surgeon, Dhulia, in February. Hospital Assistant Trimbak Laxumon is commended for performing his duties efficiently and with zeal. The total cost was Rs. 792-2-11, the cost per patient Re. 0-2-4, as compared with Rs. 1,688-14-4 and Re. 0-5-1 respectively in the previous year.

BHADGAON.—*In charge of* Hospital Assistant DAJI DHONDEO.

The building is in good order; quarters for the medical officer and servants, a dead-house and latrine are required. Some articles of furniture for in-patients are wanting. The committee visited the dispensary every month up to May. Conservancy receives attention from the municipality. The water-supply from the river Girna and wells is good and abundant. The total number treated was 3,428 out-door and 4 in-door patients as compared with 2,861 and 7 respectively in the previous year. The prevailing diseases were skin-diseases, malarious fevers, worms and ophthalmia. Cholera prevailed from July to August—72 cases with 22 deaths. Five major surgical operations were performed. The number of children vaccinated was 130. Six *post-mortem* examinations were made during the year. The total cost was Rs. 962-6-2, the cost per patient Re. 0-4-5, as compared with Rs. 1,291-6-8 and Re. 0-7-2 respectively in the previous year.

PIMPALNER.—*In charge of* Passed Medical Pupil VISHNU SHIVRAM.

The building is in a bad state of repair. The necessary furniture with the exception of a dissecting table is supplied. Complaint is made that the ground close to the dispensary is a nuisance. The committee visited the dispensary twelve times. The sanitary condition of the town is unsatisfactory, the water-supply from wells is abundant and of good quality. The total number treated was 4,984 out-door and 9 in-door patients as compared with 5,198 and 11 respectively in the previous year. The prevailing diseases were worms, skin-diseases, malarious fevers, ophthalmia and respiratory affections. Small-pox prevailed from February to June. Seven major surgical operations were performed. There were 117 successful primary vaccinations and 1 re-vaccination. Five *post-mortem* examinations were made and opinion given in 7 other medico-legal cases. The total cost was Rs. 586-3-7, the cost per patient Re. 0-1-10, as compared with Rs. 1,141-7-3 and Re. 0-3-6 respectively in the previous year.

SHÁHÁDA.—*In charge of* Hospital Assistant LAXUMON SAWUNT.

Some repairs are required to the building; the floor being on a lower level than the surrounding ground is damp; the cook-room should be more completely separated from the latrine. Quarters for the establishment and a dead-house are still required. Some articles of furniture are also wanted. The committee visited the dispensary eight times. There is some improvement in sanitary arrangements. The water-supply is abundant but liable to pollution. The total number treated was 4,889 out-door and 8 in-door patients as compared with 3,252 and 10 respectively in the previous year. The most common diseases were skin-diseases, malarious fevers, injuries, respiratory affections, bowel-complaints and ophthalmia. An outbreak of cholera occurred in August, 26 cases with 4 deaths. Eight major surgical operations were performed. There were 85 successful vaccinations. One *post-mortem* examination was made. The total cost was Rs. 844-0-11, the cost per patient Re. 0-2-9, as compared with Rs. 1,549-2-3 and Re. 0-7-7 respectively in the previous year.

TALODA.—*In charge of* Hospital Assistant KESHAV HARI.

The building, a hired one, is suitable but requires repair. A dead-house and latrine are required. The furniture and fittings are sufficient and in good order. The committee visits the dispensary frequently. Some attention is paid to sanitary matters; the water-supply is indifferent. The total treated was 5,107 out-door and 4 in-door patients as compared with 4,328 and 3 respectively in the previous year. The more common complaints were skin-diseases, malarious fevers, ophthalmia and respiratory affections. Cholera appeared in the month of September. During the year 129 children were successfully vaccinated. Two *post-mortem* examinations were made. The total cost was Rs. 1,136-0-10, the cost per patient Re. 0-3-6, as compared with Rs. 1,820-7-9 and Re. 0-6-8 respectively in the previous year.

AMALNER.—*In charge of* Passed Medical Pupil GANPAT NILOBA.

The dispensary was only opened for the reception of patients on 25th December 1885. The present building is unsuited for the purpose. There is no committee. The sanitary state of the town is very unsatisfactory. The water-supply is abundant but liable to pollution. Sixty-eight patients were treated, including 17 cases of skin-diseases, 7 cases of fever, and 7 of diseases of the lungs. Vaccination is performed by the táluka vaccinator.

SA'TA'RA COLLECTORATE.

CIVIL HOSPITAL, SA'TA'RA.—*In charge of* Surgeon H. B. BRIGGS, M.B., till the 4th November, afterwards *in charge of* Surgeon J. P. GREANY, M.D.

Conservancy and Water-supply.—It is reported that the conservancy arrangements are well looked after. The water-supply is from a reservoir on a neighbouring hill conveyed by earthen pipes. The quality is reported good but the quantity deficient. The Das water-work scheme has not yet been completed. The medical officer remarks: "The system of distribution is however open to several objections, and it would be a matter of the greatest importance if stand-pipes were constructed from which the inhabitants could obtain their daily supply instead of the present system of dipping it up."

Hospital Buildings—Are in good repair and the situation suitable, but the ventilation is defective and certain surrounding sanitation bad.

General Health.—The public health has not been satisfactory. Cholera prevailed to a considerable extent throughout the Collectorate—6,731 cases being reported, of which 3,126 were fatal. Small-pox also prevailed.

Attendance of Patients.—The total number of in-door patients was 554, of out-door 18,609, as compared with 527 and 14,548 for the previous year. All these numbers show a considerable increase over former years.

Prevailing Diseases—Were malarious fevers, intestinal worms, skin-affections, respiratory affections, maladies connected with the eye, ear-diseases, rheumatic affections, syphilis and anæmia.

Surgical Operations.—There were 48 major and 845 minor operations. Among the major operations were 10 lithotomies, all successful, 6 amputations, 2 being for mycetoma, and 1 amputation of the thigh.

Mortality and its Causes.—Thirty-two deaths occurred among in-door patients, the largest numbers being from dysentery, diarrhœa and cholera.

Medico-legal Cases.—Of these there were 46, entailing 13 examinations of dead bodies: 26 of articles supposed to contain poisonous substances: 6 of wearing apparel for blood stains or seminal stains and 1 of fragments of bones.

Vaccination—Is performed by the municipal vaccinator.

Conduct of Establishment.—The conduct of the establishment has been good.

Cost.—The total cost was Rs. 10,199-7-6 and the cost per patient Re. 0-8-6 as compared with Rs. 11,933-12-10 and Re. 0-12-7 respectively in the previous year.

The Sátára Hospital was inspected by the Surgeon General on the 17th of November.

CIVIL HOSPITAL, MAHA'BLESHVAR.—*In charge of* Surgeon-Major J. DAVIDSON, M.B.

Conservancy and Water-supply.—There are six different depôts on the hill to which stable litter and road-sweepings are carted in positions not likely to be offensive or to injure the water-supply. There are ordinarily 3 carts and one inspector, the establishment being increased when visitors arrive. There are six public latrines in the rear of the village of Málcolmpeth. There are also many private latrines kept clean at the expense of the owners. Night-soil is burned and the deposits covered with earth. House-owners are obliged to have latrines for their servants from which the filth is removed and burned. The medical officer remarks the conservancy cannot be called good, but owing to the great distance between the different bungalows no perfect system could be established without very heavy additional taxation. The heavy rainfall washes away all accumulations of filth, so that in the month of October a fresh start under perfect sanitary conditions is obtained.

The water-supply is from the Yenna lake, the Bishop's tank and the Elphinstone tank, 57 wells and 11 springs; 32 of the wells and 4 of the springs are private property. Of these sources the Yenna lake, the two tanks, 12 public and 13 private wells, 2 public and 2 private springs supply water throughout the year. The public tanks and wells are cleaned out at the end of every hot season during the year. The Elphinstone tank has been repaired. The Bishop's tank has been covered and a pipe attached with leather hose from which water flows directly into the bullocks' pukals. A suitable drained platform was also made for the bullocks to stand upon. A second pipe was also attached for low-caste people, for whom it appears the tank was originally built. The water is of good quality and of sufficient abundance to meet requirements excepting occasionally near the end of the hot season.

Hospital Buildings—Are kept in good repair by the Public Works Department. The accommodation is sufficient, not many in-door patients presenting although the out-door department is popular.

General Health.—The general health has been good and no epidemic has occurred.

Attendance of Patients.—Thirty-eight in-door and 7,415 out-door were treated, being the largest number on record.

Prevailing Diseases.—Year by year the principal causes of admission for treatment are rheumatic affections, bronchitis, eye affections, intestinal worms, constipation, skin-diseases, and ague. From a list given by the medical officer it appears the most frequent cause of admission is parasitic disease. He remarks: "it is difficult to say what is the real cause of the prevalence of intestinal worms," but refers it to impure water, insufficient use of salt, bad and imperfectly cooked food, and impaired digestion resulting from conditions of life on these hills. He also remarks that the number of admissions for ague is large and explains this by mentioning that "natives coming up from warmer stations frequently suffer during the first few days of their residence in the colder climate of the hills.

Surgical Operations.—Only one surgical operation coming under the head major presented; of minor there were 127.

Mortality and its Causes.—Only one death occurred among in-door patients from injury to the skull, the result of accident.

Vaccination.—A táluka vaccinator visits the hill periodically.

Conduct of Estabishment.—Has been satisfactory.

Cost.—The total cost was Rs. 10,465-3 and the cost per patient Rs. 1-6-5 against Rs. 10,596-0-11 and Rs. 1-10-9 respectively in the previous year.

The Mahábleshwar Hospital was inspected in May by the Surgeon General.

GRANT-IN-AID DISPENSARIES.

WÁI.—*In charge of* Hospital Assistant CHINTAMAN BALLÁL.

One of the verandahs of the building requires repair. The committee inspected the dispensary fifteen times. The town is kept clean. The water-supply is chiefly from the river

Krishna; it is abundant and of good quality. The total number treated was 15,141 out-door and 17 in-door patients as compared with 9,962 and 34 respectively in the previous year. The more common complaints were ophthalmia, skin-diseases, worms, and malarious fevers. Cholera was epidemic in October, November and December—139 cases and 53 deaths. The number of persons vaccinated was 211. Six *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Sátára, in February and August, and by the Surgeon General in June. The total cost was Rs. 1,614-6-3, the cost per patient Re. 0-1-8, as compared with Rs. 2,261-14-3 and Re. 0-3-7 respectively in the previous year.

KARA'D.—*In charge of* Hospital Assistant HARI RAGHUNATH.

The building is in good repair and supplied with the necessary furniture. The dead-house has been rebuilt. The committee visit the dispensary quarterly. The sanitary condition of the town is not satisfactory. The water-supply is abundant and fairly good. The total number treated was 5,755 out-door and 10 in-door patients as compared with 5,430 and 9 respectively in the previous year. The prevailing diseases were ophthalmia, skin-diseases, worms and malarious fevers. Cholera was epidemic from June to August—118 cases and 39 deaths. One major operation was performed. There were 317 children successfully vaccinated. Twenty-one *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Sátára, twice during the year. The total cost was Rs. 1,520-10-8, the cost per patient Re. 0-4-2 as compared with Rs. 1,725-11-7 and Re. 0-5-0 respectively in the previous year.

ISLA'MPUR.—*In charge of* Hospital Assistant RAMCHANDRA S. PRABHUNE.

The building is in a fair state of repair. The necessary furniture with the exception of some cots has been supplied. The committee visit the dispensary quarterly. The sanitary condition of the town is indifferent. The water-supply is deficient in the hot season and of inferior quality. The total number treated was 8,602 out-door and 40 in-door patients as compared with 6,152 and 15 respectively in the previous year. The most common diseases were skin-diseases, worms, malarious fevers and ophthalmia. Five major surgical operations were performed. The number of vaccinations was 128. Fourteen *post-mortem* examinations were made and opinion given in 25 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Sátára, in May. The total cost was Rs. 773-5-9, the cost per patient Re. 0-1-5 as compared with Rs. 1,138-13-7 and Re. 0-2-11 respectively in the previous year.

PUSESA'VLI.—*In charge of* Hospital Assistant BHAU TUKARAM.

The buildings are in good order and the furniture and fittings sufficient. The committee visited the dispensary 11 times during the year. The sanitary condition of the town is bad. The water-supply is abundant from the river and wells; the former is liable to pollution. The total number treated was 4,225 out-door and 16 in-door patients as compared with 3,453 and 14 respectively in the previous year. The more common diseases were ophthalmia, malarious fevers, skin-diseases and worms. One hundred and thirty-two persons were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Sátára, in March and December. The total cost was Rs. 1,057-3-6, the cost per patient Re. 0-3-11, as compared with Rs. 1,524-8-11 and Re. 0-7-0 respectively in the previous year.

MHASVAD.—*In charge of* Hospital Assistant WASUDEO BALKRISHNA.

The floor of the main building requires repair. A latrine is wanted. Some clothing for in-patients is also required. The committee visited the dispensary eleven times. The town is kept fairly clean, but the conservancy establishment is insufficient. The water-supply is scanty in the hot season and liable to pollution. The total number treated was 4,510 out-door and 28 in-door patients as compared with 4,524 and 19 respectively in the previous year. The prevailing diseases were ophthalmia, skin-diseases, worms, malarious fevers, and respiratory affections. Cholera appeared in the town in July and August—11 cases with 5 deaths. Eight major surgical operations were performed. Two hundred and four were successfully vaccinated and 2 re-vaccinated. Five *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Sátára, in February. The total cost was Rs. 852-0-9, the cost per patient Re. 0-3-0, as compared with Rs. 2,053-8-1 and Re. 0-7-2 respectively in the previous year.

PA'TAN.—*In charge of* Hospital Assistant MOHANLAL NANAKRAM.

Ordinary repairs to the building in progress; the furniture and fittings sufficient and in good order. The committee met nine times. There is little or no attempt at sanitation. The water-supply is abundant and good. The total number treated was 4,491 out-door and 7 in-door patients as compared with 4,201 and 9 respectively in the previous year. Ophthalmia, intestinal worms, skin-diseases, malarious fevers and respiratory affections were the most common diseases. Cholera appeared in July—19 cases and 9 deaths. The number of children vaccinated was 101. Two *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Deputy Sanitary Commissioner in January and by the Civil Surgeon in March. The total cost was Rs. 974-1-11, the cost per patient Re. 0-3-5, as compared with Rs. 1,484-14-9 and Re. 0-5-7 respectively in the previous year.

TA'SGAON.—*In charge of* Hospital Assistant GOVIND GOPAL.

The building is in good repair. The furniture is sufficient. The committee visits the dispensary occasionally. Sanitation is attended to; several public latrines have been built, but they are not in use as the conservancy establishment is insufficient to attend to them. The water-supply is good but insufficient in the dry season. The total treated was 2,674 out-door and 16 in-door patients as compared with 2,876 and 8 respectively in the previous year. The most common complaints were skin-diseases, respiratory affections, worms and ophthalmia. Cholera appeared in the town—7 cases with 3 deaths. Four major surgical operations were performed. Two hundred and ten persons were successfully vaccinated. Three *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon in January. The total cost was Rs. 974-1-11, the cost per patient Re. 0-3-5, as compared with Rs. 1,015-13-10 and Re. 0-5-7 respectively in 1884.

PANCHGANI.—*In charge of* Hospital Assistant J. F. DEJOSS.

Additions were made to the building, and it was opened for in-patients in April; it is in good repair and the furniture and fittings are in good order. There is no committee. The general health of the station was very good. The total treated was 8,302 out-door and 4 in-door patients. The more common diseases were skin-diseases, worms, malarious fevers, ophthalmia and respiratory affections. Chicken-pox was prevalent in the early part of the year. Five cases of cholera with one death occurred during the year. One major surgical operation was performed. The dispensary was inspected by the Surgeon General who was well satisfied with the manner in which Hospital Assistant DeJoss performs his duties. The total cost was Rs. 945-9-6, the cost per patient Rs. 0-1-3.

SHOLA'PUR COLLECTORATE.

CIVIL HOSPITAL, SHOLA'PUR.—*In charge of* Apothecary W. R. SCROGGIE, M.R.C.S.

Conservancy and Water-supply.—The conservancy arrangements are carried on by a staff of 1 Head Sanitary Inspector and 82 other employés with 20 refuse-carts. There are 215 dust-bins in the town. There are 12 public latrines, but a larger number are required. Night-soil is converted into poudrette and sold. Drainage is defective but some improvements were made to the drainage about the slaughter-houses. The nála running from the Sadar Bázár, and the trench surrounding the old fort are as mentioned in an unsatisfactory state. Water from the Ekruk tank is extensively used and is good. Some town wells are also used, and the Lingáyat caste of Hindus drink the Sidashwar tank water.

Hospital Buildings.—Quarters for 2nd class servants were completed and occupied during the year. Ceilings are required for the hospital wards. Shelves for the store-rooms are also wanted. The hospital should be paved. The dead-house requires fitting; there is no examination-room and no bath-room.

General Health.—General health not so satisfactory as for the previous year. A few cases of cholera occurred among pilgrims from Pandharpur. Measles and hooping cough occurred during the latter part of the year. Malarious fever prevailed to about the same extent as usual.

Attendance of Patients.—These were 344 in-door patients, 35 in excess of 1884, and there were 7,561 out-door patients, 34 less than in the previous year. The daily average attendance was in-door 17·5, out-door 103·2.

Prevailing Diseases.—These were among both classes of patients malarious fever, rheumatic, syphilitic, ophthalmia, respiratory and bowel-affections, skin-diseases, ulcers and injuries.

Surgical Operations.—There were 44 major operations among which were 6 lithotomies, 3 amputations, 3 podalic version, 1 craniotomy, 1 removal of a large tumour from the neck, 5 important operations on the eye. Minor surgical operations numbered 562.

Mortality and its Causes.—Twenty-five deaths occurred among in-door patients. 7 of which were due to cholera and 7 to dysentery, 2 to remittent fever and the remainder to pneumonia, poricarditis, paraplegia, ague, large abscess, epilepsy, syphilis, diarrhœa and sarcoma of the neck.

Vaccination.—The municipal vaccinator conducts this work. There were 1,687 primary and 10 re-vaccinations.

Medico-legal.—Of these there were 48 cases, entailing 14 *post-mortem* examinations.

Conduct of Establishment.—First Class Hospital Assistant, Keshew Wishwanath, is reported to have worked hard, The medical officer notices that the establishment is below strength. The subordinate servants have been contented and more regular in their attendance since the provision of quarters.

Cost.—The total cost was Rs. 7,455-2-3 and the cost per patient Rs. 0-15-1 against Rs. 7,734-5-5 and Rs. 0-15-7 respectively in 1884.

The Sholápur Civil Hospital was inspected by the Surgeon-General on the 22nd December.

MUNICIPAL DISPENSARIES.

SHOLA'PUR.—*In charge of* Hospital Assistant HANMANTRAO GHORPHURE.

The building is in good order; the latrine is badly situated, another for in-door patients is required. The furniture and fittings are complete. The committee meet regularly every month, and extra meetings are held, if necessary. The total treated was 14,085 out-door and 89 in-door patients as compared with 15,222 and 93 respectively in the previous year. The most common diseases were skin-diseases, malarious fevers, ophthalmia, respiratory affections, diarrhœa, injuries and worms. Cholera was present in July, August and October; 21 cases were treated with 7 deaths. Twelve major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. The dispensary was inspected by the Surgeon General in December and by the Apothecary in civil medical charge, Sholápur, in May and December last. First Class Hospital Assistant Hanmantrao Ghorphure is reported to conduct his duties with efficiency and zeal. The total cost was Rs. 1,954-3-2, the cost per patient Re. 0-2-2, as compared with Rs. 4,085-9-4 and Re. 0-4-3 respectively in 1884.

PANDHARPUR.—*In charge of* Assistant Surgeon SHANTARAM VINAYEK, L.M.

The buildings are in excellent condition. The necessary furniture and fittings have been supplied. The committee visited the dispensary every month. The sanitary condition of the town is indifferent. The water-supply from tanks and the river is abundant but liable to pollution. The total number treated was 13,135 out-door and 120 in-door patients as compared with 12,101 and 40 respectively in the previous year. Skin-diseases, ophthalmia, malarious fevers, worms and respiratory and rheumatic affections were the most common complaints. Cholera was epidemic in July and August; 625 cases occurred with 480 deaths. Fourteen major surgical operations were performed. Twenty *post-mortem* examinations were made, and seven cases were submitted to the Chemical Analyser to Government. The dispensary was inspected by the Apothecary in medical charge, Sholápur, in February, and by the Deputy Sanitary Commissioner in July. The total cost was Rs. 5,632-4-5, the cost per patient was Re. 0-6-9, as compared with Rs. 5,646-7-10 and Re. 0-7-5 respectively in the previous year.

BA'RSI.—*In charge of* Hospital Assistant NARSU GURAPPA.

The buildings are in good repair; the ventilation of the female ward should be improved. The furniture and fittings are supplied according to rule. The sanitary condition of the town is fairly good. The water-supply is sufficient but liable to pollution from soakage. The total number treated was 15,790 out-door and 56 in-door patients as compared with 13,339 and 43 respectively in the previous year. Ophthalmia, worms, malarious fevers, skin-diseases and respiratory affections were the most common complaints. Cholera appeared in July and August; 69 cases were treated with 19 deaths. Vaccination is performed by the municipal vaccinator. Fifteen *post-mortem* examinations were made and opinion given in 19 other medico-legal cases. The dispensary was inspected by the Apothecary in medical charge of Sholápur in June and November, who reports that Hospital Assistant Narsu Gurappa performs his duties satisfactorily and well. The total cost was Rs. 2,114-1-6, the cost per patient Re. 0-2-1, as compared with Rs. 2,725-11-1 and Re. 0-3-3 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

KARMA'LA.—*In charge of* Hospital Assistant SHAIK AHMED PATEL.

The building is in good repair; quarters for the establishment have not yet been provided. Some articles of furniture are required to complete equipment. The committee visit the dispensary every month, the chairman takes great interest in the institution. The sanitary condition of the town is fairly good. The water-supply is deficient and liable to pollution; a scheme for an improved supply is under consideration. The total number treated was 7,928 out-door and 23 in-door patients as compared with 7,904 and 35 respectively in the previous year. The most common complaints were ophthalmia, malarious fevers, worms, skin-diseases and respiratory affections. Cholera appeared in June—21 cases with 7 deaths. Seven major surgical operations were performed. Two hundred and four persons were successfully vaccinated. Five *post-mortem* examinations were made; opinion given in 9 medico-legal cases. The dispensary was inspected by the Apothecary in civil medical charge, Sholápur, in February and November; he reports that Hospital Assistant Shaik Ahmed Patel performs his duties with care and attention. The total cost was Rs. 991-8-4, the cost per patient Re. 0-1-11, as compared with Rs. 2,139-10-1 and Re. 0-4-3 respectively in the previous year.

AKLUJ.—*In charge of* Passed Pupil SHAIK GOOLAB.

A new building is to be erected; the present one is unsuitable and in need of repair. The furniture and fittings are sufficient and in good order. The chairman visits the dispensary occasionally, the other members of the committee on rare occasions. The sanitary condition of the town is unsatisfactory. The water-supply from the river Níra is plentiful but liable to contamination. The total number treated was 3,402 out-door and 10 in-door patients. The prevailing diseases were skin-diseases, malarious fevers, ophthalmia, diarrhœa and respiratory

affections. One major surgical operation was performed. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Apothecary in medical charge of Sholápur in March. The total cost was Rs. 1,237-12-8, the cost per patient was Re. 0-5-9, as compared with Rs. 550-14-2 and Re. 0-5-0 respectively for the five months the dispensary was open in 1884.

NATIVE STATE DISPENSARY.

AKALKOT.—*In charge of* Hospital Assistant GANGADEEN.

The building is in good repair. There is no committee. The Political Agent, the State Khárbhári and the Subordinate Judge visit the dispensary occasionally. The total number treated was 4,653 out-door and 2 in-door patients as compared with 6,011 and 18 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, worms, skin-diseases, respiratory affections and dysentery. During the year 227 children were successfully vaccinated. The total cost was Rs. 1,977-12-6, the cost per patient Re. 0-6-9, as compared with Rs. 2,228-7-6 and Re. 0-5-10 respectively in the previous year.

BELGAUM COLLECTORATE.

CIVIL HOSPITAL, BELGAUM.—*In charge of* Surgeon-Major D. E. HUGHES.

Conservancy and Water-supply.—The city night-soil is converted into poudrette near the Dhárwár road. The medical officer considers this place objectionable and remarks the abandonment of the former site is a mistake as the manufacture might be continued there the year round without proving a nuisance which will be impossible on the Dhárwár road. The water-supply has been improved by the formation of a new municipal well.

Hospital Buildings.—These have before been reported as unsuitable. A separate ward is required for the *detention* in security and observation of lunatics.

General Health.—With the exception of cholera which occurred from May to October (121 cases 72 deaths) the general health has been good in the city, but cholera caused great mortality in the districts.

Attendance of Patients.—Two hundred and seventy-six in-door and 3,262 out-door were treated, being a decrease of the former and an increase of the latter on the numbers for the previous years. The daily average number of in-door patients was 15·4, of out-door 31·2. The absence of admissions for small-pox and measles and the smaller number of admissions for ague and cholera accounts for the falling off in the number of in-patients.

Prevailing Diseases—Were ague, conjunctivitis, bronchitis, intestinal worms, skin-diseases, diarrhœa, and rheumatic affections.

Mortality and its Causes.—Forty-two in-door patients died; diarrhœa caused 10 deaths; cholera 7; dysentery 4; ulcers 2; injuries 3; retained placenta 1.

Surgical Operations.—Seventeen major operations occurred. Remarking on a case of lithotomy the medical officer observes: "there have only been two such operations performed at this hospital and only three cases of vesical calculus seen at Belgaum of late years, while in the neighbourhood of Chikodi in the same Collectorate the disease is common. On my recent visit to the dispensary at that town I operated on two cases."

Vaccination.—Is performed by the municipal vaccinators.

Medico-legal Cases.—Twenty-three *post-mortem* examinations were made on the requisition of the Police.

Conduct of Establishment.—The first class hospital establishment have performed their duties to the entire satisfaction of the Civil Surgeon. No complaint is made of the servants.

Cost.—The total cost was Rs. 14,966-13-10 and the cost per patient Rs. 4-3-8 as compared with Rs. 12,635-6-1 and Rs. 3-15-6 respectively in the previous year.

The Belgaum Civil Hospital was inspected on the 26th of November by the Surgeon-General.

GRANT-IN-AID DISPENSARIES.

BELGAUM.—*In charge of* Hospital Assistant HARI VITHAL.

The flooring of the building requires repair. Furniture and fittings are sufficient and in good order. There are no regular meetings of the committee, but the chairman and other members have visited the dispensary many times. The total number treated was 7,326, all out-door patients, as compared with 7,582 out-door and 3 in-door patients in the previous year. The most common complaints were skin-diseases, malarious fevers, ophthalmia and respiratory affections. Cholera prevailed from May to October; 7 cases with 2 deaths were treated. Three major surgical operations were performed. The dispensary was inspected by the Surgeon-General, by the Civil Surgeon and by the Deputy Sanitary Commissioner. Hospital Assistant Hari Vithal is favourably mentioned by Surgon-Major Hughes. The total cost was Rs. 1,192-0-0, the cost per patient Re. 0-2-7, as compared with Rs. 1,908-6-1 and Re. 0-4-1 respectively in the previous year.

GOKÁK.—*In charge of* Hospital Assistant SHIVU BHAGU.

The building is in good repair; there are no quarters for the servants. With the exception of the cots for in-patients the furniture is in good order. The committee visited the dispensary several times. The sanitary condition of the town is very indifferent. The water-supply is somewhat deficient in the hot season. The total number treated was 2,935 out-door and 21 in-door patients as compared with 3,548 and 37 respectively in the previous year. The prevailing diseases were ophthalmia, skin-diseases, worms, malarious fevers, and ulcers. Cholera was epidemic. During the year 222 successful vaccine operations were performed. The total cost was Rs. 957-14-7, the cost per patient Re. 0-5-2 as compared with Rs. 1,516-15-11 and Re. 0-6-9 respectively in the previous year.

ÁTHNI.—*In charge of* Hospital Assistant RAMCHANDRA DAJI.

The buildings are in good repair; the furniture and fittings are sufficient. The committee met 9 times; individual members frequently visited the dispensary. The town is kept fairly clean. The water-supply is insufficient. The total treated was 5,540 out-door and 14 in-door patients as compared with 5,484 and 14 respectively in the previous year. The most common diseases were ophthalmia, worms, skin-diseases, rheumatic and respiratory affections and malarious fevers. Cholera prevailed in the district, but only one case occurred in the town. Two hundred persons were successfully vaccinated by the medical officer up to the end of June; since then a vaccinator has been appointed by the municipality. Three *post-mortem* examinations were made at the request of the Police. Hospital Assistant Ramchandra Daji is favourably reported on by the Commissioner, S. D. The total cost was Rs. 1,568-11-8, the cost per patient Re. 0-4-6, as compared with Rs. 1,473-13-9 and Re. 0-4-3 respectively in the previous year.

SAUNDATTI.—*In charge of* Hospital Assistant MORO RAMCHANDRA.

The present building is in good repair. The new dispensary is not yet finished. The committee visit the institution regularly. The sanitary condition of the town is very fair. The water-supply is good and sufficient. The total number treated was 2,051, all out-door, as compared with 2,082 in the previous year. The most common complaints were skin-diseases, ophthalmia, worms, malarious fevers, ulcers and respiratory affections. Cholera prevailed in June and July—14 cases with 6 deaths. One major surgical operation was performed. There were 200 primary and 2 re-vaccinations. Fifteen *post-mortem* examinations were made. The dispensary was inspected in February by the Civil Surgeon, Belgaum, who reports favourably on Hospital Assistant Moro Ramchandra. The total cost was Rs. 4,440, the cost per patient Rs. 2-2-7, as compared with Rs. 1,257-9-4 and Re. 0-9-7 respectively in the previous year. The increase is due to the erection of a new building.

CHIKODI.—*In charge of* Hospital Assistant HANMANTRAO CHOWAN.

The roof of the building is in much need of repair. The medical officer has occupied the quarters recently built for him; quarters for the servants are required, and some articles of furniture should be supplied. The committee meet every month and also visit the dispensary frequently. The town is kept clean. The water-supply from the river and wells is sufficient. The total number treated was 3,155 out-door and 44 in-door patients as compared with 2,625 and 28 respectively in the previous year. The prevailing diseases were skin-diseases, bowel-complaints, malarious fevers, injuries, ophthalmia and respiratory and rheumatic affections. There was no epidemic. Twenty-four major surgical operations were performed. One hundred and eighty-six children were vaccinated. Opinion was given in 37 *medico-legal* cases including 8 *post-mortem* examinations. The dispensary was inspected by the Civil Surgeon, Belgaum, in December. The total cost was Rs. 1,608-14-6, the cost per patient Re. 0-8-0, as compared with Rs. 2,234-0-4 and Re. 0-13-5 respectively in the year 1884.

DHA'RWA'R COLLECTORATE.

CIVIL HOSPITAL, DHÁRWÁR.—*In charge of* Surgeon-Major W. MCCONAGHY.

Conservancy and Water-supply.—The principal streets of the town are kept fairly clean, but the sanitary condition of the smaller streets is indifferent, the side drains in the monsoon especially being offensive and choked. Cattle are kept near the owners' dwellings; the number of pit privies and a tan yard in a crowded locality are objectionable. The conservancy establishment maintained is inadequate for a straggling town like Dhárwár. The water-supply is always more or less impure, the catchment area of the town tank being liable to defilement. In April and May the supply was deficient and water was sold by those possessing wells. A large tank some distance from the town has been rendered of more service, the water-way from it having been deepened at a cost of Rs. 785, and by this means the municipality has succeeded in considerably increasing the water-supply.

Hospital Buildings—Are in good repair. A porch has been erected during the year which is a great convenience.

General Health.—Excepting cholera, of which there were 157 cases from May to August, of which 122 proved fatal, the general health of the town and district has been fairly good.

Attendance of Patients.—Two hundred and eighty in-door patients were treated, 260 being new admissions, being a slight increase over the number for the former year. Of out-door patients there were 5,404, also a slight increase on the previous year. Of the in-door patients 125 were Police, 61 mendicants, 34 travellers, 41 residents of the town and 19 of the district.

Prevailing Diseases.—Malarial fevers, rheumatism, ophthalmia, bowel and lung affections, intestinal worms and skin-diseases.

Surgical Operations.—Eighteen major, 237 minor. The most important were lithotomy, podalic version, removal of large tumours, paracentesis abdominis, reduction of hip dislocation.

Mortality and its Causes.—Twenty-five deaths occurred in hospital—9 from dysentery, 5 from debility, 4 from pneumonia, 3 from cholera, and one from each of the following :—ague, remittent fever, epilepsy, gangrene.

Vaccination—Is carried on by the municipal vaccinator; 1,415 successful cases during the year.

Medico-legal Cases.—Thirty-five cases were reported upon, entailing 16 *post-mortem* examinations and 19 examinations of person, clothes, or other articles.

Cost.—The total cost was Rs. 17,184-5-0 and the cost per patient Rs. 3-0-4 as compared with Rs. 16,853-10-2 and Rs. 2-15-11 respectively in the previous year.

The Dhárwár Civil Hospital was inspected by the Surgeon-General on the 28th of November.

GRANT-IN-AID-DISPENSARIES.

Hubli.—*In charge of* Assistant Surgeon D. N. Selke.

The buildings are in good order, but the roof of the main building leaks during the rains. An examination-room for female patients has been built. The committee meets regularly every month. The sanitary condition of the town is fairly good. The water-supply was deficient during the hot season. The large tank which supplies the town has been much improved by the removal of the steps into it and substitution of pulleys. The total treated was 16,115 out-door and 134 in-door patients as compared with 14,526 and 144 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, skin-diseases, worms and respiratory affections. A few cases of cholera occurred from May to September. Thirty-two major surgical operations were performed. Vaccination is carried on by the municipal vaccinator. Sixty-two medico-legal cases were sent for report; they included 24 *post-mortem* examinations. The dispensary was inspected by the Civil Surgeon, Dhárwár, in April and December and by the Deputy Sanitary Commissioner in June. The total cost was Rs. 5,466-1-4 and the cost per patient Re. 0-5-4 as compared with Rs. 6,240-14-11 and Re. 0-6-9 respectively in the previous year.

Gadag.—*In charge of* Assistant Surgeon D. Cardoz.

The buildings are in good order; the ventilation of the wards has been improved; some further improvements are about to be made. The furniture and fittings are in good condition. The committee visit the dispensary every month. The town is kept fairly clean, but there is much room for improvement in sanitary matters. The water-supply is abundant but liable to be contaminated by soakage into the wells. The total number treated was 13,877 out-door and 46 in-door patients as compared with 13,059 and 55 respectively in the previous year. The most common complaints were skin-diseases, ophthalmia, respiratory affections and malarious fevers. A few cases of small-pox were reported in the early part of the year. Measles prevailed severely. Twenty-seven major surgical operations were performed. Nineteen *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Surgeon-General, the Civil Surgeon, Dhárwár, twice, and by the Deputy Sanitary Commissioner. The total cost was Rs. 4,637-13-11, the cost per patient Re. 0-5-3, as compared with Rs. 4,980-9-9 and Re. 0-6-0 respectively in the previous year.

Háveri.—*In charge of* Hospital Assistant Rangappa Jagannath.

The building is in good order. The committee visited the dispensary five times during the year. The sanitary condition of the town is unsatisfactory. The water-supply is insufficient and of inferior quality. The total number treated was 5,932 out-door and 50 in-door patients as compared with 7,074 and 51 respectively in the previous year. The prevailing diseases were skin-diseases, worms and malarious fevers. There was no epidemic. Eleven major surgical operations were performed. There were 149 successful primary vaccinations. Twenty-four *post-mortem* examinations were made, and opinion was given in 38 other medico-legal cases. The dispensary was twice inspected by the Civil Surgeon, Dhárwár, who reports that Hospital Assistant Rangappa Jagannath is intelligent and energetic. The total cost was Rs. 1,333-7-0, the cost per patient Re. 0-3-6, as compared with Rs. 1,706-15-6 and Re. 0-3-9 respectively in the previous year.

BIJA'PUR COLLECTORATE.

CIVIL HOSPITAL, BIJA'PUR.—*In charge of* Assistant Surgeon J. P. WADIA, L.M. & S., from 1st January; Assistant Surgeon E. MACKENZIE, from 13th March; and Assistant Surgeon K. S. ENGINEER, L.M. & S., from the 7th of August.

Conservancy and Water-supply.—The conservancy is very unsatisfactory. The few dust-bins are not cleansed sufficiently often. Garbage accumulates; cess-pools abound. The gullies are made use of for natural purposes. The enclosures and compounds are overgrown with rank vegetation. The water-supply from numerous wells is reported abundant but the wells are liable to contamination.

Hospital Buildings.—Since the removal of the head-quarters of the Collectorate from Kaládgi the Bijápur dispensary has been utilized as a hospital for which it is quite unsuited. The police are therefore treated in their lines, under trial-prisoners in the district jail and medico-legal cases in a dharmshála near the hospital. Plans for a new hospital have been prepared and a good site is available. In the mean time the hospital servants have no quarters.

General Health.—The general health has been fairly good; 15 cases of cholera and 7 deaths occurred in July.

Attendance of Patients.—Two hundred and nineteen in-door and 7,610 out-door were treated. The daily average was 5·8 in-door and 51·1 out-door.

Prevailing Diseases.—Malarial fever, respiratory affections, dysentery and diarrhœa, ophthalmia, skin-diseases, intestinal worms.

Surgial Operations.—Surgical operations numbered 260, of which 28 come under the head major.

Mortality and its Causes.—Four deaths occurred in the hospital from general debility, cordiac disease, Bright's disease, pneumonia.

Vaccination.—Is carried on by the táluka vaccinators.

Medico-legal Cases.—Ten *post mortem* examinations were made at the request of the Police, and opinion was given in 145 miscellaneous cases.

Conduct of Establishment.—All are reported on satisfactorily excepting one.

Cost.—The total cost was Rs. 4,806-7-4 and the cost per patient Re. 0-9-9.

The Bijápur Hospital was inspected by the Surgeon-General in November.

GRANT-IN-AID DISPENSARIES.

BIJA'PUR.

This dispensary was closed on the 31st March on the removal of the Civil Surgeoncy from Kaládgi to Bijápur. During the three months that the institution was open 1,832 out-door and 13 in-door patients were treated. The prevailing diseases were skin-diseases, malarious fevers, ophthalmia and respiratory affections. The total cost for the three months was Rs. 599-6-6 and the cost per patient Re. 0-5-2.

ILKAL.—*In charge of* Hospital ASSISTANT RAMJI BAPUJI.

The buildings are in good repair. The furniture and fittings are complete. The committee meet quarterly. The sanitary condition of the town remains unsatisfactory. The water-supply is abundant but is liable to pollution. The total number treated was 3,394 out-door and 36 in-door patients as compared with 2,984 and 41 respectively in the previous year. The most common complaints were ophthalmia, skin-diseases, malarious fevers, worms, ulcers and respiratory affections. A few cases of small-pox occurred, but the disease was not epidemic. Two major surgical operations were performed. There were 352 primary and 2 re-vaccinations. Nine *post-mortem* examinations were performed and opinion given in 29 other medico-legal cases. The dispensary was inspected in June by the Assistant Surgeon, Bijápur. The total cost was Rs. 1,466-4-1, the cost per patient Re. 0-6-10, as compared with Rs. 1,723-9-5 and Re. 0-9-1 respectively in the previous year.

BA'GALKOT.—*In charge of* Hospital Assistant BHAGU MAHADU.

The buildings are in good repair; a new latrine and dead-house have been erected; quarters for the establishment are required. The furniture and fittings are sufficient. The dispensary committee met four times. The sanitary condition of the town is fair. The water-supply from the river and wells is abundant. The total number treated was 6,769 out-door and 54 in-door patients as compared with 5,693 and 46 respectively in the previous year. The prevailing diseases were worms, ophthalmia, malarious fevers, skin-diseases and respiratory affections. Cholera prevailed during the months of June, July and August. Three major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. Nineteen *post-mortem* examinations were made. The dispensary was inspected by the

Assistant Surgeon, Bijápur, in August. The total cost was Rs. 2,049-13-9, the cost per patient Re. 0-4-10, as compared with Rs. 2,511-6-1 and Re. 0-7-0 respectively in the previous year.

MUDDEBIHAL.—*In charge of* Hospital Assistant VENKAJI DEVJI.

The building is in good repair; some articles of furniture are still required. The dispensary committee met four times; individual members frequently visit the institution. The town is kept clean; the water-supply is deficient and the quality indifferent. The total number treated was 2,231 out-door and 17 in-door patients as compared with 2,392 and 17 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, skin-diseases, worms and respiratory affections. Cholera prevailed in the táluka but did not visit the town. One major surgical operation was performed. Sixty-four children were successfully vaccinated. Four *post-mortem* examinations were made at the request of the Police. The total cost was Rs. 1,186-6-10, the cost per patient Re. 0-8-5, as compared with Rs. 996-2-5 and Re. 0-6-7 respectively in the previous year.

BA'GEVADI.—*In charge of* Hospital Assistant DATTU PANDURANG.

The usual repairs have been carried out, but the buildings leak slightly in the rains. The furniture and fittings are sufficient. The committee meets quarterly. The sanitary condition of the town is not satisfactory. The water-supply is abundant but of inferior quality. The total number treated was 2,758 out-door and 19 in-door patients as compared with 2,806 and 23 respectively in the previous year. The most common complaints were ophthalmia, worms, skin-diseases, respiratory affections and malarious fevers. Cholera prevailed in the district but not in the town. There were 203 successful vaccinations. Four *post-mortem* examinations were made at the request of the Police and opinion given in 5 other medico-legal cases. The total cost was Rs. 812-14-9, the cost per patient Re. 0-4-8, as compared with Rs. 640-13-6 and Re. 0-3-7 respectively in the previous year.

SINDGI.—*In charge of* Hospital Assistant RAMRAO JANU.

The buildings are in thorough repair and the furniture in good order. The committee visited the dispensary 10 times. The sanitary condition of the town is not satisfactory; the water-supply is good and abundant. The total number treated was 2,273 out-door and 11 in-door patients as compared with 2,269 and 38 respectively in the previous year. The most common diseases were ophthalmia, worms, skin-diseases, malarious fevers, and respiratory, and rheumatic affections. Two major surgical operations were performed. One hundred and twenty-four children were successfully vaccinated. Five *post mortem* examinations were made at the request of the Police, and opinion given in several medico-legal cases. The dispensary was inspected in May by the Assistant Surgeon, Bijápur, who reported favourably on Hospital Assistant Ramrao Janu. The total cost was Rs. 1,196-10-8, the cost per patient Re. 0-8-4, as compared with Rs. 829-10-2 and Re. 0-5-9 respectively in the previous year.

INDI.—*In charge of* Hospital Assistant CHINTAMON SAKHARAM.

The buildings are in excellent order; quarters for the sweeper are being erected. The furniture is sufficient and in good order. The committee meet regularly once a month; individual members visit the dispensary not unfrequently; some attempt has been made to improve the sanitary condition of the town. The water-supply is sufficient. The total treated was 2,711 out-door and 27 in-door patients as compared with 2,357 and 20 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, ophthalmia and worms. Cholera was present in the táluka but not in the town. Small-pox also prevailed for the first half of the year. There were 215 successful vaccinations and 5 re-vaccinations. Seven *post-mortem* examinations were made and opinion given in 9 other medico-legal cases. The dispensary was twice inspected by the Assistant Surgeon at Bijápur. Hospital Assistant Chintaman Succaram is reported to be well conducted, steady and generally efficient. The total cost was Rs. 631-7-8, the cost per patient Re. 0-3-8, as compared with Rs. 1,016-9-1 and Re. 0-6-10 respectively in the previous year.

KOLHA'PUR AND SOUTHERN MARA'THA AGENCY.

ALBERT EDWARD HOSPITAL AND DISPENSARY, KOLHA'PUR.—*In charge of* Darbár Surgeon GEORGE SINCLAIR.

Conservancy and Water-supply.—The conservancy is reported defective; the water-supply sufficient and of good quality.

Hospital Buildings.—No change has taken place as the hospital buildings are well suited for the purpose.

General Health.—This is reported satisfactory; the death-rate having been 26·5 for the town and 24·1 for the districts *per mille*. The medical officer states, as the result of his inspections, he has reason to believe the registration of births and deaths is fairly correct.

Although the death-rate is not excessive, there were 1,369 deaths from cholera during the year, including city and district.

Attendance of Patients.—Eleven hundred and thirty-eight in-door and 29,628 out-door were treated, being a decrease of 132 in-door and an increase of 7,145 out-door over the number for 1884.

Prevailing Diseases.—Malarial fevers, stomach and bowel-complaints, intestinal worms, and affections of the eye and skin.

Surgical Operations.—One hundred and fifty-nine operations coming under the heading major are reported, of which 27 were connected with the eye. Fourteen amputations and 14 reductions of dislocations occurred; 24 tumours were removed and 7 operations performed for stone in the bladder; other operations included herniotomy, tracheotomy, laryngotomy, and castration. There were five obstetric operations, and several coming under the head reparative.

Mortality and its Causes.—Fifty-three deaths occurred in hospital, 9 being due to cholera, 8 to diarrhœa and dysentery, 4 to liver disease, 2 to phthisis and the others to numerous and varied causes.

Vaccination.—The municipal vaccinator performed 1,825 primary and 345 secondary successful operations, being an increase on the number for the previous year.

Medico-legal Cases.—Of these there was 133, entailing 20 *post-mortem* examinations.

Conduct of Establishment.—Satisfactory.

Cost.—The total cost was Rs. 22,046-4-11, the cost per patient Re. 0-11-5, as compared with Re. 20,176-4-6 and Rs. 0-13-7 respectively in the previous year.

NATIVE STATE DISPENSARIES.

GAD HINGLAJ.—*In charge of* Hospital Assistant D. PARASHRAM.

The buildings are in good repair; the furniture and fittings are in good order. There is no committee. The officers of the Kolhápur Agency occasionally visit the dispensary. The sanitary condition of the town is not satisfactory. The water-supply is scanty and of inferior quality. The total treated was 7,384 out-door and 23 in-door patients as compared with 6,532 and 34 in the previous year. The prevailing diseases were skin-diseases, worms, malarious fevers, ophthalmia, respiratory and rheumatic affections. Cholera was epidemic from April to October in the town and district—587 cases and 283 deaths. Vaccination is now carried on by the táluka vaccinator. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in December. The total cost was Rs. 1,274-7-11, the cost per patient Re. 0-2-9, as compared with Rs. 1,360-10-1 and Re. 0-3-3 respectively in the previous year.

MIRAJ.—*In charge of* MR. TRIMBAK SAKHARAM, L.M.

The buildings are in good repair; the furniture and fittings in good order. The committee visit the dispensary occasionally. Considerable attention is given to conservancy. The water-supply was sufficient and of good quality. The total number treated was 11,185 out-door and 46 in-door patients as compared with 10,651 and 47 respectively in the previous year. The most common diseases were worms, skin-diseases, injuries, ophthalmia and rheumatic and respiratory affections. Cholera appeared in the town in the third quarter of the year—16 cases and 10 deaths. Several major surgical operations were performed. One hundred and twenty-three primary and 23 re-vaccinations were performed at the dispensary. Thirteen *post-mortem* examinations were made and opinion was given in 26 other medico-legal cases. The total cost was Rs. 4,472-12-7, the cost per patient Re. 0-2-6, as compared with Rs. 11,353-0-5 and Re. 0-1-1 respectively in the previous year.

MUDHOL—*In charge of* MR. K. K. BHENDE, L.M. & S.

The buildings are suitable and are kept in repair. The furniture and fittings are sufficient. The Assistant Political Agent and the State Kárbhári frequently visit the dispensary. Conservancy is well attended to. The water-supply was sufficient. The total number treated was 6,787 out-door and 15 in-door patients as compared with 7,507 and 17 respectively in the previous year. The prevailing diseases were ophthalmia, worms, skin-diseases, malarious fevers and respiratory affections. Cholera prevailed in the town in June, July and August; there were 92 cases and 51 deaths. Six major surgical operations were performed. One hundred and forty-eight children were successfully vaccinated. There were 17 medico-legal cases and 7 *post-mortem* examinations. The total cost was Rs. 2,679-2-6, the cost per patient Re. 0-6-6, as compared with Rs. 2,562-11-0 and Re. 0-5-5 respectively in the previous year.

MALKÁPUR.—*In charge of* Passed Pupil R. Y. DHANAWDE.

The buildings are part of an old temple in very bad repair and not suited to the purpose. The necessary furniture is provided. There is no committee. The dispensary is visited occasionally by the officials of the Kolhápur State. The sanitary state of the town is fair. The water-supply of the town is bad in quality and insufficient. The total treated was 6,766 out-door and 23 in-door patients as compared with 7,222 and 24 respectively in the previous year.

The most common complaints were skin-diseases, worms, malarious fevers, ophthalmia, and respiratory and rheumatic affections. Cholera prevailed from November to December—37 attacks with 30 deaths. Eleven major surgical operations were performed. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in April and December. The total cost was Rs. 1,257-5-9, the cost per patient Re. 0-3-0, as compared with Rs. 1,322-13-8 and Re. 0-2-11 respectively in the previous year.

RÁMDURG.—*In charge of* MR. D. A. PATWARDHAN, L.M. & S.

The buildings are in thorough repair. The furniture and fittings are complete. The dispensary is frequently visited by the State officials, and annually by the Political Agent and his Assistant. The conservancy of the town is attended to by the municipality. The water-supply is sufficient but of inferior quality. The total number treated was 8,674 out-door and 81 in-door patients as compared with 8,756 and 75 respectively in the previous year. The prevailing diseases were skin-diseases, malarious fevers, worms, respiratory affections and ophthalmia. Cholera was epidemic in the month of May—135 cases with 42 deaths. Forty-nine major surgical operations were performed. Eight *post-mortem* examinations were made and 60 other medico-legal cases investigated. Vaccination is carried on by the State vaccinator. The total cost was Rs. 2,857-3-6, the cost per patient Re. 0-5-2, as compared with Rs. 1,746-15-6 and Re. 0-3-2 respectively in the previous year.

KÁGAL.—*In charge of* HOSPITAL ASSISTANT NARSU LINGU.

The building is in good repair; the requisite furniture and fittings are provided. There is no committee, but the dispensary was visited once by the Chief of Kágal and frequently by his Secretary and the State Kárbhári. Conservancy is well looked after. The water-supply is good and sufficient. The total number treated was 2,788, all out-door patients, as compared with 1,763 in the previous year. The most common complaints were skin-diseases, worms, ophthalmia, respiratory affections and malarious fevers. Cholera prevailed from May to September—328 attacks and 129 deaths. Five major surgical operations were performed. Vaccination is carried on by a State vaccinator. The dispensary was inspected by the Darbár Surgeon in the month of November. The total cost was Rs. 934-5-7, the cost per patient Re. 0-5-4, as compared with Rs. 668-12-3 and Re. 0-6-1 respectively in the previous year.

AJRA.—*In charge of* Hospital Assistant MÁROTI NÁNA CHOWAN.

The dispensary is still situated in a dharamshála; new buildings are in course of erection. The furniture and fittings are in good order. There is no committee; the officers of the Kolhápur State occasionally visit the institution. The sanitary condition of the town is unsatisfactory. The water-supply is abundant but liable to pollution by soakage into the wells. The total number treated was 6,129 out-door and 44 in-door patients as compared with 4,925 and 13 respectively in the previous year. The most common complaints were skin-diseases, worms, ophthalmia, respiratory affections and malarious fevers. Cholera occurred in May, June and July—9 attacks and 4 deaths. Twenty-four major surgical operations were performed. Vaccination is performed by the táluka vaccinator. Two *post-mortem* examinations were made and 23 other medico-legal cases were sent for report. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in December. The total cost was Rs. 1,182-14-4, the cost per patient Re. 0-3-7, as compared with Rs. 1,708-7-4 and Re. 0-5-6 respectively in the previous year.

GARGOTI.—*In charge of* Hospital Assistant D. W. KAEMARKAR.

The building is suitable and in good repair; a dead house is required. The furniture and fittings are sufficient and in good order. There is no committee. The dispensary is visited by the officials of the State and by the Mámlatdár occasionally. Conservancy is well attended to; the water-supply from the river is abundant but liable to contamination. The total number treated was 4,481 out-door and 34 in-door patients. The prevailing diseases were skin-diseases, worms, respiratory and rheumatic affections, malarious fevers, and ophthalmia. Cholera prevailed in May and June—61 cases with 16 deaths. Three major surgical operations were performed. Vaccination is carried on by the State vaccinator. Seven *post-mortem* examinations were made and opinion given in 10 other medico-legal cases. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in November. The total cost was Rs. 1,128-13-11, the cost per patient Re. 0-4-0.

LAKSHMESHVAR.—*In charge of* MR. H. B. BHATAVADEKAR, L.M. & S.

The dispensary was opened at the beginning of the year and is situated in a hired building; the erection of a proper building is contemplated. Furniture is sufficient. There is no committee. The water-supply is derived from wells. The total number treated was 2,298, all out-door patients. The most common complaints were skin-diseases, worms, ulcers, rheumatic and respiratory affections and malarious fevers. Measles prevailed extensively in the early part of the year. Two cases of cholera occurred in September. Three medico-legal cases were referred for opinion. The total cost was Rs. 2,750-7-0 and the cost per patient Rs. 1-3-1.

RA'YBA'G.—*In charge of* Hospital Assistant HARI RAGHUNATH.

This dispensary was opened on 15th March in a hired building not well suited for the purpose. The furniture and fittings are in good order. There is no committee but the officers of the Kolhápur Agency often visit the dispensary. The town is kept clean. The

water-supply is abundant and good. The total number treated was 4,192, all out-door patients. The most common complaints were skin-diseases, worms, ophthalmia, respiratory and rheumatic affections, inflammation of the ear and malarious fevers. One *post-mortem* examination was made. The total cost was Rs. 1726-4-10 and the cost per patient Re. 0-6-7.

NARSOBÁ'S WADI.—*In charge of* Passed Pupil S. B. VAKHARKAR.

The dispensary was opened on 1st November; it is accommodated in part of a building belonging to the Rája of Kolhápur. There is no committee. Conservancy is attended to. The water-supply is good and abundant. The total number treated was 537, all out-door patients. The most common diseases were skin-diseases, respiratory affections, worms and malarious fevers. Five major surgical operations were performed. The total cost was Rs. 441-3-11 and the cost per patient Re. 0-13-2.

GUJARAT.

SURAT COLLECTORATE.

COWASJI JEHANGIER CIVIL HOSPITAL, SURAT.—*In charge of* Surgeon-Major S. O'B. BANKS.

Conservancy and Water-supply.—Conservancy of town fairly attended to. Water-supply abundant but inferior. Schemes for supplying the city with purer water, and an effective drainage system still in abeyance.

Hospital Buildings.—All in good condition. During the year weather boards have been attached to the servants' quarters adding materially to the comfort of the inmates. New kerosine lamps both sightly and effective have been introduced. Stands have been attached to the wall by the patients' beds for bottles and other articles. A fountain surrounded by a plot of grass has been placed in front of the hospital.

General Health.—Cholera prevailed in the city from March to July, the number of cases reported being 549 with 313 deaths, otherwise the general health was good.

Attendance of Patients.—There were 603 in-door patients against 640 for the previous year, but the daily average was the same, *viz.*, 34. Of out-door patients there were 6,891 against 7,585 for 1884, the daily average being larger, *viz.* 86·1 against 79·2 for 1884.

Prevailing Diseases.—Were among both in-door and out-door patients malarious fevers, skin-diseases, intestinal worms, ear-affections, respiratory affections, injuries, rheumatic affections, abscess and ulcers, syphilitic maladies, and ophthalmia.

Surgical Operations.—Seventeen major and 368 minor occurred. None call for special remark.

Mortality and its Causes.—The mortality was 6·6 per cent. on in-door patients, and 22·8 per cent. of the total deaths were from cholera. Diarrhœa, malarious fevers, respiratory affections, general debility, and dysentery caused the next largest rates of deaths in the order named.

Vaccination—Is performed twice a week at the hospital by the municipal vaccinators under the control of the Sanitary Department—3,325 cases, 3,233 successful.

Medico-legal Cases.—There were 142 cases of this description, among which were 10 bodies sent for examination.

Conduct of Establishment.—First Class Hospital Assistant Náráyanráo Jadhow is again reported on most favourably. The first class hospital establishment has been below strength, which was unavoidable. No complaint of the second class establishment.

Cost.—The total cost was Rs. 12,729-10-10, the cost per patient Rs. 1-11-2, as compared with Rs. 14,776-13-2 and Rs. 1-12-8 respectively in the previous year.

The Surat Hospital was inspected by the Surgeon-General on the 31st December.

GRANT-IN-AID DISPENSARIES.

PARAKH DISPENSARY, SURAT.—*In charge of* Assistant Surgeon DOSABHAI PESTONJI, G.G.M.C.

The building is in good repair. The furniture and fittings are sufficient and in good order. The committee visits the dispensary once a month. The total number treated was 11,855 out-door and 14 in-door patients as compared with 12,288 and 13 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, inflammation of the ear, respiratory affections and ophthalmia. Cholera was epidemic; 77 cases were treated at the dispensary with 15 deaths. Seven major surgical operations were performed. The dispensary was inspected by the Surgeon-General, and the Civil Surgeon, Surat. The total cost was Rs. 8,770-6-11, the cost per patient Re. 0-11-9, as compared with Rs. 6,767-5-3 and Re. 0-8-9 respectively in the previous year.

OLPÁD.—*In charge of* Hospital Assistant MANOHAR HARI BARVE.

The building has recently been repaired. The furniture and fittings are in good order and sufficient. The committee visited the dispensary twelve times. Conservancy arrangements continue defective. The water-supply is ample and said to be good, but some of the wells are badly situated. The total number treated was 3,974 out-door and 25 in-door patients against 4,410 and 36 respectively in the previous year. Skin-diseases, malarious fevers, oph-

thalmia, inflammation of the ear and respiratory affections were the most common complaints. Six cases, with 2 deaths, of cholera occurred in the town. Seven major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Four *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Surat, in February. The total cost was Rs. 883-5-3, the cost per patient Re. 0-3-6, as compared with Rs. 1,047-2-2 and Re. 0-3-8 respectively in 1884.

BÁRDOLI.—*In charge of* Passed Medical Pupil SYED ABDUL RAHIMAN.

The building is in fair repair. The committee visited the dispensary twelve times. The sanitary condition of the town is very unsatisfactory. The water-supply is ample and of fair quality. The total number treated was 4,885 out-door and 44 in-door patients as compared with 5,497 and 49 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, ophthalmia and respiratory affections. One hundred and fifty-four children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Surat, in February. The total cost was Rs. 1,277-15-7, the cost per patient Re. 0-4-1, as compared with Rs. 951-1-10 and Rs. 0-2-8 respectively in the previous year.

DINSHAW MANOCKJI PETIT DISPENSARY, CHIKHLI.—*In charge of* Hospital Assistant GOVIND KESHAV.

The floor of the building requires repair. The furniture and fittings are in good order. Several meetings of the committee were held. Conservancy is not attended to. The water-supply was good and abundant The total number treated was 7,155 out-door and 16 in-door patients as compared with 7,273 and 18 respectively in the previous year. Skin-diseases, malarious fevers, worms, ophthalmia and respiratory affections were the most common diseases. Two major operations were performed. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 997-13-1, the cost per patient Re. 0-2-2, as compared with Rs. 1,332-9-2 and Rs. 0-2-11 respectively in the previous year.

PARDI.—*In charge of* Hospital Assistant MORESHWAR TRIMBAK.

The building has been thoroughly repaired. The furniture is in good order. The dispensary was visited by the district officers. The sanitary condition of the town is unsatisfactory. The water-supply is abundant and good. The total number treated was 10,832 out-door and 28 in-door patients as compared with 9,610 and 51 respectively in the previous year. The most common diseases are worms, skin-diseases, malarious fevers, respiratory affections, and ophthalmia. Nine major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected in April by the Civil Surgeon, Surat, who speaks very highly of Hospital Assistant Moreshwar Trimbak. The total cost was Rs. 1,681-0-6, the cost per patient Re. 0-2-5, as compared with Rs. 722-10-0 and Re. 0-1-2 respectively in the previous year.

MÁNDVI.—*In charge of* Hospital Assistant NARAYEN DHONDOO.

The roof of the building leaks in the rains. The furniture is in good condition. The committee visited the dispensary four times. The sanitary condition of the town is fair; conservancy arrangements require more attention. The water-supply from the river Tápti and wells is ample, and of good quality. The total number treated was 4,316 out-door and 75 in-door patients as compared with 3,566 and 85 respectively in the previous year. Malarious fevers, skin-diseases, ophthalmia and respiratory affections were the most common complaints. Vaccination is performed by the táluka vaccinator. Two *post-mortem* examinations were made and opinion given in 6 other medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner in April. The total cost was Rs. 1,134-14-5, the cost per patient Re. 0-4-1, as compared with Re. 679-10-2 and Rs. 0-2-11 respectively in the previous year.

RÁNDER.—*In charge of* Passed Medical Pupil HORMUSJI EDULJI.

The building, a hired one, is kept in good repair. The furniture and fittings are in good order. Another press for medicines is required. The committee visit the institution every month. The sanitary condition of the town is defective but some improvement has been made. The water-supply from the river Tápti and wells is abundant. The total number treated was 11,728, all out-door patients, as compared with 8,286 in the previous year. The most common complaints were skin-diseases, malarious fevers, respiratory and rheumatic affections, ophthalmia, worms and ulcers. Cholera was epidemic from March to October—146 cases with 16 deaths. Twenty-three major surgical operations were performed. Two hundred and eight persons were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Surat, in January. The total cost was Rs. 1,496-6-0, the cost per patient Re. 0-2-0, as compared with Rs. 1,722-7-6 and Rs. 0-3-3 respectively in the previous year.

NUSSERWANJI MANOCKJI PETIT DISPENSARY, KHAIRGAUM.—*In charge of* Hospital Assistant NARSAPPA ERAPPA.

The buildings are in good order; there is no dead-house. The furniture and fittings are sufficient. The committee meets quarterly; the dispensary is occasionally visited by the

Chairman. The sanitary condition of the town is unsatisfactory. The water-supply is ample and of good quality. The total number treated was 3,126 out-door and 6 in-door patients against 2,704 and 7 respectively in the previous year. The prevailing diseases were worms, malarious fevers, skin-diseases, respiratory and rheumatic affections and ophthalmia. One major surgical operation was performed. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected in April by the Civil Surgeon, Surat. The total cost was Rs. 1,516-3-7, the cost per patient Re. 0-7-8, as compared with Rs. 884-0-5 and Re. 0-5-2 respectively in the previous year.

ENDOWED DISPENSARY.

VICTORIA DISPENSARY, NAVSÁRI.—*In charge of* ASSISTANT SURGEON JAMSETJI BYRAMJI, G.G.M.C.

The building is in good repair. The requisite furniture and fittings are supplied. The committee met every three months. The sanitary condition of the town is fairly good. The water supply is good and sufficient. The total number treated was 8,837 out-door and 36 in-door patients as compared with 8,777 and 33 respectively in the previous year. The prevailing diseases were malarious fevers, respiratory affections, skin-diseases, worms, ophthalmia, rheumatic affections and inflammation of the ear. Eighteen major surgical operations were performed. One hundred and thirty-seven children were vaccinated. The dispensary was inspected by the Civil Surgeon, Surat, in April. The total cost was Rs. 3,053-13-4, the cost per patient Re 0-5-6, as compared with Rs. 2,820-1-11 and Re 0-5-1 respectively in the previous year.

GOVERNMENT DISPENSARY.

DINSHA MANOCKJI PETIT DISPENSARY, BULSAR.—*In charge of* ASSISTANT SURGEON R. R. DADINA, L.M. & S.

The building is kept in good repair and is well supplied with furniture and fittings. The committee paid frequent visits to the dispensary. Considerable attention is paid to sanitary arrangements. The water-supply is sufficient and of fair quality. The total number treated was 14,875 out-door and 62 in-door patients as compared with 14,253 and 97 respectively in the previous year. The most common diseases were worms, malarious fevers, skin-diseases, ophthalmia and respiratory affections. Eleven major surgical operations were performed. There were 351 primary and 2 re-vaccinations. Five *post-mortem* examinations were made and opinion was given in thirty-five medico-legal cases. The dispensary was inspected by the Surgeon-General in December, by the Civil Surgeon, Surat, in January. The total cost was Rs. 3,607-7-4, the cost per patient Re. 0-3-10, as compared with Rs. 4,052-0-6 and Re. 0-4-6 respectively in the previous year.

NATIVE STATE DISPENSARIES.

BÁNSDA.—*In charge of* Passed MEDICAL PUPIL PRAGJI SHAMJI.

The buildings afford sufficient accommodation and are in good repair. The furniture and fittings are sufficient. There is no committee, but the dispensary is frequently visited by the Diván. The sanitary condition of the town is fairly good. The water-supply is ample and said to be of good quality. The total number treated was 5,723 out-door and 38 in-door patients as compared with 5,366 and 37 respectively in the previous year. Malarious fevers, skin-diseases, respiratory affections and bowel-complaints were the most common diseases. Cholera was epidemic in August and September—37 cases with 20 deaths. Nine major surgical operations were performed. Vaccination is carried on by a State vaccinator. The dispensary was inspected in March by the Civil Surgeon, Surat. The total cost was Rs. 1,663-10-9, the cost per patient Re-0-4-7, as compared with Rs. 2,252-1-9 and Re. 0-6-8 respectively in the previous year.

DUMAS.—*In charge of* HOSPITAL ASSISTANT ISAAC AARON.

The buildings are in good repair; a cook-house is wanted. The furniture and fittings are sufficient and in good order. The sanitary condition of the town is unsatisfactory. The water-supply is abundant and of good quality. The total number treated was 2,784 out-door and 7 in-door patients as compared with 2,825 and 5 respectively in the previous year. The most common diseases were malarious fevers, skin-diseases, and respiratory and rheumatic affections. Cholera was prevalent from March to May; 11 cases were treated with 5 deaths. Eight major surgical operations were performed. Ninety-three children were vaccinated. The dispensary was inspected in February by the Civil Surgeon, Surat. Hospital Assistant Isaac Aaron is reported to be a smart and intelligent officer and most zealous in the performance of his duties. The total cost was Rs. 1,168-8-1, the cost per patient Re. 0-6-8, as compared with Rs. 1,694-8-5 and Re. 0-9-6 respectively in 1884.

BROACH COLLECTORATE.

CIVIL HOSPITAL, BROACH.—*In charge of* Surgeon K.S. NARIMAN up to 23rd November, and Surgeon FERGUSON *till end of the year.*

Conservancy and Water-supply.—Surgeon Ferguson gives an account of the drainage, conservancy, water-supply, &c., of the locality. Drainage is described as defective. The streets are cleaned by the municipality. There is a supply of dust-bins. Until recently

there were no regular built public latrines but open enclosures of land are allotted for natural purposes. Latterly two bamboo and two blocks of latrines on the standard plan have been constructed. The water-supply is mentioned as far from satisfactory. It is from rain-water stored in private tanks, from the river Narbada, from wells, and from three public tanks.

Hospital Buildings.—In satisfactory condition; accommodation for the Hospital Assistant and cook-room for Police sepoys required.

General Health.—A few cases of cholera occurred, otherwise the general health was good during the year.

Attendance of Patients.—There were 428 in-door and 11,272 out-door, being a considerable increase over the number for the previous year which were 383 and 9,590.

Prevailing Diseases.—Fevers, rheumatic and syphilitic affections, diseases of the eye, ear, respiratory system, stomach and bowels and skin-diseases.

Surgical Operations.—Seventy major and 893 minor operations were performed.

Mortality and its Causes.—Twenty-seven deaths occurred; fever, cholera, diarrhœa, dysentery and privation being the principal causes.

Vaccination—Is performed by the municipal vaccinator under the control of the Sanitary Department.

Medico-legal.—Thirty-seven medico-legal cases occurred, entailing 3 *post-mortem* examinations of bodies. The medical officer gives an account of the cases of injury admitted into the hospital due to the Broach riots.

Conduct of Establishment.—Second Class Hospital Assistant Manaji Kadum is commended, having worked single-handed during a period when more than ordinary attention was required. The conduct of the second class servants is described as fairly good.

Cost.—The total cost was Rs. 10,229-11-3 and the cost per patient Re. 0-13-11 as compared with Rs. 14,239-14-7 and Rs. 1-6-10 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

ANKLESHVAR.—*In charge of* Hospital Assistant LAXUMAN ANANT.

The building is in a very good state of repair. The necessary furniture has been supplied. The committee visited the dispensary 18 times. The sanitary condition of the town is fairly good. The water-supply from wells is good and abundant. The total number treated was 12,646 out-door and 22 in-door patients as compared with 12,327 and 17 respectively in the previous year. The most common diseases were malarious fevers, skin-diseases, bowel-complaints, respiratory affections and ophthalmia. Cholera prevailed in the town and district; 16 cases were treated. Eleven major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Four *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Broach, in June. The total cost was Rs. 1,355-7-8 and the cost per patient was Re. 0-1-8 as compared with Rs. 1,722-15-5 and Re. 0-2-2 respectively in the previous year.

ILA'V.—*In charge of* Hospital Assistant PHEROZSHA DINSHAJI COOPER.

The building has been repaired; there are no quarters for the servants. Furniture has been supplied according to rule. The committee visited the dispensary 17 times during the year. The sanitary condition of the town is unsatisfactory. The water-supply is abundant and good. The total number treated was 4,425 out-door and 5 in-door patients as compared with 4,645 and 5 respectively in the previous year. Malarious fevers, skin-diseases, respiratory affections, ophthalmia, and bowel-complaints were the most common diseases. Small-pox and measles prevailed to a slight extent in February and April. Two major surgical operations were performed. Fifty-five children were successfully vaccinated. The dispensary was inspected in June by the Civil Surgeon, Broach. Hospital Assistant Pherozsha D. Cooper is praised for his great care and attention to his duties. The total cost was Rs. 1,196-12-6, the cost per patient Re. 0-4-3, as compared with Rs. 1,054-13-2 and Re. 0-3-7 respectively in the previous year.

HA'NSOT.—*In charge of* Hospital Assistant GANESH GOPAL.

The same hired building is still in use. Furniture and fittings according to regulations have been supplied. The dispensary was visited by the committee 16 times. Sanitation meets with no attention. The water-supply is ample and of good quality. The total number treated was 5,655, all out-door patients, as compared with 5,505 in the previous year. The prevailing diseases were skin-diseases, malarious fevers, respiratory affections and ophthalmia. Vaccination is performed by the táluka vaccinator. The dispensary was inspected in June by the Civil Surgeon, Broach. The total cost was Rs. 1,029-5-1 and the cost per patient Re. 0-2-10 as compared with Rs. 1,308-10-9 and Re. 0-3-9 respectively in the previous year.

JAMBUSAR.—*In charge of* Hospital Assistant MALHAR SITARAM.

The building is in good repair; the furniture is sufficient and in good order. The committee visited the dispensary 24 times. The town is kept fairly clean. The water-supply is good and abundant. The total number treated was 8,281 out-door and 88 in-door patients as compared with 8,452 and 70 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, ulcers, and respiratory affections. Five *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Broach, in May. The total cost was Rs. 973-6-1, the cost per patient Re. 0-1-10, as compared with Rs. 2,144-13-9 and Re. 0-4-0 respectively in the previous year.

A'MOD.—*In charge of* Hospital Assistant BHASKER SITARAM.

The building is suitable and is in good repair; there is no latrine. The furniture is sufficient. The committee visited the dispensary 15 times. The sanitary state of the town is unsatisfactory. The water-supply is good and abundant. The total number treated was 3,999 out-door and 24 in-door patients as compared with 4,305 and 14 respectively in the previous year. Skin-diseases, malarious fevers, ulcers and respiratory affections were the most common diseases. Four cases of cholera occurred in June and July with 1 death. Nine post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Broach, in May. Hospital Assistant Bhasker Sitaram is intelligent and painstaking and performs his duty with zeal and ability. The total cost was Rs. 1,071-12-2, the cost per patient Re. 0-4-3, as compared with Rs. 1,591-13-1 and Re. 0-5-10 respectively in the previous year.

VA'GRA.—*In charge of* Passed Medical Pupil TUKARAM NARAYAN.

The building is in good state of repair. The furniture and fittings are in good order. Individual members of the committee visit the dispensary frequently. The sanitary condition is not satisfactory. The water-supply is insufficient and liable to pollution. The total number treated was 3,777 out-door and 11 in-door patients as compared with 2,765 and 12 respectively in the previous year. The prevailing diseases were skin-diseases, malarious fevers, ulcers, respiratory affections and ophthalmia. Vaccination is carried on by the táluka vaccinator. Four *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Broach, in May and by the Deputy Sanitary Commissioner in December. The total cost was Rs. 597-4-9, the cost per patient Re. 0-2-6, as compared with Rs. 601-14-0 and Re. 0-3-5 respectively in the previous year.

KA'VI.—*In charge of* Passed Medical Pupil CHOONILAL RAMDAS.

The dispensary is situated in a hired house. Furniture and fittings are not according to regulation. The conservancy arrangements are not satisfactory. There is no municipality. The committee visited the dispensary 12 times during the year. The principal source of water-supply is from wells. The wells are situated within convenient distances. The water is generally of good quality and abundant. The total number treated was 5,383 out-door patients and 7 in-door patients as compared with 2,936 and 2 respectively in the previous year. Vaccination is carried on by the táluka vaccinator. Three *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Broach, in May 1885. The total cost was Rs. 491-12-3, the cost per patient Re. 0-1-5, as compared with Rs. 659-7-7 and Re. 0-3-7 respectively in the previous year.

DEHEJ.—*In charge of* Passed Medical Pupil GANGADHAR BAPU SATHE.

The dispensary was opened in February. The building is a hired one; a dead-house is required. The furniture is in good order; a press for medicines is required. The committee visited the dispensary every month. The sanitary condition of the village is unsatisfactory. The water-supply is abundant but liable to pollution. The total number treated was 2,039, all out-door patients. The prevailing diseases were malarious fevers, skin-diseases, respiratory affections and bowel-complaints. Two major surgical operations were performed. Vaccination is carried on by the local fund vaccinator. The dispensary was inspected in June by the Civil Surgeon, Broach, who reports Passed Pupil Gangadhar Bapu Sathe to be intelligent and zealous in the performance of his duties. The total cost was Rs. 539-10-6 and the cost per patient Re. 0-4-2.

CIVIL HOSPITAL, KAIRA.—*In charge of* Surgeon W. A. CORKERY till November, afterwards in charge of Surgeon D. C. DAVIDSON.

Conservancy and Water-supply.—The disposal of debris is unsatisfactory. Pits filled with garbage are found in proximity to the town and highways. Conservancy attended to, but room for improvement. Water-supply from rivers and wells abundant and fair.

Hospital Buildings.—No change since last report. Improvements in the dead-house and in the lighting of the operating-room are still required, as also quarters for the subordinates. One of the ward floors and four feet of wall are being coated with Portland cement. The iron bedsteads are being painted white "to show the dirt." The situation of the latrines close to the cook-house is objectionable. An almirah is required for clothing and a better supply of the latter.

General Health—Has been favourable, but cholera prevailed in the districts.

Attendance of Patients.—In-door patients 251 against 280 in the previous year; out-door 4,886 against 3,964.

Prevailing Diseases.—Among in-door patients malarious fevers, injuries, diseases of the lungs, syphilis, diarrhœa, dysentery, and skin-diseases. Among out-door patients malarious fevers, skin-diseases, syphilitic affections, rheumatic affections, bowel and respiratory maladies.

Surgical Operations.—Twenty-seven major operations, among which were 6 lithotomies, 6 paracentesis abdominis, 1 excision of elephantasis scroti, 5 reductions of dislocations, 1 removal of impacted calculus from the urethra. Of minor operations there were 276.

Mortality and its Causes.—There were 11 deaths due to ascites, diarrhœa, apoplexy, bronchitis, ulcer, starvation, and vesical calculus.

Vaccination—Not practised at the hospital. Carried out in the town under the Sanitary Department.

Medico-legal.—Fourty-four medico-legal *post-mortem* examinations were made during the year.

Conduct of Establishment.—Reported satisfactory.

Cost.—The total cost was Rs. 8,586-13-7, the cost per patient Rs. 1-10-8, as compared with Rs. 9,902-13-0 and Rs. 2-5-4 respectively in 1884.

GRANT-IN-AID DISPENSARIES.

Mehmadabad.—*In charge of* Hospital Assistant Vithal Balvant.

The buildings are in good repair; accommodation for female in-patients and quarters for the Medical Officer are required. The furniture and fittings are complete. The committee visited the dispensary six times, the Chairman 10 times. The sanitary condition is fairly good. Considerable attention is given to conservancy. The water-supply is abundant and good. The total number treated was 11,231 out-door and 94 in-door patients against 10,867 and 104 respectively in the previous year. Skin-diseases, ophthalmia, abscesses and ulcers, malarious fevers, and inflammation of the ear were the most common complaints. Cholera appeared in the town in July—11 cases with 7 deaths. Five major surgical operations were performed. There were 265 successful vaccinations. The dispensary was inspected by the Civil Surgeon, Kaira, in January and August. The total cost was Rs. 1,050-13-7, the cost per patient Re. 0-1-5, as compared with Rs. 2,058-11-11 and Re. 0-3-0 respectively in the previous year.

Nadia'd.—*In charge of* Hospital Assistant Ram Sing.

The building is in good repair, and is well suited for a dispensary. The necessary furniture is supplied. The committee visited the institution eleven times. The sanitary condition of the town is fair. The water-supply is good and abundant. The total number treated was 18,142 out-door and 120 in-door patients as compared with 17,563 and 117 respectively in the previous year. Skin-diseases, malarious fevers, ophthalmia, bowel-complaints, inflammation of the ear and respiratory affections were the most common diseases. Cholera occurred in August and September; there were 37 cases. Several major operations were performed. Vaccination is performed by the táluka vaccinator. Six *post-mortem* examinations were made, and opinion was given in numerous other medico-legal cases. The dispensary was inspected in January and July by the Civil Surgeon, Kaira. Hospital Assistant Ram Sing is favourably mentioned for his care and intelligence in the performance of his duties. The total cost was Rs. 2,543-0-10, the cost per patient Re. 0-2-2, as compared with Rs. 3,140-6-11 and Re. 0-2-10 respectively in the previous year.

Borsad.—*In charge of* Passed Pupil Popatlal Lallubhai.

The building is in good order and supplied with sufficient furniture. A dead-house is wanted. The committee held quarterly meetings. The sanitary condition of the town is unsatisfactory. The water-supply is good and abundant. The total number treated was 8,602 out-door and 178 in-door patients as compared with 9,351 and 150 respectively in the previous year. The most common complaints were skin-diseases, ophthalmia, and malarious fevers. Cholera prevailed in June and July—25 cases with 7 deaths. Fourteen major surgical operations were performed. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Kaira, in April and October The total cost was Rs. 1,135-8-1, the cost per patient Re. 0-2-0, as compared with Rs. 1,963-14-7 and Re. 0-3-3 respectively in the previous year.

Ma'dha.—*In charge of* Hospital Assistant Mahadeo Bapuji.

The building is in good order; there are no quarters for the medical officer and servants. The furniture and fittings are sufficient. The members of the committee visit the dispensary occasionally. The sanitary condition of the town is not satisfactory. The water-supply is

plentiful and good. The total number treated was 7,044 out-door and 43 in-door patients as compared with 7,467 and 22 respectively in the previous year. The prevailing diseases were skin-diseases, ophthalmia, malarious fevers, ulcers and inflammation of the ear. One major surgical operation was performed. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Kaira, in March and August. The total cost was Rs. 1,099-0-2, the cost per patient Re. 0-2-4, as compared with Rs. 1,233-4-7 and Re. 0-2-7 respectively in the previous year.

DA'KOR.—*In charge of* Hospital Assistant SHANKAR HARI.

The buildings are in good order. The furniture and fittings are sufficient and serviceable. The committee met quarterly; the Chairman visits the dispensary occasionally. The sanitary condition of the town is fair. The water-supply abundant and good. The total number treated was 9,446 out-door and 144 in-door patients. Skin-diseases, malarious fevers, ophthalmia, respiratory and rheumatic affections and inflammation of the ear were the most common complaints. Cholera prevailed in July, August and September—30 cases with 12 deaths. Vaccination is performed by the táluka vaccinator. Four *post-mortem* examinations were made and opinion was given in several other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Kaira, in February and September. The total cost was Rs. 1,965-5-10, the cost per patient Re. 0-3-3, as compared with Rs. 1,999-3-1 and Re. 0-3-4 respectively in the previous year.

KAPADVANJ.—*In charge of* Hospital Assistant ABRAHAM SHALLOM.

The buildings are in good repair. There are no quarters for the Hospital Assistant and servants. The committee visits the dispensary every month. The sanitary condition of the town is fairly good. The water-supply is good and abundant. The total number treated was 17,067 out-door and 62 in-door patients as compared with 16,240 and 78 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, ophthalmia, abscesses, respiratory and rheumatic affections, and inflammation of the ear. Four major surgical operations were performed. There were 359 successful vaccinations. Three *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Kaira, in March and October. The total cost was Rs. 1,095-5-9, the cost per patient Re. 0-1-0, as compared with Rs. 2,057-10-5 and Re. 0-2-0 respectively in the previous year.

PANCH MAHA'LS.

CIVIL HOSPITAL, GODHRA.—*In charge of* Surgeon J. W. T. ANDERSON.

Conservancy and Water-supply.—The conservancy of the town is very unsatisfactory, and there is no drainage. The water-supply is obtained from wells, river and tank, all liable to pollution.

Hospital Buildings.—The buildings are those formerly used for a dispensary when the Civil Surgeoncy was at Dohad. There are two separate buildings, one for the sick of the Gujarát Bhil Corps and the other for sick paupers. The former is now well ventilated and has accommodation for 9 patients. The latter was built originally as quarters for the Assistant Surgeon and consists of 3 very small rooms accommodating only 4 patients. There are no quarters for 2nd class servants.

General Health.—Cholera prevailed in August and September. There was also an epidemic of measles in the hot weather. Malarious fevers were not quite so severe as in some previous years, probably consequent on deficient rainfall.

Attendance of Patients.—There were 294 in-door and 6,440 out-door as compared with 353 and 7,507 respectively for the previous year. The decrease is principally due to a fall in the number of cases of ophthalmia.

Prevailing Diseases.—Malarious fevers, rheumatism, syphilis, diseases of the skin, of the respiratory system, of the stomach and bowels, and of the eye and ear.

Surgical Operations.—Fifteen major and 188 minor. Among the former was a case of craniotomy for prolonged labour due to deformed pelvis; two ligatures of arteries; two removals of necrosed bone; in one case the whole of the lower third of the fibula, reductions of dislocations, &c.

Mortality and its Causes.—Sixteen deaths occurred in hospital from privation, dysentery, diarrhœa, and cholera.

Vaccination—Is carried on efficiently by the local fund vaccinators.

Conduct of Establishment—Is reported satisfactory. The medical officer commends 1st Class Hospital Assistant Lingu Bapuji as a painstaking and steady man: Passed Medical pupil Bapuji Jadow as a well educated youth who promises to become an efficient Assistant; and Googah Damodar Kooleram who has served in the hospital 17 years.

Cost.—The total cost was Rs. 7,674-13-3 and the cost per patient Rs. 1-2-2 against Rs. 10,321-11-8 and Rs. 1-5-0 respectively in the previous year.

Inspected by the Surgeon-General on January 3rd.

GOVERNMENT DISPENSARY.

DOHAD.—*In charge of* Assistant Surgeon G. G. BOPARDIKAR.

The dispensary occupies the old hospital buildings which are suitable except that there is no dead-house. There is no committee. The sanitary condition of the town is not satisfactory. The water-supply is sufficient but liable to pollution by soakage. The total number treated was 7,585 out-door and 635 in-door patients. The prevailing diseases were malarious fevers, skin-diseases, ophthalmia, worms and respiratory affections. Seven deaths from small-pox occurred. Six major surgical operations were performed. Vaccination is carried out by the local fund vaccinator. The dispensary was inspected by the Civil Surgeon, Panch Mahâls, in August. The total cost was Rs. 4,494-5-8 and the cost per patient Re. 0-8-8.

AHMEDABAD COLLECTORATE.

HUTTEESINGH PREMABHAI CIVIL HOSPITAL, AHMEDABAD.—*In charge of* Surgeon-Major J. ROBB, M.D.

Conservancy and Water-supply.—Conservancy is being improved by the laying down of a light tramway to carry night-soil and street-refuse nearly three miles away. The water-supply is abundant but of inferior quality. Recently a new scheme has been proposed by which 20 gallons per head of better water may be delivered daily at the cost of half a pie. Nevertheless the Civil Surgeon remarks: "the scheme is likely to meet with firm opposition in the municipal body as extravagant and unnecessary."

Hospital Buildings.—The buildings with their furniture and fittings are in good order. Additions and alterations required are still in abeyance, although there is an available funded balance of the original private donations amounting to Rs. 52,500. But the municipality are unable to meet the cost—about Rs. 2,000 per annum which would be entailed if this money were spent and the interest lost.

General Health.—Not so good as in some previous years. Death-rate almost 53 *per mille* of the population. There were however only 49 deaths from cholera and no small-pox.

Attendance of Patients.—There were 1,752 in-door patients against 1,782 for the previous year and 21,130 out-door against 18,930. The average daily number of in-door was 87·8, of out-door 211·0.

Prevailing Diseases.—Among in-door patients injuries and poisons occupy the first and second places among causes of admission. The injuries come from the mills, from the railway, and from street disturbances. Ninety per cent. of the cases coming under poisons were due to alcoholic liquor. Next to injuries and poisons there come in order syphilitic diseases, ulcers, fevers, skin and rheumatic affections. Among out-door patients diseases of the skin, malarious fever, abscess, ophthalmia, and respiratory affections were most prevalent.

Surgical Operations.—There were 170 major operations, 43 of which were for vesical calculus. Nine of these were by the method known as Bigelow's. There were also 20 amputations, 20 cases of paracentesis abdominis, and 11 extractions of cataract. Operative surgery here is performed under considerable difficulties, there being no theatre and the dispensary now used being too dark.

Mortality and its Causes.—There were 104 deaths among in-patients during the year, being 5·9 per cent. of the total treated; 24 per cent. of the number of deaths were due to bowel-complaints, 13 per cent. were connected with operations, while malarious fevers, respiratory diseases, old age and debility, injuries and cholera make up the total.

Vaccination—Is successfully carried on by the municipal vaccinator; 4,144 primary vaccinations gave a result of 97·7 successful. There were 38 re-vaccinations.

Medico-legal Cases.—The medico-legal work of the year comprised 489 Police cases, including 21 dead bodies reported on in detail. The correspondence involved in this work and the frequent appearances in courts to give evidence, are no light matters and tax considerably the time of the Civil Surgeon.

Conduct of Establishment.—First Class Hospital Assistant Laxumon Singh Arjoon Singh continues to merit entire confidence. Generally the conduct of the establishment has been satisfactory, but as there are no quarters for the second class servants they are left subject to the discipline necessary for themselves and advantageous to the institution.

Cost.—The total cost was Rs. 23,694-9-5, the cost per patient Rs. 1-0-6, as compared with Rs. 24,903-4-5 and Rs. 1-3-2 respectively in the previous year.

Inspected by the Surgeon General on 7th January.

GRANT-IN-AID DISPENSARIES.

RÁIPUR.—*In charge of* Hospital Assistant BHAU SAKHARAM.

The buildings are in good repair ; the furniture and fittings in good condition. The committee visited the dispensary 12 times. The sanitary condition of the district is defective. The water-supply is abundant but only fair in quality. The total number treated was 14,744 out-door and 39 in-door patients as compared with 15,159 and 32 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, inflammation of the ear, and ophthalmia and respiratory and rheumatic affections. Nineteen major surgical operations were performed. Vaccination is performed by a municipal vaccinator; 574 children were successfully vaccinated. The dispensary was inspected in May and November by the Civil Surgeon, Ahmedabad. Hospital Assistant Bhau Sakharam is efficient, intelligent and painstaking. The total cost was Rs. 2,167-5-1, the cost per patient Re. 0-2-4 as compared with Rs. 3,635-4-2 and Re. 0-3-9 respectively in 1884.

SÁNAND.—*In charge of* Passed Medical Pupil JOSEPH BENJAMIN.

The buildings are in good repair. The furniture is sufficient. The Chairman of the committee visited the dispensary three times; no other members of the committee attended. The sanitary condition of the town is bad, and the lack of funds prevents improvement. The water-supply is from wells near a tank. The total number treated was 7,731 out-door and 72 in-door patients as compared with 8,324 and 61 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, ophthalmia, ulcers and respiratory affections. Small-pox and measles prevailed in March and April. One major surgical operation was performed. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected in June and October by the Civil Surgeon, Ahmedabad, who recommends Passed Pupil Joseph Benjamin to favourable notice as "an exceptionally competent and trustworthy" subordinate. The total cost was Rs. 837-6-6, the cost per patient Re. 0-1-8 as compared with Rs. 700-15-10 and Re. 0-1-4 respectively in the previous year.

VIRAMGÁM.—*In charge of* Hospital Assistant NARSU SAYÁJI.

The buildings are in good order. The furniture and fittings are sufficient. The committee visit the dispensary every month. The sanitary condition of the town is defective. The water-supply is insufficient and the wells are so situated as to allow of soakage. The total number treated was 8,732 out-door and 95 in-door patients as compared with 8,004 and 134 respectively in the previous year. The most common diseases were malarious fevers, skin-diseases, ophthalmia, ulcers, respiratory and rheumatic affections. Vaccination is carried on by the táluka vaccinator. Four *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Ahmedabad, in June and October. Hospital Assistant Narsu Sayáji discharges his duties efficiently. The total cost was Rs. 1,688-15-11, the cost per patient Re. 0-3-0, as compared with Rs. 2,259-8-8 and Re. 0-4-5 respectively in the previous year.

DHOLKA.—*In charge of* Hospital Assistant RÁMCHANDRA GOVIND.

The buildings, with the exception of the Hospital Assistant's quarters, are in good repair. The furniture is sufficient. The committee visited the dispensary regularly once a month. The sanitary condition of the town is not good, but improvements are being carried out. The water-supply is from wells; it is of fair quality. The total number treated was 7,346 out-door and 105 in-door patients as compared with 7,811 and 126 respectively in the previous year. The most common complaints were skin-diseases, ulcers, ophthalmia and malarious fevers. Cholera prevailed in the town from August to October—80 cases with 39 deaths. Vaccination is carried on by the municipal vaccinator. Nine *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Ahmedabad, in June and November. The total cost was Rs. 1,956-13-10, the cost per patient was Re. 0-4-2, as compared with Rs. 2,106-5-7 and Re. 0-4-2 respectively in the previous year.

DHANDHUKA.—*In charge of* Hospital Assistant BABURA'V NÁRA'YAN.

The buildings have been repaired. The furniture and fittings are sufficient. The committee visited the dispensary ten times. The sanitary condition of the town is good. The water-supply is good and sufficient. The total number treated was 5,879 out-door and 66 in-door patients as compared with 6,003 and 70 respectively in the previous year. The most common diseases were malarious fevers, skin-diseases, ulcers, inflammation of the ear and rheumatic affections. Two major surgical operations were performed. Vaccination is carried on by the local fund vaccinator. Six *post-mortem* examinations were made at the request of the Police. The total cost was Rs. 1,270-2-1, the cost per patient Re. 0-3-5, as compared with Rs. 1,645-6-3 and Re. 0-4-4 respectively in the previous year.

DHOLERA.—*In charge of* Passed Medical Pupil BANKAY BEHARI.

The building, a hired one, is not well suited to the purpose. There is no dead-house. The furniture is in good order and sufficient. The committee visited the dispensary six times. The sanitary condition of the town is unsatisfactory. The water-supply is insufficient and of poor quality. The total number treated was 4,610 out-door and 54 in-door patients as compared with 4,548 and 91 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, rheumatic and respiratory affections and bowel-com-

plaints. Four major surgical operations were performed. There were 270 successful vaccinations. Two *post-mortem* examinations were made. The total cost was Rs. 1,110-14-8, the cost per patient Re. 0-3-9, as compared with Rs. 1,425-14-9 and Re. 0-4-11 respectively in the previous year.

PARÁNTIJ.—*In charge of* Hospital Assistant ANNÁJI PÁNDURANG.

The buildings were repaired. The furniture and fittings are sufficient and in good order. The dispensary was visited frequently by the Chairman of the committee, but the members did not attend. The sanitary condition of the town is unsatisfactory. The water-supply is abundant and said to be good. The total number treated was 5,061 out-door and 72 in-door patients against 6,980 and 50 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, ophthalmia and ulcers. Five major surgical operations were performed. Three *post-mortem* examinations were made. The total cost was Rs. 1,095-7-6, the cost per patient Re. 0-3-4, as compared with Rs. 1,483-6-3 and Re. 0-3-4 respectively in the previous year.

GOGHA.—*In charge of* Hospital Assistant MÁNEKLÁL HARJIVAN.

The buildings are in good repair. Some articles of furniture are required. The committee visited the dispensary seven times, and individual members pay frequent visits. The sanitary condition of the town is very unsatisfactory. The water-supply is indifferent. The total number treated was 7,819 out-door and 32 in-door patients as compared with 7,012 and 37 respectively in the previous year. The prevailing diseases were malarious fevers, worms, skin-diseases and ophthalmia. Three major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 979-3-8, the cost per patient Re. 0-1-11, as compared with Rs. 1,410-12-2 and Re. 0-3-2 respectively in the previous year.

MODÁSA.—*In charge of* Hospital Assistant RÁMA MALUP.

The building is in good order; cook-rooms and a dead-house are required. Some articles of furniture are still required. The committee visited the dispensary every month. Conservancy arrangements are still unsatisfactory. The water-supply is plentiful and of good quality. The total number treated was 9,348 out-door and 73 in-door patients as compared with 9,158 and 68 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, ophthalmia and ulcers. Thirteen major surgical operations were performed. Vaccination is performed by the táluka vaccinator. Three *post-mortem* examinations were made and opinion given in several other medico-legal cases. The total cost was Rs. 1,321-7-4, the cost per patient Re. 0-2-2, as compared with Rs. 1,676-3-7 and Re. 0-2-10 respectively in the previous year.

RANCHODLÁL DISPENSARY, AHMEDABAD.—*In charge of* Assistant Surgeon P. H. DÁDACHANJI, L.M. & S.

The buildings are in good repair. Two blocks of buildings have been erected by Ráo Bahádur Ranchodlál Chhotálál, the founder of the institution, for the reception of middle class patients, who though unwilling to accept gratuitous attendance cannot afford to pay for medical attendance at home. The furniture and fittings are sufficient and in good order. The committee visited the dispensary eleven times. Mr. Ranchodlál is a very frequent visitor. The sanitary condition of the locality in which the dispensary is situated is on the whole good. The water-supply is abundant and of fair quality. The total treated was 13,072 out-door and 82 in-door patients as compared with 11,250 and 74 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, respiratory affections, ophthalmia and ulcers. Cholera was present from June to September; 84 cases with 49 deaths were reported. Several major surgical operations were performed, including 3 cataract extractions and 3 lithotomies. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Sanitary Commissioner in January and by the Civil Surgeon, Ahmedabad, in May and November. The total cost was Rs. 3,305-14-6, the cost per patient Re. 0-4-0, as compared with Rs. 3,545-14-11 and Re. 0-5-0 respectively in the previous year.

ENDOWED DISPENSARY.

BAICHARDÁS DISPENSARY, AHMEDABAD.—*In charge of* Assistant Surgeon K. B. COOPER, L.M..

The buildings are in very good repair. The furniture and fittings are suitable and sufficient. The committee met seven times. The sanitary condition of the district is defective. The water-supply is abundant and of fair quality. The total number treated was 19,430 out-door and 61 in-door patients as compared with 12,013 and 93 respectively in the previous year. The most common complaints were skin-diseases, ophthalmia, malarious fevers, respiratory affections and abscess. Forty-five major surgical operations were performed, including 20 cases of lithotomy. The dispensary was inspected by the Civil Surgeon, Ahmedabad, in May and November. The total cost was Rs. 4,613-2-4, the cost per patient Re. 0-3-9, as compared with Rs. 5,134-12-11 and Re. 0-6-9 respectively in the previous year.

GOVERNMENT DISPENSARY.

KHÁRÁGHODA.—*In charge of* Assistant Surgeon ABDUL GHANI HAKIM.

The building is in good repair. The furniture is in good order. There is no committee. The sanitary condition of the place is satisfactory. The water-supply is plentiful, but it is inferior in quality. The total number treated was 2,970 out-door and 31 in-door patients as compared with 2,975 and 74 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, ophthalmia, ulcers and respiratory and rheumatic affections. Four major surgical operations were performed. Forty-five children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Ahmedabad, in May and November. The total cost was Rs. 2,977-13-1, the cost per patient Re. 0-15-10, as compared with Rs. 2,224-5-9 and Re. 0-11-8 respectively in the previous year.

MAHI KA'NTHA:

CIVIL HOSPITAL, SA'DRA.—*In charge of* Assistant Apothecary J. MASCARENHAS.

Conservancy and Water-supply.—Conservancy of the camp fair, and that of the Sadra village improving. Water-supply ample from the Sábarmati river in the fair season, and from a well in the monsoon.

Hospital Buildings.—Are in fair repair but do not afford sufficient accommodation. There is a detached cholera ward.

General Health.—Not satisfactory. There was a general and wide prevalence of malarious fevers and an outbreak of cholera.

Attendance of Patients.—There were 184 in-door and 7,007 out-door against 19 and 5,489 respectively in the previous year, thus showing a large increase in the first class, principally from cholera.

Prevailing Diseases.—Malarious fevers, skin-diseases, ophthalmia, bronchitis, diarrhœa, and dysentery.

Surgical Operations.—Two major surgical operations and 364 minor.

Mortality and its Causes.—Two deaths occurred among in-door patients, both from cholera.

Vaccination.—This was performed once weekly. There were 260 primary and 53 re-vaccinations against 158 and 9 in the former year. Percentage of success good.

Conduct of Establishment.—Reported satisfactory.

Cost.—The total cost was Rs. 2,851-12-10, the cost per patient Re. 0-6-4, as compared with Rs. 3,181-11-8 and Re. 0-9-2 respectively in the previous year.

KA'THIA'WA'R

CIVIL HOSPITAL, RA'JKOT.—*In charge of* Surgeon-Major F. C. BARKER, M.D.

Conservancy and Water-supply.—Conservancy is mentioned as satisfactory; water-supply as abundant and good.

Hospital Building.—Have been much improved by re-roofing and stone-paving to the verandahs. An operating-room has also been built and well fitted.

General Health.—On the whole the general health is considered to have been good.

Attendance of Patients.—During the year 6,839 out-door and 554 in-door patients were treated against 4,229 and 510 respectively for the previous year, thus showing a large increase.

Prevailing Diseases.—Skin-diseases, fevers, bowel-complaints, respiratory and syphilitic affections, eye-diseases, rheumatic affections, and ear-diseases occurred in the order of frequency as named.

Surgical Operations.—Sixty-two major operations were performed against 60 for the previous year, among which there were 29 lithotomies, 5 amputations of limbs, 5 paracentensis abodminis, 1 vesico-vaginal fistula, 3 removals of large tumours.

Mortality and its Causes.—Thirty-one deaths took place in hospital. Four deaths occurred after the operation for lithotomy and one from tetanus after an operation on the leg. Other deaths occurred from anæmia, cardiac disease and various other causes.

Vaccination—Is under the Superintendent, Western Gujarát Circle.

Conduct of Establishment.—Second Class Hospital Assistant Babaji Santoo is especially commended. The menial servants are reported to have given a great deal of trouble. The medical officer remarks: "The Hospital is vastly below its full development and what has been done could never have been accomplished with the present establishment," and he acknowledges the assistance received from a volunteer, Mr. Syed Edroos, a former employé, now resident at Rájkot.

Cost.—The total cost was Rs. 15,361-7-6, the cost per patient Rs. 2-1-2, as compared with Rs. 14,775-9-5 and Rs. 3-1-10 respectively in the year preceding.

Inspected by the Surgeon-General on 13th and 14th January.

WADHWAN DISPENSARY.—*In charge of* Assistant Surgeon THAKORDAS KIKABHAI DALAL.

The buildings are in good repair, the furniture in good order. There is no committee. The dispensary is visited from time to time by the Political Officers. The sanitary condition of the town is good. The water-supply is brackish. The total number treated was 4,939 out-door and 114 in-door patients as compared with 4,347 and 100 respectively in the previous year. Skin-diseases, malarious fevers, ophthalmia, worms and respiratory affections were the most common diseases. Nine major surgical operations were performed, including five cases of lithotomy. One hundred and seventeen children were successfully vaccinated. Two *post-mortem* examinations were made and opinion was given in 24 medico-legal cases. The dispensary was inspected by the Surgeon-General in January. The total cost was Rs. 4,486-15-8, the cost per patient Re. 0-14-2, as compared with Rs. 3,854-6-8 and Re. 0-13-10 respectively in the previous year.

CUTCH.

CIVIL HOSPITAL, BHU'J.—*In charge of* Mr. BHIKA'JI JIVA'JI DAMANIA.

Conservancy and Water-supply.—Conservancy satisfactory, water-supply wholesome and sufficient.

Hospital Buildings.—There is a separate hospital and a dispensary for out-patients kept in good repair and suitably fitted.

General Health.—Reported to have been fair.

Attendance of Patients.—In-door 463, out-door 13,634, showing an increase of 14 and 692 respectively over the numbers for the previous year.

Prevailing Diseases.—Ague, intestinal worms, bronchitis, conjunctivitis, diseases of the ear, rheumatism and syphilis.

Surgical Operations.—There were 84 surgical operations coming under major. Among them were 5 extractions of hard cataract, 7 amputations, and 35 lithotomy cases, also two operations for stone in the bladder of females. The medical officer submits a detailed report of all his major surgical operations. Of minor operations there were 1,499.

Mortality and its Causes.—Thirty-one fatal cases occurred among in-door patients; 4 from phthisis, 2 from disease of bones, 1 from snake-bite, eight connected with operations and the rest from various other causes.

Vaccination—Is performed by the State vaccinators. The total number of vaccinations was 915.

Conduct of Establishment.—Reported satisfactory.

CUTCH MA'NDVI.—*In charge of* MR. ARDESIR DADABHAI.

The buildings are kept in good repair, and the necessary furniture is supplied. The accommodation is ample. There is no committee. Attention is paid to the sanitary condition of the town. The water-supply from wells is brackish. The total number treated was 20,861 out-door and 163 in-door patients, as compared with 19,971 and 179 respectively in the previous year. The most common complaints were worms, skin-diseases, ophthalmia, malarious fevers, respiratory affections, inflammation of the ear and ulcers. Eighteen major surgical operations were performed. Vaccination is carried on by the State, 872 persons were successfully vaccinated. The total cost was Rs. 7,040-5-0, the cost per patient Re. 0-5-4, as compared with Rs. 7,566-5-11 and Re. 0-6-0 respectively in the previous year.

CUTCH ANJAR.—*In charge of* Native Doctor LAKHAMSEY TULSIDAS.

The building is kept in good repair. The necessary furniture and fittings are provided. There is no committee. Attention is given to conservancy arrangements. The water-supply is abundant and good. The total number treated was 17,171 out-door and 73 in-door patients as compared with 17,140 and 73 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, worms, ophthalmia, respiratory affections, and ulcers. Small-pox, chicken-pox and measles prevailed during the year. Nine major surgical operations were performed. Vaccination is carried on by the State vaccinator. The total cost was Rs. 3,523-0-0, the cost per patient Re. 0-3-1, as compared with Rs. 3,279-11-2 and Re. 0-3-0 respectively in the previous year.

CUTCH NALIYA.—*In charge of* Native Doctor ATMARAM KESHAV.

The dispensary is lodged in a hired house. The furniture and fittings are sufficient. There is no committee. Conservancy is attended to. The water-supply was scanty owing to deficient rainfall. The total number treated was 6,135, all out-door patients, as compared with 5,613 in the previous year. Ophthalmia, skin-diseases, malarious fevers, ulcers and worms were the most common diseases. Vaccination is performed by a State vaccinator. The total cost was Rs. 1,594-6-4, the cost per patient Re. 0-4-1, as compared with Rs. 1,401-0-6 and Re. 0-3-11 respectively in the previous year.

CUTCH RAPUR.—*In charge of* Native Doctor JENATALLY PYRMAHOMED.

The buildings require repair; the furniture and fittings sufficient and in good order. There is no committee. Some attention is paid to sanitary arrangements. The water-supply is good and abundant. The total number treated was 3,685 out-door and 53 in-door patients as compared with 4,079 and 27 respectively in the previous year. The more common complaints were skin-diseases, worms, ulcers, ophthalmia, malarious fevers, and respiratory affections. Two major surgical operations were performed. Vaccination is carried on by a State vaccinator. The total cost was Rs. 1,410-15-8, the cost per patient Re. 0-6-0, as compared with Rs. 1,277-12-4 and Re. 0-4-11 respectively in the previous year.

CUTCH BHACHAO.—*In charge of* Native Doctor HIRJI HANSRAJ.

The building is in a good state of repair; the furniture is sufficient and in good order. There is no committee. The sanitary condition of the town is indifferent. The water-supply from wells is brackish. The total number treated was 3,035, all out-door patients, against 2,835 in the previous year. The most common complaints were skin-diseases, abscess, worms, malarious fevers and respiratory affections. Vaccination is carried on by a State vaccinator. The total cost was Rs. 1,069-14-5, the cost per patient Re. 0-5-8, as compared with Rs. 6,196-1-10 and Rs. 2-2-11 respectively in the previous year.

CUTCH MUNDRA.—*In charge of* Hospital Assistant RAMCHANDRA DALPATRAM.

This dispensary was opened in February. The building is a new one and is in good order. There is no committee. Some attention is paid to conservancy. The water-supply is abundant and of good quality. The total number treated was 8,551 out-door and 38 in-door patients. The most common diseases were skin-diseases, worms, ulcers, malarious fevers, ophthalmia and respiratory affections. Vaccination is performed by a State vaccinator. The total cost was Rs. 1,667-5-3, the cost per patient Re. 0-2-11.

NARAYANSUROVER.—*In charge of* Native Doctor MANISHANKAR.

The dispensary was opened in December; it is lodged in a hired building, properly supplied with furniture. There is no committee. Conservancy is attended to. The water-supply is good. The total number treated was 316, all out-door patients. Malarious fevers, respiratory affections, skin-diseases and worms were the more common complaints.

MHOW.

ENDOWED DISPENSARY.

DORABJI PESTONJI DISPENSARY, MHOW.—*Superintended by* Surgeon-Major W. P. SAUNDERS *and in charge of* pensioned Hospital Assistant KRISNAPPA.

The building, its furniture and fittings are in excellent order. The Superintendent visits the dispensary every day. Conservancy is most carefully attended to. The water supply owing to scanty rainfall was very deficient. The total number treated was 7,434 out-door and 67 in-door patients as compared with 7,204 and 45 respectively in the previous year. The prevailing diseases were malarious fevers, respiratory affections, ophthalmia and skin-diseases. Cholera was epidemic in May and June. A few cases of small-pox also occurred. The total cost was Rs. 2,100-3-2, the cost per patient Re. 0-4-5, as compared with Rs. 2,123-15-4 and Re.0-4-8 respectively in the previous year.

In Administrative charge OF DEPUTY SURGEON-GENERAL J. PINKERTON, M.D.

Deputy Surgeon-General J. Pinkerton brings to notice the names of the officers and subordinates who are, in his opinion, deserving of special commendation :—Surgeons-Major H. DeTatham, J. F. Keith and M. L. Bartholomeusz, Assistant Surgeons Mackenzie, Aquino and Bocarro, Apothecary Mullen and Hopital Assistants E. Jacob and Balaji Cuddum.

KARA'CHI COLLECTORATE.

CIVIL HOSPITAL, KARA'CHI.—*In charge of* SURGEON-MAJOR J. F. KEITH, M.D.

Conservancy and Water-supply.—Conservancy is as good as circumstances permit where a system of cess-pits is in force. The public latrines are carefully attended to. In the Sadar Bázár private latrines and stables are well looked after. The municipality is stated to be "fully alive to the necessity of maintaining the sanitation of the town in the best possible condition." Water from the Mulleer work, which supplies the locality abundantly with water of good quality, has not yet been conveyed by pipes to the hospital, but provision has been made in the budget for 1886-87.

Hospital Buildings.—There has been no change in the hospital buildings since last report except repairs to the upper storey, which had become unsafe from beams giving way. Therefore flaggings for certain parts, better latrines, and a fence are still desirable.

General Health.—Cholera prevailed during the hot season and there was an excess of malarious fever. The first case of cholera occurred on June 8th, and for some time cases occurring at Karáchi were confined entirely so far as could be ascertained to people who had come from infected localities. The number of cases was 274 and 183 deaths.

Attendance of Patients.—One thousand one hundred and sixty-six in-door patients were received against 914 for the former year. Of out-door patients there were 11,140 against 9,173, showing an increase of 252 in-door and 1,967 out-door, most attributable to malarious fever.

Prevailing Diseases.—Malarious fevers, diseases of the eye, ear, skin, stomach and bowels, lungs and joints.

Surgical Operations.—There were 173 major and 1,432 minor operations. The major comprised 13 lithotomies and 1 lithotrity. Surgeon-Major Keith mentions a plan he has adopted for children with small stones which he extracts with the small forceps from the pocket instrument case. He also states he has followed Vernenils method of treating cold abscesses very successfully ; there were also two cases for artificial anus. Cocaine has been used for various operations "with the pleasantest results."

Mortality and its Causes.—Sixty deaths occurred among in-door patients, 8 from cholera, 5 from remittent fever, 3 from pneumonia, 3 from anœmia, 14 from dysentery or diarrhœa and the remainder from various causes.

Vaccination—Is under the Sanitary Department, the hospital being a principal station.

Conduct of the Hospital Establishment.—The conduct of the establishment has been very good. Dr. D. Gama, the apothecary, has worked very hard. Mr. Ganu Arjun, the Hospital Assistant, also works hard. There are no pupils who cannot be obtained at the pay offered.

Cost.—The total cost was Rs. 21,600-0-1, the cost per patient Rs. 1-12-1, as compared with Rs. 18,729-1-0 and Rs. 1-13-8 respectively in the previous year.

A comparison between the general expenditure and number treated for the last 3 years is as below :—

Years.	Treated.	Expenditure. Rs. a. p.
1882	74,424	20,284 15 0
1883	8,903	21,034 2 3
1884	10,087	18,729 1 0

General Remarks.—Some remarks by Surgeon-Major Keith with reference to surgery have been noted under surgical operations. Some observations on other subjects are worthy of notice. He has tried the hypodermic injection of osmic acid (1 per cent. solution) for neuralgia with success. He records the cure of a nasal polypus by the application of sodium. ethylate, also successful treatment of enlarged tonsils by the same agent. He recommends inhalation of creasote and iodine instead of cough mixtures for throat and laryngeal diseases.

Of Kairin, Dr. Keith says, it rapidly reduces the temperature which as quickly rises again, when the drug is withheld, and if continued long it produces stomatitis particularly in children. He has also tried quioline and antipyrin and has been disappointed.

CIVIL HOSPITAL, KOTRI.—*In charge of* APOTHECARY E. H. COOKE.

Conservancy and Water-supply.—The sanitary condition of the station is well looked after. The water-supply from the Indus is reported pure, abundant and pleasant to drink.

Hospital Buildings—Are in good repair, well ventilated, affording sufficient accommodation and conveniently situated.

General Health—Has been satisfactory.

Attendance of Patints.—There were 1,229 in-door and 13,039 out-door patients against 1,299 and 15,456 respectively for the previous year. The diminution is attributed to a more healthy season, there having been a small rain-fall and a rapid fall of the river Indus. Mr. Cooke forwards full reports of several very interesting cases, showing extensive knowledge and careful practice on his part.

Prevailing Diseases.—The principal diseases among in-door patients were malarious fevers, rheumatic and syphilitic affections, diseases of the respiratory organs, skin-diseases, and ulcers. Among out-patients fevers, rheumatic and syphilitic affections, maladies of the respiratory and digestive organs. A large number of injuries and accidents also presented.

Surgical Operations.—Fifty-two major and 1,582 minor operations are reported.

Mortality and its Causes.—Seven deaths occurred among in-door patients, 5 from diarrhœa. and 2 from pneumonia.

Vaccination—Is carried out by the táluka vaccinator under the Sanitary Department.

Conduct of Establishment—Has been very good.

Cost.—The total cost was Rs. 5,517-15-11, the cost per patient Re. 0-6-2 as compared with Rs. 7,838-8-3 and Re. 0-7-5 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

KARA'CHI BANDAR ROAD.—*In charge of* Hospital Assistant A. X. D'SOUZA.

The building is in good repair. The furniture and fittings are sufficient. The committee visit the dispensary every month. The sanitary condition of the locality is fair. The water-supply is abundant and good. The total number treated was 12,701, all out-door patients, as compared with 13,334 in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases, respiratory affections and ulcers. Cholera occurred in the month of June ; 60 cases with 32 deaths were reported. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Deputy Surgeon-General, Sind, in October, and by the Civil Surgeon, Karáchi, in August and September. The total cost was Rs. 1,747-12-0, the cost per patient Re. 0-2-2, as compared with Rs. 2,533-15-1 and Rs. 1-14-4 respectively in previous year.

KARA'CHI LAYARI.—*In charge of* Hospital Assistant M. SHALLOMJI.

The building is in good order. The furniture is good and sufficient. The committee visited the dispensary every month. The sanitary condition of the locality is fair. The water-supply is abundant and good. The total number treated was 10,376, all out-door patients, as compared with 12,442 in the previous year. The prevailing diseases were ophthalmia, malarious fevers, ulcers and respiratory affections. Cholera and small-pox both prevailed during the year. Two major surgical operations were performed. The dispensary was inspected by the Civil Surgeon, Karáchi, in August and December, and by the Deputy Surgeon-General, Sind, in October. The total cost was Rs. 1,098-2-6, the cost per patient Re. 0-1-8, as compared with Rs. 2,191-0-11 and Re. 0-2-9 respectively in the previous year.

EDULJI DINSHAW DISPENSARY, KARÁCHI SADAR BA'ZA'R.—*In charge of* Hospital Assistant P. RODRIGUES.

The building is in good repair. The furniture and fittings are in good order. The committee visit the dispensary every month. The sanitary condition of the quarter is fairly good. The water-supply is abundant and good. The total number treated was 14,876, all out-door patients, as compared with 12,457 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases, abscess, and respiratory affections. The dispensary was inspected by the Deputy Surgeon General, Sind, in October, and by the Civil Surgeon, Karáchi, in September and December. The total cost was Rs. 1,533-4-9, the cost per patient Re. 0-1-7, as compared with Rs. 2,291-0-1 and Re. 0-2-11 respectively in the previous year.

JAMNABAI DISPENSARY, TATTA.—*In charge of* Apothecary A. H. MULLEN.

The usual repairs have not been undertaken. A dead-house is required. The furniture and fittings are old but in fair condition. The committee met eight times; individual members visit the dispensary occasionally. The sanitary condition of the town is indifferent. The water-supply is abundant but liable to contamination. The total number treated was 7,052 out-door and 20 in-door patients as compared with 6,648 and 18 respectively in the previous year. Malarious fevers, ophthalmia, ulcers, skin-diseases and respiratory and rheumatic affections were the most common diseases. Cholera prevailed in June and July. One hundred and six children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Karáchi, in August and December, and by the Deputy Sanitary Commissioner in April. The total cost was Rs. 3,978-0-6, the cost per patient Re. 0-9-0, as compared with Rs. 4,427-2-1 and Re. 0-10-7 respectively in the previous year.

KETI BANDAR.—*In charge of* Passed Pupil TAIJI AHEER.

The building is in a good state of repair. The furniture is sufficient but some of the articles require repair. The committee hold monthly and quarterly meetings. The sanitary condition of the town is indifferent. The water-supply is abundant and good. The total number treated was 2,008 out-door and 7 in-door patients as compared with 1,755 and 2 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases and respiratory and rheumatic affections. Cholera prevailed in February and March—63 cases with 40 deaths. There were 14 primary and 3 re-vaccinations. The total cost was Rs. 815-7-2, the cost per patient Re. 0-6-5, as compared with Rs. 1,097-3-1 and Re. 0-9-11 respectively in the previous year.

JERRUCK.—*In charge of* Passed Pupil REUBEN SUDKIEL.

The building is in good repair; the furniture is sufficient. The committee held monthly and quarterly meetings. Conservancy arrangements are very defective. The water-supply is from the river Indus and is abundant and good. The total number treated was 1,516 out-door and 7 in-door patients as compared with 1,002 and 8 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases, and rheumatic and respiratory affections. There was an out-break of cholera in June—49 cases with 29 deaths. Small-pox also occurred. There were 28 primary and 5 re-vaccinations. The dispensary was inspected in February by the Deputy Sanitary Commissioner, and in December by the Civil Surgeon, Karáchi. The total cost was Rs. 929-2-0, the cost per patient Re. 0-9-9, as compared with Rs. 705-10-0 and Re. 0-11-2 respectively in the previous year.

MIRPUR BATORO.—*In charge of* Passed Pupil SATRAMDAS RAMCHAND.

The building, a hired one, is quite unsuited for the purpose. There is no accommodation for servants and no dead-house. The furniture is sufficient but very old. The committee meets every month or oftener if necessary. Conservancy is attended to. The water-supply is good and sufficient. The total number treated was 6,412 out-door and 214 in-door patients as compared with 5,064 and 108 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, respiratory affections, dysentery and diarrhœa. Cholera appeared in June and July; 65 cases were treated with 14 deaths. Eighty-four primary and 5 re-vaccinations were performed. One *post-mortem* examination was made. The dispensary was inspected by the Deputy Sanitary Commissioner in February. The total cost was Rs. 936-10-4, the cost per patient Re. 0-2-3, as compared with Rs. 2,450-10-3 and Re. 0-7-6 respectively in the previous year.

PARUMAL KHUBCHAND DISPENSARY, SEHWAN.—*In charge of* Hospital Assistant E. BENJAMIN.

The building is in a very good state of repair. The furniture and fittings are sufficient. The committee visit the dispensary regularly. The sanitary condition of the town is fair. The water-supply is good in quality but scanty. The total number treated was 4,169 out-door and 89 in-door patients as compared with 3,619 and 53 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, skin-diseases, and respiratory affections. Cholera was epidemic in June and July—77 cases with 37 deaths. Sixteen major surgical operations were performed. Sixty-seven children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Karáchi, in December. The total cost was Rs. 1,940-15-5, the cost per patient Re. 0-7-3, as compared with Rs. 2,713-9-1 and Re. 0-11-9 respectively in the previous year.

GOVERNMENT DISPENSARIES.

THÁNO BULA KHÁN.—*In charge of* Native Doctor M. D'SOUZA.

The buildings are in a fair state of repair; quarters for servants are to be provided, but a dead-house is much needed. There is no committee. The water-supply is plentiful and of good quality. The total number treated was 1,215 out-door and 11 in-door patients as compared with 1,025 and 8 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, skin-diseases and respiratory affections. Two *post-mortem* examinations were made. The total cost was Rs. 793-3-5, the cost per patient Re. 0-10-4, as compared with Rs. 928-14-4 and Re. 0-14-4 respectively in the previous year.

MANORA.—*In charge of* Assistant Surgeon E. MACKENZIE.

The building is in good repair, but there is very little accommodation. The sanitary condition is very good and the water-supply good and abundant. The total number treated was 2,252, all out-door patients, as compared with 1,447 in the previous year. The most common diseases were malarious fevers, respiratory affections, ophthalmia, diarrhœa and skin-diseases. Two major surgical operations were performed. The dispensary was inspected by the Deputy Surgeon-General, Sind, in January, and by the Civil Surgeon, Karáchi, in September and December. The total cost was Rs. 2,950-5-8, the cost per patient Re. 0-8-11, as compared with Rs. 1,920-0-1 and Rs. 1-5-2 respectively in the previous year.

HYDERABAD COLLECTORATE.

CIVIL HOSPITAL, HYDERABAD.—*In charge of* Surgeon-Major B. C. KEELAN till 27th May, Surgeon H. ADEY till 19th June, and Surgeon-Major H. DeTATHAM, M.D., till end of year.

Conservancy and Water-supply.—The conservancy is described as fairly satisfactory although more public latrine accommodation is required; while private latrines are not all that can be desired. There is a sanitary committee, but the Civil Surgeon thinks a large city like Hyderabad requires a Health Officer. Drainage is reported unsatisfatory, the good natural drainage of the locality not being sufficiently assisted by artificial works. The water-supply, pumped from the river Indus into settling tanks, is copious, and although it is not filtered and is not quite clear, it is very highly appreciated by the inhabitants.

Hospital Buildings.—The hospital is near the town and conveniently situated. The accommodation for in-door patients is satisfactory, but inconvenient for out-door patients. The only improvement during the year was the construction of a paved drain in rear of the hospital.

General Health.—Cholera prevailed within municipal limits from the 13th of June till the 31st of August, during which period there were 266 cases and 172 deaths; 171 cases were treated in the hospital. With the exception of the cholera epidemic the public health was satisfactory.

Attendance of Patients.—In 1885 there were 892 in-door and 24,583 out-door patients against 908 and 25,538 respectively for 1884, which was a more sickly year.

Prevailing Diseases.—The most prevalent diseases among in-door patients were ague, vesical calculi, affections of the bowels, affections of the respiratory organs, skin and eye diseases; among out-door applicants, skin-diseases, affections of the eye, ague and bowel-complaints.

Surgical Operations.—Two hundred and seventeen major operations occurred during the year, of which no less than 181 were cases of lithotomy. The medical officer gives details of these operations, some of which were performed by Surgeon-Major Keelan before his departure; and a few by Surgeon Adey while temporarily holding charge. Two operations were performed by Assistant Surgeon Bocarro. Dr. DeTatham mentioned that shortly after his arrival few cases of operation presented which he attributes, *first*, to distrust of himself as a stranger; and *secondly*, to the people being averse to coming to Hyderabad from the outlying villages while cholera prevailed: but he adds that during the later months of the year there was no scarcity of operations. Among the major operations were amputations, excision of the eye-ball, elevation of depressed bone from fractured skull, removal of the penis for elephantiasis, repair of vesico-vaginal fistula, reductions of dislocations, &c.

Mortality and its Causes.—Forty-three deaths occurred in hospital during the year; 14 deaths occurred after operations for stone in the bladder; 4 occurred from diarrhœa, and 3 debility. Anæmia, pneumonia, cancer, phagedæna abscess, phthisis also contributed. Four deaths resulted from injuries.

Medico-legal Cases.—Eight bodies were examined, and many other medico-legal cases were investigated, one of the medico-legal cases was that of a subordinate of the Medical Department, Passed Medical Pupil P. Lely, who was shot through the arm by a fanatical sepoy, who also shot and killed two other men. In Lely's case the bone of the arm was shattered and the large vessels wounded, and he saved his life by his professional knowledge, which enabled him, with great presence of mind, to compress the artery above the wound (and thus prevent himself bleeding to death) until assistance arrived. Amputation was necessitated by the severity of the injury but the patient made a good recovery.

Vaccination—Is carried on by a municipal vaccinator.

Conduct of the Hospital Establishment.—The Civil Surgeon remarks: "it would be difficult to over-rate the services rendered by Assistant Surgeons T. H. Aquino and J. G. Bocarro both as regards the hospital practice and the clinical teaching of the students. First Class Hospital Assistant E. Jacob also performed his duties to the entire satisfaction of the Superintendent."

Cost.—The total cost was Rs. 13,614-1-10 and the cost per patient Re. 0-8-6 as compared with Rs. 13,052-15-4 and Re. 0-7-10 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

TANDO ALAHYAR.—*In charge of* Hospital Assistant MOSES ELIJAH.

The buildings are in good repair. The furniture though old is good. The committee visits the dispensary every month. The sanitary condition of the town is bad. The water-supply is from the canal and wells; the latter are liable to pollution by soakage. The total number treated was 5,233 out-door and 9 in-door patients as compared with 5,160 and 34 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, ulcers and respiratory affections. Cholera was epidemic in May and June—198 cases with 103 deaths. Two major surgical operations were performed. There were 81 successful primary vaccinations. The dispensary was inspected by the Deputy Sanitary Commissioner in January, and by the Civil Surgeon, Hyderabad, in February and November. The total cost was Rs. 1,493-13-5, the cost per patient was Re. 0-4-6, as compared with Rs. 2,316-11-5 and Re. 0-7-1 respectively in the previous year.

TANDO MAHOMED KHÁN.—*In charge of* Hospital Assistant SAMUEL DAVID.

The buildings are in good repair; quarters for the medical officer have been erected; servants' quarters are still required. The furniture and fittings are good and sufficient. The committee meets regularly once a month. The sanitary condition of the town is fairly good. The water-supply is sufficient but indifferent in quality. The total number treated was 3,885 out-door and 41 in-door patients as compared with 6,594 and 97 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, ulcers, skin-diseases and respiratory affections. Cholera was epidemic from April to July—65 cases with 41 deaths. Six major surgical operations were performed. One hundred and seventeen persons were vaccinated and 5 re-vaccinated. The dispensary was inspected by the Deputy Sanitary Commissioner in February, and by the Civil Surgeon, Hyderabad, in February and October. The total cost was Rs. 1,306-15-0, the cost per patient Re. 0-5-3, as compared with Rs. 2,526-0-0 and Re. 0-6-0 respectively in the previous year.

HÁLA.—*In charge of* Passed Pupil PESTONJI DORABJI TALATI.

The building is in a good state of repair; a dead-house is required. The furniture and fittings are in good condition and sufficient. The committee visit the dispensary every month. The sanitary condition of the town is fairly good. The water-supply is plentiful; that from some of the wells is liable to contamination by soakage. The total number treated was 4,100 out-door and 34 in-door patients as compared with 3,885 and 25 respectively in the previous year. The prevailing diseases were malarious fevers, abscess, ulcers, diarrhœa, ophthalmia, respiratory affections and skin-diseases. Two major surgical operations were performed. There were 95 primary and 4 re-vaccinations. Nine *post mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Hyderabad, in January and November. The total cost was Rs. 723-1-6, the cost per patient Re. 0-3-10, as compared with Rs. 1,351-2-0 and Re. 0-5-6 respectively in the previous year.

THÁRU SHÁH.—*In charge of* Passed Pupil D. C. DE SOUZA.

The building is to be repaired; some articles of furniture are required. The committee meets every month; individual members visit the dispensary frequently. The sanitary condition of the town is fairly good. The water-supply is abundant but liable to contamination by soakage. The total number treated was 4,211 out-door and 121 in-door patients as compared with 2,455 and 44 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, ulcers, abscess, and skin-diseases. Cholera and small-pox prevailed to some extent. Five major surgical operations were performed. Fifty persons were vaccinated. The dispensary was inspected by the Civil Surgeon, Hyderabad, in December. The total cost was Rs. 1,057-1-8, the cost per patient Re. 0-3-10, as compared with Rs. 1,693-10-10 and Re. 0-10-10 respectively in the previous year.

TANDO ADAM.—*In charge of* Passed Pupil TEJUMAL DHALAMAL.

The new building is completed and is now occupied; a dead house and latrine are required. The committee visit the dispensary every month. The town is kept fairly clean. The water-supply is abundant but some of the wells are so situated as to allow of soakage. The total number treated was 3,070 out-door and 10 in-door patients as compared with 3,439 and 7 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, ulcers and respiratory affections. Two cases of cholera occurred. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon of Hyderabad in January and November. The total cost was Rs. 550-3-9, the cost per patient Re. 0-2-10, as compared with Rs. 1,040-7-7 and Re. 0-4-9 respectively in the previous year.

MIRPUR KHÁS.—*In charge of* Passed Pupil KHIAMAL HUSHMATRAI.

The buildings require repair; a female ward has been built; a table is required for the dead-house. The committee visit the dispensary every month. The town is kept fairly clean.

The water-supply is good and abundant. The total number treated was 2,063 out-door and 16 in-door patients as compared with 2,336 and 18 respectively in the previous year. The prevailing diseases were malarious fevers, ulcers, ophthalmia and respiratory affections. Cholera was epidemic in June and July, 307 attacks with 210 deaths. Vaccination is performed by the táluka vaccinator. Two *post-mortem* examinations were made and opinion was given in 3 medico-legal cases The dispensary was inspected in November by the Civil Surgeon, Hyderabad. The total cost was Rs. 918-5-2, the cost per patient Re. 0-7-0, as compared with Rs. 1,521-3-10 and Re. 0-10-4 respectively in the previous year.

BOULTON DISPENSARY, TANDO BÁGO.—*In charge of* Passed Pupil JOHN JOEL.

The buildings are in good repair; a cook-house is required. The furniture and fittings are in good order and sufficient. The committee meets regularly every month. The sanitary condition of the town is unsatisfactory. The water-supply from a canal and from wells is abundant but the wells are liable to contamination. The total number treated was 2,163 out-door and 98 in-door patients as compared with 2,765 and 60 respectively in the previous year. The prevailing diseases were malarious fevers, ulcers, ophthalmia, abscess and respiratory affections. Two major surgical operations were performed. There were 42 primary vaccinations. Three *post-mortem* examinations were made at the request of the Police. The total cost was Rs. 1,040-10-6, the cost per patient Re. 0-7-4, as compared with Rs. 1,387-11-4 and Re. 0-7-10 respectively in the previous year.

THAR AND PÁRKAR.

GRANT-IN-AID DISPENSARIES.

UMARKOT.—*In charge of* Hospital Assistant WAMON GANESH.

Some repairs are required to the building. Some articles of furniture are required. The committee meet regularly every month. The town is kept clean. The water-supply is plentiful and of good quality. The total number treated was 1,345 out-door and 196 in-door patients as compared with 1,728 and 190 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, and respiratory affections. Three cases of cholera occurred in June and July. Vaccination has been carried out by the táluka vaccinator. The total cost was Rs. 775-10-10, the cost per patient Re. 0-8-0, as compared with Rs. 1,916-4-9 and Re. 0-15-11 respectively in the previous year.

KHIPRA.—*In charge of* Passed Pupil PEERAJI KAMAJI.

The new building occupied in June last is in good order; a cook-room and latrine are required. The furniture and fittings are in fair condition. The committee met four times. The sanitary condition of the town is unsatisfactory. The water-supply is good and sufficient. The total number treated was 2,700 out-door and 56 in-door patients as compared with 3,043 and 51 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, abscess, skin-diseases and ulcers. One major surgical operation was performed. There were 35 primary and 7 re-vaccinations. Five *post-mortem* examinations were made. The total cost was Rs. 707-14-3, the cost per patient Re. 0-4-1, as compared with Rs. 1,782-12-11 and Re. 0-9-2 respectively in the previous year.

MITTI.—*In charge of* Passed Pupil SAWALSING MANECKRAI.

The building is in good repair; a dead-house and female ward are required. The furniture and fittings are sufficient. The committee meets every month and takes great interest in the institution. The sanitary condition of the village is fair. The water-supply is abundant but of inferior quality. The total number treated was 1,670 out-door and 15 in-door patients as compared with 2,685 and 25 respectively in the previous year. The prevailing diseases were malarious fevers, ulcers, skin-diseases and respiratory affections. Small-pox was present in the town. Three major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Two *post-mortem* examinations were made at the request of the Police. The total cost was Rs. 745-0-2, the cost per patient Re. 0-7-0, as compared with Rs. 1,795-0-5 and Re. 0-10-7 respectively in the previous year.

NAGAR PARKAR.—*In charge of* Passed Pupil PARMANAND VISHANDAS.

The buildings are in good repair; the furniture with some exceptions is serviceable. The committee meets every month; individual members visit the dispensary frequently. The sanitary condition of the town is satisfactory. The water-supply is ample and of good quality. The total number treated was 2,415 out-door and 41 in-door patients as compared with 2,218 and 9 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases, ulcers and respiratory affections. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 568-7-8, the cost per patient Re. 0-3-8, as compared with Rs. 1,262-11-8 and Re. 0-9-0 respectively in the previous year.

SHIKA'RPUR COLLECTORATE.

CIVIL HOSPITAL, SHIKA'RPUR.—*In charge of* Surgeon H. P. DIMMOCK till 2nd August, Assistant Surgeon M. S. POSTWALA till 12th December and Surgeon STREET till end of the year.

Conservancy and Water-supply.—The larger public streets are kept cleanly but the bye-lanes are not so. Refuse is removed to a distance but not burnt so often as it should be. A good deal has been done in the way of paving the larger streets, and some hollows have been filled in. Private enclosures are dirty. There are 28 public latrines but many people use the roofs of their houses as latrines. Slaughter-houses are required. The water-supply is abundant and good from wells, but "it would be a great improvement if suction pumps were substituted for the present wheel and its rotting rope."

Hospital Buildings.—In a satisfactory state.

Public Health.—Cholera was present in the hot weather, causing 45 deaths; there were also 22 deaths from small-pox. There was rather more than the usual amount of fever during the autumnal months.

Attendance of Patients.—The total number treated during the year was 663 in-door and 2,969 out-door patients, a slight decrease as regards the latter and an increase of the former class.

Prevailing Diseases.—Ague, rheumatism, anæmia, diseases of the ear and eye, bronchitis, dyspepsia, disease of the spleen, venereal, abscess and ulcers.

Surgical Operations.—Eleven major and 257 minor operations were performed during the year.

Mortality and its Causes.—There were 22 deaths in hospital, 8 of which were from cholera.

Conduct of the Hospital Establishment.—The hospital staff have performed their duties in a satisfactory manner.

Cost.—The total cost was Rs. 6,984-3-7 and the cost per patient Rs. 1-14-9 as compared with Rs. 8,025-2-7 and Rs. 1-15-6 respectively in the previous year.

CIVIL HOSPITAL, SUKKUR.—*In charge of* Surgeon-Major M. L. BARTHOLOMÉUSZ, M.B.

Conservancy and Water-supply.—As mentioned last year the conservancy is unsatisfactory, the roof of private dwellings being made use of for purposes of nature, and the Civil Surgeon again recommends the introduction of a halálkhor cess to remedy this nuisance. The water-supply from river and wells is indifferent but a scheme for supplying Sukkur with water is now being considered.

Hospital Buildings—Are in fair repair and accommodotion ample, but ill-fitting doors and windows and the absence of fire-places in the native wards render these old mud barracks which have been utilized as a hospital unsuitable for the treatment of natives in the cold season.

General Health.—Notwithstanding some cases of cholera in June and July the general health of Sukkur was good throughout the year.

Attendance of Patients.—There is a decrease of both in-door and out-door patients as compared with 1884. In that year there were 493 in-door and 5,553 out-door. In 1885 there were 375 in-door and 4,791 out-door. The medical officer attributes this disease to the smaller rainfall (3·78 inches) mentioning that it is a well-observed fact in Sind that a large rainfall is invariably associated with an unhealthy season.

Prevailing Diseases.—Malarious fevers, affections of the respiratory organs, phthisis, abscess, boils, ulcers, dysentery, diarrhœa, and spleen maladies.

Surgical Operations.—Thirty-nine major and 317 minor operations were performed. The major surgery comprised 20 lithotomies, 5 removals of tumours, 3 amputations, 1 paracentesis of the liver, 1 lithotrity, 1 excision of eye-ball and 7 reductions of dislocations.

Mortality and its Causes.—There were 35 deaths in hospital—10 from cholera, 5 from diarrhœa, 5 from phthisis, 2 from dropsy, 2 from pneumonia, 2 from apoplexy, 2 from cerebro-spinal fever, &c.

Vaccination—Is carried on by a male and female vaccinator under the control of the Deputy Sanitary Commissioner.

Conduct of Establishment—Is reported good. It is mentioned that two Hospital Assistants attached to this Hospital died during the year from heat apoplexy and from phthisis.

Cost.—The total cost was Rs. 9,527-1-1, the cost per patient Rs. 1-13-6, as compared with Rs. 9,301-4-7 and Rs. 1-8-7 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

SHIKA'RPUR.—*In charge of* Assistant Surgeon M. S. POSTVALA, L.M.

The building is old but has been kept in a fair state of repair. Plans and estimates are in preparation for a new building. The furniture and fittings are in good order. The committee meets once a quarter and individual members visit the dispensary frequently. The sanitary condition of the town is defective. The water-supply is abundant and of fair quality. The total number treated was 11,464 out-door and 101 in-door patients as compared with 12,183 and 114 respectively in the previous year. The prevailing diseases were malarious fevers, inflammation of the ear, ulcers, and ophthalmia. Cholera appeared in June—31 cases with 19 deaths. Small-pox was also present—155 cases with 22 deaths. Eighteen major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. The dispensary was inspected by the Deputy Surgeon-General, Sind, in November, by the Civil Surgeon in May and December, and by the Deputy Sanitary Commissioner in November. The total cost was Rs. 4,102-1-1 and the cost per patient Re. 0-5-8 as compared with Rs. 5,112-15-9 and Re. 0-6-7 respectively in the previous year.

SUKKUR.—*In charge of* Hospital Assistant BALLAJI CUDDUM.

The buildings are in good repair; the furniture and fittings complete and in good condition. The committee hold monthly meetings. The sanitary condition of the town is fairly good. The water-supply from the Indus and wells is abundant, that from wells is of bad quality. The total number treated was 9,862 out-door and 285 in-door patients as compared with 9,035 and 142 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, ulcers, inflammation of the ear, respiratory affections and skin-diseases. Cholera and small-pox were both present. Ten major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. The dispensary was inspected by the Deputy Surgeon-General, Sind, in November, and by the Civil Surgeon, Sukkur, in May and September. The total cost was Rs. 2,422-7-11, the cost per patient Re. 0-3-9, as compared with Rs. 3,592-7-3 and Re. 0-6-3 respectively in the previous year.

ROHRI.—*In charge of* Hospital Assistant BAPU SHAMSHERSING.

The building is under repair. Certain articles of furniture have been supplied. The committee visited the dispensary 20 times. The sanitary condition of the town is fair. The water-supply is good and abundant. The total number treated was 2,286 out-door and 73 in-door patients as compared with 2,451 and 93 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, abscess, ulcers, and respiratory affections. Cholera appeared in the month of July. There were 235 successful primary and 183 re-vaccinations. The dispensary was inspected by the Deputy Surgeon-General, Sind, in November, by the Civil Surgeon, Sukkur, in May and October, and by the Deputy Sanitary Commissioner in December. The total cost was Rs. 1,758-8-3, the cost per patient Re. 0-11-11, as compared with Rs. 1,756-1-1 and Re. 0-11-0 respectively in the previous year.

LA'RKHA'NA.—*In charge of* Assistant Apothecary A. RODRIGUES.

The buildings are in a good state of repair. An additional ward for eight beds has been built. The furniture and fittings are ample. The committee visits the dispensary regularly once a month. The sanitary condition of the town is fair. The water-supply is abundant and said to be of good quality. The total treated was 10,249 out-door and 219 in-door patients as compared with 12,570 and 177 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, abscess, ulcers and inflammation of the ear. One case of cholera occurred in the town. Six major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. Eight *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Deputy Surgeon-General, Sind, in November, and by the Civil Surgeon in May and December. The total cost was Rs. 3,022-0-11 and the cost per patient Re. 0-4-7 as compared with Rs. 4,216-6-6 and Rs. 0-5-3 respectively in the previous year.

MEHAR.—*In charge of* Passed Pupil HUSSEIN KHAN.

There has been no alteration in the building. The furniture and fittings are sufficient. The committee hold quarterly meetings; the President inspects the dispensary frequently. The sanitary condition of the town is satisfactory. The water-supply is abundant and of good quality. The total number treated was 5,163 out-door and 42 in-door patients as compared with 5,902 and 35 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, abscess, ulcers and skin-diseases. Nineteen major surgical operations were performed. There were 51 successful vaccinations. Nine *post-mortem* examinations were made. The dispensary was inspected in May by the Civil Surgeon, Shikárpur, and in December by the Civil Surgeon, Sukkur. The total cost was Rs. 1,182-0-10, the cost per patient Re. 0-3-7, as compared with Rs. 2,083-11-8 and Re. 0-5-7 respectively in the previous year.

KAMBAR.—*In charge of* HOSPITAL ASSISTANT JOSEPH ISRAEL.

The building is kept in repair; a cook-room for in-patients is required. The committee meets once a month. The sanitary condition of the town is very unsatisfactory. The water-supply from wells is abundant but liable to contamination by soakage. The total number treated was 6,385 out-door and 245 in-door patients as compared with 7,758 and 161 respectively in the previous year. The prevailing diseases were malarious fevers, ulcers, abscess, ophthalmia, respiratory affections and skin-diseases. Cholera was epidemic, 105 attacks and 53 deaths. Small-pox also prevailed. Nine major surgical operations were performed. There were 142 primary and 70 re-vaccinations. Eleven *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Shikárpur, in May and by the Civil Surgeon, Sukkur, in December. The total cost was Rs. 1,427-9-10 and the cost per patient Re 0-3-5 as compared with Rs. 2,048-5-5 and Re. 0-4-1 respectively in the previous year.

GHOTKI.—*In charge of* HOSPITAL ASSISTANT SHAIK SHAHABUDIN.

The dispensary was opened on 28th June 1885. The building is the old Munsif's Court and is suited for the purpose. Some articles of furniture are required. The committee visited the institution every month. The sanitary condition of the town is unsatisfactory. The water-supply is from wells so situated as to allow of pollution by soakage. The total number treated was 2,093 out-door and 6 in-door patients. The prevailing diseases are malarious fevers, respiratory affections, skin-diseases and ophthalmia. Vaccination is carried on by the táluka vaccinator. One *post-mortem* examination was made and opinion given in several other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Sukkur, and by the Deputy Sanitary Commissioner in December. The total cost was Rs. 557-2-2, the cost per patient Re. 0-4-2.

UPPER SIND FRONTIER.

GOVERNMENT DISPENSARY.

JACOBABAD.—*In charge of* SURGEON A. MILNE.

The building is in good repair. The furniture is in good order. The committee visit the dispensary every month. The sanitary condition of the town is satisfactory. The water-supply is sufficient and of fairly good quality. The total number treated was 3,218 out-door and 248 in-door patients as compared with 5,511 and 230 respectively in the previous year. The prevailing diseases were malarious fevers, ulcers, respiratory affections, skin-diseases, inflammation of the ear and ophthalmia. Cholera was present in June and July, 37 cases were treated. Small pox was also reported—8 cases. Twenty major surgical operations were performed, including 11 cases of lithotomy. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Deputy Surgeon-General, Sind, in November. The total cost was Rs. 4,843-2-0 and the cost per patient Rs. 1-6-4 as compared with Rs. 3,800-4-3 and Re. 0-10-7 respectively in the previous year.

GRANT-IN-AID DISPENSARY.

KASHMOR.—*In charge of* Passed Pupil MULCHAND LALCHAND.

The buildings are in good repair. The site is very damp and should be drained. A dead-house is required. One or two articles of furniture should be supplied. The committee visit the dispensary once a month. The village is kept fairly clean. The water-supply from wells is liable to contamination by soakage. The total number treated was 1,704 out-door and 47 in-door patients as compared with 1,232 and 52 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, ulcers and respiratory affections. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner, Sind, in December. The total cost was Rs. 1,357-7-7, the cost per patient Re. 0-12-4, as compared with Rs. 1,637-15-7 and Rs. 0-12-4 respectively in the previous year.

FOREIGN.

ADEN.

EUROPEAN GENERAL HOSPITAT, ADEN.—*In charge of* SURGEON-MAJOR E. COLSON.

Conservancy and Water-supply.—The conservancy in the immediate locality of the hospital is well provided for. Water used is condensed.

Hospital Buildings.—The hired bungalow is still in use. It is quite unsuitable for a hospital.

General Health—Good during the year in that division of Aden in which this hospital is situated. No contagious disease excepting a few cases of small-pox.

Attendance of Patients.—Ninety-one in-door and 2,031 out-door, showing a considerable increase of the latter class. The in-door patients are chiefly from the shipping in harbour.

Prevailing Diseases.—Among in-door patients the prevailing diseases were in the order of frequency as follows: debility, simple continued fever, diarrhœa, dysentery, enteric fever, ulcers, injuries, ague, and orchitis.

Mortality and its Causes.—Seven of the 91 in-door cases proved fatal. Three deaths were caused by enteric fever originating on board, one from apoplexy, one from dysentery, one from hepatic abscess, one from burns.

Surgical Operations.—Three major operations, all amputations of limbs, as the result of accident.

Conduct of Establishment.—Reported satisfactory.

Cost.—The total cost was Rs. 9,216-12-3, the cost per patient Rs. 4-5-5, as compared with Rs. 8,878-9-0 and Rs. 4-9-9 respectively in the previous year.

ADEN CIVIL HOSPITAL.—*In charge of* SURGEON C. MONKS.

Conservancy and Water-supply.—Conservancy is well looked after by the municipality. The water is condensed.

Hospital Buildings.—The buildings were considerably damaged by a cyclone in June. Necessary repairs were carried out by the municipality. The floor of the latrines is earthen and small baskets are used instead of iron receptacles. The medical officer suggests these defects should be remedied.

General Health.—Good. No epidemic occurred.

Attendance of Patients.—There were 506 in-door and 1,474 out-door against 541 and 1,959 respectively in the previous year. The decrease is attributed to the work of a dispensary at Shaikh Othman.

Prevailing Diseases.—As in former years ulcer was the principal cause of in-door admissions, giving 208. Fever, privation and injuries gave the next largest number. Among out-door patients injuries, ulcers, fevers, diseases of the digestive and respiratory systems, eye and ear affections, in the order named.

Surgical Operations.—Fifteen major operations were performed, comprising 6 lithotomies and 2 amputations of the leg. There were 89 minor operations.

Mortality and its Causes.—Sixty-five deaths occurred—18 from privation, 10 from phthisis, 10 from ulcers, 7 from diarrhœa. As usual many were admitted in a moribund condition. The number of deaths from privation is commented on by the Civil Surgeon.

Vaccination—Is carried on by the municipal vaccinator. There were 543 operations, of which 511 were successful. Lymph is received quarterly from England.

Conduct of Establishment.—Satisfactory.

Cost.—The total cost was Rs. 17,032-0-11, the cost per patient Rs. 8-9-7, as compared with Rs. 19,464-10-3 and Rs. 7-9-3 in 1884.

GRANT-IN-AID DISPENSARY.

PRINCE OF WALES DISPENSARY, ADEN.—*In charge of* Assistant Surgeon JAMSEDJI P. POCHA, L.M. & S.

The building, a hired one, is kept in fair repair. The furniture and fittings are in good order. The sanitary condition of the neighbourhood in which the dispensary is situated is very unsatisfactory. The total number treated was 6,686, all out-door patients, against 7,893 in the previous year. The most common complaints were skin-diseases, malarious fevers, respiratory and rheumatic affections, ulcers and ophthalmia. Twenty-seven major surgical operations were performed. Vaccination is performed by the municipal vaccinator. The dispensary was inspected by Deputy Surgeon-General Bruce. The total cost was Rs. 3,662-12-3, the cost per patient Re. 0-8-9, as compared with Rs. 5,099-14-10 and Re. 0-10-4 respectively in the previous year.

MUNICIPAL DISPENSARY.

SHAIKH OTHMAN.—*In charge of* Hospital Assistant GOOLABKHAN.

The building is kept in a fair state of repair. The furniture and fittings are good and sufficient. There is no committee, but the Civil Surgeon, Aden, visits the dispensary once a month. Conservancy arrangements are very satisfactory. The total number treated was 2,692 out-door and 15 in-door patients as compared with 2,088 all out-door patients in the previous year. The prevailing diseases were ulcers, malarious fevers, respiratory affections, skin-diseases, and rheumatism. There were 124 successful vaccinations. Twelve medico-legal cases were examined and reported on. The dispensary was inspected by the Sanitary Commissioner and by Deputy Surgeon-General Bruce. Hospital Assistant Goolabkhán is specially commended by Dr. Bruce. The total cost was Rs. 1,237-4-10, the cost per patient Re. 0-7-3, as compared with Rs. 1,559-0-5 and Re. 0-12-3 respectively in the previous year.

PERSIAN GULF.

CIVIL HOSPITAL, MUSKAT.—*In charge of* Surgeon-Major A. S. G. JAYAKAR.

Conservancy and Water-supply.—Conservancy and sanitation neglected; water-supply good.

Hospital Buildings.—No change beyond ordinary repairs.

General Health.—Small-pox and measles prevailed early in the year; there was much ague in the middle of the year, and an epidemic of mumps towards the close.

Attendance of Patients.—In-door patients 60, out-door 3,757, an increase of 7 and 218 over the numbers for 1884.

Prevailing Diseases.—Malarious fevers, rheumatic affections, respiratory affections, diseases of the stomach and intestines, ulcers, skin-diseases.

Surgical Operations.—Only 97 minor operations were performed during the year.

Mortality and its Causes.—Eleven deaths occurred among in-door patients; the causes were fever 2, pneumonia 2, phthisis, dropsy, diarrhœa, hepatic abscess 1 each, and other diseases 3.

Vaccination.—Sixty-six operations including 3 of re-vaccinations, of which 47 were successful.

Conduct of Establishment.—Reported satisfactory: First Class Hospital Assistant P. A. D'Crastos is commended.

Cost.—The total cost was Rs. 10-766-6-1, the cost per patient Rs. 2-13-1, as compared with Rs. 10,926-15-1 and Rs. 3-0-7 respectively in the previous year.

CIVIL HOSPITAL, BUSHIRE.—*In charge of* Surgeon D. B. Ross, M.D.

Conservancy and Water-supply.—Beyond the removal of a few filth accumulations no attention is paid to the conservancy or cleanliness of the town. Water from wells some mile away is good, all that in the town wells is brackish.

Hospital Buildings.—The dispensary, which is situated within the Residency enclosure, is in a good state of repair.

General Health.—Unsatisfactory, owing to the prevalence of malarious fever.

Attendance of Patients.—Four thousand five hundred and forty-five out-door patients were treated as compared with 4,386 in the previous year.

Prevailing Diseases.—Malarious fevers of the intermittent type were extremely prevalent. Affections of the respiratory organs, scorbutic, rheumatic, and syphilitic maladies, ulcers, intestinal worms and ophthalmia caused the greatest number of admissions. Guinea-worm was also common.

Surgical Operations.—The major operations were 5 in number.

Vaccination.—Nineteen children were successfully vaccinated.

Conduct of Establishment.—Assistant Apothecary De Sylva, the Residency Apothecary, is reported as having conducted his duties in a zealous and efficient manner.

Cost.—The total cost was Rs. 10,566-5-0, the cost per patient Rs. 2-5-2, as compared with Rs. 10,360-6-3 and Rs. 2-5-9 respectively in 1884.

APPENDIX II.

SUMMARIES OF THE ANNUAL REPORTS

OF THE

MEDICAL SCHOOLS.

Byra'mji Jijibhoy Medical School, Poona.

The school was under the superintendence of Surgeon-Major Cook, M.D., during the whole year. There were at the beginning of the year 53 pupils classed as follows: native medical pupils 30, stipendiary 14, paying 5 and Native State 4. Of these 29 were first year's pupils, 11 second-year, and 13 third-year. Of the first year's pupils 28 were examined on the 6th of April and of these 16 passed and 12 failed, all of whom were dismissed excepting one, a native medical pupil, who was permitted to remain on account of long service. On the second examination of first-year pupils on the 14th of September, 15 were examined and all passed. Of the second-year pupils 11 were examined, 10 passed, and 1 was dismissed at the first examination. At the second 10 were examined and all passed. Of the third year's pupils at the final examination in September, 11 passed and 2 failed and were dismissed. Of the 11 who passed 8 were native medical pupils, 1 stipendiary and 2 State (Kolhápur). Four prizes were awarded at the final examination aggregating in value Rs. 170. No change was made in the curriculum. The entrance examination was held on the 26th October when 5 candidates appeared. Of these 3 were boys from schools in Poona, one a State pupil from Dhár, and one a paying pupil. Of the 3 boys who competed for stipends 2 were found ineligible, as they were not provided with the necessary certificates, and 1 failed. The State pupil failed but the paying pupil passed. At a second entrance examination 24 candidates presented, 18 being medical pupils from hospitals and dispensaries; of these 14 passed and 4 failed; 4 were candidates for stipends, 3 passing and one failing; but one of the former was not admitted as he declined to sign the agreement. There were also 1 paying pupil and 1 State pupil (Kolhápur) both of whom passed. At a third and fourth examination, held specially for boys who arrived late, two passed. At the opening of the winter session there were 28 native medical pupils, 12 stipendiary, 3 State, 4 paying, total 47. Of these 21 were Bráhmins, 20 Hindus of other variety, 3 Mussalmán, 2 Goanese, 1 Native Christian. The behaviour of the students was on the whole very good, the only serious offence coming to notice being that of two students who were found copying from notes at the final examination, and who were dismissed. The Superintendent submits a copy of the questions asked at the various examinations which are well calculated to test the knowledge of the examinees. The Superintendent also submits the accounts of the endowment fund (Rs. 10,000) with the necessary vouchers, showing a balance of Rs. 18-6-3. The total amount of fees realized from paying pupils for the year was Rs. 102. The cost of the school during the year under report was Rs. 14,606-4-3. The Superintendent further states his "thanks are due to Surgeon D. N. Párakh for the zeal and ability with which he carried on his duties as Teacher of Surgery and Midwifery." He also states Assistant Surgeon Bhikaji Amrut Chobe has sustained his reputation as Teacher of Anatomy and Physiology, while the position of Teacher of Chemistry and Medical Jurisprudence formerly so excellently filled by Assistant Surgeon G. R. Desai (transferred as Superintendent of Vaccination, Bombay), has been filled creditably by Assistant Surgeon D. G. Sabnis, since the 12th of June last. Mr. Apothecary Gallagher has also performed his multifarious duties in connection with the school to the Superintendent's entire satisfaction.

Byra'mji Jijibhoy Medical School, Ahmedabad.

The school has been under the superintendence of Surgeon-Major Robb, M.D., during the whole year. On the opening of the session of November 1884 there were 63 students, of whom 16, 21, and 26 belonged to the third, second and first years respectively. In April written and oral examinations of the first and second years' students were conducted in the presence of Surgeon-Major Waghorn, A. M. D., and Assistant Surgeon K. B. Cooper, of the Bechardass Dispensary, who acted as assessors. Of 21 second-year's students 14 passed and of 26 first-year's students 22 passed. The closing examinations were held in September, Surgeon-Major Waghorn again acting as assesor. Of 25 first-year's men 21 passed; of 21 second year's students 15 passed; of 16 third-year's students 16 passed. Scholarships and prizes were awarded at the close of the summer session, the awards being reported to the Surgeon-General. The entrance examination was held on the 26th October when 41 boys were examined, of whom 33 passed. Of these 11 were permitted to join the school, 5 as stipendiary and six as paying pupils: 16 native medical pupils from hospitals and dispensaries were also admitted: so that including one paying pupil not promoted from the previous year the new first year's class numbered 28, being the grand total of students up to 70. No change

has taken place in the curriculum of study, but the Superintendent reports the advanced students were taken in small parties to the Lunatic Asylum and to the Leper Hospital, so that they might see the types of cases usually met with at these institutions. Several changes occurred in the teaching staff during the year. One was occasioned by the transfer to the Poona School of Assistant Surgeon Sabnis, Teacher of Anatomy and Physiology, who was succeeded by Assistant Surgeon Nilkanth Dayabhai who, the Superintendent states, fulfils the expectations formed of him. The next change was caused by the departure of Assistant Surgeon Tribhowandas M. Shah, a skilled Teacher in Surgery, to Junágad. He was succeeded by Assistant Surgeon Nanavatty from the Khárághoda Dispensary. The Superintendent again brings forward the case of First Class Hospital Assistant Laximon Singh Arjun Singh, who has without any recompense whatever conducted the teaching of materia medica and pharmacy since the opening of the school. The students as a whole have conducted themselves with propriety and have been generally amenable to the discipline of the school and hospital. The total expenditure amounted to Rs. 17,763-7-11, being Rs. 1,317-9-5 less than for the previous year, the reduction being caused by the two Assistant Surgeons appointed, as above detailed, being on the revised scale of pay. Fees from paying pupils amounted to Rs. 549.

Hyderabad Medical School.

Surgeon-Major B. C. Keelan was in charge from the beginning of the year till the 27th May, when proceeding on furlough he was succeeded temporarily by Surgeon H. Adey, of the 2nd Belooch Regiment, until the 19th of June, when Surgeon-Major DeTatham, M.D., took charge. At the beginning of the year there were 30 students on the rolls, including 17 native medical pupils and 13 high school pupils. Of these 12 were in the third year, eight in the second, and ten in the first year of studentship. Of the high school pupils two resigned their stipends for other employment. The usual examinations were held and at the pass examination in September 12 students passed (namely 6 native pupils and 6 high school pupils) and one was removed. The number of students on the roll, which had thus been reduced to 15, was augmented at the commencement of the winter session by ten native medical pupils and six high school pupils, so that the total number at the end of the year was 31. One high school pupil who passed is, it is stated, an enthusiastic member of the Brahmo Samáj and has determined to practise medicine in Sind under the auspices of that society. No change was made in the course of study. The pass examination in September was presided over by the Deputy Surgeon-General, Sind Circle, and the Superintendent generously remarks: "the result proves that the efforts of my predecessor Surgeon-Major B. C. Keelan had been ably seconded by the two able teachers employed, *viz.*, Assistant Surgeons J. H. Aquino and J. E. Bocarro." As usual the sum of Rs. 200 presented by Government was distributed in prizes among the successful pupils. It is mentioned that the school is not so well provided with certain necessaries as it might be; for instance, the means for teaching osteology are imperfect, and there are no good physiological diagrams. Midwifery diagrams would also be acceptable and the supply of chemical apparatus is limited.

It has already been stated that six high school pupils were admitted towards the close of the year. It was not without difficulty this small accession of strength was obtained, as there was no candidate presenting who had passed the sixth standard and the agreement which each candidate was called upon to sign to serve Government wherever and so long as Government might require his services proved an insuperable obstacle to any young Sindi joining. Under these circumstances the Surgeon-General sanctioned the admittance into the school of boys who had passed the fifth standard, and that the agreement should remain in abeyance, a proviso being added that preference should be given to sixth standard boys and that the Superintendent of the School should take special care to ascertain that candidates of the fifth standard possessed a good knowledge of English. Government by their Resolution No. 10, dated 5th January 1886, approved of the arrangement made.

APPFNDIX III.

Civil Hospitals and Dispensaries: Report on the —— for the year 1885.

No. 2912.

GENERAL DEPARTMENT.

Bombay Castle, 17th August 1886.

Letter from the Surgeon General with the Government of Bombay, No. S.B.—142, dated 8th May 1886—Submitting the Administration and Progress Report on the Civil Hospitals and Dispensaries of this Presidency for the year 1885.

RESOLUTION.—The number of patients treated during the year under review at the 217 Civil Hospitals and Dispensaries was 1,605,968, of which number 37,642 were in-door patients. Dr. Moore's suggestion that no attempt should in future be made to guess at the number of out-patients cured or relieved is approved.

2. As in the previous year the three most numerous classes of cases treated were cases of malarious fever, skin diseases and diseases of the eye. There was a decrease in the number of small-pox cases which fell from 1,099 to 153, and a rise in the number of cholera cases from 1,943 to 5,360. The Surgeon General states that few persons suffering from small-pox apply for treatment. His remarks on the best method of preventing the disease known as intestinal worms are worthy of attention.

3. The year's income was Rs. 10,14,360, of which Government contributed Rs. 7,80,516 and Local and Municipal Funds Rs. 1,81,288. The total of private subscriptions was only Rs. 7,677. The expenditure was Rs. 9,65,445.

4. Dr. Moore has from information gained during his carefully arranged tour made several suggestions for the improvement of various hospitals and dispensaries which however cannot be dealt with here. The question of the reconstruction of the European General Hospital is under the consideration of Government.

5. It is observed that several dispensaries have not been visited by either a Civil Surgeon or by a Deputy Sanitary Commissioner for the last two years, while some were visited too rarely even by the Dispensary Committees during the year under review.

6. The acknowledgments of Government are due to Dr. Moore for his efficient supervision of the Department and for his clear and concise report, and His Excellency in Council has observed with satisfaction that Dr. Moore highly commends the good work done by the various officers under his control. He also acknowledges with pleasure the excellent services of the Nursing Sisters at the Jamsedji Jijibhái and European General Hospitals.

J. DE C. ATKINS,
Acting Under Secretary to Government.

ADMINISTRATION AND PROGRESS REPORT

ON THE

CIVIL HOSPITALS AND DISPENSARIES

UNDER THE

GOVERNMENT OF BOMBAY

FOR THE YEAR 1886.

COMPILED IN THE OFFICE OF THE SURGEON-GENERAL WITH THE GOVERNMENT OF BOMBAY

By

SURGEON-MAJOR D. A. PATTERSON, M.D.,

SECRETARY TO THE SURGEON-GENERAL.

~~22 K 13~~

Bombay:

PRINTED AT THE GOVERNMENT CENTRAL PRESS.

1887.

No. $\frac{S.B.}{198}$ OF 1887.

FROM

THE SURGEON-GENERAL
WITH THE GOVERNMENT OF BOMBAY,

To

THE SECRETARY TO GOVERNMENT,
General Department.

Bombay, 15th June 1887.

SIR,

I have the honour to forward, for the information of Government, the Administration and Progress Report on the Civil Hospitals and Dispensaries of the Presidency for the year 1886.

2. The general plan of the report is that which has been found convenient in former years, and the sketch maps showing the places at which there are hospitals and dispensaries have been again inserted.

3. It is found necessary to attach four appendices as per margin. The first appendix contains summaries of the reports by medical officers in charge submitted to this office. In these summaries I have mentioned the names of the subordinates reported on favourably by medical officers.

1. Summaries of the annual reports of medical officers.
2. Summaries of the annual reports of medical schools.
3. Hospital and dispensary statistics.
4. Statement of patients treated in various institutions not included in the body of the report under Government Resolution No. 2141, dated July 1st, 1878, General Department.

4. Appendix II consists of summaries of the reports by the Superintendents of the Medical Schools at Poona, Ahmedabad and Hyderabad (Sind). But I think it better to show the actual working of these schools more prominently, as it is upon them that both the Civil and Military Departments and Native States must rely for the provision of that generally excellent and hard-working class known as Hospital Assistants.

5. At the end of the year 1885 the number of students in the schools was as below :—

Poona...	...	...	...	47
Ahmedabad	...	...	...	70
Hyderabad	...	...	...	31
			Total	148

And inserted is a tabular statement showing the number and classes of pupils in the schools at the end of the year 1886 :—

Classes of Students.	Poona.				Ahmedabad.				Hyderabad.				Total.			
	3rd Year.	2nd Year.	1st Year.	Total.	3rd Year.	2nd Year.	1st Year.	Total.	3rd Year.	2nd Year.	1st Year.	Total.	3rd Year.	2nd Year.	1st Year.	Total.
Native Military	7	10	1	18	9	10	..	19	7	10	..	17	23	30	1	54
Stipendiary	2	2	7	11	2	4	5	11	1	4	7	12	5	10	19	34
Native State	1	1	..	2	4	..	..	4	..	..	..	..	5	1	..	6
Paying	2	3	4	9	4	5	10	19	..	..	..	..	6	8	14	28
Free	..	..	..	..	..	..	..	..	..	..	1	1	..	..	1	1
Total ..	12	16	12	40	19	19	15	53	8	14	8	30	39	49	35	123

The names of the teachers and the subjects they teach are as follows :—

Byrámji Jijibhái Medical School, Poona.

Surgeon-Major Cook, M.D. : Medicine, Clinical Medicine, Therapeutics.
Surgeon D. N. Párakh, succeeded by Surgeon Eaton : Surgery, Clinical Surgery, Midwifery.
Assistant Surgeon Bhikáji Amrit : Anatomy and Physiology.
„ „ Dattu Ganesh Sabnis : Chemistry and Medical Jurisprudence.
Apothecary Gallagher, succeeded by Apothecary Fearn : Materia Medica, Pharmacy.

Byrámji Jijibhái Medical School, Ahmedabad.

Surgeon-Major Robb : Medicine, Clinical Medicine, Therapeutics.
Assistant Surgeon B. H. Nánávati : Surgery, Clinical Surgery, Midwifery.
„ „ N. Dayábhái : Anatomy, Physiology.
„ „ J. D. Khambáta : Chemistry, Medical Jurisprudence.
Hospital Assistant Lakshman Singh : Materia Medica and Pharmacy.

Medical School, Hyderabad.

Surgeon-Major De Tatham, succeeded by Surgeon-Major Keelan : Clinical Medicine and Surgery.
Assistant Surgeon Aquino : { Medicine and Chemistry in winter. / Midwifery and Physiology in summer.
„ „ Bocarro : { Surgery and Anatomy in winter. / Medical Jurisprudence and Materia Medica in summer.

At Poona the pupils who are paid receive Rs. 9 during the first year and Rs. 10 during the second and third year. They also receive actual travelling expenses if they pass the entrance examination, and when they leave if successful. Their food is provided at their own cost, and they reside in a bungalow, the gift of Mr. Byrámji Jijibhái, the expenses connected with which are met from the interest of Rs. 10,000, also presented by Mr. Byrámji. Military pupils only are allowed clothing. Stipendiary pupils draw similar allowances, but no travelling allowance. Paying pupils contribute Rs. 3 per month. At Ahmedabad the only difference is that Government rent a bungalow for the accommodation of the students, the lease having been recently renewed for seven years at a rental of Rs. 75 per month. At Hyderabad (Sind) similar arrangements are in force, but the Principal reports the bungalow in a very dilapidated condition.

Examinations are held at all the schools on the same day in April and September. The examinations are conducted by the Superintendents and teachers assisted by assessors either of the British or Indian Medical Departments. Examinations are both oral and written. The questions for the final examinations on particular subjects are submitted to the Surgeon-General and forwarded from his office, so that all the students have the same examination, although the questions may not be those of their own teachers.

6. From the figures given in the foregoing remarks it may be observed that there were 25 pupils less in the schools at the termination of the last year than at the end of 1885. The difference is accounted for by 12 pupils being allowed to resign, 1 retired, 16 dismissed, 3 died and 28 passed out—total 60. On the other hand, there were 35 new admissions, leaving the numbers as shown in the tabular statement in para. 5. The actual number of students, who having passed out went into the service of Government, was 12 Native military medical pupils who joined the Military Department, and 9 stipendiary who joined the Civil Department. The remainder were Native State or paying pupils. It is here mentioned that in order to supply demands for Burmah the terminal examination was antedated 9 days at all the schools. It will be observed that 12 Native military pupils passed out, but no military pupils joined. But we have enough on the books to support the non-entrance for the present. The number educated for the Civil Department was 9 and the estimate of requirements is 10. But with the opening of new institutions the estimate must continually increase. We have, however, pupils coming on for the Civil Department latterly attached to civil hospitals under Government Resolution No. 4403 of the 20th November 1885, and therefore no present apprehension is felt on this subject (*vide* para. 25).

7. The summaries of the reports of the Superintendents contained in Appendix II will also show that these schools are making good progress as educational institutions, as they are almost certain to do so long as presiding officers

take that trouble and interest in their work which I have every reason to believe they do. Surgeon-Major Cook, the Superintendent of the Poona School, is an excellent Principal. Surgeon-Major Robb, the Superintendent of the Ahmedabad School, is most energetic, careful and efficient, taking the greatest interest in his work. Surgeon-Major DeTatham, who was Acting Superintendent of the Hyderabad School till May 12th, when relieved by Surgeon-Major Keelan, conducted the duties most satisfactorily, and so has Dr. Keelan since his return.

8. The three schools, however, do not represent the medical educational power of the Presidency. There is in addition the Grant Medical College and its staff of Professors where a large number of paying students (average for 6 years 258) are being educated for the L.M. & S. or other diplomas and from whom the Assistant Surgeon class is recruited. There is also a class of 12 female students. Here also the apothecary class is educated, and the thoroughness of the clinical teaching afforded is referred to in my inspection report of the Jamsetji Jijibhái Hospital. I have, however, to remark that the teaching power is not sufficient, and that all the classes are too large and would in an European school demand a larger number of Professors and teachers. The military medical students of the apothecary class, all of whom are Europeans or Eurasians, receive pay for the first year at Rs. 20, during the second year at Rs. 25, and during the third year Rs. 30. They also get an allowance of Rs. 10 in lieu of rations and housing under Government Resolution, Military Department, No. 1158 of the 5th March 1885, and Government Resolution, Military Department, No. 368, dated 27th January 1885. With this allowance a house is rented for their convenience in the neighbourhood of the hospital. But owing to reductions in the apothecary class under a recent India Army Circular, we have not required to recruit during the last year, nor shall we want fresh students during the present or next year.

9. At my request Government have recently been pleased to sanction, by Government Resolution No. 4633, dated 12th November 1886, Military Department, as a tentative measure, the admittance of Europeans or Eurasians educated at their own cost into the apothecary grade of the department. As this branch of the service has latterly been considerably benefited under the regulations published in India Army Circular of 1884, clause 83, it is not improbable that self-educated persons of the classes required may become candidates. But the proposed admission requires to be made better known than it has hitherto become.

1. Classification of hospitals and dispensaries.
2. Number of patients, in-door and out-door, during the year.
3. Diseases for which patients were treated.
3A. Major surgical operations and the results.
4. Classes and sex of in-door and out-door patients.
5. Part I., Income and expenditure.
5. Part II., Account of invested capital.

10. Appendix 3 contains statistical statements as per margin, and on these I have to advance the following observations:—

Statement No. 1.

This shows the classification of hospitals and dispensaries according to the orders of the Government of India conveyed in Resolution No. 3-163-74 of May 4th, 1883. The classes into which institutions are divided are three in number, namely :—

Class I.—State hospitals and dispensaries, including all institutions maintained by Provincial Funds and under Government management.

Class II.—Local Fund institutions, including all institutions which are vested in Local Boards or guaranteed or maintained by Local Funds.

Class III.—Private institutions, being sub-divided into—

(*a*) Those entirely maintained at the cost of private individuals or associations.

(*b*) Institutions supported by private subscriptions or guarantee, but receiving aid from Government or Local Funds.

On the 1st of January 1886 the total number of institutions open was 217 classified as under :—

Class	I.	... 47
„	II.	... 34
„	IIIA.	... 31
„	IIIB.	... 105
		217

Nine new dispensaries were added during the year 1885, but during the year 1886 only 7 institutions were added to the list, namely :—Kama Hospital, Navalgund, Berbera, Shirol, Katkol, Inchalkaranji and Shett Dattubhai Ibrahim Dispensary at Cutch Mándvi.

Two dispensaries, *viz.*, Bánsda and Narsoba's Wádi, were closed during the year.

The classification at the end of the year 1886 therefore stood as follows :—

Class	I.	...	...	... 49
„	II.	...	...	... 35
„	IIIA.	...	...	... 34
„	IIIB.	...	...	... 104
				222

The reason why so few new dispensaries were opened this last year is the impossibility of providing qualified Hospital Assistants, Burmah demands having caused the employment of twenty-five civil medical subordinates in the Military Department and thus necessitating our working short handed. At present there are dispensaries sanctioned at the places as per margin (and more are wanted) all waiting for the provision of medical subordinates.

*Párner.	*Khánápur.
Akola.	Ránebennur.
*Rahimatpur.	Sindkheda.
Goregaon.	Trimbak.
Nátáputa.	*Rájápur.

*Since opened.

11. The *second statement* shows the number of in-door and out-door patients treated during the year. These amounted to in-door 36,444 and out-door 1,576,677, total 1,613,121, against 37,642 in-door and 1,568,326 out-door, total 1,605,968, for the year 1885. And this does not include the numbers treated in the institutions mentioned in Appendix 4 for the reasons already stated in the margin of my previous paragraph 3. As compared with the year 1885 there has been a decrease of 1,198 in the number of in-patients treated, and an increase of 8,351 out-patients. Of the in-patients 26,062 were "cured," 3,488 were "relieved," 2,855 were "discharged otherwise" and 2,496 "died"; the ratio per cent. of deaths being 6·8 against 7·4 in 1885. The total number of beds available was 3,398 or 80 more than in the previous year; the increase is chiefly due to the opening of the Kama Hospital. The daily average number of sick was 1,837, almost the same as the number for the previous year, *viz.*, 1,837·2. Of the total number of out-door patients 341,495 were treated at civil hospitals and 1,235,182 at dispensaries as compared with 344,270 and 1,224,056 respectively in 1885. The daily average attendance at civil hospitals is 3,231·1 and at dispensaries 13,202·5, total 16,433·6, against 3,118·5 and 12,856·5 and 15,975 respectively in the previous year.

Statement No. II.

12. Last year I remarked that medical officers are expected to show in their monthly and annual statements not only the numbers who come under treatment, but how many are discharged, cured or relieved. And I observed that this, as regards out-door patients, is simply impossible in the great majority of instances, reducing the whole system to one of guess-work. In consequence of these and other observations in my last report Government were pleased, by Resolution No. 2912, dated 17th August, to say that no attempt should be made in future to guess at the number of out-patients cured or relieved. The system has, however, gone on during the year under report, and the registers are as before, but from the commencement of the present year the alteration will be effected.

Statement No. III.

13. Statement No. III. shows the diseases for which in-door and out-door patients were admitted, and on the principal diseases I remark as follows :—

Small-pox.

The number of patients applying for treatment was very small, only 69; of this number 31 occurred in the Konkan, 9 in the Deccan, 23 in Gujarát and 6 in Sind.

Cholera.

Happily the Presidency has been almost free from this disease during the year, no epidemic of the malady having broken out anywhere. The total number of cases treated was 55, of which 36 occurred in the Konkan, 8 in the Deccan and 11 in Gujarát. In my

last report I mentioned that however much medical men may differ in their opinions of the origin and dissemination of cholera, all are in accord that sanitary measures in the fullest acceptation of the term are the only preventive means not only in this country but in all others—a maxim which cannot be too frequently repeated.

Malarious fevers.

So-called "malarious fevers" stand as usual at the head of the list of diseases. In 1884 there were 274,762 cases or 18·4 per cent. of the total treated. In 1885 there were 276,007 cases or 17·2 *per cent.* And last year there were 251,291 cases or 15·6 *per cent.* The ratio *per cent.* in the various divisions of the Presidency were for 1885 in the Konkan 23·8, the Deccan 11·6, Gujarát 16·2, Sind 25·2 and in foreign institutions 25·5. For last year the ratio is as follows: Konkan 21·3, Deccan 11·2, Gujarát 15·9, Sind 20·1, foreign institutions 18·9. I perceive from the Sanitary Commissioner's report for 1884 that the death-rate for fevers to the total of population reached 16·83 *per mille*, far exceeding that from any other disease. Both the sanitary and medical statistics therefore combine in demonstrating that there are few problems more interesting, and more requiring satisfactory solution, than the causes and prevention of these so-called "malarious fevers." Doubtless many of the deaths recorded as from fevers were not due entirely to such diseases. For there are various maladies exciting or accompanied by fever, which in the opinions of professionally uneducated persons appear to be fever, whereas the fever is often a result; and there are various diseases commencing with fever during the course of which some other malady developing occasions the fatal result. Still the amount of pure fever prevailing and the diseases and deaths caused by the fever render its prevention and cure not even second in importance to the prevention and cure of cholera; for fever we have always with us, while cholera is often absent. If fever could be prevented, every other tropical disease would be diminished, for it is those who are debilitated by fever who fall an easy prey to other maladies and especially to bowel-complaints. If we refer to divisions of the Presidency we find the Konkan and Sind to be more productive of fevers than Gujarát and the Deccan. This at once shows that both a hot moist damp climate such as the Konkan, and a hot dry climate such as Sind, are almost equally productive of fevers. Or to take a still greater extreme, nothing can contrast more strongly than the low-lying swampy humid coast districts of the Konkan, and the dry arid sandy plains of Márwár, yet so-called malarious fevers prevail in almost equal intensity in both countries. Gujarát which in climatic characteristics approaches more towards those of the Konkan in the south, and to those of Sind and Márwár in the north, but which altogether is neither so extremely arid as the latter nor so extremely humid as the former, exhibits a smaller percentage of fevers. The Deccan, the mildest climate of all, where the heat is never so intense as in Sind, where the humidity is less than in the Konkan, and where the vicissitudes of temperature are smaller than either in the Sind cold weather or in the localities directly exposed to the diurnal sea-breeze, exhibits the smallest proportions of malarious fever. Such facts evidence that so-called malarious fevers are intimately associated with climatic conditions. It has long been taught that so-called malarious fevers originate from malaria, a poison presumed to emanate from the ground and especially from marshy ground. But malaria is invisible, imponderable, and not recognizable by any chemical or other test. All that we are taught regarding the characteristics and habitat of malaria has been deduced by inference from presumed consequences. Recognizable causes of disease may be fairly pitted against hypothetical malaria as the excitants of fever. If we are to insist on the removal of malaria from the surface of the whole country by cultivation and perfect drainage, the panaceas given for malaria, the position is hopeless. If we are to insist on the removal of recognizable causes of disease, the position is more hopeful. Such recognizable causes are in the main, bad food and water, insufficient clothing, bad and damp housing, deficient conservancy and habitual exposure to vicissitudes of temperature, the latter fertile cause being due in a great measure to native habits and customs. The general progress of civilization and education in hygiene will only effectually combat these causes of disease and hygiene ought to be taught in every school in the land. In the meantime the distribution of cinchona alkaloids or even of quinine is not of great utility unless the people understood the desirability of using these drugs as prophylactic instead of as curative agents.

Venereal disease.

The numbers treated for syphilis were 19,960 in 1884, 18,782 in 1885, and during the last year 18,631. This includes both primary and secondary disease. But it does not include the large number of maladies which arise from, or are aggravated by, syphilis. If all the diseases which syphilis aggravates were enumerated, nearly the whole of the ills afflicting humanity would find a place; while venereal itself causes blindness, aneurisms, paralysis, liver disease and various other affections ordinarily supposed to originate from totally different causes. How venereal is to be lessened throughout the land I do not know. Measures for the protection of those particular sections of society who can be more or less protected meet with opposition on mistaken moral grounds and in ignorance of the dire results of the malady. It were well if opposers were acquainted with these results; if they saw syphilitic sufferers in the different stages of the malady and of the maladies it induces, and if they recognized the fact that there is danger not only to the living but to unborn generations; then perhaps honest endeavours of prevention would meet with that sympathy which want of information directs in a different course. Of the total number of cases treated during 1886 there were 3,260 in the Konkan districts, 6,346 in the Deccan, 6,650 in Gujarát, 2,067 in Sind and 308 in foreign institutions. Of the cases occurring in the Konkan 1,945 were registered in Bombay. If gonorrhœa is added to syphilis the total treated is 34,221 or 2·1 per cent. of the total treated against 32,524 or 2 per cent. in the previous year. The percentages to treated in the provinces of the Presidency were 2·3 in the Konkan against 2·1 in 1885, 1·7 in the Deccan against 1·6, 2·4 in Gujarát against 2·2, 2·4 in Sind against 2·4, and 2·7 at foreign institutions against 2·1.

Leprsoy.

Last year there were 1,204 cases of leprosy treated against 1,240 for the previous twelve months. Of course the largest number was treated in the Leper Asylum at Ratnágiri, at Ahmedabad, and in the leper ward of the Jamsetji Jijibhái Hospital. This is a very small proportion of the lepers of the Bombay Presidency, where exclusive of the city of Bombay there is computed to be upwards of 10,000 lepers. But if there were a larger number of asylums it may be doubted if full advantage would be taken of them. If, as is often the case, the malady is chronic, and does not entail great suffering, most lepers would, I believe, rather endure the disease which enables them to obtain a living as mendicants than be free from it on condition of working. Our experience at Ratnágiri is, that many, while taking advantage of the asylum during the wet weather, prefer their liberty and the rôle of begging during the remainder of the year. Experience also shows that while a leper may not be cured the malady may be arrested by treatment combined with good food. The difference being that the cachectic leper becomes a robust leper, but he remains a leper still. The connection between syphilis and leprosy has long been a mute point, for the effects on various organs are much the same, and some have considered the latter an hereditary form of the former. This is a question which materially affects preventive measures. The segregation of all lepers has been advocated by the establishment of leper villages, but I am inclined to believe that the diminution of leprosy is rather to be sought for by the progress of sanitation generally, in which I include the cheapening of salt, the supply of pure water, the prevention of scarcity and measures against the spread of the venereal. I may mention incidentally that leprosy has been attributed to a fish diet, but in the report of the Ratnágiri asylum it is noted that most of the patients were cultivators from the interior, and only one a fisherman—the class who may be presumed to consume the most fish diet.

Statement No. III., Order B.

Constitutional Diseases contain a column headed "other diseases of this order." Among other diseases is included one of very great importance, namely, scurvy. Of scurvy I find there were 2,106 cases returned as treated during the year. The largest number of cases under this head occurred at Lárkhána (156), Bushire (152), J. J. Hospital (83), Kolhápur (36), Baichardas Dispensary (68), and Civil Hospital, Aden (21). This does not however by any means represent the amount of scurvy which prevails. Wherever there exists a soil highly impregnated with saline material, especially in the sandy districts and on arid and sandy sea coasts, there the scorbutic diathesis will be found to prevail. It may not display itself by the swollen spongy gums, the petechiæ, and the indurations of the confirmed disease. On the contrary it usually remains latent, but when the scorbutic taint is so present, it like

syphilis influences all diseases which may affect the individual, obscuring and masking and preventing the cure of those ailments which belong to medicine, and aggravating all surgical complaints. Very large numbers of natives are affected by this scurvy taint either entirely latent, or presenting insignificant manifestations, and their diseases will not be cured until the scurvy taint is attacked. The principal cause of scurvy is a deficiency of fresh vegetable food in the diet, hence it chiefly prevails in those arid regions previously noted where fresh vegetable food is least abundant. The necessity of a due proportion of fresh vegetable matter is another subject which might well be taught in the schools, together with the names of those vegetables which possess antiscorbutic properties.

Respiratory affections.

The number treated of this class of disorders was 85,717 for 1885 against 92,328 for 1886, the latter number being 5·7 per cent. of the total. Such affections include bronchitis, pleuritis, inflammation of the lungs, phthisis. I remember the time when, excepting by medical officers acquainted with India, affections of the respiratory organs were ignorantly supposed to be rare in this hot country. The reverse however is the case, and the reason is not uncertain. The majority of respiratory affections are caused by exposure to vicissitudes of temperature and exposure among natives has been already noted as a cause of disease in the observations made under malarious fevers. Why one person suffers from fevers, another from pleurisy, a third from inflammation of the lungs, and another perhaps from rheumatism as the result of a similar exposure, must be attributed to local organic weaknesses, and to peculiarities of temperament and constitution. The result perhaps in a great measure of hereditary tendency to disease. The means of preventing respiratory affections is avoiding chills.

Rheumatic affections.

There is always a large number of rheumatic affections. In 1884 there were 44,860 cases, in 1885, 47,294, for the last twelve months 48,148. If rheumatic affections be not syphilitic, they are usually the result of exposure and remarks as above apply.

Dysentery and diarrhœa.

In 1885 there were 28,834 cases of dysentery and 41,305 of diarrhœa against 27,077 of the former and 41,303 of the latter for the past year. The dysentery which natives suffer from arises in the first instance principally from exposure although it is often aggravated by the latent scorbutic taint previously referred to. The diarrhœa also arises from cold and often from improper food.

Intestinal parasites.

In 1884 there were 115,276 of these cases or 7·7 per cent. of the total. In 1885 there were 134,399 or 8·3 per cent. of the total. In 1886 there were 141,017 such cases or 8·7 per cent. of the total. These worms are the round variety, *ascaris lumbricoides*, and patients, especially children, sometimes pass large quantities. Doubtless mistakes in diagnosis are sometimes made, for one cannot be certain that worms are present without ocular demonstration. The presence of this class of parasites is however sufficiently often proved to leave no doubt as to their extreme prevalence in certain districts. They abound in the Konkan where 33,092 cases were treated, and they also prevail in the Deccan where 81,270 cases presented. The great helminthologist, the late Mr. Cobbold, considered it certain that the common round worm completes its life cycle without the necessity of having to pass through the body of any intermediary animal as the tape worm passes, and that when round worms occur in fish or animals they develope from the ova being swallowed as they do in human beings. There is reason to believe the ova are introduced through the media of insufficiently washed vegetables. Vegetables are more abundant in those districts where round worms prevail, the malady becoming less prevalent as the drier interior tracts are reached, thus corresponding with the presence of worms. In various parts the people believe the use of the jack fruit causes worms. Worms are not the unimportant malady which many believe them to be. In addition to the distressing symptoms they excite, they are often the concealed cause of anæmia, of atrophy in children, of convulsions, of semi-paralysis, and even assist in the development of cholera when that disease is localized. Fortunately we have several efficacious remedies and the people ask for worm medicines with the same confidence as they require quinine.

Skin-diseases.

The number of skin-diseases treated was 228,326 or 14·2 per cent. as compared with 233,139 or 14·5 per cent. for 1885 of the total treated. These maladies are very prevalent everywhere, most so in Gujarát where they furnished 17·4 per cent. of the cases admitted, and least so in Sind where the percentage was 5·7. All kinds of cutaneous affections are included under the term skin-diseases. Among the most common are the different kinds of tinea or ringworm of the scalp and body known among the people as *dad* or *dadru*. Pityriasis known as *senwha* or *chulee* is also very common.

Diseases of the eye.

The number of eye diseases treated was 168,613 or 10·5 per cent. as compared with 163,278 or 10·2 per cent. in 1885. Relatively these diseases are most frequent in the Deccan and in Sind where they furnish 13·4 and 13·6 respectively of the total number of cases treated.

Diseases of the ear.

The number of these diseases treated was 46,609 or 2·9 per cent. of the total as compared with 42,027 or 2·6 relatively in the previous year. These diseases are respectively more frequent in Sind 4·2, and in Gujarát 3·9 per cent. of the total treated.

Major surgical operations.

14. In Statement No. III A. is given the number and results of major surgical operations under treatment during the year. On the 1st January 1886 there remained under treatment 128 cases, 4,579 operations were performed, making a total treated of 4,707 against 4,220 in the previous year. Of these 4122 were "cured," 192 were "relieved," 79 were "discharged otherwise," 186 "died" and 128 remained under treatment. According to provinces 2,038 were performed in the Konkan including 1,844 in Bombay City, 1,098 in the Deccan, 801 in Gujarát, 699 in Sind, and 71 in foreign institutions. Of the total number 3,478 were performed in civil hospitals and 1,229 in dispensaries. Of the operations performed during the year 1,506 were upon the eye and its appendage and of these 1,298 were performed at the Cowasji Jehangier Ophthalmic Hospital, Bombay. Of operations on joints 471 were performed, chiefly reduction of dislocations, including 136 of the jaw, 113 of the shoulder, 105 of the elbow and 16 of the hip. There were 304 amputations, including 1 at the hip-joint, 7 at the shoulder-joint, 13 of the thigh, 23 of the arm, 67 of the leg and 30 of the forearm. There were 621 opertations for stone in the bladder, including 554 cases of lithotomy with 50 deaths. The proportionate number of important surgical operations differs considerably at different institutions. I recollect under another Government an attempt being made to gauge the acquirements, skill and attention of medical officers by the number of important surgical operations they performed. This, however, is not a satisfactory procedure. For first, the bent of all medical officers' minds do not incline them all to the practice of surgery and under such inclinations one officer seeks for surgical cases, while another is content to take what may present. We cannot insist on all men being extraordinarily skilful surgeons. Again the amount of major surgery which presents at different places rests with the occupation of the people and with the characteristics of the country. For instance, where there are works and factories of various kinds accidents will afford surgical cases. Where the fungus (Chionyphe Carteri) causing fungus foot disease flourishes, cases of mycetoma will demand operation. Where excess of lime exists in the water, stone in the bladder will abound. It is quite sufficient in considering the amount of major surgery at different hospitals if it is ascertained that the advent of a fresh officer has not been followed by any decided reduction in the amount of surgical relief afforded. This has not been the case in any of the hospitals. The Jamsetji Jijibhai Hospital, Bombay, as a matter of course, shows the largest number of important surgical operations; but as regards some particular operations there are more performed at other place—for stone in the bladder, for instance, of which 176 were removed at Hyderabad, Sind, 56 at Ahmedabad, 47 at Dhulia with a remarkably good percentage of success, patients being thus restored to health from lingering suffering which otherwise would have terminated fatally.

15. Of the total number 734,631 were males, 288,379 females and 590,111 children against 734,096 males, 284,564 females and 587,308 children for 1885. The following table exhibits the ratio per cent. of men, women and children treated at the institutions in the different provinces of the Presidency during the past 2 years :—

Statement No. IV.—Sex, caste, &c. of patients.

	Men.		Women.		Children.	
	1885.	1886.	1885.	1886.	1885.	1886.
Konkan	47·7	46·9	18·2	18·8	34·1	34·3
Deccan	41·9	42·7	16·8	16·6	41·3	40·7
Gujarát	44·1	43·6	19·8	19·8	36·1	36·6
Sind	56·1	54·8	14·7	16·1	29·2	29·1
Foreign	61·5	65·2	20·0	17·8	18·5	17·0
Total ...	45·7	45·5	17·7	17·9	36·6	36·6

The percentage of women to total treated remains the same in the Konkan and Gujarát; it has diminished slightly in the Deccan and considerably in foreign institutions, but in Sind there is good increase.

The attendance of women shows considerable variation at different institutions. Thus it is as high as 41·6 per cent. of daily average attendance at the Victoria Dispensary, Navsári, 31·2 at Ránder, 29·3 at Bhiwndi, 27·9 at the Párakh Dispensary, Surat, and 27·4 at Bassein; and as low as 7·9 at Hála, 8·8 at Bhadgaon, 10·6 at Kotri, 11 at Khipra and 11·5 at Gokák. The caste of the patients was as follows :—69 per cent. were Hindus, 24·6 Mahomedans, 2·5 Native Christians, 2·2 Pársis, 0·5 Europeans, 0·3 Eurasians and 0·9 other castes.

16. The total income for the year was Rs. 11,59,309-4-8. Deducting from this the cash balance in hand on 1st January, the net income was Rs. 10,45,010-9-3 as compared with Rs. 10,14,360-8-3 in the previous year. The amount contributed by Government was Rs. 7,83,229-0-2, and that from Local and Municipal Funds and other miscellaneous sources was Rs. 2,35,562-3-7. The interest on invested capital amounted to Rs. 15,223-8-5, and subscriptions from Europeans to Rs. 854 and from Natives to Rs. 8,141-13-1. The expenditure, after deducting sums remitted to the treasury on account of paying patients, &c., Rs. 34,000-3-3, and the amount invested during the year, Rs. 12,775, amounts to Rs. 9,79,209-2-4 against Rs. 9,65,445-9-2 in the previous year. The increase is chiefly on account of establishments, European medicines and miscellaneous charges; there is a decrease on bázár medicines, diets, and repairs. The total spent on diets was about Rs. 1,000 less than in 1885, and the contract being still more favourable, it is anticipated there will be still further reduction. The average cost of each patient was Re. 0-11-1 against Re. 0-10-10 in the year 1885. According to provinces the cost per patient is shown in the following table :—

Statement No. V., Part I—Income and Expenditure.

Province.	1886.			1885.		
	Rs.	a.	p.	Rs.	a.	p.
Konkan	1	7	5	1	8	2
Deccan	0	7	8	0	7	3
Gujarát	0	6	4	0	6	3
Sind	0	9	1	0	7	11
Foreign	2	4	2	2	6	5

The percentage of total cost paid by Government was 79·9 against 80·8 in 1885. If the cost of Native State institutions be included, the percentage paid by

Government is 73·9 against 74·4 in the previous year. The proportion paid by Government of the cost of dispensaries alone is 44·3 per cent. against 44·6 in 1885. The average cost of each diet was Re. 0-2-6, the same as in the previous year. During the year the following reductions of establishment were tentatively or permanently effected:—Lock Hospital, Rs. 12: Civil Hospital, Kárwár, Rs. 10: Civil Hospital, Ahmedabad, Rs. 18: Civil Hospital, Karáchi, Rs. 22: Shikárpur, Rs. 7; total Rs. 69. The Vengurla Civil Hospital was abolished as the municipality desired a dispensary nearest the town, and the Civil Hospital, Kotri, was made over to the Sind Railway, a town dispensary to be substituted at a considerable saving to Government.

I regret that in the accounts of several institutions discrepancies again occur between the closing balances for the previous year and the opening balances for the year under report. They are as under:—

	Balance on 31st December 1885.	Balance on 1st January 1886.
	Rs. a. p.	Rs. a. p.
Gokuldas Tejpal Hospital	3,257 8 11	.....
C. D. Petit Dispensary, Umbargaon	921 15 1	494 12 8
Sassoon General Hospital, Poona	10,253 14 11	.....
Sangamner	.....	367 15 1
Málegaon	1,886 6 5	—67 0 7
Dindori	1,317 4 0	—338 8 10
Sinnar	1,334 4 6	—410 0 4
Satána	429 10 7	—213 9 0
Muddebihál	.....	159 0 4
Bágevádi	.....	170 4 9
Sindgi	.....	61 1 5
Indi	.....	374 10 10
Nadiád	241 5 0	107 11 10
Gogha	1,409 8 11	.....
Kotri	1,162 9 7	.....
Mirpur Khás	1,382 2 0	82 2 0
Mitti	291 15 0	171 15 0

As explained on former occasions there is no balance to carry forward at the Gokuldas Tejpal Hospital, the amount shown on 31st December 1885 being the unexpended balance of the grant of Rs. 36,000 received from the municipality which lapses to that body. The dispensary at Umbargaon was opened in August 1885, and in his accounts the medical officer showed the whole income for one year as having been received before the 31st December 1885, but he now states that only two instalments were received and the balance to the credit of the dispensary was only what is now stated Rs. 494-12-8. The balance shown in previous reports at the Sassoon Hospital, Poona, does not exist. This institution is maintained by Government, and there are no funds in connection with it; there therefore can be no balance. At Sangamner the discrepancy appears to have been caused by an error in the accounts, credit not having been taken for a contribution of Rs. 400 from Local Funds towards the expenses of the dispensary. At four dispensaries in the Násik Collectorate the accounts for the year 1886 show a minus opening balance instead of the considerable balances given in the previous returns. In reference to these I quote the following from the Treasury Officer, Násik: "The dispensary funds under reference were transferred to Excluded Local "Funds from 1st August 1885 under Accountant General's Circular No. 29 of "18th July 1885. Prior to the receipt of the above circular the accounts "of the aforesaid funds were maintained by the Local Fund Department to the "credit of which the sanctioned annual grant from Provincial Fund was transferred and the charges on their account were paid from Incorporated Local "Funds. On the date of the transfer of the Dispensary Funds to Excluded Local "Fund, the Local Fund Department had not only nothing to transfer in the "shape of balances in favour of dispensaries, but debit balances were shown; the "cause of this state of things was due to the non-adjustment of the annual "grant from Provincial and Local Funds at the time the transfer was made.

Málegaon.
Dindori.
Sinnar.
Satána.

"The charges in connection with dispensaries were however debited to "Excluded Local Funds till January 1886 when the Local and Provincial grants "for 1885-86 were adjusted in treasury accounts. Before January 1886, the "charges incurred were shown as minus balances for reasons stated above, *viz.*, "want of assets to cover charges. When the Hospital Assistants had sent in "their annual statements of receipts and charges for calendar year 1886 for veri- "fication, the undersigned was unable to do so, owing to the introduction of the "charges ordered by the Accountant General. The undersigned, therefore, "forwarded to each of the Hospital Assistant a statement of receipts and charges "with the opening and closing balances as ascertained from treasury accounts with "the explanation of the discrepancies between treasury and dispensary figures. "The figures as per treasury accounts were then entered in the annual returns "by the Hospital Assistants."

Muddebihál. Bágevádi. Sindgi. Indi.

At four dispensaries in the Bijápur District an opening balance is shown to the credit of the institution where there was no closing balance at the end of 1885. In reply to a reference the Treasury Officer says: "Hitherto the "balances of the dispensary funds were included in the "balance at the credit of the District Local Board. But "since the above change in the system it was deemed necessary to strike out "balances of each fund separately. The Hospital Assistant should therefore "insert this office figures of receipts and expenditure in his annual accounts to "be rendered to the Surgeon General, Bombay." The discrepancies in the accounts of these dispensaries and of those of the Násik Collectorate appear to be due to a change in the manner of keeping accounts and to the fact that prior to August 1885 no separate accounts for dispensaries were kept.

In the case of the Nadiád Dispensary there was an error in the accounts for the previous year. At Gogha also there was an error of account, the medical officer having supposed that the Government and Municipal grants were paid before the 31st December 1885, while such was not the case. With regard to Kotri the Deputy Surgeon General, Sind, reports: "The railway contribution "has been received on one side of the account and not disbursed on the other as "it should have been when paid into the treasury by the railway. As a matter "of fact there never was any balance."

The discrepancy at Mirpur Khás was due to the sum of Rs. 1,300 being included in the cash balance on 31st December 1885, when in reality that sum had been invested, and should have been shown as invested capital. The error in the return of the Dispensary at Mitti arose from the fact that the Hospital Assistant entered Rs. 120 which were actually drawn in January 1886 in the cash account for 1885.

17. *Invested Capital.*—On the 1st January 1886 there was a balance, Rs. 3,49,700, the sum of Rs. 12,775 was invested during the year, Rs. 2,000 was withdrawn at Bassein, leaving Rs. 3,60,475 invested at the close of the year. The opening balance for the year under review exceeds the closing balance given in the report for 1885 by Rs. 1,800; the discrepancy is explained that at Yellápur Rs. 500 were invested but not shown in the returns, and at Mirpur Khás Rs. 1,500 were shown whereas the real amount invested was Rs. 2,800.

Statement No. V., Part II.

18. *Appendix No. IV.*—Contains statements regarding persons treated at the Police, Railway, Telegraph Dispensaries maintained for the benefit of Government servants and not included in the general report of the department. The table shows that there were 2,031 in-patients and 19,827 out-patients treated at the institutions with a daily average attendance of 62·4 and 237·8 respectively.

19. The institutions in Sind were inspected thoroughly by Deputy Surgeon-General Pinkerton and the civil medical institutions at Aden by Deputy Surgeon-General Bruce, to whom thanks are due for their able supervision and assistance.

Inspections.

My inspection tour included the Presidency Hospitals, those in the Southern Marátha Country, Khándesh, Gujarát, the Deccan, and Ratnágiri on the Malabár Coast, and I now proceed to mention the results commencing with Bombay.

The *European General Hospital, Bombay.*—Was formally inspected in February and visited frequently. My inspection was made in company with the Physician, Surgeon-Major Hojel, and the Resident Surgeon, Surgeon Baker. I need not refer to the imperfections of this hospital, and its surroundings, as they are fully known to Government, were specially reported on by a committee during the year, and plans are now almost complete for the construction of a new hospital on a site proposed by the committee and approved by Government. So far as it can be so rendered the hospital is in excellent order, an increase in the number of patients during the year of 28·9 per cent. abundantly demonstrating the urgent need of such a hospital, the appreciation of the hospital by the classes for whom it is intended, and the careful supervision accorded to his responsible charge by the accomplished Physician, Brigade-Surgeon Hojel, also seconded by the Resident Surgeon, Surgeon Baker, who has arduous and continuous duties to perform. In the abstract of the Physician's report at page 1 will be found an expression of his high appreciation of the work of the Nursing Sisters, the Sister Superindendent, Sister Superior Gertrude Anna, in whom we all had such confidence, having, I regret to say, been obliged to leave India in December last on account of serious ill-health. A report by the Sister Superior is abstracted at page 2.

The Jamsetji Jijibhái Hospital, Bombay.—Was visited on various occasions, and formally inspected in February, in company with the 1st Physician and Principal, Grant Medical College, Brigade-Surgeon Carter, M. D. The hospital is in good order, and the administration leaves little to be desired. The buildings being constructed years back, are defective in various ways, but as the provision of a new hospital is impracticable, are made the best of. Since my last formal inspection various improvements and additions have been made. These are the completion of the fumigating chamber, completion of Nursing Sisters' quarters, completion of the female dispensary and rooms for the accommodation of senior students on duty. The principal requirements are better store-rooms, the places now used being dark, dismal and not affording sufficient space; Minton tile flooring for Nos. 5, 11, 12 and 14 wards; an improved operating theatre (*vide* abstract of Senior Surgeon's report at page 3); obstetric wards adopted to modern requirements (*vide* abstract of Obstetric Physician's report at page 4); suitable quarters for the residence of the House Surgeon and Apothecaries (brought to the notice of Government in my office letter No. 7390, dated 22nd December 1886), a better cholera ward, a fence in certain parts of the compound; sanitation of the neighbourhood on two sides of the hospital compound which is as bad as it well can be, and is probably the cause of recurring erysipelatous affections in the surgical wards (*vide* abstract of Surgeon-Major Gray's report, page 3). The proposed erection of a new chawl close to the hospital, which would add materially to the nuisances of the neighbourhood, was reported upon by a committee and communicated to Government with my letter No. 590, dated 2nd February 1887, as it appeared legal measures would be necessary to prevent this additional nuisance. One of the wants mentioned above, namely, a better cholera ward with modern appliances, will probably soon be provided, as in October last Mr. Dwárkádás Lallubhái liberally offered Rs. 10,000 for the purpose, and as there is no cost for site, the sum will probably be sufficient to secure a suitable ward instead of the present temporary shed.

Wishing to ascertain if the existence of the Kama Hospital and Jaffer Sulliman Dispensary for females had made any difference in the attendance of women at the Jamsetji Hospital, I looked up the numbers for the last four years which are as below:—

Years.	Female Patients.
1883	... 6,013
1884	... 6,429
1885	... 6,224
1886	... 5,942

Although there was a smaller female attendance last year, I do not attribute this to the attractions of the Kama Hospital, which is a long distance away. The variation as the previous year's figures evidence may be accepted as within normal limits, and something may be attributed to the transfer of the Female Out-patient Department from one side to the other of the compound (on this point I refer to remarks on the Goculdas Hospital, page 14.)

The main building of the Jamsetji Hospital is devoted to medical and surgical cases; the former being under the care of Brigade-Surgeon Carter, M.D., and the Assistant Physicians Surgeon-Major Waters and Surgeon Manser: the surgical cases being attended to by the Senior Surgeon, Surgeon-Major W. Gray, and the Junior Surgeon, Surgeon Kirtikar. It must be recollected that the J. J. Hospital is not only a Hospital, but also the school in which the numerous students of the Grant Medical College receive instruction (*vide* para. 8). The 1st Physician therefore holds a most onerous position. He is both in administrative charge of a large establishment and responsible for the proper treatment of the patients, and he has also to see that the various clinical classes are working smoothly and thoroughly. Brigade-Surgeon Carter has previously acted for lengthened periods as 1st Physician and Principal of the College, and when re-appointed in May last on the resignation of Deputy Surgeon-General Cook, it was known that the post would be filled by an officer not only skilled in the management of a large hospital, but also with reputation throughout the medical profession as a scientific physician and an ardent student in original research into the hidden causation of disease. Surgeon-Major Gray, the Senior Surgeon, is also known as a most accomplished Surgeon, and his report abstracted at page 3 evidences that under his charge the surgical division of this large hospital is increasing its longstanding reputation. But it must not be forgotten that these officers are ably seconded. The Junior Physicians and Surgeons well support the skill and ability of their senior. Surgeon-Major Waters, the 2nd Physician, is an officer of established professional reputation. Surgeon Manser, the 3rd Physician, has high professional qualifications, and is most careful and painstaking. Surgeon Kirtikar, who succeeded Surgeon Hatch as Second Surgeon in April last, has proved himself to be well fitted in every respect for the position. Under these circumstances it is not surprising that, as mentioned by Surgeon-Major Gray, "a very considerable proportion of the patients are sent to us from distant parts of the Presidency by their friends who have been successfully treated in hospital." And under such circumstances it is not surprising that the clinical teaching by the various Professors is of the most thorough character, carried on day by day in the wards with great care and patience by the Physicians and Surgeons; and as the natural consequence eagerly received and fully appreciated by the students. But in para. 8 I have stated that the teaching strength is not sufficient for the large classes of students. Some years ago in connection with this large hospital and medical school there was a minor professorship of dental surgery. But it appears to have been abolished as a saving when increasing requirements demanded the addition of another medical officer. I think this was a retrograde step. During recent years the art of dentistry, both surgical and mechanical, has made enormous advances. In Europe dentistry has been rescued from the hands of unqualified practitioners and entrusted to those who having gone through a course of necessary study and instruction receive a license to practise. The prevalent idea that the teeth of Natives in consequence of the difference in diet last longer than those of Europeans is a somewhat erroneous notion. General health depends much on the condition of the teeth. Doubtless the Professor of Surgery in the course of his lectures gives some instruction as regards surgical dentistry. But this is not sufficient for a large school, and I should be glad to see a Professor of Dentistry added to the College and a license in dentistry added to the number of qualifications. The absence of skilled dentistry is a want from which I believe European soldiers suffer much, and the periodical visits of a skilled dentist to European barracks would not be without considerable advantage to the health of the men.

The *Obstetric Institution* is separate and distinct, situated some distance from the main hospital. The defects of this institution have been frequently mentioned, and it will now suffice to say that it does not fulfil modern requirements. It was hoped that the offers of Mr. Harkisandás Narotamdás of a lákh of rupees to build a new one would not only have resulted in a better hospital, but also, by the occupation of the proposed site, in the removal of neighbouring nuisances. But it was found that taking up the ground and the buildings would cost much more than a lákh of rupees, so the best must be made of the present buildings. Owing to the actual decay and consequent unsafe

condition of the flooring in two of the obstetric wards Minton tiles were substituted, which is a great improvement. The abstract of the medical officer's report given at page 4 shows the excellent work done at this institution where both Surgeon-Major Arnott and his successor Surgeon-Major Parakh have successfully performed the most important of all operations on the female subject. The abstract also demonstrates that the obstetric institution is popular among certain classes of females. In addition to the report Surgeon-Major Parakh has submitted a "History of important cases treated at the Obstetric Institution," and this I have forwarded to the "Bombay Medical and Physical Society."

The *Cowasji Jehangir Ophthalmic Hospital*, under the charge of Surgeon Boyd, was also inspected. The abstract of the Ophthalmic Surgeon's report given at page 4 shows that although another Ophthalmic Hospital has been recently started in Girgaum, there has been a large increase of patients, and also of operations. Surgeon Boyd attributes much of the popularity of this hospital to the skill and kindness of Surgeon-Major Machonachie, now on furlough, whose merits as an Ophthalmic Surgeon have been frequently acknowledged. Surgeon Boyd, however, who took charge in April last, must also be credited with attentive, careful and skilful conduct, certainly maintaining if not increasing the popularity and usefulness of this hospital, as from his able work in previous positions it was expected he would do. As this hospital is so popular, and as it does so much good, it may be hoped that it will eventually be improved, one great want being an operation room in which students may see without crowding. On my visits the hospital was found clean and in good order, and the patients seemed evidently thankful for the prospect afforded them of recovery of sight, a prospect, the brighter, from actual recoveries taking place within their cognizance.

The *Goculdass Tejpall Hospital* was also visited on various occasions and formally inspected in February. When Brigade-Surgeon Carter succeeded Deputy Surgeon-General Cook in May at the Jamsetji Hospital, Surgeon-Major Arnott took charge of the Goculdass, and at the very end of the year he was succeeded by Surgeon-Major Parakh. The reputation of this hospital under Brigade-Surgeon Carter has been well supported by his successors. But as often mentioned before there is ample scope for a second medical officer at this hospital. The total treated during last year was 20,743, a larger number by about 500 than even treated at the Goculdass before. This may be regarded as evidencing growing confidence in the hospital by the poor, as the neighbouring locality, always thickly inhabited, cannot be much increased in population. Requirements which may be noted are a laundry, a permanent compound enclosure, a better dispensary, isolation wards, quarters for Nursing Sisters.

I mention in connection with this hospital that although the Kama Hospital for females was opened in July last in the immediate locality, and although the Jaffer Sulliman Dispensary for females has been some time working not far away, the attendance of females at the Goculdass has increased, the numbers for four years being as below :—

Years.	Attendance of Females.
1883	... 2,916
1884	... 3,204
1885	... 3,068
1886	... 3,230

Kama Hospital for Females.—To the cost of constructing this hospital Mr. Pestonji Hormasji Kama liberally contributed Rs. 1,64,311. The first stone was laid by His Royal Highness the Duke of Connaught on 22nd November 1883. The institution was opened by His Excellency Lord Reay on 30th July 1886. A sum of Rs. 5,000 granted under Government Resolution No. 814 dated 23rd March 1886, Financial Department, has been expended in furniture, the provision of which was supervised by a Committee under the Presidentship of Surgeon-Major Gray, who deserves credit for the trouble taken. As soon as possible the patients at the temporary Female Hospital at Khetvádi, originated and conducted by the "Committee of the Medical Women for India Fund," were transferred to the Kama Hospital, and the temporary Khetvádi Hospital was closed. The Kama Hospital

was formally inspected in March of the present year, and I was much pleased with the order and regularity prevailing. Dr. Pechey's report will be found at page 5 where several wants are noticed—the building of quarters for pupil nurses from Lady Reay's Fund is reported—and the services rendered by the Sisters of all Saints in taking charge of the nursing are acknowledged, which I endorse. Dr. Pechey remarks that it is much to be hoped an Endowment Fund will be formed to supplement the Government grant: and this is a desideratum which should be prominently noticed. Government are well aware of the interest Dr. Pechey has taken in this hospital. But only the Surgeon-General can fully appreciate the trouble it has been to her, not only in filling the hospital with means, appliances, servants and patients removed from the temporary hospital at Khetvádi, but also in acquiring the information necessary to work the hospital since it was taken over by Government in accordance with the requirements of the Medical Department. Dr. Pechey has now, in addition to known high professional attainments, the claims to be regarded as successful in hospital administration. Dr. Ellaby, the Second Physician, has ably seconded Dr. Pechey in the care of the patients.

The *Sassoon Hospital, Poona,* was visited on various occasions and formally inspected in September. The urgent want of a suitable building for infectious diseases has now been met, and the laying on of water has recently been sanctioned. A building is also in progress for the accommodation of Nursing Sisters. More ground must be taken up for the consequent re-arrangement of out-buildings, a necessity which has been represented to Government. An application for an out-patient department could not be met. But as observed last year, the present arrangements are highly objectionable, and it is hoped that when funds are available an out-patient dispensary may be provided near the compound gate, to obviate the present crowding of out-patients in the verandahs of the hospital which interferes with the conduct of work and is an annoyance to the in-door patients. Two small wards require ceiling, and better arrangements for the Hospital Dispensary are desirable. The hospital is in capable hands under the direction of Surgeon-Major Cook, seconded by the Assistant Civil Surgeon Eaton. Surgeon-Major Cook's responsibility is further increased by the superintendency of the attached medical school (*vide* paragraph 5) in which both officers lecture.

The *Poona City Dispensary* was visited twice. The building is a very poor one, and the sanitary condition is bad from inherent defects of site and construction. Such a city as Poona should have a better dispensary. The Assistant Surgeon, latterly given the distinction of Ráo Bahádur, Vishram Ramji Golay is a capable medical officer and makes the best of his position.

I proceeded to the Southern Marátha Country towards the end of November, my first inspection being Sholápur on the 25th of the month. Various requirements at the Sholápur Civil Hospital were noted last year, none of which have been supplied excepting the boarding of the cells used for lunatics. In order to render this hospital satisfactory the following are essential: an operating and examining room, stone-flooring instead of mud, cloth ceiling under the thatched roof of two wards, proper fittings for the dead-house, bath-rooms, detached ward for infectious diseases, presses for stores and clothing, quarters for medical pupils. The establishment should also be increased by a ward servant, a dhobi and a female attendant. The hospital has been all the year in the charge of Apothecary W. R. Scorggie, M.R.C.S., England, who during the time conducted his duties satisfactorily.

I also visited the Sholápur City Dispensary in the charge of a capable Hospital Assistant of the First Grade, Mr. Hanmantráo Gorpade. This dispensary is supported entirely by the municipality. The establishment consisted of the 1st Grade Hospital Assistant named above and a passed medical pupil. But on the publication of Government Resolution No. 1853, General Department, dated 25th May 1886, sanctioning a revision of the subordinate medical service, the passed pupil was promoted to 3rd Grade Hospital Assistant, and passed medical pupils now by the order quoted above forming the reserve for temporary duty, another could not be supplied permanently to the Sholápur Dispensary. First, for a long time, the municipality refused to disburse the increase of pay to the 3rd

Class Hospital Assistant, and when made to understand a passed pupil could not be again supplied, they required the removal of the 3rd Class Hospital Assistant, and notwithstanding remonstrance, they insisted upon it. The average daily attendance at this dispensary is 112·2.

The following remarks were placed on the visitors' book :—

"Visited the Dispensary, which, judging from the number of patients present, about 100, and from the records, is popular. I have already elsewhere expressed my decided opinion that one medical officer is not sufficient for this dispensary. But the municipality declined to pay a 3rd Class Hospital Assistant (instead of a passed medical pupil no longer available) who was therefore removed. I am sorry that for the sake of 9 rupees per month the municipality allow the efficiency of the institution, which is so popular, to be impaired, which must be the inevitable result. It is impossible for one man to attend to all the patients, and the result will be that many will be attended to by an unqualified compounder. The committee consider themselves best qualified to judge of the wants of a dispensary, and with this assumption I do not agree. I noticed the condition of the latrine last year, and now remark that it is disgraceful. A proper receptacle should be provided for the cook-house refuse. At present there is a broken iron pipe and a hole in the ground. There should be an iron vessel which may be removed and emptied."

From Sholápur I proceeded to the next station, Bijápur. At the beginning of the year Bijápur was in charge of Assistant Surgeon K. S. Engineer, a capable officer, the incumbent Surgeon-Major Peters being in Burmah. But Assistant Surgeon Engineer was required to take up his duties as one of the lecturers at the new Veterinary College; and he was succeeded by Assistant Surgeon D. E. Kothawala, who has performed the duties satisfactorily. The building of the new Bijápur Hospital is making progress. At present the old dispensary is used as a hospital, and from want of room the police are treated in their own lines. Heavy rains in October at Bijápur and the surrounding districts resulted in much sickness, especially febrile, towards the end of the year.

My next inspection was Dhárwár on December the 1st and 2nd. Surgeon-Major McConaghy, the Civil Surgeon, proceeding on furlough in April 1886, was relieved by Surgeon-Major Davidson, who has been in charge ever since. The hospital is in good order, the principal requirement being better cots. The medical officer complains of inefficient establishment, requiring a compounder or Second Hospital Assistant, which if sanctioned could not be supplied in consequence of other more urgent demands. It affords me pleasure to mention the excellent order maintained in all his various charges by Surgeon-Major Davidson.

Proceeding from Dhárwár to Belgaum by road this hospital was inspected on the 4th of December. The Civil Station has been all the year under Surgeon-Major Hughes, a careful and capable officer. The hospital cannot be regarded as satisfactory and the defects are noted in the medical officer's report at page 28. So far as may be, the hospital is in good order. With the advent of the railway to Belgaum accommodation in some shape or other will be demanded for European patients.

The *Belgaum City Dispensary* was also visited. The place is not suitable and must be inconvenient. A better entrance to the dispensary might be made on the closed side, but a better place altogether is desirable. The attendance at this dispensary averages 85·6. The Hospital Assistant in charge performs his duties satisfactorily.

My next inspection was Sátára, which I reached on December 12th. Surgeon Greany in charge, a most able and attentive officer, owing to the paucity of medical officers, was also attending to the Military as well as to the Civil Station. The Sátára Hospital serves its purpose, but its surroundings are sanitarily defective owing to the neighbourhood of native huts and a deep ravine. The female ward is too close to the road, and so is the dead-house.

After inspecting Sátára I spent some days in Bombay engaged in various local business and taking the opportunity of going over to Thána to make the inspection there. Surgeon Kirtikar, the Civil Surgeon, was transferred in April last as Acting Second Surgeon, Jamsetji Jijibhái Hospital, and Curator of the Museum, Grant Medical College, and he was succeeded at Thána by

Surgeon Anderson, the Civil Surgeon at Godhra. But in September last Surgeon Anderson was required for field service in Burmah and the station was taken charge of by Assistant Surgeon Barjorji Ardasir, the Medical Officer of the Thána City Dispensary. I found the Thána Hospital in good order under this officer.

The Thána Dispensary was also inspected, and a similar remark applies, but it is too near the Civil Hospital.

On the 26th of December I arrived at Surat. Since the departure of Surgeon-Major Banks on furlough in May last, the Surat Hospital has been under Khán Bahádur Assistant Surgeon Dosábhái Pestonji, Honorary Surgeon to the Viceroy and Medical Officer to the Párakh Dispensary in the city of Surat. The Surat Hospital affords excellent accommodation, and is very well kept. But the arrangements for night-use are defective, and the latrines should be stone work instead of chunam.

While at Surat the Párakh Dispensary was also inspected which is conveniently placed in the centre of the city. It is a good building and the compound has been recently much improved by extension. When funds permit the out-houses, especially the latrines, should be removed to a greater distance from the main building. As observed above, this dispensary is under Assistant Surgeon Dosábhái Pestonji. The attendance averages 137·2 daily and the female attendance is 38·4. Mr. Dosábhái is a capable medical officer, and it affords me pleasure to notice that his services have been recently recognized by the Directors of the Mission of the Presbyterean Church in Ireland, a branch of which is located at Surat. The Directors sent Mr. Dosábhái an illuminated card and a handsome silver tray "in recognition of the uniform kindness and the professional skill and attention shown to the members of the Mission at Surat in times of sickness by Mr. Dosábhái Pestonji with their cordial acknowledgment of the services and of the spirit in which they were rendered." Mr. Dosábhái has recently been given the distinction of Khán Bahádur.

On leaving Surat I went to Broach which was inspected on December the 29th. Like various other stations this year it was under the charge of an Assistant Surgeon Mr. Motivala, Surgeon-Major Keith, the Civil Surgeon, having been ordered to Burmah. I found the Broach Hospital in excellent order, the requirements being quarters for the medical subordinates, and an additional cook-room for the police.

On the evening of the 31st of December I arrived at Godhra, Panch Maháls, inspecting the hospital next day. During the greater part of the year this station has also been in charge of an Assistant Surgeon, but towards the end of the year Surgeon Nariman having returned from Burmah resumed charge. The hospital buildings are those formerly used as a dispensary before the head-quarters of the Collectorate were placed at Godhra. The pauper ward is some distance away from the main building, being the quarters formerly occupied by the Dispensary Hospital Assistant, and four or five patients only can be accommodated. A better hospital is much required at Godhra.

From Godhra I went to Ahmedabad. My first inspection at this place was the Hatteesingh Premábhái Civil Hospital and the medical school attached. Last year I noticed various defects in this hospital but means have not permitted a remedy, neither could all the defects be remedied without building a new hospital. There are however certain wants which certainly should be met. Thus, a place which would make a suitable low-caste female ward, of which there is a want, is obliged to be used as a store-room. There is no ward for Europeans and when Europeans are admitted a curtain is put up. There is no private office or examination room. There is no operating theatre and operations are performed in the dispensary which affords no accommodation for the students. There are no servants' quarters. I repeat my observation of last year—"A hospital sufficiency important to warrant the attachment of a medical school, certainly should not be stigmatised by imperfections as above".

The extra-mural extension of the hospital known as the Kagda Peth Hospital or leper asylum was also inspected. It is intended for lepers, and for contagious diseases and is suitable for both purposes. The daily average number in residence during the year was 23·8 comprising 18·8 of the leper class, and 5 from other incurable diseases, there having been no contagious epidemic demanding the place for sufferers therefrom.

The police hospital is situated some distance away close to the police lines, and is in good order.

The three dispensaries in the city of Ahmedabad were also inspected. At the Ráipur Dispensary after inspection I placed the following remarks on the visitors' book:—"Visited the dispensary and find it in good order. Number of females attending still satisfactory. As noted last year another store-room is required." At the Ranchodlál Dispensary I noted that it is in a satisfactory condition, that two new detached wards have been completed and that a second compounder has been allowed, a want which I brought to notice in the previous year. At the Baichardás Dispensary I remarked that the dispensary is in very good order, that the attendance, especially of females, is large, the total of all classes reaching in September 260 daily. There is no doubt that these three dispensaries at Ahmedabad are doing excellent work, and the Medical Officers deserve considerable credit, *viz.*, Hospital Assistant Bháu Sakhárám, Assistant Surgeon Dadachanji, and Assistant Surgeon K. B. Cooper. Mr. Dadachanji was known as a capable man from his previous work in Sind, and Mr. Cooper was similarly known from his previous work at Aden and elsewhere. The latter officer is particularly successful as a Surgeon as noted in the abstract of the Baichardás Dispensary report. At my visit there were 5 stone cases in his dispensary and there had been 26 lithotomies during the year. He also had under charge several other surgical cases of great interest.

My inspections at Ahmedabad closed with a visit to the Jail Hospital, to the Dhuliákot Jail Hospital and to the Lunatic Asylum, and I close my account by again mentioning that Surgeon-Major Robb performs all his multifarious duties honestly, zealously and efficiently.

From Ahmedabad I went to Kaira where the Civil Hospital is in charge of Assistant Surgeon Khandvala, Surgeon Davidson, the Civil Surgeon, having also been ordered to Burmah. This hospital is a fairly satisfactory one and it is in good order, quarters for medical subordinates, windows for the wards, and ventilation of the dead-house, being the principal requirements.

Returning from Kaira I called at the Mehmadabad Dispensary. It is noted that a small ward for females is here wanted, and also better accommodation for the Hospital Assistant.

After returning from Gujarát I found it again necessary to pass a few days on Bombay business connected with the Lock Hospital and other subjects demanding attention, but as soon as possible I proceeded to Násik, Ahmednagar and Dhulia.

Dhulia Hospital.—Was at the commencement of the year in the charge of Surgeon Boyd who in April was transferred to act as Ophthalmic Surgeon in Bombay. He was succeeded by Surgeon Sargent who falling sick was succeeded by Surgeon-Major Murphy, who when required for his substantive appointment as Superintendent of Mahábaleshvar was replaced at Dhulia by Assistant Surgeon M. M. Modi. Notwithstanding all these changes I had no fault to find in the Dhulia Hospital. It is an excellent building with every convenience, having been built for a Military Hospital. But it is too far away from the town and therefore the attendance of out-patients is limited. This gave rise to the establishment of a dispensary more conveniently situated. There never was any large attendance of out-patients at this hospital, the daily average before the dispensary was opened a couple of years back being 25, and since the dispensary was opened 17. All the out-patients come from villages to the north or west and not from the town side. There is a good site for a hospital near the dispensary, and if the present hospital could be otherwise utilized and a new one

built, there would be no necessity to maintain a dispensary. Since Assistant Surgeon Modi has been in charge he has had 17 stone cases, all successful, 5 of which I saw in hospital.

The Dispensary at Dhulia.—Is an unpretentious building, formerly a dwelling house. It was inspected and found working satisfactorily with an average attendance of 52·8 daily.

At Ahmednagar.—The station was in charge of Surgeon-Major Guinness, Army Medical Staff, in addition to his own duties. This resulted from Surgeon-Major Batty, the Civil Surgeon, having been ordered in December last on field service to Burmah. There is too much work for one officer at Ahmednagar, the Civil charges, jail and hospital, being far removed from the Military cantonments, and as soon as possible another officer was sent. The Ahmednagar Civil Hospital is quite unfitted for the purpose, but as a new hospital is advancing towards completion, it is needless saying more on this subject. I inspected the works at the new hospital, and I am sorry to observe that my observations on this site, several times repeated, have not been attended to. In my last report I wrote: "unless certain buildings are taken in, I fear it will be cramped, which opinion was expressed to the Collector." I now find that the west corner of the new hospital is about 12 yards from projecting mud buildings, the west side about the same distance from the servants' quarters, the east side about the same distance from projecting buildings, while an old building in front is to be converted into Hospital Assistant's quarters. All this cannot fail to be in the future grave defects.

Of Násik.—I have nothing to say except that the hospital is an old native house quite unsuited for a hospital, that during the rains it became unsafe, and that I fear it must be vacated. But the Civil Surgeon cannot find any other suitable building. The abstract at page 18 of Surgeon-Major DeTatham's excellent report mentions this, while the report itself maintains the established reputation of this officer. He has taken considerable interest in the supply of clothing for in-door patients, and managed to procure some excellent blankets, sold when not wanted, from the neighbouring Military Depôt, Devláli.

I next proceeded to Ratnágiri inspecting the Civil Hospital, Jail Hospital, Lunatic Asylum, and Leper Asylum, on the 7th and 8th of February 1887. The hospital is in good order, and the requirements are servants' quarters, a waiting room and private office. The Civil Hospital is at a considerable distance from the town, all up-hill. If the hospital were more conveniently situated, it would doubtless command a larger out-door attendance than the 6,559 treated last year. The Civil Station was temporarily in charge of Surgeon Collie, acting for Surgeon McCalman, on privilege leave (taken on account of sickness), and I fully appreciated the manner in which Surgeon Collie after a very short residence had made himself acquainted with the working, history and requirements of the different institutions, and the interest he took in his temporary charge.

The Ratnágiri Leper Asylum was instituted in 1874-75 and the cost of buildings was met by a donation of Rs. 15,500 from Mr. Dinshaw Maneckji Petit of Bombay, the total cost being Rs. 27,000. Of this difference Rs. 13,344 was provided by public subscription and the remainder from Local Funds. A managing committee was formed at a general meeting of the subscribers which committee is still in existence. Rules were adopted by the managing committee which placed the whole onus of the institution on the Civil Surgeon, who is not only medical officer but is required to keep the accounts, registers, returns, &c. As the asylum is a considerable distance from the station of Ratnágiri some allowance ought certainly to have been given to the Civil Surgeon if only to cover cost of conveyance. Civil Surgeons have been glad to give their professional services gratuitously, but they have not appreciated administering the asylum in all its branches and maintaining additional means of conveyance. The asylum was inspected on the 6th of February. It consists of wards well adapted for the purpose, and it can accommodate 100 persons. At the period of my visit there were 27 males and 9 females, total 36. As mentioned in the remarks on leprosy, paragraph 13, the monsoon is the period when lepers most appreciate the asylum. Nearly all the cases at my visit were leprosy in an advanced stage.

The site of this asylum is elevated sheet rock, so that it is bleak and exposed. Holes have been made in the rock for the purpose of planting trees, but it is doubtful if they will grow well. There are various requirements, as for instance, houses for the peon and mether, which are being provided. During the year some other small requirements have been met, such as the repair of the cook-house and a stone gutter to the bath-room. More cots and tapes are wanted for those lepers who, in consequence of the disease, cannot sleep on the stone and mud bunks. The diet has recently been improved by the addition of more nitrogenous element. Current expenditure is met by Local Funds grant of Rs. 2,500 and Government grant up to Rs. 2,000 as per Government Resolution No. 66 of 19th January 1877, Financial Department, and No. 2585 of 8th July 1873, Financial Department.

20. Several improvements were noted last year as made in the *Civil Hospital, Rájkot*, chiefly from the energetic superintendence of Surgeon-Major Barker. The additions still desirable as then noticed, *viz.*, ophthalmic wards, a low-caste ward, and the enlargement of the women and children ward, are being supplied. An increased establishment was also sanctioned under Government Resolution No. 4170, dated 30th November 1886, General Department. I may refer to Surgeon-Major Barker's excellent service in connection with this hospital, which shows an annual increase of patients and of operative surgery (*vide* abstract of medical officer's report, page 48).

21. Other matters which I consider it desirable to note, with reference to various institutions, are the want of a suitable European General Hospital at Aden; pavement for the south wards of the Karáchi Hospital; better means of lighting for the Sukkur Hospital; new iron cots for the Hyderabad Hospital.

22. *Remarks on the Dispensaries.*—Some dispensaries only treat out-door patients; many of them afford accommodation for a small number of in-door patients. As a rule the larger dispensaries are officered by Assistant Surgeons, the smaller by Hospital Assistants. The dispensaries were inspected by the Civil Surgeon of the district if he could reach them in an absence of 3 days from his head-quarters, but the time has been recently extended to 4 days by Government Resolution No. 3883, dated 4th November 1886, General Department. Such dispensaries as cannot be so reached are inspected by the Deputy Sanitary Commissioner in the course of his tours. The inspection reports are forwarded to the Surgeon-General who also inspects such institutions as are in his reach during his tour of inspection of Civil Hospitals. There is also a Dispensary Committee for grant-in-aid dispensaries appointed by the District Local Board or Municipality. This committee are required to visit the institution regularly, and their duties are laid down in the Revised Rules published by Government in the General Department under date 4th of June 1884. It has been necessary during the year to propose several modifications of these rules; first, that the Surgeon-General should sanction the building proposed to be used as a dispensary, 2ndly, that certain additions should be made to the enumerated requirements for a dispensary building, *viz.*, quarters for servants, better accommodation for the Hospital Assistant in charge, a cook-room for the latter, a store-room. It has also been necessary to check the procedure of a committee on several occasions, notably when they erroneously regarded it as part of their duty to examine the instruments and medicines, and when they required the monthly contingent bills for bázár medicines sent to them for sanction instead of to the Surgeon-General. It was also found necessary to limit the occasions on which a dispensary medical officer might be called away from his duties to attend to persons elsewhere, also to intimate that dispensary committees must keep up the instruments which in the first instance are given to them by Government; as, for instance, when a committee declined to obtain a new *post-mortem* examination case on the plea that it was used for judicial work. It was also reiterated that dispensary committees must bear the grade pay of the subordinate provided or promoted, as it is impossible all institutions can be provided with one of the lowest grade and therefore least paid officer. All these matters were brought to the notice of Government from time to time. There are several other modifications of the rules desirable and which will be brought forward as occasions arise pointing to the necessity.

Although the dispensary committees in some instances may mistake their position and functions there is no doubt that in many cases they take considerable interest in the institutions as the following memorandum of the number of visits paid to different dispensaries bears witness :—

Committee visited.

As regards the dispensary statistics I think they may be trusted as fairly showing the number of patients actually attending although not as respects whether the patients were cured, relieved or died. Of course there may be instances of falsifying the returns in order to show a large attendance. But as a large attendance is not altogether taken as evidence of successful work, I therefore consider the dispensary statistics fairly represent the work done. That the dispensaries as the rule are very popular among the poorer classes admits of no doubt as any one observing the morning attendance may see for himself. And the growing system of medical relief is I believe regarded by the people as evidence of the interest taken by Government in their well-being. One thing is certain, *viz.*, that the more skilful and experienced the dispensary medical officer is, the more his services are appreciated. I have objected to the system of employing medical pupils passed or unpassed for the charge of dispensaries, although, in consequence of the smaller grade pay, desired by some committees. It should be understood that even a suitable building and a full array of instruments and medicines with an inexperienced or unskilful officer in charge, does not fulfil the purposes of a dispensary. Yet judging from the requisitions I have for subordinates of the inferior grades it would appear that committees regard the medical officer as the secondary consideration, a taint from which even European officials are not altogether free. Of course this may arise from a meritorious wish to diminish expenditure, but efficiency should be the first consideration. My desire is to see every dispensary officered by a man not only qualified to diagnose and treat an ordinary disease, but also capable of performing a capital surgical operation, and so of affording relief to a large class who now have frequently to travel to the nearest Civil Hospital. The ordinary acquirements of Hospital Assistants do not qualify them for the higher branches of either medicine or surgery, and I should wish to see a larger employment of Assistant Surgeons in charge of dispensaries. Some years back, when Deputy Surgeon General of the Presidency Division, I recollect proposing Assistant Surgeons, or at least the Licentiate of Medicine and Surgery Class from whom Assistant Surgeons are recruited, being subsidized in different villages on condition that they treated the poor gratuituously ; being in fact a modification of the English poor low medical relief system. And so long as Hospital Assistants are employed for the charge of dispensaries, I should be glad if only as the rule 1st grade and therefore the most experienced men could be so employed. And I have for some time had it in mind to limit the term of office of an Hospital Assistant in charge of a dispensary to five years, then bringing him for a period to a Civil Hospital where under the Civil Surgeon he would remove himself from the groove into which he falls by a lengthened time at an isolated dispensary, where he would see new modes of practice, and where opportunities of gauging his present acquirement would be afforded. The

under-handed condition of the service, as referred to in paragraph 24, coupled with military demands as referred to in paragraph 23, has however rendered this change hitherto impracticable.

The following table represents the numbers of inspections made by Civil Surgeons and Deputy Sanitary Commissioner of dispensaries during the year :—

Civil Surgeons (twice)	72	Dispensaries.
Do. (once)	46	do.
Deputy Sanitary Commissioners	30	do.

Twelve dispensaries in Sind and Aden were inspected by the Deputy Surgeons General, Sind and Presidency Circles.

23. From the foregoing it will be seen that there has been considerable strain on the Medical Department during the past year owing to demands for service in Burmah. The only means of relieving medical officers ordered on this duty was by substituting Assistant Surgeons. Thus we have had the following stations in charge of Assistant Surgeons during the year :—

Bijápur,	Kárwár,
Broach,	Násik,
Dhulia,	Surat,
Godhra,	Thána,
Kaira,	Shikárpur;

while the Civil and Military charges have been doubled up at Rájkot, Ahmednagar and Sátára, and this notwithstanding the fact that furlough to Indian Medical Officers was stopped. Three of the Apothecary Class were also demanded by the Military Department, and the only way of relieving them was by the employment of additional Assistant Surgeons for the stations of Dápoli, Lárkhána, and Sádra, which was sanctioned by Government Resolution No. 2024, dated 5th June 1886, General Department.

Similar strain has also prevented the full carrying out of the division of the Hospital Assistant Class into Civil and Military, for although the division was nominally affected, the Military Department have yet been unable to hand over twenty-two men, and have indeed been recently obliged to apply for 3 more who were supplied with some difficulty.

24. During the year under Government Resolution, General Department, No. 1853, dated 25th May 1886, a very desirable revision of the Subordinate Medical Department was effected. The strength of the Hospital Assistant Class as previously fixed was found inadequate to meet the increasing requirements of the service. The actual number of Hospital Assistants required for sanctioned charges was 273, but there were only 196 to meet such requirements. A system had therefore arisen of supplying passed pupils instead. This was unjust to the latter who performed the work of a higher grade while drawing the pay of a lower. It was represented that the strength of the Hospital Assistant Class should be that of the sanctioned appointments *plus* a reserve for contingencies. On reference to the Accountant General it was found that the extra expense to Government would be trifling. Accordingly sanction was given to the promotion of 53 passed pupils, while the remainder of the passed pupils were to form the reserve for employment as *locum tenens*, in times of epidemic diseases at fairs, &c. This has tended to better the condition of the lower grade of the subordinate medical service, to promote the efficiency of the service, and will attract men to the department who previously were afraid they might be kept as native medical pupils for an indefinite period until a vacancy occurred in the inadequate staff sanctioned when there were not so many charges. Yet with all this, as previously mentioned in para. 10, we have not been able to supply all needs.

25. As it is manifest the number of students entering the medical schools with the intention of Government service, will not suffice for the maintenance of a growing departmental strength consequent on continual additions to the number of institutions, endeavours have been made to obtain pupils for the different hospitals who after a course therein will be transferred to the schools, and I consider they will make better Hospital Assistants than those entering

the schools direct. This subject was brought to the notice of Government in my letter No. 5922, dated 4th November 1885. Medical pupils have been secured for the hospitals mentioned below :—

26. Hospital stoppages is another matter which has received attention during the year. At my suggestion a new scale was sanctioned for the European General Hospital (*vide* Government Resolution No. 3282, dated 16th September 1886), but it was not considered advisable to interfere with existing arrangements at other hospitals (which are those sanctioned by Government Resolution No. 3043 of 5th October 1875), and when there are few paying patients with regard to payments at dispensaries, the first Resolution quoted above mentioned that the dispensary rules require committees to frame rules on this subject, and asked what rules had been framed. This was replied to by my letter No. 7242, dated 21st December, and answered by Government Resolution No. 343, General Department, of the 31st January of the present year. Only a few dispensaries have yet framed the required rules, and I was told to request Dispensary Committees to do so, and to report the result in the next annual report. I regret I have been unable to do this as time would not allow of answers from the Dispensary Committees, some of whom have asked what rules should be passed. The matter has therefore been made the subject of separate report, for, as stated in my letter No. 7242 of December 21st, there is little desire among Dispensary Committees to frame rules on this subject and to make charges for medicine. Neither is it a matter which can be taken up without caution for in one case at least the medical officer reported that patients had ceased attending, having been led to believe they would all have to pay. This matter was again referred to Government under No. 1060, dated 26th February 1887, from this office.

27. In my last annual report I mentioned that I had devoted considerable attention to an endeavour to diminish the excessive clerical work at hospitals and dispensaries. I first called for the opinion of every officer in charge, these opinions were afterwards classified, and different subjects were considered, and a departmental Circular was issued which introducing several modifications in the departmental working has materially lessened clerical labour; this was aided by Government kindly sanctioning by Government Resolution No. 2562, dated 21st July 1886, the printing at the Central Press of forms for the record of out-door and in-door patients which occupied daily a long time in ruling and writing. I have not been quite so successful in this matter as I wished owing to various officials, municipalities, &c., wanting forms or reports which I had considered unnecessary, but I have nevertheless succeeded in materially reducing the clerical labour.

28. Many officers have been mentioned in the foregoing remarks as zealously and efficiently performing their duties. I might however have mentioned the name of every officer serving under me with more or less commendation. During the whole year I have not had occasion to reprimand or to find any serious fault with any one of the medical officers. All have done their duty, and I think all have done it well.

29. In forwarding the annual returns from Sind, Deputy Surgeon-General Pinkerton, whose opinion is entitled to the highest confidence, brings to notice the names of Surgeon-Major B. C. Keelan and Surgeon H. W. Stevenson.

"The former has a very heavy charge in Hyderabad and devotes his whole time to his public duties. He is a very successful surgical operator and performed a very large number of lithotomies with great success. The latter for a considerable part of the year had very heavy work in Jacobabad, being the only medical officer for 3 charges and has done the Civil duties very well indeed and to every one's satisfaction." The Deputy Surgeon-General in Sind also brings to notice Assistant Surgeon E. Mackenzie, T. H. Aquino and J. E. Bocarro. Of the Hospital Assistant Class he mentions 1st Class Hospital Assistant Elija Benjamin, 2nd Class Pursonsing, 3rd Class John Joel, and 3rd Class P. D. Taláti.

30. I must further remark on the manner in which the Assistant Surgeons, placed temporarily in commissioned officers' charges at the places as per margin, have acquitted themselves. These Assistant Surgeons whose names are mentioned in the abstract of the reports of medical officers were placed in charge consequent on the incumbents being required for field service in Burmah. I was scarcely surprised but very much pleased to find the hospitals in the charge of Assistant Surgeons maintained in their full efficiency, and it appeared to me that these gentlemen all felt their responsibility and were desirous of showing themselves equal to a higher charge than usually falls to the class. Further their conduct of professional work reflects credit on the teaching they received at the Grant Medical College, the thoroughness of which has been acknowledged in paragraph 6 and in my inspection report of the Jamsetji Jijibhái Hospital.

Bijápur.	Broach.
Dhulia.	Panch Maháls.
Surat.	Shikárpur.
Thána.	Kárwár.
Kaira.	Násik.

31. There are also many excellent and many more hard-working men among the Hospital Assistant class. Among various good reports submitted I may refer to the one on the new dispensary at Berbera on the Somali Coast submitted by Hospital Assistant Esoobji Salamanji and abstracted at page 61. As Hospital Assistants are frequently in independent charge I mention that the adoption of some other designation appears desirable, and the only one which seems feasible is that of Sub-Assistant Surgeon. I have elsewhere remarked, while the Hospital Assistants' pay is small, their labour is great and continuous, and much is expected from them. I may therefore express the hope that my remonstrance against the proposal of the Finance Committee to discontinue the small extra allowances drawn by some of this class may be successful (*vide* this office letter No. 240, dated 14th January 1887).

32. I now have the pleasure of noting offers made in aid of the Medical Department by Native gentlemen during the year.

Mr. Kisandás Narotamdás for the purpose of building a new Obstetric Hospital and for the diseases of women and children—one lákh of rupees.

For a cholera ward in connection with the Jamsetji Jijibhái Hospital—Mr. Dwárkadás Lallubhoy—Rs. 10,000.

For a contagious disease ward in connection with the Jamsetji Jijibhái Hospital—anonymous through Khán Bahádur Mancharji Kavasji Murzban—Rs. 60,000.

For a Female Hospital at Ahmedabad by Ráo Bahádur Ranchodlál Chhotálál, C.I.E.—Rs. 20,000.

33. Some little delay has occurred in submitting this report but it was unavoidable and entirely connected with the discrepancies between closing and opening balances referred to at page x.

I have the honour to be,

Sir,

Your most obedient Servant,

W. J. MOORE, C.I.E.,

Surgeon-General.

APPENDIX I.

SUMMARIES OF THE ANNUAL REPORTS

OF THE

CIVIL HOSPITALS AND DISPENSARIES

OF THE

BOMBAY PRESIDENCY AND SIND,

FOR THE YEAR 1886.

KONKAN.

BOMBAY CITY.

EUROPEAN GENERAL HOSPITAL.—*In charge of* Surgeon-Major A. N. HOJEL.

Conservancy and Water-supply.—The conservancy of the hospital compound is well looked after; the water-supply to the hospital continued to be the cause of so much complaint that sanction had to be obtained for the employment of a bhisti to keep the tanks in the female wards fully supplied.

Hospital Buildings.—In his report for 1885 the medical officer referred at length to the unsuitability of the present buildings. By Government Resolution No. 1565, dated May 1st, 1886, General Department, a committee was appointed to report on certain points connected with the proposed reconstruction of the hospital. Plans were prepared and are now under consideration.

General Health.—During the whole year the health of the city has been very good as regards Europeans. There were no epidemics and the admissions for small-pox and measles few, *viz.* 4 and 10.

Attendance of Patients.—1,576 in-door patients against 1,433 in 1885 and 1,824 out-patients against 1,194 for 1885 were treated, making a grand total of 3,400, showing an excess of 773 or 28·9 per cent. over the previous year, the increase being mostly in the out-patient class. Of the in-door patients 1,151 were males, 321 females and 104 children, 1,226 being Europeans, 307 Eurasians and 43 others.

Prevailing Diseases.—The percentage of the more common diseases compared with 1885 is as per margin. The admissions under the head Enteric Fever were fewer in number, *viz.* 12, with three deaths, against 22 with one death last year. Syphilis shows an increase. Diseases of the liver yielded more than double. On the other hand, poisoning by alcohol showed a marked reduction, *viz.* 81 against 124. The admissions during the year into the obstetric ward were 64 as compared with 41 in 1885 and the actual number of deliveries were 50 against 32 in 1885. Only one operation in midwifery was required.

	1885.	1886.
Malarial fevers	9·1	13·0
Dysentery	3·0	2·1
Phthisis	1·5	2·7
Rheumatism	3·0	3·6
Diarrhœa	3·9	4·6

Surgical Operations.—Twelve major operations were performed. The medical officer remarks it was not considered necessary to count as separate operations some cases in which aspiration of the liver and of the different serous cavities was performed more than once.

Mortality and its Causes.—Seventy deaths against 81 in 1885 occurred during the year, being a percentage of 4·4 on the total treated. The largest number of deaths (6) occurred from phthisis, the next largest number (5) from pneumonia, and 4 from abscess of the liver; 3 deaths took place from each of the following causes, enteric fever, secondary syphilis, meningitis, sunstroke, and two from remittent fever, erysipelas, cancer, convulsions, valvular heart-disease, aortic aneurism, gangrene of the lung, Bright's disease, debility, burns. The remaining deaths resulted from various causes, 3 being from accident. Of the total 13 died within 24 hours, 4 within 48 hours, and 5 within 72 hours after admission.

Conduct of Establishment.—The Physician in charge states that the Apothecary Mr. Church continues to merit the favourable reports that have been previously made. Mr. Machado, the Assistant Apothecary, is mentioned as painstaking and efficient. Surgeon-Major Hojel adds: "It affords me great pleasure to repeat my thanks to the Lady Superintendent and the Nursing Staff under her for the willing and efficient assistance accorded

me and for their devotion and attention to the sick in hospital." He regrets to say that "Sister Gertrude Anna, Sister Superintendent of the Nursing Staff, was obliged to leave for England in December last on account of ill-health; Sister Mary Delicia has now assumed charge."

Cost.—The total cost was Rs. 71,871-11-10 as compared with Rs. 74,961-9-0 in the previous year. The total income amounted to Rs. 29,091-13-0, out of which Rs. 15,550-11-0 were received from paying patients and Rs. 13,500 from Port Trust Fund. The cost per patient was Rs. 21-2-2.

The Sister Superintendent of Nurses forwards a report as an addendum being principally a statement of the expenditure of Rs. 4,080 granted by Government for nursing as below:—

Salary of two nurses, board, and uniform at Rs. 60 per mensem each	1,440
Salary of 3 nurses at Rs. 30 per mensem each ...	1,080
Board of 3 sisters at Rs. 18 each per mensem ...	648
Board of 1 nurse at Rs. 18	216
Cook Rs. 15, Hamál Rs. 12, Table Servant 8, Dhobi 23.	696
Total ..	4,080

The Sister Superintendent remarks that this is not the complete account of the expense of the Nursing Staff, there being still on duty at the hospital 7 nurses, besides the 2 ward sisters and the Sister Superintendent, as it is found impossible to work the Hospital efficiently with a smaller staff. The Sister Superintendent also adds "there is still increasing demand for trained nurses for the sick in private families which it is quite impossible to meet with our present staff. Several from England would be willing to join us, could we pay their passages, but the nursing fund being in debt we do not feel justified in increasing expense till that is paid off." During the past year, of the nurses who came out in December 1885, one has been married and left, and another has returned to England being unsuited to the work. Three nurses came out in 1886.

JAMSETJI JIJIBHOY HOSPITAL, BOMBAY.—Deputy Surgeon-General COOK, M.D., *First Physician* till 19th May, afterwards Brigade Surgeon H. V. CARTER, M.D.

MEDICAL SECTION.

Conservancy.—Previous regulations have continued in force and irregularities and deficiencies have been promptly brought to notice. On one occasion it was found necessary to fine the contractor for laxity in the removal of sweepings.

Water-supply.—Vehár lake water; no complaints.

Hospital Buildings.—The main buildings have been kept in good repair, and the triennial painting of wood work, &c., has been effected. Servants' quarters and offices are also in good repair. The new Nursing Sisters' quarters were made over by the Executive Engineer in October, and are now occupied: weather boards and gas fittings had to be supplemented to the original design and now the accommodation is reported as being quite comfortable. Another block of buildings consisting of female out-patient dispensary below and rooms above for the accommodation of students on duty at the hospital were finally completed towards the end of the year. The fumigation chamber has also been completed, but the First Physician remarks—"being constructed after the European model, the cost of fuel may be more than perhaps anticipated."

General Health.—Good. There has been an absence of epidemic disease during the year.

Attendance of Patients.—Of in-door patients the total treated was 5,637 as compared with 5,976 during the previous year; but on the other hand, the daily average number of sick was 393·2 as compared with 390·4. Such variations may be said to fall within normal limits. Cholera was notably rare during 1886, and this accounts for more than half of the diminution of actual numbers. Syphilis was also less common. The total number of out-patients was 28,317 as contrasted with 29,025 during the previous year, but the daily average attendance, as with the in-door patients, was greater. The diminution of total treated concerns exclusively the section of women and children, the number of males showing an increase. This may be accounted for by an inconvenient change of the female dispensary department pending the erection of the new quarters referred to under hospital buildings. It does not appear that attendance has diminished in consequence of the opening of the Cama Hospital, the in-door female patients being rather more than during 1886.

Prevailing Diseases.—There were among in-door patients, in the order named, diseases of the respiratory system, syphilis, ague, phthisis, dysentery, diseases of the skin, remittent fever, diarrhœa, paralysis, gonorrhœa and complications, hepatic abscess. The First Physician submits remarks on various diseases. Small-pox had much declined but of the few cases admitted some were serious. Ague was comparatively less. Remittent fevers were more frequent. Syphilis was less often seen, the number of cases being 276 as compared with 419 for the previous year. Among out-door patients the most common maladies were, in

the order named, fevers, skin-diseases, syphilis and gonorrhœa, diseases of the respiratory system, dyspepsia, diarrhœa, dysentery, rheumatism, ulcers, scurvy, neuralgia, phthisis.

Mortality and its Causes.—Among in-door patients there were 789 deaths or 13·9 per cent. on total treated. The causes were in the order named to total of each class treated—traumatic tetanus, phthisis, opium-poisoning, hepatic abscess, diarrhœa and enteric catarrh, dysentery, cholera, remittent fever, diseases of the respiratory system, paralysis, surgical injuries, labour, ulcers, and syphilis. The absolute number of deaths ranged from highest to lowest as follows:—Phthisis 108; other respiratory diseases 83; diarrhœa 65; dysentery 56; surgical injuries 55; remittent fever 47; paralysis 20; opium toxæmia 20; labour 12; hepatic abscess 17; and tetanus 16. The First Physician remarks: "a large proportion of the total deaths is due to disease and injury of too serious and severe a character to permit of effectual aid at the time when the patients are brought to hospital." Of the total number of deaths 177 took place within 24 hours after admission, 63 within 48, and 65 within 72 hours.

Vaccination.—Is performed at the Vaccination Station within the hospital compound by the Sanitary Department.

Medico-legal.—Of these cases there were 77, a number fully equal to the average.

Conduct of Establishment.—Various changes have taken place in the staff during the year, the most important being the retirement of Deputy Surgeon-General Cook, M.D., and Brigade-Surgeon Carter's succession as First Physician dating from the 19th of May. Surgeon Hatch went on furlough on the 30th of April and was succeeded by Surgeon Kirtikar. Surgeon-Major Bainbridge was relieved on the 4th of May by Surgeon-Major Gray returned from furlough. Surgeon-Major Arnott was relieved by Surgeon-Major Parakh on the 30th May. Apothecary W. Fearn was succeeded by Apothecary T. Gallagher as House Surgeon on the 17th of March. Various changes also took place among the Assistant Medical Officers. Brigade-Surgeon Carter states—"I have nothing but commendation to report especially as regards the efficient control exercised by Mr. Gallagher, the House Surgeon." He also commends the Apothecary Mr. Murray and the Assistant Apothecary Mr. Shephard, and the Steward Mr. Paes. "In conclusion," the First Physician adds, "it is my grateful duty to acknowledge the ready assistance always afforded to me by the Head of the Department and by my several colleagues in their never failing co-operation. Also to offer our common thanks to the ladies who give their valued help to the sick."

Cost.—So far as practicable the general expenditure has been kept under restrictive notice and as compared with 1885 a reduction in the cost per patient appears of pies 3¾. Respecting the contractors and their supplies every morning invariably the articles of daily consumption have been carefully inspected. "Strictness on these points led to several formal complaints from this office, and warnings to the contractors at fault have consequently been issued by the Surgeon-General which, if less rigorous than the fines suggested, were yet not without effect."

SURGICAL SECTION.—Surgeon-Major G. BAINBRIDGE, Acting Senior Surgeon till the 4th of May when Surgeon-Major W. GRAY, Senior Surgeon, returned from furlough.

The Senior Surgeon reports that the sanitary state of the surgical wards has been scarcely so satisfactory, as usual a mild form of erysipelas having attacked No. 2 ward in October necessitating airing, white-washing and painting. Surgeon-Major Gray states erysipelas has always hung about No. 7 ward caused probably by the proximity of the latrines and of cattle-sheds in the adjoining compound which also are responsible for the number of flies present. The following list shows the principal wounds and injuries treated. Fractures of skull 15; concussion of brain 5; injuries of the spine 16; dislocations and fractures of facial bones 4; fractured ribs 11; dislocations and fractures of upper extremity 41; of lower extremity 74; multiple injury 15; rupture of viscera 1; burns and scalds 34; wounds 143; contusion and sprains 83. Traumatic tetanus as a complication of wounds and operations has been less than previously, which the Senior Surgeon attributes to the dry antiseptic dressings now used. During the year there were 339 major and 932 minor operations. Minor operations year by year show a steady increase, and "it is satisfactory to know that a very considerable proportion of the patients are sent to us from distant parts of the Presidency by their friends who have already been successfully treated in hospital." Among the major operations were one successful disarticulation of the hip joint; three amputations of the thigh, all recoveries; twelve of the leg; and four of the foot. There were also four amputations at the shoulder joint and two of the arm which come in every case. Other operations were three amputations at the elbow, two at the wrist, two excisions of the upper jaw, one of the hip, elbow and wrist and two of the knee. The carotid and femoral arteries were ligatured for aneurism, both successfully; lateral lithotomies 30, all successful; the supra pubic operation for stone was performed in 5 cases with one death; lithotrity was successfully done in 8 cases; herniotomy, colotomy, ovariotomy, abdominal section, removal of the penis, removal of large tumours, and castration complete the list.

Respecting the operating theatre the Senior Surgeon remarks: "I have always regarded present operating theatre as badly designed and fitted, the light is bad, it is open to the public, and there is no place sufficiently near for the storage of instruments," and he suggests

that "the present operating theatre be given up for a dispensary and that No. 1 ward be fitted up as an operating theatre and instrument store." Lastly the Senior Surgeon joins with the First Physician in commending the work of the sisters of whom he cannot speak in too high terms.

OBSTETRIC SECTION.—Surgeon-Major J. ARNOTT, M.D., till May 30th, afterwards Surgeon-Major D. N. PÂRAKH.

Surgeon-Major Parakh submits a report, from which it appears that the total number of patients was 398. Of these 198 were labour, 157 gynœcological cases, and 43 came under various headings. Hindus, Native Christians and Goanese gave the greatest number of admissions. Of the labour cases 29 were premature. There were 70 cases of operative midwifery, including 21 of craniotomy, this particular operation always showing large, as women are not brought until it is the last resource. Of the craniotomy cases three died. Delivery was effected by the forceps in 20 cases, all successful. Cæsarian section was required in one instance and Porro's operation was performed in another, both ending fatally to the woman, but the child was saved in the latter case. The total number of deaths was 19, the causes being, 1 Septicæmia 7 days after delivery; 1 exhaustion two days after delivery by decapitation; 1 exhaustion after craniotomy; 1 seven days after Cæsarian section; 1 from peritonitis; 1 septicæmia after craniotomy; 2 from puerperal fever; 1 from hæmorrhage; 2 from arsenic poisoning; 1 from shock after Porro's operation; the remaining cases were principally from exhaustion.

Among the 157 gynœcological cases treated the principal were cervical endometritis, chronic metritis, ovarian tumours, pelvic cellutitis, and peritonitis, fibroid uterine tumours and polipi. "Endometritis and pelvic inflammations were most commonly met with because their causes are in operation to a marked extent in the native community, *viz.*, bad management of labour and miscarriage." In one case the operation for recto-vaginal fistula was successfully performed. There were also 8 cases of ovarian tumours admitted, of which 7 were submitted to the operation of ovariotomy, 4 being successful. Of minor operations there were 400 performed on in-door patients. The total number of out-door patients was 10,123. Among this class there were 239 minor operations.

During the year 10 women joined the obstetric institution for instruction, 4 being soldiers' wives. Of the latter two completed their 6 months' course, one was sent back as unfit, and one remains. Of the other six three were paying and three free; four passed and two remain. Dr. Parakh does not consider the 6 months' instruction to ignorant women sufficient, and proposes that the class may be abolished, now that we have lady students at the Grant Medical College.

With regard to the buildings the Obstetric Physician observes: "There is not sufficient accommodation. The out-door patients are seen in the verandah and when the verandah is filled with students there is hardly room to breathe freely." He also states an additional áyáh and sweeper are imperatively necessary. Lastly the work of the Matron Mrs. Carroll is commended.

Registrar's Report.—The Registrar, Surgeon Manser, submits a report from which it appears that 6,068 cases have been treated at the hospital at all hours of the day and night, of which a separate register is kept. If these casualties are added to the total, the inclusive number of patients dealt with during the year amounts to the large number of 40,022. By means of the register varied information is afforded, not obtainable from the ordinary returns. For instance, the incidence of disease, as regards age, caste, occupation and residence can be shown, the general outline of treatment with the result is given, the duration of disease prior to admission and the length of stay in hospital are noted, while with the aid of the register all cases in which a *post mortem* examination has been made can be traced and the result of the examination gained. The Registrar gives various tabular statements illustrating the mortality each month, the prevalence of phthisis pulmonalis among different castes, &c. One year's figures, however, are not sufficient to draw deductions from, but when the register has been kept during a series of years, very valuable information will be forthcoming.

COWASJI JEHANGIER OPHTHALMIC HOSPITAL.—*In charge of* Surgeon-Major G. A. MACHONACHIE, M.D., till may, afterwards Surgeon H. W. B. BOYD.

The main building makes good ward for males, but the female ward is defective as regards ventilation. The roof is of corrugated iron, therefore the interior is often very hot, as, to maintain the degree of light necessary for the patients' doors, &c., must necessarily be closed. The flooring is Minton tiles. The water-supply is Vehár, and as there are no storing tanks, inconvenience from scanty supply is sometimes felt. Food and clothing is obtained from the J. J. Hospital to which the ophthalmic hospital is an addendum. The total number treated was 7,859 as compared with 6,558 for 1885, being a large increase, the more remarkable in the face of the establishment two years ago of another Ophthalmic Hospital in Girgaum. The Acting Surgeon, Surgeon Boyd remarks: "a great deal of the success of this hospital may certainly be attributed to the kindness and care of Surgeon-Major Machonachie as well as to his fame as a painstaking and skilful operator." The details of the total treated are native out-door 7,179, native in-door 494; European out-door 173;

European in-door 13: total 7,859. The total major and minor operations amounted to 1,690 as compared with 1,407 for 1885. Operations classed as major were 1,298, of which 161 were extractions of cataract: 72 the formation of artificial pupil, 16 iridectomies, 6 enucleations, 4 abscission including 1 of critchet's, 422 paracentesis. With reference to the cataracts they consisted of 153 senile or hard, 7 soft, and 1 traumatic. Artificial pupils were required for various affections of the cornea blocking the natural pupil. The iridectomies were for the relief of glaucoma, and excisions of the eye-ball for disorganization of the globe. During the year the attendance of students was regular and punctual, and it is noted "lady students also attended and took a very great interest in the work." The servants attached are reported as working satisfactorily and the two Hospital Assistants attached, *viz.*, 1st Class Hospital Assistant G. D'Cruz and 3rd Class Hospital Assistant Oorunker are commended as most attentive to their duties.

GOCULDÁS TEJPAL HOSPITAL.—*In charge of* Brigade-Surgeon H. V. CARTER, M.D., till the 31st of May, afterwards Surgeon-Major J. ARNOTT, M.D.

Conservancy.—Efficient.

Water-supply.—Good and sufficient.

Hospital Buildings.—Are in good repair. But there is room for increased accommodation and especially for places in which certain patients, dangerous or troublesome or who require special care, may be isolated. The compound requires a good enclosure wall or railing; hospital fittings have been kept in good order and repair and 12 spring mattresses have been supplied.

Attendance of Patients.—The total number of in-door patients was 2,826, being an increase of 63 over the number for 1885. Each bed accommodated 23·5 during the year and the average detention in hospital was 16 days. Of out-door patients the total was 17,917 against 17,471 for the previous year. The daily average number of sick was 115·2 in-door and 165·1 out-door.

Prevailing Diseases.—Malarious fevers, rheumatic affections, syphilitic affections, respiratory affections, phthisis pulmonalis, dysentery, diarrhœa, liver diseases, spleen diseases, heart diseases, gonorrhœa, abcess, ulcers, poisons, injuries, in the order named. As usual both among in-door and out-door patients there were a large number of injuries, among them 255 fractures, 26 being fractures of the skull.

Surgical Operations.—Total of major operations 74, or 11 less than for the previous twelve months. Among them were 24 amputations, 2 being of the thigh. For stone in the bladder there were 5 operations, 4 being lithotomy and 1 lithotrity; 2 cases requiring racheotomy and 2 requiring laryngotomy occurred; 15 cases of hepatic abscess were operated upon. The death-rate among patients submitted to major operative surgery was 13·5 per cent.

Mortality and its Causes.—The total number of deaths in hospital was 273 or 9·6 per cent. The principal causes of deaths were phthisis, remittent fever, dysentery, diarrhœa, pneumonia, debility and privation, injuries.

Medico-legal.—Medico-legal cases amounted to 2,125, whilst 48 inquests were held, *viz.* 41 on account of fatal injuries, 5 poisoning and 2 from other causes.

Conduct of Establishment.—Has on the whole been satisfactory. The medical officer remarks: "It is my pleasing duty to record my appreciation of the intelligent, "industrious and zealous work done by the House Surgeon, Mr. Charles Easdon."

Cost.—The total cost was Rs. 45,955-8-5 and the cost per patient Rs. 2-3-5 as compared with Rs. 52,037-10-9 and Rs. 2-9-1 respectively in the previous year. The cost of diet was Re. 0-3-4 against Re. 0-3-5 for the previous year.

Visited on various occasions by the Surgeon-General and formally inspected in February.

PESTONJI HORMASJI KAMA HOSPITAL.—*In charge of* MISS. EDITH PECHEY, M.D.

Conservancy and Water-supply.—These are in charge of the municipality.

Hospital Buildings.—Quarters are now being erected on the west side of the hospital for the pupil nurses in training at the hospital, and it is hoped that the building will be completed by the monsoon. Great annoyance is caused by the want of a proper fence. The hospital compound is made a common thoroughfare by coolies on their way to and from their work, and it is found impossible to prevent petty thefts being made by outsiders who can enter the premises from any direction.

Details of treated.—2,707 out-door and 334 in-door patients were treated during the year. Of the out-door 2,081 were women and 626 children. Of the in-door 295 were women and 39 children. The in-patients were moved in August from the temporary hospital at Khetwádi into the Kama Hospital. The out-door patients are seen at the Jaffer Suleman Dispensary.

Prevailing Diseases.—The prevailing diseases were uterine diseases which, with the labour cases admitted, amounted to 123, respiratory affections 37, scrofula 24, syphilis 18, rheumatic affections 16, liver diseases 14. Amongst the out-door patients the order was as

follows:—Uterine diseases, syphilis and gonorrhœa, respiratory affections, ophthalmia, rheumatism and diarrhœa.

Mortality and its Causes.—Twenty-one deaths occurred during the year, giving a percentage of 6·2, the chief cause being affections of the respiratory organs.

Surgical Operations.—There was one major operation (Porro's) which unfortunately had to be performed whilst the patient was suffering from capillary bronchitis, from which complication she died on the sixth day. The child lived. There were 20 minor operations.

Conduct of Establishment.—This has been satisfactory with one exception. The 1st Physician says "I cannot too warmly acknowledge the services rendered to the hospital by the Sisters of all Saints who at great trouble and considerable expense to themselves have taken charge of the nursing of the patients, and who in addition are conducting the training school for nurses instituted in connection with the Kama Hospital by Lady Reay's Committee. The hospital derives considerable advantage from the addition to the nursing staff of the pupil nurses, European and Native, who now number a dozen, and the habits of order and method in which these pupils are trained will, I am convinced, introduce an element into native nursing which is of the utmost importance and which has hitherto been wanting."

Cost.—The cost of the establishment at Khetwádi was borne partly by Government and partly by the Committee for the Medical Women for India Fund. Government now maintains the whole cost of the Kama Hospital, but it is much to be hoped that an endowment fund will be started to supplement the Government grant.

BYCULLA CENTRAL SCHOOLS.—*In charge of* Brigade-Surgeon G. Y. HUNTER up to 1st April, then Surgeon-Major J. P. GREANY, M.D., up to 6th October and afterwards, Brigade-Surgeon HUNTER.

Conservancy arrangements are good. There is an ample supply of Vehár water. The Hospital buildings are in good repair. Furniture and fittings are in serviceable condition. An increase of 198 in-patients is shown over the pervious year. The prevailing diseases were malarious fever of an intermittent type, chest complaints and skin diseases. No major operations. No deaths. No child was admitted into the schools who had not been vaccinated or revaccinated. Conduct of the establishment was good. The schools went to Devláli on 1st and 2nd June 1886, returning on the 2nd and 3rd September 1886. The change was not so beneficial as was hoped as the number of admissions into Hospital was large during the three months spent there. Malarial fever having been the chief complaint which the children suffered.

GRANT-IN-AID DISPENSARY.

MA'HI'M.—*In charge of* MR. NUSSERWANJI JAHANGIERJI, L.M.

The building is commodious, conveniently situated and in good repair; all necessary furniture and fittings are provided. Two members of the committee have occasionally visited the dispensary during the year. Conservancy is attended to. The water-supply is plentiful, partly from wells and partly from Vehár Lake. The total treated was 7,103, all out-door patients, as compared with 8,892 in the previous year. The prevailing diseases were malarious fevers, diarrhœa, respiratory affections and skin-diseases. There was no epidemic. Vaccination is compulsory; 923 children were vaccinated. The total cost was Rs. 2,194-6-7, the cost per patient Re. 0-4-11, as compared with Rs. 2,049-4-10 and Re. 0-3-8 respectively in the previous year.

THA'NA COLLECTORATE.

THA'NA CIVIL HOSPITAL.—*In charge of* Surgeon K. R. KIRTIKAR from 1st January to 30th April, Surgeon J. W. T. ANDERSON from 1st May to 19th September, Assistant Surgeon BURJORJEE ARDESEER, G.G.M.C., till the end of the year.

Conservancy.—The conservancy of the town is far from satisfactory. Gutters, drains and nálás are receptacles of rubbish. Defæcation takes place in the streets. Dust-bins exist, but care is not taken to shoot rubbish into them. The conservancy of the hospital is looked to.

Water-supply.—Quite sufficient and of pure character.

Hospital Buildings.—No change has taken place. The buildings fulfil their purpose, but cannot be regarded as suitable, being without various necessary adjuncts.

General Health.—Has been fairly good, no epidemics occurring.

Attendance of Patients.—There were 292 in-door patients and 4,616 out-door, being a decrease of the former and a considerable increase of the latter as compared with the former year. A large number of the patients come in from different parts of the districts for treatment.

Prevailing Diseases.—Malarial fevers complicated with liver and spleen affections, skin-diseases, diseases of the respiratory organs, dysentery, diarrhœa, worms.

Mortality.—The mortality in the year was 8·9 per cent. on the total of in-door patients. Want was the principal cause. Many patients come to hospital in a dying state and there is little that can be done for them except affording nourishment.

Major Surgical Operations.—Twenty were performed. Minor operations numbered 141.

Vaccination.—By the municipal vaccinator.

Medico-legal Cases.—There were 49 cases of this class, all investigated at the instance of the police. Only two *post-mortem* examinations were required.

Conduct of the Establishment.—First Class Hospital Assistant Rajana Lokajee is reported trustworthy, and no complaints have been made of the hospital servants.

Cost.—The total cost was Rs. 8,978-9-11 and the cost per patient Rs. 1-13-3 against Rs. 11,364-11-6 and Rs. 3-4-10 respectively in 1885.

The Thána Civil Hospital was inspected by the Surgeon-General on the 24th December 1886.

GRANT-IN-AID DISPENSARIES.

Sir Cowásji Jehángir Dispensary, Bándra.—*In charge of* Assistant Surgeon J. F. Gonsalves, L.M.

The building is kept in good repair, also the furniture and fittings. The committee met ten times during the year. The conservancy of the town is looked after by the municipal establishment. The water-supply is still defective; a project for an improved system is under consideration. The total treated was 15,452, all out-patients, as compared with 18,154 in the previous year. The most common diseases were malarious fevers, intestinal worms, respiratory affections, diarrhœa and dysentery. There was no epidemic. Ten major surgical operations were performed. Vaccination is carried on with calf lymph; 403 children were primarily vaccinated. Twelve dead bodies were examined at the request of the police. The dispensary was inspected in March by the Civil Surgeon, Thána. The total cost was Rs. 5,576-11-10, the cost per patient Re. 0-5-9, as compared with Rs. 5,710-4-7 and Re. 0-5-0 respectively in the previous year.

Bassein—*In charge of* Assistant Surgeon F. A. Moos, L.M. & S.

A new building is in course of erection. Four meetings of the committee were held during the year. There is great room for improvement in the sanitary condition of the town, both as to conservancy and water-supply; the latter is liable to contamination. The total treated was 15,873 out-door and 17 in-door patients as compared with 16,639 and 8 respectively in the previous year. The most common diseases were malarious fevers, respiratory affections, diarrhœa and worms. There was no epidemic. Seven major surgical operations were performed. The number of vaccine operations was 111. Twelve *post-mortem* examinations were performed at the request of the police. The dispensary was inspected by the Surgeon-General and by the Civil Surgeon, Thána. The total cost was Rs. 5,108-3-6, the cost per patient Re. 0-5-1, as compared with Rs. 3,936-12-6 and Re. 0-3-9 respectively in 1885.

Dinshaw Manockji Petit Dispensary, Bhiwndi.—*In charge of* Hospital Assistant Wásudeo Rámchandra.

The building is new and is conveniently situated. Servants' quarters and a kitchen for in-patients are required. The committee visit the dispensary regularly once a month. Conservancy is fair; the water-supply is sufficient, the quality inferior. The total number treated was 10,718 out-door and 16 in-door patients as compared with 10,151 and 19 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, worms, ophthalmia and diarrhœa. There was no epidemic. Two hundred and twenty-one children were vaccinated. Six *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Deputy Sanitary Commissioner in January and by the Civil Surgeon in February. The total cost was Rs. 2,610-14-2, the cost per patient Re. 0-3-10, as compared with Rs. 3,036-12-5 and Re. 0-4-9 respectively in the previous year.

Kelva Máhi'm.—*In charge of* Hospital Assistant Rájárám Bálkrishna.

No alterations have been made in the building; quarters for servants and a cook-house are required. The furniture and fittings are complete. The committee met nine times. Conservancy is unsatisfactory, the establishment is insufficient; the water-supply is plentiful but liable to contamination by soakage. The total number treated was 8,664 out-door and 28 in-door patients against 8,286 and 27 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, worms and respiratory affections. There was no epidemic disease. One hundred and ninety persons were successfully vaccinated. Five *post-mortem* examinations were made at the request of the police,

The dispensary was inspected by the Civil Surgeon, Thána, in April. The total cost was Rs. 2,079-3-5, the cost per patient Re. 0-3-9, as compared with Rs. 1,271-4-4 and Re. 0-2-5 respectively in the previous year.

SHÁHÁPUR.—*In charge of* Hospital Assistant MORO NILKANTH.

The buildings are in good repair; the furniture and fittings good and sufficient. The Vice-President of the Local Boards visits the dispensary every month, the other members on rare occasions. The sanitary condition of the town is fairly satisfactory. The water-supply is ample from the river and wells; the latter are liable to contamination by soakage. The total number treated was 8,589 out-door and 19 in-door patients as compared with 8,276 and 19 respectively in the year previous. The more common diseases were malarious fevers, skin-diseases, worms and respiratory affections. There was no epidemic disease. One major surgical operation was performed. There were 40 successful vaccinations and 6 re-vaccinations. Eight *post-mortem* examinations were made at the request of the police, and opinion was given in 3 other medico-legal cases. The dispensary was inspected in March by the Deputy Sanitary Commissioner, and in June by the Civil Surgeon, Thána. The total cost was Rs. 1,496-9-1, the cost per patient Re. 0-2-9, against Rs. 1,592-0-10 and Re. 0-3-1 respectively in 1885.

BÁI SÁKARBÁI DISPENSARY, CHINCHNI.—*In charge of* Hospital Assistant BHIWJI JÁDAW.

The building is in good repair and is sufficient for the purpose; the furniture and fittings are in order. The dispensary was visited seven times by the committee. The sanitary condition of the town is unsatisfactory; the water-supply is of indifferent quality. The total number treated was 11,824 out-door and 44 in-door patients against 11,079 and 43 respectively in the previous year. The more common complaints were worms, malarious fevers, skin-diseases and respiratory affections. Measles prevailed in the town and neighbourhood; there was no other epidemic disease. Sixty-six persons were successfully vaccinated. One *post-mortem* examination was made at the request of the police. The total cost was Rs. 825-1-6, the cost per patient Re. 0-1-1, as compared with Rs. 1,775-6-10 and Re. 0-2-6 respectively in the year 1885.

COWASJI DINSHÁW PETIT DISPENSARY, UMBARGAON.—*In charge of* Hospital Assistant SHRIPAT HARI.

The buildings are in good order. The compound should be enclosed. The committee hold monthly and quarterly meetings. Sanitary matters are not properly attended to. The water-supply is sufficient but generally brackish. The total number treated was 6,183 out-door and 39 in-door patients; in the previous year the dispensary was only open for five months when the attendance was 4,131 out-door and 9 in-door patients. The more common diseases were malarious fevers, skin-diseases, worms, and respiratory affections. There was no epidemic disease. Vaccination meets with opposition and only 11 children were vaccinated. The total cost was Rs. 1,239-3-8, the cost per patient Re. 0-3-2.

ENDOWED DISPENSARIES.

RUSTOMJI WÁDIA DISPENSARY, THÁNA.—*In charge of* Assistant Surgeon BARJORJI ARDESIR, G.G.M.C.

The building is well situated and in good order, but it is small and dark and there is no accommodation for the medical officer. An upper storey is to be added to the building. The committee visit the dispensary from time to time. The sanitary condition of the town is unsatisfactory; the water-supply is ample and of good quality. The total number treated was 9,268 out-patients as compared with 9,510 in the previous year. The prevailing diseases were malarious fevers, diarrhœa, worms and skin-diseases. There was no epidemic. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Surgeon-General in December. The total cost was Rs. 5,030-0-9, the cost per patient Re. 0-8-8, as compared with Rs. 4,346-5-8 and Re. 0-7-3 respectively in the previous year.

RAKMÁBÁI DISPENSARY, KALYÁN.—*In chrge of* Assistant Surgeon PESTONJI BAMANJI, G.G.M.C.

The buildings are in good order; the usual annual repairs have been executed. Some articles of furniture are old and require to be renewed. The committee visited the dispensary twice in the first half and every month in the second half of the year. The sanitary condition of the town is unsatisfactory and the water-supply is reported bad. The total number treated was 5,501 out-door and 50 in-door patients as compared with 5,152 and 80 respectively in the previous year. The more common diseases were malarious fevers, worms, respiratory affections and skin-diseases. Two cases of cholera occurred, but there was no epidemic. Twelve major surgical operations were performed. Vaccination is performed by a municipal vaccinator. Eight *post-mortem* examinations were made and opinion given in a number of other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Thána. The total cost was Rs. 5,589-1-7, the cost per patient Rs. 1-0-1, as compared with Rs. 5,438-13-4 and Rs. 1-0-7 respectively in the previous year.

BA'I MITHIBÁI DISPENSARY, KURLA.—*In charge of* Assistant Surgeon NUSSERWÁNJI DHUNJISHA, G.G.M.C.

The building is conveniently situated and is in very good order; a fence to the compound and repairs to the roof of the out-houses are required. The furniture and fittings are generally old, and some of them require renewal and repair. The committee visit the dispensary every month. Some attention is paid to conservancy. The water-supply, partly from Vehár but chiefly from wells and a tank, is insufficient, and from the latter sources of bad quality. The total number treated was 8,511 out-door and 4 in-door patients as compared with 9,442 and 7 respectively in the previous year. The prevailing diseases were malarious fevers, respiratory affections, skin-diseases, worms and diarrhœa. Four cases of cholera occurred in August, but there was no extension of the disease. Three major surgical operations were performed. There were 253 vaccinations and one re-vaccination. Three *post-mortem* examinations were made and opinion given in several other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Thána, in March. The total cost was Rs. 6,083-7-10, the cost per patient Re. 0-11-5, as compared with Rs. 4,575-15-1 and Re. 0-7-8 respectively in the previous year.

GOVERNMENT DISPENSARY.

MÁTHERÁN.—*In charge of* Surgeon-Major A. BARRY.

There is no special building; a room in the Superintendent's office is used as a dispensary. There is no committee. The sanitary condition of the hill is good, and the water-supply good and ample. The total number treated was 834, all out-patients, as compared with 709 in the previous year. The more common diseases were intestinal worms, malarious fevers, respiratory affections and skin-diseases. There was no epidemic. One major surgical operation was performed. Vaccination was performed successfully five times. The dispensary was inspected by the Surgeon-General in May. The total cost was Rs. 806-1-8, the cost per patient Re. 0-15-5, as compared with Rs. 1,030-10-8 and Rs. 1-7-3 respectively in the previous year.

KOLA'BA COLLECTORATE.

GRANT-IN-AID DISPENSARIES.

PEN.—*In charge of* Hospital Assistant BÁBÁJI RÁVJI KUDDUM.

The buildings are in good repair and every way suitable; the furniture and fittings good and sufficient. The committee visited the dispensary three times. The sanitary condition of the town is fair: the water-supply good and abundant. The total number treated was 12,209 out-door and 31 in-door patients as compared with 11,439 and 44 respectively in the previous year. The most common diseases were worms, malarial fevers, skin-diseases and respiratory affections. Measles was epidemic in the months of April, May and June. Four major surgical operations were performed. Fifteen persons were vaccinated. Three *post-mortem* examinations were made. The dispensary was inspected by the Deputy Sanitary Commissioner in May, and by Assistant Surgeon, Alíbág, in June and November. The total cost was Rs. 1,680-10-6, the cost per patient Re. 0-2-2, as compared with Rs. 1,746-0-11 and Re. 0-2-5 respectively in the previous year.

MAHA'D.—*In charge of* Hospital Assistant NARSA'PPA RA'MSWA'MI N'AIDU.

The building is in good repair; the furniture and fittings sufficient and in good order. The committee visited the dispensary nine times. The sanitary condition of the town is unsatisfactory, and the water-supply is scanty and of inferior quality. The total number treated was 7,130 out-door and 34 in-door patients against 7,819 and 31 respectively in the previous year. The more common complaints were worms, malarious fevers, skin-diseases and respiratory affections. There was no epidemic. Ten major surgical operations were performed. There were 64 successful vaccinations. Seven *post-mortem* examinations were made and opinion given in 11 other medico-legal cases. The dispensary was inspected by the Assistant Surgeon, Alíbág, in November. The total cost was Rs. 1,140-6-1, the cost per patient Re. 0-2-6, as compared with Rs. 1,481-2-10 and Re. 0-3-0 respectively in 1885.

PANVEL.—*In charge of* Hospital Assistant AARON SAMSON.

A dead-house has been added to the buildings; accommodation for out-patients, a female ward and servants' quarters are still wanted. The committee visited the dispensary frequently. Some attention is paid to sanitary matters. The water-supply from tanks and wells is liable to soakage. The total number treated was 7,130 out-door and 25 in-door patients as compared with 7,121 and 23 respectively in the previous year. The most common diseases were skin-diseases, malarial fevers, worms and respiratory and rheumatic affections. No epidemic occurred. Five major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. Seven *post-mortem* examinations were

made at the request of the police. The dispensary was inspected by the Assistant Surgeon, Alíbág, in June and November, and by the Deputy Sanitary Commissioner in January. The total cost was Rs. 1,857-5-0, the cost per patient Re. 0-4-1, as compared with Rs. 5,515-12-6 and Re. 0-12-4 respectively in the previous year.

ENDOWED DISPENSARY.

MRS. PASCOAL DESOUZA'S DISPENSARY, URAN.—*In charge of* Assistant Surgeon KA'SSIM VIRJI PATEL, L.M.

The building is very unsuitable; steps are, however, being taken to secure the erection of a new building. The committee met once only, but individual members visit the dispensary frequently. The town is kept fairly clean; the water-supply from tanks and wells is liable to contamination. The total number treated was 6,401 out-door and 1 in-door patient as compared with 7,299, all out-patients, in the previous year. The prevailing diseases are malarious fevers, skin-diseases, worms, respiratory affections and diarrhœa. Measles and chicken-pox were epidemic in October, November and December. Six major surgical operations were performed. Vaccination is carried on by a municipal vaccinator; only 93 primary vaccinations were performed. Four *post-mortem* examinations were made at the request of the police, and opinion given in several other medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner in May. The total cost was Rs. 5,126-6-3 and the cost per patient Re. 0-12-9, as compared with Rs. 4,272-10-7 and Re. 0-9-4 respectively in the previous year.

GOVERNMENT DISPENSARY.

ALI'BA'G.—*In charge of* Assistant Surgeon M. F. PEREIRA, L.M.

The buildings are in good order. A cook-room is much wanted, and some articles of furniture and clothing are required. There is no committee. The sanitary condition of the town is satisfactory. The water-supply is good and sufficient. The total number treated was 11,228 out-door and 67 in-door patients as compared with 12,472 and 62 respectively in the previous year. The prevailing diseases were malarious fevers, worms, respiratory affections and skin-diseases. There was no epidemic. Seventy-four vaccinations were performed. Six *post-mortem* examinations were made at the request of the police. The total cost was Rs. 5,234-7-5, the cost per patient Re. 0-7-5, as compared with Rs. 5,592-6-0 and Re. 0-7-1 respectively in the previous year.

RATNA'GIRI COLLECTORATE.

RATNA'GIRI CIVIL HOSPITAL.—*In charge of* Surgeon H. MCCALMAN, M.D.

Conservancy.—There is a Halálkhor cess and a number of very badly constructed privies attended to by the municipal bhangis. But the sea-shore, nálás and rice fields are the chief resorts for natural purposes. The night-soil of the Civil Hospital and Lunatic Asylum is buried in the jail garden but that of the bungalows in camp, it is said, "has no particular destination."

Water-supply.—This is mainly derived from wells. The water-supply from the Nachni lake is precarious, the failure being due both to engineering difficulties and failure in construction. There is a well in the hospital compound.

Hospital Buildings.—The buildings are in fair order; a waiting-room and office are required, and there are no quarters for hospital servants.

General Health of the town and district.—Has been exceptionally good; no case of cholera or small-pox has been reported.

Attendance of Patients.—There were 155 in-door and 6,559 out-door as compared with 135 and 6,808 respectively for the previous year.

Prevailing Diseases.—Malarious fevers, respiratory affections, syphilitic maladies, hepatic complaints and injuries. Among the out-door patients 28 per cent. were suffering from worms.

General Operations.—There were 46 major operations including reductions of dislocations of large joints, amputation of the arm and leg, excision of tumorus, paracentesis abdominis, and three major operations consequent on difficult labour; all the operations were successful.

Mortality and its Causes.—There were 5 deaths in hospital, 2 from remittent fever, 1 from cirrhosis of the liver, 1 from phthisis and 1 from injuries to the brain.

Vaccination.—Is performed by the táluka vaccinator.

Conduct of Establishment.—Is reported uniformly good. First Class Hospital Assistant Máhádev Cuddum as before has performed his duties "conscientiously and efficiently."

Cost.—The total cost was Rs. 9,460-13-6 and the cost per patient Rs. 1-6-6 as compared with Rs. 9,494-0-1 and Rs. 1-5-10 respectively in the previous year.

The Ratnágiri Civil Hospital was inspected by the Surgeon-General on the 7th of February 1887.

DINSHAW MA'NEKJI PETIT LEPER ASYLUM, RATNA'GIRI.—*In charge of* Surgeon H. MCCALMAN, M.D.

Conservancy.—The nightsoil is removed by hand into a neighbouring shed where it is converted into poudrette. There is no ground available for trenches, the surrounding surface for a long distance being sheet rock.

Water-supply.—From a good well near the Asylum gate; supply sufficient.

Hospital Buildings.—Are in good repair and suitable; during the year the construction of the cook-house has been improved, a suitable waiting shed has been erected and arrangements are made for the provision of quarters for the peon and sweeper. The peon is especially required at night to prevent lepers straying away to the bázár and to keep the sexes separate. The hospital compound has been planted with trees.

Admission of Patients.—There were 30 admissions during the year which with 31 remaining gives a total treated of 61. The average daily sick was 33·3. Of the 30 admissions 27 were males and 3 females; by caste 29 Hindus and 1 Mussalmán. Of the males 11 were cultivators, 6 mendicants, 2 artizans, 2 small farmers, 1 a labourer, 1 a servant, 1 a trader, 1 a fisherman and 2 no occupation. Twenty-three of the males were married but none to lepers. Of the 3 females all were married to non-leprous husbands and all had healthy children. Of the varieties of leprosy the anæsthetic was the most common.

Mortality.—There were 7 deaths—5 from ulcers and general exhaustion, 1 from pneumonia and 1 from diarrhœa. The average duration of the disease in these fatal cases was 8 years and the average stay in hospital 4 years.

Results of Treatment.—Gurjon oil has been the chief drug systematically employed, but the chief reliance has been placed on a liberal dietary. The diet scale has been altered, ghee and animal food being used more freely. The Civil Surgeon observes: "In previous annual reports I have observed on the manner in which patients are given to abscond after a short residence only to re-appear in a worse plight than ever. If the institution is to be saved from degenerating into a leper 'dharmshála', district officials must be empowered to compel the residence of vagrant lepers in the Asylum. No hardship would be inflicted on the sufferers themselves and the spread of the disease (whether by contagion or hereditary) would be discouraged."

Conduct of Establishment.—Third Class Hos[illegible] Assistant Bálláji Kushába continues to perform his duties efficiently, and the [illegible]ct of the servants has been satisfactory.

The Asylum was inspected by the Surgeon-General on the 7th of February.

CIVIL HOSPITAL, SÁVANTVÁDI.—*In charge of* D. G. DALGADO, M.D.

Conservancy.—Receives constant attention at the hands of the local municipality.

Water-supply.—Generally good. A new tank for washing purposes was built, and a new well is being dug at a place where during the hot season there has been some scarcity.

Hospital Buildings.—In good repair, but site objectionable. The new hospital mentioned in last report as under construction is not yet finished.

General Health.—Good.

Attendance of Patients.—In-door 455 and out-door 6,927, being an increase of 88 and 798 on the previous year's returns.

Prevailing Diseases.—Malarious fevers, intestinal worms, diarrhœa, dyspepsia, bronchial affections, ulcers, rheumatic affections and skin-diseases.

Surgical Operations.—13 major and 276 minor. Among the major were two obstetrical operations, and two for hepatic abscess.

Mortality and its Causes.—Deaths 22. Causes—remittent fever, pneumonia, ague, diarrhœa, aneurism of the aorta, punctured wound of abdomen, pleurisy, leprosy.

Vaccination.—217 primary and 10 secondary operations, of which 213 and 9 were successful. An additional vaccinator was appointed.

Medico-legal.—Of these cases there were 29, 7 being *post-mortem* examinations, and 22 examinations of persons, clothes or other articles.

Conduct of Establishment.—Reported quite satisfactory.

Cost.—Rs. 8,541-3-4 against Rs. 7,424-9-8 in 1885. Increased cost due to promotion of medical officer and of the hospital subordinate.

GOVERNMENT DISPENSARIES.

DÁPOLI.—*In charge of* Assistant Surgeon P. P. MULAN, L.M. & S.

Conservancy arrangements reported lax. Water-supply abundant and good, but liable to pollution. Hospital buildings and out-houses in good order: quarters for 2nd class

servants are required, also a better examination room and almirahs for persons and instruments. General health has been satisfactory. Attendance of patients was 55 in-door and 4,263 out-door—somewhat less than for the former year. Prevailing diseases were fevers, worms, skin-diseases, dysentery and chest affections. Of surgical operations 10 major occurred, one being craniotomy. Mortality and its causes is represented by 6 deaths from fracture of the skull, remittent fevers, large abscess, pneumonia, dysentery and acute bronchitis. Medico-legal cases consisted of 5 *post-mortem* examinations. Vaccination is performed by the táluka vaccinator. As regards the conduct of establishment it is reported good, but there are only two servants and a compounder is required. The total cost was Rs. 3,775-3-0 and the cost per patient Re. 0-13-11 as compared with Rs. 3,249-6-7 and Re. 0-11-7 respectively in the previous year.

VENGURLA.—*In charge of* Hospital Assistant KISSONGIR ÁNANDGIR.

The buildings are old and in bad repair; the accommodation is sufficient. There is no committee. Conservancy and sanitation has been well attended to. The water-supply is ample and good; the wells in the town require walls round them. The total number treated was 16 in-door and 1,662 out-door patients against 44 and 1,925 respectively in the previous year. The more common diseases were malarious fevers, worms, skin-diseases, and respiratory and rheumatic affections. There was no epidemic. Seven major surgical operations were performed. Vaccination is performed by the municipal vaccinator. Six *post-mortem* examinations were made. The total cost was Rs. 1,260-14-1, the cost per patient Re. 0-12-0 as compared with Rs. 4,054-7-7 and Rs. 2-0-11 respectively in the previous year.

KA'RWA'R COLLECTORATE.

CIVIL HOSPITAL, KA'RWA'R.—*In charge of* Surgeon W. G. H. HENDERSON till 7th December, afterwards Assistant Surgeon DIXON.

Conseravancy.—Is well looked after. Nightsoil removed to a distance. Proposed additional latrine not yet built owing to want of funds.

Water-supply.—From wells but liable to pollution.

Hospital Buildings.—The hospital buildings are in good condition.

General Health.—Reported go[redacted] No epidemic of any kind, but the medical officer remarks: "Syphilis was common [redacted]een in its various forms in a large proportion of the attendants at the hospital."

Attendance of Patients.—355 in-[redacted] patients and 5,808 out-door against 325 and 5,694 respectively in the previous year.

Prevailing Diseases.—Malarial fevers head the list, after which come rheumatic affections, syphilitic affections, anæmia, diseases of the eyes, of the respiratory system, of the urinary organs and skin-affections.

Surgical Operations.—8 major and 84 minor. The major were delivery by forceps, evisceration, extension of stiff joints, paracentesis abdominis, reduction of dislocation, removal of dead bones.

Mortality and its Causes.—There were 22 deaths among in-door patients, 6 from debility, 4 from dysentery, 2 from anæmia, and one from various other causes.

Medico-legal.—During the year 3 bodies were sent by the police for examination, all of which were in such an advanced state of putrefaction that no opinion could be given as to the cause of death. Other medico-legal cases were examination of cloth for blood stains, and examination of a substance supposed to contain arsenic.

Vaccination.—Number of operations 672, of which 540 were successful and the result was not obtained in 76 cases.

Conduct of Establishment.—Hospital Assistant Ittu Chowan is commended. The present medical officer concurs with the former that a second Hospital Assistant is required, which however it is impossible to supply.

Cost.—The total cost was Rs. 10,547-5-4 and the cost per patient Rs. 1-11-4 as compared with Rs. 10,618-7-4 and Rs. 1-12-2 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

KUMTA.—*In charge of* Hospital Assistant SHAIK LATIF.

The buildings are in excellent order; the annual repairs have been carried out. The furniture and fittings are in good order. The committee held three meetings during the year. Sanitation receives considerable attention. The water-supply is fair and plentiful; some wells are liable to pollution by soakage. The total number treated was 5,843 out-door and 121 in-door patients as compared with 6,784 and 96 respectively in the previous year. The prevailing diseases were malarious fevers, worms and skin-diseases. There was no epidemic. Fourteen major surgical operations were performed. Vaccination is carried on by a Local Fund vaccinator; there were 264 successful vaccinations. Two *post-mortem*

examinations were made at the request of the police. The dispensary was inspected by the Civil Surgeon, Kárwár, on the 1st March. The total cost was Rs. 2,661-1-6, the cost per patient Re. 0-7-1, as compared with Rs. 2,729-11-0 and Re. 0-6-4 respectively in the previous year.

HONA'VAR.—*In charge of* Hospital Assistant SHIVRAM NARAYAN.

The new building was occupied on 9th June 1886. Members of the committee frequently visit the dispensary. They have held four regular meetings. The sanitary condition of the town is fair. The water-supply is sufficient. The total number treated was 3,859 out-door and 59 in-door patients as compared with 5,256 and 58 respectively in the previous year. The prevailing diseases were malarious fevers, worms and skin-diseases. There was no epidemic. There were 160 primary and 5 re-vaccinations. One *post-mortem* examination was made at the request of the police. The dispensary was inspected by the Civil Surgeon, Kárwár, in March. The total cost was Rs. 705-0-9, the cost per patient Re. 0-2-10, as compared with Rs. 628-14-2 and Re. 0-1-10 respectively in the previous year.

SUPA.—*In charge of* Hospital Assistant DATTATRAYA GANESH.

The building has been thoroughly repaired, and with the out-buildings, is now in good order. The furniture and fittings are in satisfactory condition. The committee visit the dispensary every month. The village is kept fairly clean. The water-supply is mainly from the river; is sufficient, but liable to pollution. The total number treated was 1,481 out-door and 50 in-door patients as compared with 1,425 and 59 respectively in the previous year. The most common diseases were malarious fevers, skin-diseases, worms and rheumatic and respiratory affections. Four cases of small-pox occurred. One major surgical operation was performed. Vaccination is performed by the petha vaccinator. The dispensary was inspected by the Civil Surgeon, Kárwár, in April, and by the Deputy Sanitary Commissioner in May. The total cost was Rs. 1,019-3-11, the cost per patient Re. 0-10-7, as compared with Rs. 760-14-11 and Re. 0-8-2 respectively in the previous year.

HALIYA'L.—*In charge of* Hospital Assistant BENJAMIN SOLOMON.

The buildings are in good repair and the furniture and fittings sufficient. The committee held four meetings. Sanitation continues to be attended to. The water-supply is sufficient and of good quality. The total number treated was 2,678 out-door and 81 in-door patients as compared with 2,507 and 91 respectively in the previous year. The more common diseases were malarious fevers, worms, skin-diseases and ophthalmia. Small-pox and measles prevailed during the year. Twenty children were vaccinated and 2 re-vaccinated. The dispensary was inspected by the Deputy Sanitary Commissioner, who reports favourably on Hospital Assistant Benjamin Solomon. The total cost was Rs. 941-10-1, the cost per patient Re. 0-5-5, as compared with Rs. 835 and Re. 0-5-1 respectively in the previous year.

SIRSI.—*In charge of* Assistant Surgeon F. S. DAVAR, L.M. & S.

The buildings, fittings and furniture are in good condition. Quarters for servants are much needed. The committee met regularly every month. Sanitary arrangements are unsatisfactory. The water-supply is abundant, but very liable to contamination by soakage. The total treated was 9,519 out-door and 118 in-door patients as compared with 8,910 and 125 respectively in the previous year. Malarious fevers, skin-diseases, worms and respiratory affections were the most common diseases. Some cases of small-pox and chicken-pox occurred in the first half of the year. Thirteen major surgical operations were performed. Vaccination meets with considerable opposition; 149 persons were successfully vaccinated and 12 re-vaccinated. Five *post-mortem* examinations were performed at the request of the police. The dispensary was inspected by the Civil Surgeon in March. The total cost was Rs. 3,266-14-10, the cost per patient Re. 0-5-5, as compared with Rs. 3,663-12-2 and Re. 0-6-5 respectively in the previous year.

YELLA'PUR.—*In charge of* Hospital Assistant SAMUEL SAMSON.

The building is in good repair. A ward for females and a latrine are required. Some necessary articles of furniture are wanted. The committee visited the dispensary every month. The sanitary condition of the town is fair. The water-supply is sufficient and of good quality. The total treated was 2,552 out-door and 70 in-door patients as compared with 2,173 and 111 respectively in the previous year. The more common complaints were malarious fevers, worms, skin-diseases and respiratory affections. There was no epidemic. One major surgical operation was performed. Vaccination is much opposed; 24 children were vaccinated. The dispensary was inspected by the Civil Surgeon, Kárwár, in January, May and November. Hospital Assistant Samuel Samson is reported energetic, careful and efficient. The total cost was Rs. 1,337-13-5, the cost per patient Rs. 0-8-1, as compared with Rs. 1,034-5-3 and Re. 0-7-2 respectively in the previous year.

SIDDA'PUR.—*In charge of* Hospital Assistant D. NARAYAN.

The building is in good repair. The furniture and fittings are sufficient. The committee visited the dispensary seven times during the year. The town is kept fairly clean. The water-supply from wells is sufficient, but liable to contamination. The total number treated was 1,815 out-door and 24 in-door patients as compared with 2,064 and 26 respectively in

the previous year. The most common diseases were malarious fevers, worms and skin-diseases. Small-pox, chicken-pox and measles prevailed during the early part of the year. Vaccination is much opposed; 11 primary operations were performed. Four *post-mortem* examinations were made at the request of the police. The total cost was Rs. 1,148-14-6, the cost per patient Re. 0-9-11, as compared with Rs. 889-6-5 and Re. 0-6-9 respectively in 1885.

GOVERNMENT DISPENSARY.

MUNDGOD.—*In charge of* Hospital Assistant RAMCHANDRA BALAJI.

The building is in good repair. The furniture is in good order. The Collector and Assistant Collector and other officers visited the dispensary. The sanitary condition of the town is good and the water-supply good and sufficient. The total treated was 2,966 out-door and 76 in-door patients as compared with 2,506 and 101 respectively in the previous year. Malarious fevers, worms, skin-diseases, ophthalmia and respiratory affections were the most common complaints. There was no epidemic. There were 32 successful vaccinations. The dispensary was inspected by the Deputy Sanitary Commissioner in February. The total cost was Rs. 1,130-5-10, the cost per patient Re. 0-5-11, as compared with Rs. 925-1-11 and Re. 0-5-8 respectively in the previous year.

DECCAN.

POONA COLLECTORATE.

SASSOON GENERAL HOSPITAL, POONA.—*In charge of* Surgeon-Major H. COOK, M.D.

Conservancy.—A city conservancy establishment is maintained at a cost of Rs. 42,648 per annum, working about 66 public latrines, 37 urinaries and 7,061 private latrines. In the Cantonments the conservancy has been worked departmentally since April 1885 at considerable profit. The hospital conservancy is well attended to by the hospital establishment.

Water-supply.—The quantity is abundant and the quality good, supplied by aqueducts and canal. Some persons living near the Mutha River still use river water for drinking purposes, although the river receives drainage from the town and is considerably contaminated. The hospital is supplied by pipes from the Khadakwásla water-works.

Hospital Buildings.—The buildings generally are in good order. In addition to the works referred to in the Surgeon-General's inspection report (page XV) Government have sanctioned the removal of certain out-buildings to make room for the Nursing Sisters' quarters, and steps are being taken to obtain an extension of the compound. The ventilation of the hospital is good and sufficient throughout, and there has been no crowding.

General Health.—The general health of the town and district is reported fairly good throughout the year, neither cholera nor small-pox having occurred. Malarial fevers have increased, owing, it is presumed, to the irrigation of land in the neighbourhood of the town (but probably more correctly to the waste of over-irrigation, saturation and consequent dampness of the ground). Anæmia from various causes is common and so is the scorbutic taint. "Syphilis also largely affects the population and is at the root of many cases which actually come under treatment for apparently quite different affections and which are returned as such."

Details of treated.—The total number of in-door patients treated was 2,437 against 2,611 for the previous year. The total number of out-door patients was 11,354 against 12,354 for the previous year, thus showing a diminution in both classes of patients probably consequent on a healthy year. Of the in-door patients 1,461 were discharged cured, 360 relieved and 347 absented, 161 died and 108 remained.

Prevailing Diseases.—Among in-door patients malarious fevers, injuries, syphilitic affections, respiratory and rheumatic affections, dysentery, diarrhœa, skin-diseases. Among the out-door applicants similar affections prevailed.

Mortality and its causes.—Of the 161 deaths the principal causes were dysentery, phthisis, diarrhœa, debility, malarious fevers, diseases of the respiratory system, dropsies from various causes, and injuries. Many patients are brought into this hospital suffering both from disease and want and frequently are in a hopeless state when admitted.

Surgical Operations.—Among in-door patients there were 128 operations, of which 41 come under the heading major. Among out-door patients there were 355 operations, of which 20 were major. The major operations included 15 dislocations of bones, 2 of extraction of the lens, 3 of excision of the eyeball, 9 amputations of extremities, 2 for craniotomy and 1 for strangulated hernia. But none of the cases were of exceptional interest needing special mention. Among the major operations four terminated fatally, *viz.* two amputations, and one lithotomy from tetanus supervening and one large abscess from following exhaustion.

Vaccination.—Is regularly practised every Monday both human and calf lymph being used. The vaccination is not attached to the hospital but works under the Sanitary Department.

Medico-legal Cases.—There were 68 dead bodies examined during the year, 45 male, 20 female, 3 children; also 10 fœtuses. The causes of death were as follows:— 26 from drowning, 5 from opium-poisoning, 5 from lung disease, 3 from heart disease, 3 from irritant poisoning, 2 from gun-shot wound, 2 sun-stroke, 2 strangulation, 2 aneurism, &c. In 18 instances the cause of death was not ascertained. There were four cases of alleged rape.

Conduct of Establishment.—The appointment of Assistant Civil Surgeon and Assistant Surgeon to the Hospital was held till the 20th of April by Surgeon D. N. Párakh, subsequently by Surgeon J. B. Eaton consequent on Surgeon D.N. Párakh's transfer to Surat. The best thanks of the Civil Surgeon are due to both these gentlemen for their zealous and able assistance in the school and for their skilful aid in the hospital. The Apothecary Mr. Gallaghar gave over charge to Apothecary Fearn on the 18th March, appointments being exchanged. Mr. Gallaghar deserves "the warmest acknowledgment" of the Civil Surgeon for his zeal and attention and Mr. Fearn is accorded "unqualified praise." Assistant

Surgeon Bhikaji A. Chobbe has earned the Civil Surgeon's "warmest esteem," and Assistant Surgeon D. G. Subnis has "proved his value." Excepting one man convicted of complicity in a theft of Hospital clothing, the members of the 2nd class establishment have conducted themselves satisfactorily.

Cost.—The total cost was Rs. 43,249-0-1, and the cost per patient Rs. 3-2-2 as compared with Rs. 43,077-14-4 and Rs. 2-14-0 respectively in the previous year. Excess owing to a Senior Apothecary having re-placed one of the 1st Grade.

The Sassoon Hospital was visited on various occasions by the Surgeon-General and formally inspected in September.

ROMAN CATHOLIC ORPHANAGE, POONA.—*In charge of* Surgeon E. W. YOUNG, Staff Surgeon, till 28th April, afterwards, Surgeon G. H. BULL, M.D., till the 18th September then Surgeon J. B. EATON, M. B.

New latrines were built during the year and the conservancy is reported satisfactory. Water is from the Khadakwásla system. There is no special hospital, a large well ventilated apartment being used for the purpose, and an out-house has been converted into an infectious ward. The general health has been favourable. The total number of admissions was 587, chiefly from ague and bronchitis. The ladies of the community and the domestic servants of the institution were also treated but are not included in the report. No surgical operations were required. One death only from roseola. Vaccination is carefully attended to. The total cost was Rs. 1,195-6-3, and the cost per patient Rs. 2-0-6 as compared with Rs. 1,186-5-6 and Rs. 2-4-1 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

SA'SVAD.—*In charge of* Hospital Assistant M. PRASADA.

The buldings are suitable and in good repair, the furniture sufficient. The committee visited the dispensary eleven times during the year. The sanitary condition of the town is fairly good, the water-supply is insufficient during the hot weather. The total number treated was 5,385 out-door and 2 in-door patients as compared with 9,256 and 5 respectively in the previous year. The prevailing diseases were worms, ophthalmia, malarious fevers, skin-diseases and respiratory affections. There was no epidemic. Four major surgical operations were performed. Vaccination is now performed by the táluka vaccinator, 210 children were vaccinated. The dispensary was inspected by the Civil Surgeon, Poona, in February and November; Hospital Assistant Mahabir Prasad is reported well qualified, well conducted and careful. The total cost was Rs. 987-15-5, the cost per patient Re. 0-2-11 as compared with Rs. 545-1-7 and Re. 0-0-11 respectively in the year 1885.

JEJURI.—*In charge of* Hospital Assistant CHATURJI NARA'YAN.

The building is quite unsuited for the purpose; a ward for four patients was constructed in the verandah of the dharamshála; it is however some distance from the dispensary. The furniture and fittings are sufficient. The committee visited the institution twice only. The sanitary condition of the town is very indifferent, the water-supply is abundant but liable to contamination. The total number treated was 5,916 out-door and 9 in-door patients as compared with 6,311 and 3 respectively in the previous year. The most common diseases were worms, skin-diseases, ophthalmia, ulcer and malarious fevers. There was no epidemic. Ten major surgical operations were performed. Ninety-nine children were vaccinated and re-vaccinated, this duty has now been transferred to the táluka vaccinator. Three *post-mortem* examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Poona, in February and in November. Hospital Assistant Chaturji Narayan is reported to be careful, efficient and popular. The total cost was Rs. 1,032-14-2, the cost per patient Re. 0-2-9 as compared with Rs. 974-3-3 and Re. 0-2-5 respectively in the year 1885.

BA'RA'MATI.—*In charge of* Hospital Assistant GUNGA DEEN.

The building is a hired one and is kept in good repair and supplied with the necessary furniture. The committee visited the dispensary every month. The sanitary condition of the town is fairly good, the water-supply from the river and canal is good; but deficient in the hot season. The total number treated was 5,700 out-door and 20 in-door patients as compared with 5,154 and 3 respectively in the previous year. The prevailing diseases were those of the skin, ophthalmia, malarious fevers, respiratory affections and worms. There was no epidemic. One major surgical operation was performed. There were 172 successful vaccinations. Vaccination is now performed by the táluka vaccinator. Three *post-mortem* examinations were made and opinion given in six other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Poona, in May and December. Hospital Assistant Gunga Deen is reported to be well conducted, efficient and careful. The total cost was Rs. 1,270-2-10, the cost per patient Re. 0-3-6 as compared with Rs. 1,348-10-1 and Re. 0-4-2 respectively in the previous year.

INDA'PUR.—*In charge of* Native Doctor RAMJI MULHAR.

The building is a hired one and not well suited for in-patients; the furniture and fittings are in accordance with requirements. The committee visited the dispensary eight times during the year. The sanitary condition of the town is fairly good. The water-supply is

abundant and said to be good. The total number treated was 6,123 out-door and 19 in-door patients as compared with 6,212 and 12 respectively in the previous year. Ophthalmia, malarious fevers, skin-diseases, ulcers and worms were the most common complaints. There was no epidemic. Two major surgical operations were performed. Ninety-one children were successfully vaccinated. Two *post-mortem* examinations were made at the request of the Police and opinion given in other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Poona, in May and December. Native Doctor Ramji Mulhar is favourably reported upon for efficiency and good conduct. The total cost was Rs. 1,142-7-3, the cost per patient Re. 0-2-11 as compared with Rs. 1,173-4-3 and Re. 0-3-0 respectively in the year 1885.

JUNNAR.—*In charge of* Hospital Assistant BAPUJI JANARDHAN.

The building is convenient for out-patients only; accommodation for in-patients, quarters for the establishment and a dead-house are still wanted. The furniture is sufficient. The committee visited the dispensary eleven times. The sanitary condition of the town is indifferent. The water-supply is deficient, and some of the wells allow of soakage. The total number treated was 7,011 out-door and 2 in-door patients as compared with 6,004 and one respectively in the previous year. Ophthalmia, worms, skin-diseases and malarious fevers caused the greatest number of admissions. There was no epidemic. Three major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Three *post-mortem* examinations were made at the request of the Police and opinion was given in 16 medico-legal cases. The dispensary was inspected by the Civil Surgeon, Poona, in February and December and by the Deputy Sanitary Commissioner in December. Hospital Assistant Bapuji is reported efficient, well conducted and popular. The total cost was Rs. 1,177-5-8, the cost per patient Re. 0-2-8 as compared with Rs. 856-14-9 and Re. 0-2-3 respectively in 1885.

KHED.—*In charge of* Acting Hospital Assistant SHAIK ABDUL RAJAK.

The building is in good repair; quarters for the Medical Officer are to be erected, and a cook-room and servants' quarters are required; the necessary furniture and fittings are supplied. The committee visited the dispensary three times during the year. The sanitary condition of the town is fairly good; the water-supply from the river is abundant but liable to pollution. The total number treated was 5,416 out-door and 12 in-door patients as compared with 6,868 and 19 respectively in the previous year. The prevailing diseases were ophthalmia, skin-diseases, malarious fevers and worms. There was no epidemic. Ten major surgical operations were performed. Vaccination is carried out by the táluka vaccinator. Four *post-mortem* examinations were made during the year and opinion given in several medico-legal cases. The dispensary was inspected by the Civil Surgeon, Poona, in February and December, and by the Deputy Sanitary Commissioner in December. Hospital Assistant Shaik Abdul Rajak is reported to be well conducted, careful and efficient. The total cost was Rs. 873-8-7, the cost per patient Re. 0-2-6 as compared with Rs. 817-9-6 and Re. 0-1-10 respectively in the previous year.

TALEGAON DA'BHA'DA.—*In charge of* Acting Hospital Assistant RAMCHANDER GANGADHER.

The building is in good repair, accommodation for female in-patients, a kitchen, and quarters for the establishment are required. The furniture is sufficient. The dispensary was regularly visited by the committee. The sanitary condition of the town is unsatisfactory. The water-supply is liable to pollution, the new scheme is not yet completed for want of funds. The total treated was 5,649 out-door and 30 in-door patients as compared with 8,125 and 27 respectively in the previous year. The more common complaints were skin-diseases, ophthalmia, malarious fevers, worms and respiratory affections. Some cases of measles occurred. Six major surgical operations were performed. Six children were successfully vaccinated. Two *post-mortem* examinations were made and opinion given in several medico-legal cases. The dispensary was inspected by the Civil Surgeon, Poona, in May and December. The total cost was Rs. 877-5-5, the cost per patient Re. 0-2-5 as compared with Rs. 702-15-4 and Re. 0-1-4 respectively in the previous year.

TALEGAON DHAMDHERA.—*In charge of* Hospital Assistant NARSÁPA POCHÁYA.

The building, a hired one, is in good repair, and the furniture and fittings are sufficient. Members of the committee visit the dispensary frequently; quarterly meetings of the committee are held. The sanitary condition of the town is very indifferent; the water-supply from the river is scanty and liable to contamination. The total number treated was 3,421 out-door and 7 in-door patients as compared with 4,084 and 4 respectively in the previous year. The prevailing diseases were worms, skin-diseases, ophthalmia and malarious fevers. There was no epidemic. Two major surgical operations were performed. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner in January, and by the Civil Surgeon, Poona, in February and November. Hospital Assistant Narsápa Pocháya is commended for efficiency and good conduct. The total cost was Rs. 623-11-10, the cost per patient Re. 0-2-10, as compared with Rs. 880-12-2 and Re. 0-3-5 respectively in the previous year.

A'LANDI.—*In charge of* Hospital Assistant BHAYA SING.

The same building is in use; it is unsuited for the purpose; quarters for the Medical Officer and servants, a latrine and dead-house are required. The furniture and fittings are in good order. The committee visit the dispensary every month. The sanitary condition of the town is bad. The water-supply is ample but is much exposed to pollution. The total number treated was 4,699 out-door and 5 in-door patients as compared with 5,424 and 9 respectively in the previous year. The most common complaints were worms, ophthalmia and skin-diseases. There was no epidemic. One major surgical operation was performed. There were 40 primary and 11 revaccinations. Four *post-mortem* examinations were made and opinion given in one other medico-legal case. The dispensary was inspected by the Civil Surgeon, Poona, in February and November. The total cost was Rs. 1,389-5-2, the cost per patient Re. 0-4-8, as compared with Rs. 669-13-11 and Re. 0-1-11 respectively in the previous year.

ENDOWED DISPENSARY.

KHÁN BAHÁDUR PESTONJI SORÁBJI DISPENSARY, POONA.—*In charge of* Assistant Surgeon VISHRÁM RÁMJI GHOLLAY.

The building, part only of which is occupied as a dispensary, is conveniently situated, is in good repair, and fairly provided with furniture and fittings. There was no meeting of the committee; the Collector of Poona visited the institution once and the City Magistrate 8 times during the year. The total number treated was 18,767 out-door and 40 in-door patients as compared with 21,015 and 53 respectively in the previous year. Skin-diseases, ague, worms and respiratory affections caused the greatest number of admissions. Measles and small-pox occurred in the city; there was no other epidemic disease. Many major surgical operations were performed, including 9 for cataract and 9 for stone in the bladder. Vaccination is carried on by municipal vaccinators. The dispensary was inspected once by the Surgeon-General and twice by the Civil Surgeon, Poona. The total cost was Rs. 5,419-3-4, the cost per patient Re. 0-4-7, as compared with Rs. 5,445-3-10 and Re. 0-4-1 respectively in the previous year.

AHMEDNAGAR COLLECTORATE.

CIVIL HOSPITAL, AHMEDNAGAR.—*In charge of* Surgeon-Major R. H. BATTY till 6th December; afterwards Surgeon-Major GUINNESS, A.M.D.

Conservancy.—Inadequate for the population. More public latrines are required. Drainage and sewerage reported bad.

Water-supply.—Variable. When the rainfall is copious no scarcity; when the rainfall is less want of water is felt. Sources of supply from aqueducts from the hills, wells, and the river Sina.

Hospital buildings.—Unsuitable, but the Ripon Hospital now being built is expected to be ready during the year.

General health.—Good; no epidemic.

Attendance of patients.—Three hundred and sixty-five in-door and 17,986 out-door as compared with 412 in-door and 17,508 out-door for the previous twelve months.

Prevailing diseases.—Malarious fevers, ophthalmia, worms and skin-affections.

Surgical operations.—Fifty-five major operations were performed, of which 13 were lateral lithotomy: all successful.

Mortality and its causes.—Nine deaths took place among in-door patients from the following causes: leprosy, phthisis, bronchitis, dysentery, labour, Bright's disease, abortion, arsenic poisoning, guinea worm.

Medico-legal.—Fifteen dead bodies were sent for examination; 44 persons were sent for examination, and 16 substances of various kinds.

Vaccination.—Municipal; 1,362 operations, 1,308 being successful.

Conduct of establishment.—Very satisfactory.

Cost.—The total cost was Rs. 13,014-4-5 and the cost per patient Re. 0-11-4 as compared with Rs. 12,336-5-1 and Re. 0-11-0 respectively in the previous year.

Inspected by the Surgeon-General in January.

GRANT-IN-AID DISPENSARIES.

SANGAMNER.—*In charge of* Hospital Assistant HARI KÁKÁJI.

[redacted]ildings are in good repair and suitable; the furniture and fittings are sufficient. [redacted]ee visited the dispensary five times. The sanitary condition of the town [redacted]ion and is fairly good. The water-supply from the river is good and abund-

ant; that from the wells is liable to contamination by soakage. The total treated was 12,537 out-door and 38 in-door patients as compared with 15,210 and 60 respectively in the previous year. The most common complaints were ophthalmia, skin-diseases, malarious fevers, worms and respiratory affections. There was no epidemic. Three major surgical operations were performed. Nine *post-mortem* examinations were made at the request of the police and opinion given in 16 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Ahmednagar, in April and December, and by the Deputy Sanitary Commissioner in December. Hospital Assistant Hari Kákáji is favourably reported upon for his efficiency and zeal in the performance of his duties. The total cost was Rs. 1,150-8-5, the cost per patient Re. 0-1-5, as compared with Rs. 1,456-14-8 and Re. 0-1-6 respectively in the previous year.

NEVÁSA.—*In charge of* Hospital Assistant BHIMÁJI GOPÁL.

The building is under repair; the roofs of the quarters for medical officer and servants leak very much and should be looked to. The furniture is sufficient. The committee meet quarterly. The sanitary condition of the town is very unsatisfactory. The water-supply from the river is good and abundant. The total number treated was 3,168 out-door and 32 in-door patients as compared with 2,991 and 30 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases and ulcers. There was no epidemic disease. Fifty-four children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Ahmednagar, in May and November. The total cost was Rs. 954-14-9, the cost per patient Re. 0-4-9, as compared with Rs. 780-13-9 and Re. 0-4-1 respectively in the previous year.

SHEVGAON.—*In charge of* Hospital Assistant SUBRÁYA BASÁPA.

The buildings are in good repair. Quarters for the Hospital Assistant and servants and a kitchen are required. The furniture is complete. The committee visited the dispensary four times. The sanitary condition of the town is very unsatisfactory. The water-supply is abundant from wells but liable to contamination by soakage. The total treated was 2,863 out-door and 15 in-door patients as compared with 2,894 and 25 respectively in the previous year. The prevailing diseases were ophthalmia, skin-diseases, malarious fevers, worms and ulcers. There was no epidemic. Seventy-four children were successfully vaccinated. Two *post-mortem* examinations were held at the request of the police. The dispensary was inspected by the Civil Surgeon, Ahmednagar, in November. Hospital Assistant Subráya Basápa is favourably reported upon. The total cost was Rs. 998-1-9, the cost per patient Re. 0-5-6, as compared with Rs. 1,048-12-9 and Re. 0-5-8 respectively in 1885.

NA'SIK COLLECTORATE.

CIVIL HOSPITAL, NA'SIK.—*In charge of* Surgeon H. P. DIMMOCK till 4th May; afterwards Surgeon-Major DETATHAM, M.D.

Conservancy.—The general conservancy of the city is well looked after by the Municipal Health Officers. The municipality maintains 38 sweepers. There are 34 public latrines with a special staff of 55 sweepers attached. Nightsoil is removed, converted into poudrette and sold. The drainage is also reported efficient.

Water-supply.—There is a fountain in the Musalmán quarter which receives water from the Nassurdi river said to be the best water in Násik. Three-fourths of the population obtain water from the Godávari which is impure, being the resort of numerous pilgrims. There is also a small supply from the Wagare, another small river, and there are numerous wells.

Hospital buildings.—The hospital is still located in the same old house in the city. During the rains the northern wall became unsafe, so that it became necessary to vacate that portion of the building. A search by the Civil Surgeon ended in his not being able to find any other convenient house for the purpose. Every effort has been made to maintain the hospital in as good a sanitary state as possible, and the whole building was whitewashed directly after the rains. The furniture and fittings have been in use a good many years and are in a very dilapidated condition. From every point of view the present building is unsuitable. A piece of ground near the Mutton Market is proposed as a suitable site for a new hospital.

General health.—No abnormal amount of sickness, and general health fairly good.

Attendance of patients.—In-door 262, out-door 6,751, being a considerable reduction on the two previous years accounted for by a more healthy season and by a much smaller number of pilgrims visiting Násik.

Prevailing Diseases.—Malarial fevers, conjunctivitis, respiratory affections, skin-affections, intestinal parasites, dysentery and diarrhœa.

Surgical Operations.—Seventeen major operations, including one on the globe of the eye, four amputations, four lateral and one supra-pubic lithotomies, one removal of upper jaw, one delivery by forceps, and one paracentesis abdominis. The medical officer gives an account of

most of these operations and he remarks: "I think the absence of a proper hospital "building, which would be known far and wide, is the reason why so few cases present for "operation, and I feel confident that a change for the better will be apparent when Násik "once possesses a hospital worthy of the name."

Mortality and its Causes.—Twenty-eight deaths occurred during the year, the largest number from dysentery and diarrhœa. The Civil Surgeon observes: this "rate of mortality "(10·6 per cent.) appears high, but it must be remembered that at Násik at least half the "patients are pauper pilgrims who are found by the river-side or in the dharmshálas in an "extreme state of emaciation and exhaustion and utterly destitute."

Vaccination.—Municipal, under the Deputy Sanitary Commissioner. The Civil Surgeon states the work is efficient.

Medico-legal.—Six *post-mortem* examinations were made and opinions and certificates given in various other cases.

Conduct of Establishment.—Satisfactory, with the exception of two medical pupils who after trial were dismissed as not likely to succeed. The Medical Officer reports the better class of boys seek more remunerative employment, while the less respectable ones find they can earn more money by begging at the river-side from pilgrims.

Cost.—The total cost was Rs. 10,163-1-10 and the cost per patient Rs. 1-7-2 as compared with Rs. 9,212-13-9 and Re. 0-13-6 respectively in the previous year.

Inspected by the Surgeon-General in January.

GRANT-IN-AID DISPENSARIES.

MÁLEGAON.—*In charge of* Assistant Surgeon K. T. GOKHALE, L.M. & S.

The building is small and inconvenient; certain repairs are necessary; quarters for the establishment and a dead-house are required and some articles of furniture are wanted. The committee visited the dispensary every three months. Sanitary arrangements are defective and the condition of the town bad. The water-supply is sufficient, but it is not protected from contamination. The total treated was 11,206 out-door and 19 in-door patients as compared with 12,167 and 21 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, ophthalmia, respiratory affections and worms. There was no epidemic. One hundred and ninety-six children were vaccinated. Five *post-mortem* examinations were made and opinion given in 10 medico-legal cases. The dispensary was inspected by the Civil Surgeon, Násik, in January and November. The total cost was Rs. 3,123-0-10, the cost per patient Re. 0-4-5, as compared with Rs. 1,616-7-11 and Re. 0-2-1 respectively in the previous year.

YEOLA.—*In charge of* Hospital Assistant SHAIK SURFRÁZ HÁKIM.

The new building was occupied on the 11th December 1886. A store-room, quarters for servants and increased accommodation for the Hospital Assistant are required. The committee visited the dispensary frequently. The sanitary condition of the town is fair. The water-supply from wells is deficient in the hot weather. A scheme for an improved water-supply has been resolved upon. The total number treated was 13,431, all out-door patients, as compared with 13,854 in the preceding year. The most common diseases were ophthalmia, malarious fevers, skin-diseases and worms. There was no epidemic. Nine major surgical operations were performed. There were 523 primary vaccinations. Five *post-mortem* examinations were made and opinion given in 22 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Násik, in January and in September. Hospital Assistant Shaik Surfráz Hákim is reported efficient and well conducted. The total cost was Rs. 1,851-6-0, the cost per patient Re. 0-2-2, as compared with Rs. 1,835-15-6 and Re. 0-2-1 respectively in the previous year.

DINDORI.—*In charge of* Hospital Assistant BASWANT SING.

The building is conveniently situated and is in good repair; quarters for the medical officer are required, and certain furniture should be supplied. The committee meets every month. The sanitary condition of the town is indifferent. The water-supply from the river and wells is sufficient but of doubtful quality. The total number treated was 5,144 out-door and 20 in-door patients as compared with 5,815 and 26 respectively in the previous year. Ophthalmia, malarious fevers, worms, skin-diseases and respiratory affections were the most common complaints. There was no epidemic. One hundred and fifteen children were successfully vaccinated. Five *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Násik, in February and September. Hospital Assistant Baswant Sing is favourably mentioned for good conduct and efficiency. The total cost was Rs. 1,562-14-2, the cost per patient Re. 0-3-10, as compared with Rs. 1,054-7-10 and Re. 0-2-10 respectively in the previous year.

SINNAR.—*In charge of* Hospital Assistant VITHAL BHIKA'JI.

The buildings are in good repair; the dead-house has been completed. The committee holds monthly meetings. The sanitary condition of the town is fairly good; the water-supply is said to be of good quality; some wells are liable to soakage. The total number treated was 5,733 out-door and 26 in-door patients as compared with 6,717 and 44 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, skin diseases, worms and respiratory affections. There was no epidemic. Three major surgical operations were performed. Two hundred and fifteen persons were vaccinated. Six *post-mortem* examinations were made and opinion was given in 8 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Násik, in the months of January and October. Hospital Assistant Vithal Bhikáji is efficient and well conducted. The total cost was Rs. 2,271-9-0, the cost per patient Re. 0-6-3, as compared with Rs. 1,188-15-3 and Re. 0-2-9 respectively in the previous year.

SATÁNA.—*In charge of* Hospital Assistant EBRÁHIM KHÁN.

The building is in good order, but some petty repairs are required. There are no quarters for the establishment. All furniture has now been supplied, but some clothing for in-patients is required. Monthly and quarterly meetings of the Dispensary Committee are regularly held. The sanitary condition of the town is unsatisfactory; there is no conservancy establishment. The water-supply is sufficient but liable to pollution. The total treated was 6,746 out-door and 43 in-door patients as compared with 7,117 and 39 respectively in the previous year. The most common diseases were ophthalmia, skin-diseases, malarious fevers, worms and respiratory affections. There was no epidemic. There were 163 successful primary vaccinations. Three *post-mortem* examinations were made and opinion given in many other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Násik, in February and in November. The total cost was Rs. 1,112-10-1, the cost per patient Re. 0-2-5, against Rs. 859-2-10 and Re. 0-1-9 respectively in the previous year.

PIMPALGAON BASWANT.—*In charge of* Hospital Assistant VINÁYAK DIVÁKAR.

The buildings are in good repair; the medical officer complains that the quarters allotted to him are insufficient. The committee hold monthly and quarterly meetings. The sanitary condition of the town is unsatisfactory. The water-supply is from the river and wells, the latter badly situated and liable to soakage. The total number treated was 9,762 out-door and 42 in-door patients as compared with 10,051 and 38 respectively in the previous year. The most common complaints were skin-diseases, ophthalmia, worms, and malarious fevers. There was no epidemic. Two major surgical operations were performed. Sixty-five persons were successfully vaccinated. Nine *post-mortem* examinations were made at the request of the police and opinion was given in 13 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Násik, in January and October. The total cost was Rs. 1,417-5-9, the cost per patient Re. 0-2-3, as compared with Rs. 1,405-15-0 and Re. 0-2-2 respectively in the previous year.

GOVERNMENT DISPENSARY.

PEINT.—*In charge of* Hospital Assistant BÁLÁJI MAKUND.

The building is in good repair; a store-room is required. The furniture is sufficient. There is no committee; the Mámlatdár visits the dispensary frequently. The sanitary condition of the town is very indifferent. The water-supply is deficient in the hot season and the wells are liable to soakage. The total number treated was 4,296 out-door and 67 in-door patients as compared with 3,182 and 44 respectively in the previous year. The most common complaints were worms, ophthalmia, skin-diseases and malarious fevers. There was no epidemic. Vaccination is performed at the dispensary; 78 children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Násik in February and December. The total cost was Rs. 1,976-3-2, the cost per patient Re. 0-7-2, as compared with Rs. 1,909-6-9 and Re. 0-9-5 respectively in the previous year.

KHA'NDESH COLLECTORATE.

CIVIL HOSPITAL, DHULIA.—*In charge* of Surgeon W. H. B. BOYD till 3rd May, Surgeon A. F. SARGENT till 8th August and afterwards Assistant Surgeon M. M. MODY.

Conservancy.—Public latrines insufficient. Night-soil turned a mile away. There are about 50 dust-bins. Altogether the sanitary condition of the new town is fair.

Water-supply.—Sources of supply, the river Panjra, the irrigation nála, and some 273 wells; river-water impure, irrigation water the same, well-water liable to contamination.

Hospital Buildings.—Are in very good order.

General Health.—Some cases of small-pox occurred in December. Otherwise no epidemic disease and general health satisfactory.

Attendance of Patients.—In-door 517, out-door 2,317, being less than for the previous year which was more unhealthy, especially as regards malarious fevers.

Prevailing Diseases.—Ague, conjunctivitis, diseases of the alimentary tract, spleen, affections, complaints of the respiratory system, ulcers, injury, vesical calculus.

Surgical Operations.—Ninety major operations were performed. Of the total number 47 were lateral lithotomies for stone in the bladder with 4 deaths. Of the 47 lithotomies Assistant Surgeon M. M. Mody performed 17 with only one death. Two cases of stone were submitted to lithectasy and one required the supra-pubic operation. There were also one case of artificial anus consequent on strangulated hernia with gangrene and two amputations of the foot for mycetoma.

Mortality and its causes.—Twenty-four deaths occurred in hospital, 6 from vesical calculus, 4 from dysentery, 3 from diarrhœa, 2 from dropsy and one each from the following diseases: chronic rheumatism and debility, bronchitis, phthisis, stricture, ague, syphilis, burns, gangrene, disease of the vagina.

Vaccination.—Is carried on by the municipal vaccinator and his reports go to the Sanitary Department. Vaccination is not popular at Dhulia.

Conduct of Establishment.—Satisfactory. First Class Hospital Assistant, Shaikh Dadoo, is commended.

Cost.—The total cost was Rs. 10,113-3-5, the cost per patient Rs. 3-9-1 as compared with Rs. 11,053-0-3 and Rs. 3-10-2 respectively in the previous year.

Inspected by the Surgeon-General in January.

GRANT-IN-AID DISPENSARIES.

DHULIA.—*In charge* of Hospital Assistant V. B. MOGHE.

The building, a hired one, is well suited to the purpose; it has not been repaired lately. The furniture is according to regulation and in good order. There is no committee; the dispensary is under the control of the Civil Surgeon who frequently visits it. The total number treated was 6,235 out-door patients as compared with 5,790 in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases, ulcers, inflammation of the ear and respiratory affections. The total cost was Rs. 795-2-8, the cost per patient Re. 0-2-0 as compared with Rs. 769-0-0 and Re. 0-2-1 respectively in the previous year.

PA'ROLA.—*In charge* of Hospital Assistant CHOTAY KHAN.

The building is in good order with the exception of the roof of the verandah. Some articles of furniture require repair. The committee visited the dispensary every month. The sanitary condition of the town is indifferent, the water-supply is from wells deficient and liable to pollution by soakage. The total number treated was 7,530 out-door and 11 in-door patients against 7,519 and 5 respectively in the previous year. The most common complaints were ophthalmia, skin-diseases, malarious fevers, ulcers, respiratory affections and worms. There was no epidemic. Two major surgical operations were performed. There were 603 successful vaccinations. The dispensary was inspected by the Civil Surgeon, Dhulia, in April and in November. The total cost was Rs. 1,378-15-3, the cost per patient Re. 0-2-11 as compared with Rs. 1,029-11-11 and Re. 0-2-2 respectively in the previous year.

ERANDOL.—*In charge* of Hospital Assistant MAHADEO MANOHAR.

The building is in good repair; quarters for the establishment and a latrine are still wanting. The committee meets quarterly. The sanitary condition of the town is unsatisfactory. The water-supply is insufficient in the hot season, but reported of good quality. The total number treated was 9,680 out-door and 5 in-door patients as compared with 10,075 and 7 respectively in the previous year. The most common complaints were skin-diseases, ophthalmia, malarious fevers, inflammation of the ear and respiratory affections. There was no epidemic. Three major surgical operations were performed. Four hundred and thirty-two children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon of Dhulia in April and in November. The total cost was Rs. 869-2-3, the cost per patient Re. 0-1-5, as compared with Rs. 1,136-2-4 and Re. 0-1-9 respectively in the previous year.

CHOPDA.—*In charge* of Hospital Assistant HANMA'N SING.

The buildings are in good repair; the cook-room and the compound wall have been completed. The furniture and fittings are sufficient. The committee visit the dispensary every month. The sanitary condition of the town is defective. The water-supply is liable to pollution by soakage. The total number treated was 6,324 out-door and 9 in-door patients as compared with 6,160 and one respectively in the previous year. The most

common complaints were ophthalmia, skin-diseases, malarial fevers, inflammation of the ear, ulcers and respiratory affections. There was no epidemic disease in the town. Vaccination is carried on by a Local Fund Vaccinator. The dispensary was inspected by the Civil Surgeon, Dhulia, in January, who reports favourably on Hospital Assistant Hanman Sing. The total cost was Rs. 1,631-11-10, the cost per patient Re. 0-4-1 as compared with Rs. 1,272-7-2 and Re. 0-3-3 respectively in the previous year.

SUNDARJI MULJI DISPENSARY, JALGAON.—*In charge* of Assistant Surgeon NARAYEN ANANT, G.G.M.C.

The buildings are in a good state of repair, and the furniture, &c., according to standard. The committee visited the dispensary every month. The sanitary condition of the town meets with attention. The water-supply is abundant and good for the greater part of the year but is somewhat deficient in the hot season. The total number treated was 6,378 out-door and 23 in-door patients as compared with 5,087 and 26 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, ophthalmia, worms, and respiratory affections. A few cases of measles occurred in the month of August, one major surgical operation was performed. Vaccination is carried on by a special vaccinator. Nine *post-mortem* examinations were made. The dispensary was inspected in March by the Civil Surgeon, Dhulia. The total cost was Rs. 5,269-11-10 and the cost per patient Re. 0-13-2 against Rs. 4,985-1-9 and Re. 0-15-7 respectively in the previous year.

NANDURBA'R.—*In charge* of Hospital Assistant VISHNU NARAYEN.

The building is a hired one; a new building is to be provided. There is no committee but the chairman of the municipality visited the dispensary every month. The sanitary condition of the town is fair; the water-supply is scanty and bad. The total number treated was 6,699 out-door and 11 in-door patients against 8,242 and 5 respectively in the previous year. The most common complaints were malarious fevers, skin-diseases, worms, respiratory affections and ophthalmia. There was no epidemic. One major surgical operation was performed. The number of persons vaccinated was 119. Six *post-mortem* examinations were made and opinion given in 6 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Dhulia, in February. The total cost was Rs. 1,259-7-3, the cost per patient Re. 0-3-0 as compared with Rs. 1,283-4-0 and Re. 0-2-5 respectively in the previous year.

SHIRPUR.—*In charge* of Hospital Assistant TRIMBAK LAXUMAN.

The building, a hired one, is in good repair; no decision has been arrived at regarding the purchase of the present building or the erection of a new one. A latrine is required. The committee visited the dispensary twice during the year. The sanitary condition of the town is bad. The water-supply, chiefly from wells, is sufficient, but it is not protected from pollution. The total number treated was 6,000 out-door and 10 in-door patients against 5,386 and 10 respectively in the previous year. The most common complaints were skin-diseases, ophthalmia, malarious fevers, inflammation of the ear, ulcer and respiratory affections. There was no epidemic. Several major surgical operations were performed. There were 313 successful primary and 4 re-vaccinations. Three *post-mortem* examinations were made and opinion given in several other medico-legal cases. The dispensary was inspected in January by the Civil Surgeon, Dhulia, who commends Hospital Assistant Trimbak Laxuman for the excellent condition of his dispensary. The total cost was Rs. 1,180-11-3, the cost per patient Re. 0-3-1 against Rs. 792-2-11 and Re. 0-2-4 respectively in the previous year.

BHADGAON.—*In charge* of Hospital Assistant DAJI DHONDO.

The building is in good repair; quarters for the establishment, a dead-house, cook-room and latrine are wanted. Some articles for in-patients are required. The committee visited the dispensary regularly every month. The sanitary condition of the town is not satisfactory; the water-supply from the Girna and from wells is abundant, but from the latter is liable to soakage. The total treated was 4,292 out-door and 11 in-door patients compared with 3,428 and 4 respectively in the previous year. The most common diseases were skin-diseases, malarious fevers, worms and ophthalmia. There was no epidemic. Two major surgical operations were performed. One hundred and thirty-nine children were successfully vaccinated. Eight *post-mortem* examinations were made. The dispensary was inspected in January by Civil Surgeon, Dhulia, and in November by the Deputy Sanitary Commissioner. The total cost was Rs. 1,657-5-0, the cost per patient Re. 0-6-1 as compared with Rs. 962-6-2 and Re. 0-4-5 respectively in the previous year.

PIMPALNER.—*In charge of* Hospital Assistant VISHNU SHIVRÁM.

The buildings are in good repair. The necessary furniture with the exception of a dissecting table is provided. The ground close to the dispensary, used as a pond, is complained of as a nuisance. The light in the dead-house is defective, and there are no servants' quarters. The committee visited the institution 9 times. The sanitary condition of the town is not attended to. The water-supply is abundant but liable to pollution.

The total number treated was 5,464 out-door and 28 in-door patients as compared with 4,984 and 9 respectively in the previous year. The most common diseases were worms, skin-diseases, malarious fevers, ophthalmia and respiratory affections. There was no epidemic. One major surgical operation was performed. Vaccination is carried on by the táluka vaccinator. Seven *post-mortem* examinations were made. The dispensary was inspected in March by the Civil Surgeon, Dhulia. The total cost was Rs. 1,176-7-0, the cost per patient Re. 0-3-5 against Rs. 586-3-7 and Re. 0-1-10 respectively in the previous year.

SHA'HA'DA.—*In charge of* Hospital Assistant RAMKRISHNA SUKESHWAR.

Some petty repairs are required. The establishment is not provided with quarters and there is no dead-house. The committee met four times. The sanitary condition of the town is very unsatisfactory. The water-supply is ample but is very liable to contamination. The total treated was 4,648 out-door and 18 in-door patients as compared with 4,889 and 8 respectively in the previous year. The most common diseases were those of the skin, malarious fevers, respiratory affections, inflammation of the ear and worms. There was no epidemic. Two major operations were performed. Vaccination is carried on by a vaccinator. Six *post-mortem* examinations were made. The dispensary was inspected in December by the Acting Civil Surgeon, Dhulia. The total cost was Rs. 1,301-15-8, the cost per patient Re. 0-4-5 as compared with Rs. 844-0-11 and Re. 0-2-9 respectively in the previous year.

TALODA.—*In charge of* Hospital Assistant SAKA'RA'M LAXUMAN.

The building is a hired one and requires repair. Quarters for servants, a cook-room and a dead-house are wanted; some furniture is required. The committee visit the dispensary frequently. The sanitary condition of the town is not satisfactory and the water-supply is very indifferent. The total number treated was 4,124 out-door and 1 in-door patient as compared with 5,107 and 4 respectively in the previous year. Skin-disease, malarious fevers, ophthalmia, respiratory affections, ulcers and diarrhœa were the most common diseases. There was no epidemic. One hundred and thirty-two children were vaccinated. One *post-mortem* examination was made at the request of the police. The total cost was Rs. 745-9-5, the cost per patient Re. 0-2-10 as compared with Rs. 1,136-0-10 and Re. 0-3-6 respectively in the previous year.

AMALNER.—*In charge of* Hospital Assistant GANPAT NILOBA.

The present hired building is unsuited to the purpose. The furniture is in good order but one or two articles are required. The committee met 7 times during the year. The sanitary condition of the town is unsatisfactory. The water-supply is deficient in the hot season and of inferior quality. The total number treated was 4,644 out-door and 2 in-door patients. Skin-diseases, ophthalmia, malarious fevers, ulcers, inflammation of the ear, and respiratory affections were the most common diseases. There was no epidemic. Eight major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. One *post-mortem* examination was made during the year. The dispensary was inspected by the Civil Surgeon, Dhulia, in January. The total cost was Rs. 1,454-2-9, the cost per patient Re. 0-5-0.

SA'TA'RA COLLECTORATE.

CIVIL HOSPITAL, SA'TA'RA.—*In charge of* Surgeon-Major J. P. GREANY, M.D., till 27th March; SURGEON DAMANIA till 17th September, and afterwards SURGEON-MAJOR J. P. GREANY, M.D.

Conservancy.—Is on the whole fairly looked after.

Water-supply.—The Kas water scheme, undertaken to supplement the old 'Gosteshwar' supply, was taken over by the municipality during the year, but means of distribution are still faulty.

Hospital Buildings—Are in good repair, but defects in construction, ventilation, and position render them in some degree objectionable.

General Health.—Most satisfactory.

Attendance of Patients.—In-door 523, out-door 20,037 compared with 554 and 18,609 for the previous year.

Prevailing Diseases.—Intestinal worms, scabies, malarious fevers, ulcers, conjunctivitis, ear diseases, wounds and injuries, abscess, rheumatic affections, syphilis, diarrhœa, dysentery, gonorrhœa and its complications in the order named.

Surgical Operations.—Major 45 including 6 lithotomies, 5 amputations, 9 removal of tumours. Minor 787.

Mortality and its Causes.—Seventeen deaths occurred in hospital—3 from phthisis, 2 from fever, 2 debility, 2 necrosis of spine, one from each of the following diseases: pneumonia, diarrhœa, calculus, bronchitis, opium-poisoning, Bright's disease, gangrenous ulcers, hydrophobia.

Medico-legal.—Total 28 cases, *viz.* 12 *post-mortem* examinations, 10 examiations of articles supposed to contain poisons, 3 examinations of wearing apparel for blood stain, 1 of fœtal bones, 2 females examined for abortion.

Vaccination.—Municipal, and reported satisfactory.

Conduct of Establishment.—Good.

Cost.—The total cost was Rs. 9,748-9-1, the cost per patient Re. 0-7-7, as compared with Rs. 10,199-7-6 and Re. 0-8-6 respectively in the previous year.

Inspected by the Surgeon-General on 12th December.

CIVIL HOSPITAL, MAHA'BALESHVAR.—*In charge of* Surgeon-Major DAVIDSON, M.B., till 23rd March, afterwards Surgeon-Major MURPHY.

Conservancy.—Is carried on by the same means and on the same principle as for some years past. There are 6 public latrines and a permanent staff of sweepers entertained by the municipality and supervised by an inspector. Sweepings are carted to depôts both from the bázár and from bungalows.

Water-supply.—From the Yenna lake, tanks, wells and openings. The water is good and abundant excepting towards the end of the wet season.

Hospital Buildings.—Are in good repair and the accommodation sufficient with furniture and fittings meeting requirements.

General Health.—Good throughout the year.

Attendance of Patients.—There were 104 in-door patients and 5,403 out-door against 38 and 7,415 for the previous year.

Prevailing Diseases.—Parasitic diseases, constipation, scabies, ague, conjunctivitis, bronchitis, chronic rheumatism. Parasitic diseases, although showing a decrease on former years, are still very prevalent, accounting for nearly half the admissions. It is alleged "that the great prevalence of parasitic diseases amongst the hill tribes is owing to various factors, the chief being impure water, insufficient and bad food, and want of salt."

Surgical Operations.—There was only one major operation, *viz.* internal urethrotomy; of minor operations 146.

Mortality and its Causes.—No death occurred among the in-door patients.

Vaccination.—By the táluka vaccinator, who visits Mahábaleshvar periodically.

Conduct of Hospital Establishment.—Reported satisfactory.

Cost.—The total cost was Rs. 10,806-14-1 and the cost per patient Rs. 1-15-4 as compared with Rs. 10,465-3-0 and Rs. 1-6-5 respectively in the previous year.

Inspected by the Surgeon-General in May.

GRANT-IN-AID DISPENSARIES.

WA'I.—*In charge of* Hospital Assistant CHINTA'MAN BALLÁL.

The verandah requires repair. The furniture and fittings are sufficient. The committee inspected the dispensary 12 times during the year. The sanitary condition of the town is unsatisfactory. The water-supply is abundant but contaminated by surface filth. The total treated was 12,326 out-door and 21 in-door patients against 15,141 and 17 respectively in the previous year. The most common complaints were worms, skin-diseases, ophthalmia, malarious fevers and respiratory affections. There was no epidemic. Seven major surgical operations were performed. One hundred and eighty-six persons were vaccinated. Eight *post-mortem* examinations were made at the request of the police. The dispensary was inspected in March by the Deputy Sanitary Commissioner. The total cost was Rs. 1,176-11-4, the cost per patient Re. 0-1-6, as compared with Rs. 1,614-6-3 and Re. 0-1-8 respectively in the previous year.

KARÁD.—*In charge of* Hospital Assistant VINAYAK SAKHARAM.

The building is in good repair; there are no quarters for the medical officer. The furniture is in good order. The committee meets quarterly. The sanitary condition of the town is not satisfactory, but some attention is given to these matters. The water-supply is abundant and said to be good. The total number treated was 7,608 out-door and 29 in-door patients as compared with 5,755 and 10 respectively in the previous year. The most common diseases were ophthalmia, skin-diseases, worms, malarious fevers, respiratory affections and ulcers. There was no epidemic. Several major surgical operations were performed. The number of children vaccinated was 193. Twenty bodies were sent for *post-mortem* examination. The total cost was Rs. 1,251-6-1, the cost per patient Re. 0-2-7, as compared with Rs. 1,520-10-8 and Re. 0-4-2 respectively in the previous year.

ISLÁMPUR.—*In charge of* Hospital Assistant RAMCHANDRA S. PRABHUNE.

The building requires repair; furniture with the exception of some cots is supplied. The committee visited the dispensary every quarter. The sanitary condition of the town is not at all satisfactory. The water-supply from tanks is deficient in the hot weather and

at all times indifferent in quality. The total number treated was 8,160 out-door and 45 in-door patients as compared with 8,602 and 40 respectively in the previous year. The most common complaints were skin-diseases, worms, ophthalmia, malarious fevers, and respiratory and rheumatic affections. There was no epidemic. Several major surgical operations were performed. The total number of vaccinations was 418. Ten *post-mortem* examinations were made and opinion was given in 28 other medico-legal cases. The dispensary was inspected in February by the Civil Surgeon, Sátára. The total cost was Rs. 1,005-10-3, the cost per patient Re. 0-1-11, as compared with Rs. 773-5-9 and Re. 0-1-5 respectively in the previous year.

PUSESÁVLI.—*In charge of* Hospital Assistant BHAU TUKARAM.

The building is in good order; the furniture is sufficient. The committee visited the dispensary ten times. The sanitary condition of the town is unsatisfactory. The water-supply is abundant. The total number treated was 3,898 out-door and 10 in-door patients as compared with 4,225 and 16 respectively in the previous year. The most common complaints were ophthalmia, malarious fevers, skin-diseases, worms and respiratory affections. There was no epidemic. Seventy-nine persons were successfully vaccinated. The total cost was Rs. 900-4-8, the cost per patient Re. 0-3-8, as compared with Rs. 1,057-3-6 and Re. 0-3-11 respectively in the previous year.

MHASVAD.—*In charge of* Hospital Assistant WASUDEO BALKRISHNA.

The building is in a good state of repair; quarters for the servants are required. Furniture and fittings are in good order; some bedding for in-patients is wanted. The committee visited the dispensary twelve times. Some attention is paid to conservancy; the water-supply is deficient in the hot season and of inferior quality. The total treated was 4,306 out-door and 32 in-door patients as compared with 4,524 and 19 respectively in the previous year. The most common complaints were ophthalmia, skin-diseases, worms, malarious fevers and respiratory affections. There was no epidemic in the town; a few cases of cholera occurred in surrounding villages. There were 202 successful vaccinations and 3 re-vaccinations. Five *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Civil Surgeon, Sátára, in February. The total cost was Rs. 823-12-6, the cost per patient Re. 0-3-0, as compared with Rs. 852-0-9 and Re. 0-3-0 respectively in the previous year.

PÁTAN.—*In charge of* Hospital Assistant MOHANLAL NANEKRAM.

The ordinary and petty repairs are in progress. The furniture and fittings are in good order. The committee visited the dispensary 8 times during the year. There is no attempt at sanitation; the water-supply is ample but subject to pollution. The total treated was 4,492 out-door and 7 in-door as compared with 4,491 and 7 respectively in the previous year. The most common diseases were ophthalmia, skin-diseases, worms and malarious fevers. There was no epidemic. One hundred and eight children were vaccinated. Four *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Civil Surgeon, Sátára, in January. Hospital Assistant Mohanlal Nanekram is commended. The total cost was Rs. 1,284-11-6, the cost per patient Re. 0-4-6, as compared with Rs. 974-1-11 and Re. 0-3-5 respectively in the previous year.

TÁSGAON.—*In charge of* Hospital Assistant GOVIND GOPAL.

The building is in good repair; the furniture is sufficient. The committee visit the dispensary occasionally. Conservancy is attended to; the public latrines are not in use as there is not sufficient establishment to attend to them. The water-supply is good but insufficient in the hot season. The total number treated was 3,734 out-door and 6 in-door patients as compared with 2,674 and 16 respectively in the previous year. The most common complaints were worms, skin-diseases, ophthalmia and respiratory affections. There was no epidemic. There were 153 successful vaccinations. Seven *post-mortem* examinations were made during the year. The total cost was Rs. 1,041-1-6, the cost per patient Re. 0-4-5, as compared with Rs. 974-1-11 and Re. 0-3-5 respectively in the previous year.

PÁNCHGANI.—*In charge of* Hospital Assistant J. F. DEJOSS.

The building is in good order; the necessary furniture is supplied and is also in good order. There is no committee. Measures have been taken to improve the sanitary condition of the station. The water is good but in the hot season the supply is confined to one well, the others run dry. The total number treated was 8,604 out-door and 8 in-door patients as compared with 8,302 and 4 respectively in the previous year. The most common complaints were skin-diseases, worms, malarial fevers and respiratory affections. There was no epidemic. Four major surgical operations were performed. The dispensary was inspected in April by the Deputy Sanitary Commissioner. The total cost was Rs. 924-8-1, the cost per patient Re. 0-1-8, against Rs. 945-9-6 and Re. 0-1-3 respectively in the previous year.

SHOLÁPUR COLLECTORATE.

CIVIL HOSPITAL, SHOLÁPUR.—*In charge of* Apothecary W. R. SCROGGIE, M.R.C.S.

Conservancy.—There is a conservancy establishment and the main streets are fairly clean. There is an absence of sufficient receptacles for waste water and some are leaky.

Dust-bins are placed in various localities. Poudrette is prepared and sold particularly to sugarcane growers. Rs. 1,285 has been expended on small drains, but efficient general drainage is required.

Water-supply.—The water from the Ekruk Tank is the chief source and its quality is good.

Hospital Buildings.—Many improvements are required by quarters for medical pupils, ceiling to the wards, paved floors, improvements to the dead-house and cholera wards. During the year 2 cells for lunatics were boarded and an iron water-tank was sanctioned which, however, had not yet been supplied.

General Health.—Good. No epidemic occurred.

Attendance of Patients.—The total number treated was 8,116, being 211 in excess of the previous year. Of these 329 were in-door patients, of which 120 were police.

Prevailing Diseases.—Malarious fevers, rheumatic affections, ophthalmia, respiratory affections, dysentery, worms, skin-diseases, ulcers, and injuries in the order named.

Surgical Operations.—Fifty major operations are reported. The most important were 5 lithotomies, 4 aspirations of hepatic abscess, 1 removal of uterine fibrous tumour, 1 for cancer of the uterus, 1 iredectomy, 1 extraction of cataract; minor operations 592.

Mortality and its Causes.—Twenty-three deaths occurred in hospital, 4 from dysentery, 3 from remittent fever, 2 from phthisis, 2 from dropsy and 1 each from various other causes.

Vaccination.—Municipal, 1,835 cases of primary and 189 of secondary being recorded.

Medico-legal.—Fourteen *post-mortem* examinations, 25 persons examined for criminal injuries, 5 articles examined, 2 females for signs of delivery, dead cattle sent for examination 1.

Conduct of Establishment.—There have been owing to various causes 3 changes of Hospital Assistants. The medical officer represents the necessity of further assistance, which it is not practicable to afford. He also represents the want of a female attendant. The 2nd class servants did their work on the whole well.

Cost.—The total cost was Rs. 7,517-12-1 and the cost per patient Re. 0-14-9, as compared with Rs. 7,455-2-3 and Re. 0-15-1 respectively in the previous year.

MUNICIPAL DISPENSARIES.

SHOLÁPUR.—*In charge of* Hospital Assistant HANMANTRAO GHORPARE.

The building is in good repair; a new latrine for in-door patients is required. The furniture and fittings are complete and in good order. The committee met frequently during the year. The total number treated was 15,751 out-door and 90 in-door patients as compared with 14,085 and 89 respectively in the previous year. The most common diseases were those of the skin, malarious fevers, ophthalmia, respiratory affections, worms and other bowel-complaints. There was no epidemic. Seventeen major surgical operations were performed. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Apothecary in civil medical charge, Sholápur, in June and November and by the Surgeon-General in November. Hospital Assistant Hanmantrao Ghorpare is again commended. The total cost was Rs. 3,739-11-4, the cost per patient Re. 0-3-9, as compared with Rs. 1,954-3-2 and Re. 0-2-2 respectively in the year 1885.

PANDHARPUR.—*In charge of* Assistant Surgeon SHANTARAM VINAYAK, L.M.

The buildings are in excellent condition. The furniture and fittings are in good order. The committee met frequently. The total number treated was 13,490 out-door and 65 in-door patients as compared with 13,135 and 120 respectively in the previous year. The most common diseases were those of the skin, ophthalmia, worms, malarious fevers and respiratory affections. There was no epidemic. Eleven major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. Fifteen *post-mortem* examinations were made and 3 cases were submitted to the Chemical Analyser. The total cost was Rs. 5,082-11-5, the cost per patient Re. 0-5-11, as compared with Rs. 5,632-4-5 and Re. 0-6-9 respectively in the previous year.

BA'RSI.—*In charge of* Hospital Assistant NARSU GURAPA.

The building is in good order, but better ventilation of the female ward is still required. The furniture and fittings are satisfactory. The committee met twelve times. The sanitary condition of the town is fairly good. The water-supply is from a tank and wells; the latter permit of soakage. The total number treated was 14,780 out-door and 52 in-door patients against 15,790 and 56 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, skin-diseases, worms, respiratory affections and inflammation of the ear. Vaccination is performed by the municipal vaccinator. Eight major surgical operations were performed. Twelve *post-mortem* examinations were made, and opinion given in 27 other medico-legal cases; eight cases were submitted to the Chemical Analyser to Government. The dispensary was inspected by the Apothecary in civil medical charge, Sholápur, in March and November. The total cost was Rs. 1,761-9-2, the cost per patient Re. 0-1-10, as compared with Rs. 2,114-1-6 and Re. 0-2-1 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

KARMA'LA.—*In charge of* Hospital Assistant SHAIK AHMED PATEL.

The dead-house and part of the compound wall require repair; quarters for the servants are unprovided, and some articles of furniture, benches and cots are wanted. The committee visited the dispensary every month. The sanitary condition of the town is fairly well looked after. The water-supply is deficient and liable to pollution from soakage. The total number treated was 8,741 out-door and 11 in-door patients as compared with 7,928 and 23 respectively in the previous year. The most common complaints were ophthalmia, skin-diseases, worms, malarious fevers and rheumatic affections. An epidemic of mumps occurred in the latter part of the year. Six major surgical operations were performed. The number of persons successfully vaccinated was 153. Seven *post-mortem* examinations were made and opinion given in 12 other medico-legal cases. The dispensary was inspected by the Apothecary in civil medical charge, Sholápur, in February and November. Hospital Assistant Shaik Ahmed Patel is commended. The total cost was Rs. 1,497-12-6, the cost per patient Re. 0-2-8, as compared with Rs. 991-8-4 and Re. 0-1-11 respectively in the previous year.

AKLUJ.—*In charge of* Hospital Assistant S. NICKUM.

The building is in good condition; a female ward and dead-house are required. The furniture and fittings are sufficient. The committee meet every three months. The sanitary condition of the town is very unsatisfactory. The water-supply is abundant but is not protected from contamination. The total number treated was 6,110 out-door and 30 in-door patients as compared with 3,402 and 10 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, ophthalmia and respiratory affections. There was no epidemic. Six major surgical operations were performed. Sixty persons were successfully vaccinated. The dispensary was inspected in February by the Apothecary in civil medical charge, Sholápur. The total cost was Rs. 688-12 3, the cost per patient Re. 0-1-9, as compared with Rs. 1,237-12-8 and Re. 0-5-9 respectively in the previous year.

NATIVE STATE DISPENSARY.

AKALKOT.—*In charge of* Hospital Assistant GANGADEEN.

No alteration has been made in the building during the year. The Political Agent and local officials visit the dispensary occasionally. The total number treated was 5,039 out-door and 9 in-door patients, as compared with 4,653 and 2 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, worms and skin-diseases. There was no epidemic. Vaccination hitherto performed by the medical officer has now been handed over to the State vaccinator; 218 children were successfully vaccinated. The total cost was Rs. 2,071-5-2, the cost per patient Re. 0-6-6, as compared with Rs. 1,977-12-6 and Re. 0-6-9 respectively in the previous year.

BELGAUM COLLECTORATE.

CIVIL HOSPITAL, BELGAUM.—*In charge of* Surgeon-Major D. E. HUGHES, M.D.

Conservancy.—The city night-soil is converted into poudrette near the Dhárwár road, but it is in contemplation to remove the depôt away from the fort on the Kolhápur road.

Water-supply.—No complaints, chiefly from wells.

Hospital Buildings.—The following are the graver defects. Male ward low and ventilation defective. Female ward badly ventilated. These wards are either draughty or close. Flooring of both wards rough stone which cannot be kept clean. No well lighted operating room or private examination room. No accommodation for Europeans, required now, Belgaum being on the railway line. No accommodation for better class of natives. No servants' quarters. No detention ward for supposed lunatics.

General Health.—Good: no epidemic.

Attendance of Patients.—Two hundred and sixty-eight in-door and 4,059 out-door were treated. The daily average number of in-door patients was the same as for the previous year, namely 15·4. There was an increase of out-door.

Prevailing Diseases.—Malarious fevers, rheumatic affections, dysentery, diarrhœa, intestinal worms, skin-affections, ulcers, injuries, diseases of the respiratory system.

Mortality and its Causes.—Twenty-seven in-door patients died. The causes were remittent fever, secondary syphilis, general dropsy, bronchitis, pneumonia, cancer, hepatitis, cirrhosis, splenitis, Bright's disease, wound of abdomen, dysentery, ascitis, debility, compound fracture, diarrhœa.

Surgical Operations.—Twenty-four major operations occurred.

Vaccinations.—Municipal.

Medico-legal.—Eighteen *post-mortem* examinations were made on the requisition of the police.

Conduct of Establishment.—Reported satisfactory.

Cost.—The total cost was Rs. 16,694-0-10 and the cost per patient Rs. 3-13-8, as compared with Rs. 14,966-13-10 and Rs. 4-3-8 respectively in the previous year.

Inspected on the 4th of December by the Surgeon-General.

GRANT-IN-AID DISPENSARIES.

BELGAUM.—*In charge of* Hospital Assistant HARI VITHAL.

Some repairs are required to the roof of the main hall and to the floor of the dispensing room. The furniture and fittings are sufficient and in good order. The committee met ten times and individual members have made very frequent visits. The total number treated was 8,139 out-door and 7 in-door patients against 7,326, all out-door, in the previous year. The prevailing diseases were those of the skin, malarious fevers, ophthalmia, respiratory affections and worms. Mumps and hooping cough prevailed during the year. One major surgical operation was performed. Vaccination is carried on by a municipal vaccinator. The dispensary was inspected by the Surgeon-General in December, by the Civil Surgeon in April and November, and by the Deputy Sanitary Commissioner. Hospital Assistant Hari Vithal is praised for the manner in which he conducts his duties. The total cost was Rs. 1,743-3-5, the cost per patient Re. 0-3-5, as compared with Rs. 1,192 and Re. 0-2-7 respectively in the previous year.

GOKA'K.—*In charge of* Hospital Assistant SHIVU BHAGU.

The building has been repaired; there are no quarters for servants. With the exception of the cots the furniture is in good condition and sufficient. The committee visited the dispensary several times. Surface conservancy is good. The water-supply is from the river and wells; the latter is brackish. The total number treated was 4,622 out-door and 48 in-door patients as compared with 2,935 and 21 respectively in the previous year. The most common complaints were ophthalmia, skin-diseases, worms and ulcers. There was no epidemic. Vaccination is performed at the dispensary twice weekly. The Civil Surgeon, Belgaum, inspected the dispensary once in January, and commends Hospital Assistant Shivu Bhagu. The total cost was Rs. 1,448-12-7, the cost per patient Re. 0-4-11, as compared with Rs. 957-14-7 and Re. 0-5-2 respectively in the previous year.

ATHNI.—*In charge of* Hospital Assistant RA'MCHANDRA DA'JI.

With the exception of the roof of the verandah the buildings are in good repair. Clothing for in-patients is required; otherwise the furniture and fittings are sufficient. The committee met 9 times. The sanitary condition of the town is fair. The water-supply is fair but liable to become scanty. The total number treated was 5,988 out-door and 19 in-door patients as compared with 5,540 and 14 respectively in the previous year. The most common diseases were ophthalmia, worms, skin-diseases, respiratory affections, ulcers and malarious fevers. There was no epidemic. Six major surgical operations were performed. Vaccination has been carried on by the municipal vaccinator. Eight *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Deputy Sanitary Commissioner in March. Hospital Assistant Ramchandra Daji keeps his dispensary in excellent order. The total cost was Rs. 1,536-7-1, the cost per patient Re. 0-4-1, as compared with Rs. 1,568-11-8 and Re. 0-4-6 respectively in the previous year.

SAUNDATTI.—*In charge of* Hospital Assistant MORO RA'MCHANDRA.

The building now occupied is in good order; the new building is nearly finished. The committee meet regularly. Drainage and surface conservancy of the town are good. The water-supply is good and sufficient. The total number treated was 2,160, all out-door patients, against 2,051 in the previous year. The most common complaints were malarious fevers, skin-diseases, worms, ophthalmia and ulcers. There was no epidemic. Four major surgical operations were performed. One hundred and seventy-two children were successfully vaccinated. Fifteen *post-mortem* examinations were made. The dispensary was inspected in December by the Civil Surgeon, Belgaum, who speaks favourably of Hospital Assistant Moro Rámchandra. The total cost was Rs. 3,268-12-4, the cost per patient Rs. 1-8-2, against Rs. 4,440 and Rs. 2-2-7 respectively in the previous year.

CHIKODI.—*In charge of* Hospital Assistant HUNMANTRAO CHOWAN.

The roof of the buildings requires repair; quarters for servants and some articles of furniture are required. The committee visited the dispensary 18 times. The town is kept clean. The water-supply from a stream and wells is sufficient. The total number treated was 3,860 out-door and 41 in-door patients as compared with 3,155 and 44 respectively in the previous year. Skin-diseases, malarious fevers, worms, ophthalmia and respiratory affections were the most common complaints. There was no epidemic. Several major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Eight *post-mortem* examinations were made and opinion given in 16 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Belgaum, in December; Hospital

Assistant Hunmantráo Chowan is praised for his conduct. The total cost was Rs. 1,328-7-3, the cost per patient Re. 0-5-5, as compared with Rs. 1,608-14-6 and Re. 0-8-0 respectively in the previous year.

DHA'RWA'R COLLECTORATE.

CIVIL HOSPITAL, DHÁRWÁR.—*In charge of* Surgeon-Major W. MCCONAGHY, M.D., till the 24th March, afterwards in charge of Surgeon-Major J. DAVIDSON, M.B.

Conservancy.—There is a conservancy establishment in the city consisting of inspector, sweepers, carts, &c.; the rubbish is conveyed to outside depôts and afterwards sold, and the night-soil is buried. But the establishment only suffices for the principal thoroughfares. Pit privies are very common in the city and the practice of keeping cattle in human habitations is most objectionable. The hospital conservancy is well attended to.

Water-supply.—From 5 public tanks, 16 public wells, and many private wells. The whole is more or less impure and the supply often scanty in the hot season.

Hospital Buildings.—Are in excellent repair, and accommodation sufficient for demand.

General Health.—Remarkably good during the whole year.

Attendance of Patients.—In-door patients treated 245 against 280 for the previous year. Out-door 6,740.

Prevailing Diseases.—Ague, parasitic diseases, scabies, ulcers, bronchitis, conjunctivitis, injuries, diarrhœa, dysentery.

Surgical Operations.—Major operations 10, including podalic version, removal of large fatty tumour, paracentesis abdominis, reduction of dislocations, amputations of thigh and arm; minor operations 493.

Mortality and its Causes.—There were 19 deaths, 5 from dysentery, 4 from diarrhœa, 2 debility, one from each of the following maladies: secondary syphilis, opium-poisoning, hepatitis, amputation of thigh, remittent fever, ague.

Vaccination.—Is carried on by the municipal vaccinator under the control of the Sanitary Department.

Medico-legal.—Eleven *post-mortem* examinations were made for medico-legal purposes and 35 reports were made to the police. In addition the Civil Surgeon had on several occasions to appear as witness in the local Court and was once summoned to Belgaum.

Conduct of Establishment.—Reported generally good. 1st Class Hospital Assistant Woodaji Raiker is commended.

Cost.—The total cost was Rs. 17,587-8 and the cost per patient Rs. 2-8-3 as compared with Rs. 17,184-5-0 and Rs. 3-0-4 respectively in the previous year. This increase is chiefly owing to the fact that the salaries of both Surgeon-Major W. McConaghy and the Acting Civil Surgeon were disbursed in Dhárwár for the month of March.

Inspected by the Surgeon-General on December 2nd.

GRANT-IN-AID DISPENSARIES.

HUBLI.—*In charge of* Assistant Surgeon D. N. SELKE.

The building requires thorough repair. The committee visit the dispensary every month. The sanitary condition of the town is fairly good; the water-supply is abundant but liable to soakage and contamination. The total number treated was 18,001 out-door and 136 in-door patients as compared with 16,115 and 134 respectively in the previous year. The most common diseases are ophthalmia, malarious fevers, worms, skin-diseases, and respiratory affections. There was no epidemic. Thirty-one major surgical operations were performed. Vaccination is performed by a municipal vaccinator. Fourteen *post-mortem* examinations were made at the request of the police, and opinion was given in 35 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Dhárwár, in July and December, and by the Deputy Sanitary Commissioner in January and November. Assistant Surgeon D. N. Selke is a most efficient officer. The total cost was Rs. 7,101-14-11, the cost per patient Re. 0-6-3, as compared with Rs. 5,466-1-4 and Re. 0-5-4 respectively in the previous year.

GADAG.—*In charge of* Assistant Surgeon D. CARDOZ.

The buildings are in good order; a cupboard for medical stores and shelves in the store-room are needed. The committee usually visit the dispensary every month, but of late their visits have been irregular and infrequent. The sanitary condition of the town is unsatisfactory. The water-supply is abundant but many of the wells allow of soakage. The total number treated was 14,804 out-door and 47 in-door patients against 13,877 and

46 respectively in the previous year. The most common complaints were skin-diseases, ophthalmia, malarious fevers, worms and respiratory affections. There was no epidemic. Thirty-eight major surgical operations were performed. Vaccination is done by the municipal vaccinator. Thirteen *post-mortem* examinations were made and numerous other medico-legal cases sent for opinion. The dispensary was inspected by the Civil Surgeon, Dhárwár, in June and December, who speaks in high terms of Assistant Surgeon D. Cardoz. The total cost was Rs. 5,297-1-3, the cost per patient Re. 0-5-8, as compared with Rs. 4,687-13-11 and Re. 0-5-3 respectively in the previous year.

HÁVERI.—*In charge of* Hospital Assistant RANGAPPA JAGANNATH.

The building has not been repaired and the roof leaks. The committee visited the dispensary 6 times. The sanitary condition of the town is unsatisfactory and the water-supply insufficient and of inferior quality. The total number treated was 5,520 out-door and 40 in-door patients as compared with 5,932 and 50 respectively in the previous year. The most common complaints were skin-diseases, worms, malarious fevers, ophthalmia and ulcers. There was no epidemic. Seven major surgical operations were performed. Twenty-five *post-mortem* examinations were made and opinion given in 47 other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Dhárwár, once. The total cost was Rs. 1,989-4-10, the cost per patient Re. 0-5-8, as compared with Rs. 1,333-7-0 and Re. 0-3-6 respectively in the previous year.

NAVALGUND.—*In charge of* Hospital Assistant VENKAJI DEVJI.

The institution was opened for the reception of patients on the 11th December 1886, The buildings are suitable and convenient. Some furniture still remains to be supplied. No meeting of the committee has been held. Sanitary matters do not appear to have received much attention; the water-supply is scanty and of inferior quality. The number of patients treated was 400 out-door and 1 in-door; skin-diseases, malarious fevers, bowel-complaints and rheumatism being the chief diseases. Vaccination is performed by the táluka vaccinator. The cost was Rs. 114-7-7, the cost per patient Re. 0-4-6.

BIJÁPUR COLLECTORATE.

CIVIL HOSPITAL, BIJÁPUR.—*In charge of* Assistant Surgeon K. S. ENGINEER till 13th July 1886, Surgeon-Major BARRY till 27th September 1886, Assistant Surgeon D. E. KOTHAWALA till the end of year.

Conservancy.—There are 3 small municipal latrines, but the generality of people resort to the neighbouring ground. Altogether the sanitary arrangements as regards conservancy, drainage, &c., are unsatisfactory.

Water-supply.—Reported abundant from numerous wells but liable to contamination.

Hospital Buildings.—The old Bijápur Dispensary is still used as the hospital, but the new hospital is making satisfactory progress.

General Health.—Good, with the exception of much malarial fever after the heavy rains.

Attendance of Patients.—Three hundred and seven in-door, being an increase of 88 over the previous year. Out-door 8,640, being an increase of 1,030. It is stated that the population of Bijápur is increasing since it became the head-quarters of the Collectorate.

Prevailing Diseases.—Malarial fevers, intestinal worms, skin-affections, ophthalmia, ear affections, venereal, and respiratory affections.

Surgical Operations.—Twenty-two major and 452 minor operations presented. The major operations include amputation of the forearm for injury, removal of the lens for cataract, both successful.

Mortality and its Causes.—Six deaths occurred among in-door patients. The causes are syphilis 1, phthisis 1, hydrocephalus 1, pneumonia 1, hepatitis 1, and injury 1.

Vaccination.—Is performed by the táluka vaccinator under the control of the Sanitary Department.

Medico-legal.—Seven *post-mortem* examinations were made at the request of the police, and opinion given in many other cases coming under this head.

Conduct of Establishment.—Reported satisfactory. 3rd Class Hospital Assistant Ganesh Vinayak is commended both by Surgeon-Major Barry and Assistant Surgeon Kothawala.

Cost.—The total cost was Rs. 3,752-15-2 and the cost per patient Re. 0-6-8, as compared with Rs. 4,806-7-4 and Re. 0-9-9 respectively in the previous year.

Inspected by the Surgeon-General in November.

GRANT-IN-AID DISPENSARIES.

ILKAL.—*In charge of* Hospital Assistant RAMJI BAPUJI.

The buildings are generally in a good state of repair, but the roof leaks in the rains. The furniture and fittings are in good order and sufficient. Individual members of the committee visited the dispensary, but no regular meetings were held. The town is kept fairly clean, the water-supply is abundant, but some wells are liable to pollution by soakage. The total number treated was 3,758 out-door and 31 in-door patients as compared with 3,394 and 36 respectively in the previous year. The most common diseases were ophthalmia, skin-diseases, malarious fevers, worms and ulcers. There were 289 primary and 11 re-vaccinations. Six *post-mortem* examinations were made at the request of the police, and opinion given in 20 other medico-legal cases. The dispensary was inspected by the Assistant Surgeon, Bijápur, in March. The total cost was Rs. 1,669-14-9, the cost per patient Re. 0-7-0, as compared with Rs. 1,466-4-1 and Re. 0-6-10 respectively in the previous year.

BÁGALKOT.—*In charge of* Hospital Assistant BHAGU MAHADU.

The buildings are in good order; quarters for servants have been supplied and the furniture sufficient. The committee met three times. The sanitary condition of the town receives attention. The water-supply is good and abundant. The total number treated was 10,708 out-door and 44 in-door patients as compared with 6,769 and 54 respectively in the previous year. The most common diseases were worms, ophthalmia, malarious fevers, skin-diseases and respiratory affections. There was no epidemic. Eight major surgical operations were performed. Vaccination is carried on by the municipal vaccinator. Seventeen *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Assistant Surgeon, Bijápur, in January and July. The total cost was Rs. 2,181-15-6, the cost per patient Re. 0-3-2, as compared with Rs. 2,049-13-9 and Re. 0-4-10 respectively in 1885.

MUDDEBIHÁL.—*In charge of* Hospital Assistant PEERAJEE SEWAJEE.

There is no change in the building; double tiling is recommended as the roof leaks. The committee visit the dispensary every quarter. Sanitary matters receive little attention. The water-supply is deficient and of indifferent quality. The total number treated was 1,886 out-door and 15 in-door patients against 2,231 and 17 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, skin-diseases, worms, rheumatic and respiratory affections. There was no epidemic. Forty-two persons were vaccinated. Eight *post-mortem* examinations were made. The dispensary was inspected in February and December by the Assistant Surgeon, Bijápur. The total cost was Rs. 1,290-4-11, the cost per patient Re. 0-10-10, as compared with Rs. 1,186-6-10 and Re. 0-8-5 respectively in the previous year.

BÁGEVÁDI.—*In charge of* Hospital Assistant DATTU PANDURANG.

The buildings are in a good state of repair; the furniture and fittings are sufficient. Quarterly meetings of the committee were held, and members frequently visit the dispensary. The sanitary condition of the town is bad. The water-supply is abundant but in quality indifferent. The total number treated was 3,346 out-door and 16 in-door patients as compared with 2,758 and 19 respectively in the previous year. The most common complaints were ophthalmia, worms, skin-diseases, respiratory affections and malarious fevers. There was no epidemic. One hundred and ninety-six persons were successfully vaccinated. Eight *post-mortem* examinations were made and opinion given in 3 other medico-legal cases. The dispensary was inspected in June and November by the Assistant Surgeon, Bijápur. The total cost was Rs. 965-3-1, the cost per patient Re. 0-4-7, as compared with Rs. 812-14-9 and Re. 0-4-8 respectively in 1885.

SINDGI.—*In charge of* Hospital Assistant GOVIND TANTIA.

The buildings are in thorough repair and the furniture in good order. The committee visited the dispensary 8 times. The sanitary condition of the town is unsatisfactory; the water-supply from wells is sufficient and of fair quality. The total number treated was 1,965 out-door and 5 in-door patients against 2,273 and 11 respectively in the previous year. The most common diseases were ophthalmia, worms, skin-diseases, malarious fevers and respiratory affections. There was no epidemic. One hundred and fourteen primary vaccinations were performed. Six *post-mortem* examinations were made at the request of the police, and opinion given in several other medico-legal cases. The dispensary was inspected by the Assistant Surgeon, Bijápur, in June. The total cost was Rs. 1,254-6-4, the cost per patient Re. 0-10-2, as compared with Rs. 1,196-10-8 and Re. 0-8-4 respectively in the previous year.

INDI.—*In charge of* Hospital Assistant CHINTAMAN SAKHARAM.

The buildings are in excellent condition, the quarters for the sweeper are finished, the furniture is ample and in good condition. Meetings of the committee took place 7 times and individual members visited the dispensary 6 times. Sanitary matters are neglected. The water-supply is abundant. The total treated was 2,864 out-door and 18 in-door patients

as compared with 2,711 and 27 respectively in the previous year. The more common diseases were ophthalmia, worms, malarious fevers, skin-diseases, and respiratory and rheumatic affections. A few cases of small-pox occurred in March and April. Three major surgical operations were performed. There were 140 primary and 3 re-vaccinations. Six *post-mortem* examinations were made at the request of the police, and opinion given in several other medico-legal cases. The dispensary was inspected by the Assistant Surgeon, Bijápur, in April and October. Hospital Assistant Chintaman Sakharam is commended. The total cost was Rs. 936-9-5, the cost per patient Re. 0-5-2, against Rs. 631-7-8 and Re. 0-3-8 respectively in the previous year.

KOLHÁPUR AND SOUTHERN MARÁTHA AGENCY.

ALBERT EDWARD HOSPITAL AND DISPENSARY, KOLHÁPUR.—*In charge of* Darbár Surgeon SINCLAIR.

Conservancy.—Improved and more satisfactory than it has ever been.

Water-supply.—Good and abundant.

Hospital Buildings.—Good and suitable.

General Health.—No epidemic occurred. The death-rate is reported lessened, while the birth-rate increased.

Attendance of Patients.—In-door 1,436, out-door 34,554, both showing a considerable increase over the numbers for former years. This taking place during a healthy year, demonstrates growing popularity of the hospital.

Prevailing Diseases.—Fevers, bowel-complaints, dysentery.

Surgical Operations.—Twenty-six operations were performed on the eye : 14 on joints ; 7 for necrosed bone ; 15 amputations ; 26 on tumours ; 4 for lateral lithotomy ; 24 under the head incisions for abscesses, tumours, &c. ; 1 plastic ; 9 aspirations, two of which were for hepatic abscess. Besides the foregoing there were 9 obstetric operations. Of most of these Dr. Sinclair furnishes an account.

Mortality and its Causes.—Thirty-nine deaths occurred in hospital—5 from diarrhœa ; 4 from pneumonia ; 3 dysentery ; 3 tetanus ; 2 phthisis ; 2 cancer ; 2 burns ; and 1 each from varrious other causes.

Vaccination.—There were 2,196 primary and 462 re-vaccinations, being an increase on the former year. The success of primary vaccinations was 95 per cent ; of re-vaccinations 80 per cent.

Medico-legal.—One hundred and fifty-one cases were referred for examination and report ; and 30 *post-mortem* examinations were required.

Conduct of Establishment.—Reported very satisfactory.

Cost.—The total cost was Rs. 18,745-9-0 and the cost per patient Re. 0-8-4 as compared with Rs. 22,046 -4-11 and Re. 0-11 5 respectively in the previous year.

GAD HINGLAJ.—*In charge of* Hospital Assistant D. W. KARMARKAR.

The buildings are in thorough repair. The furniture and fittings in good order and sufficient. There is no committee ; the dispensary is visited by the officials of the State. The sanitary condition of the town is indifferent ; the water-supply is scanty and of inferior quality. The total number treated was 7,840 out-door and 28 in-door patients as compared with 7,384 and 23 respectively in the previous year. The most common complaints were skin-diseases, worms, malarious fevers, ophthalmia, rheumatic and respiratory affections and ulcers. There was no epidemic. Sixteen major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Five *post-mortem* examinations were made. The total cost was Rs. 1,103-0-7, the cost per patient Re. 0-2-1, as compared with Rs. 1,274-7-11 and Re. 0-2-9 respectively in the previous year.

MIRAJ.—*In charge of* Mr. TRIMBAK SAKHARAM, L.M.

The buildings are convenient and in good repair, the furniture and fittings are sufficient and in good order. The committee visited the dispensary occasionally. Sanitary matters receive considerable attention ; the water-supply is sufficient and of good quality. The total number treated was 13,636 out-door and 53 in-door patients as compared with 11,185 and 46 respectively in the previous year. The most common complaints were skin-diseases, worms, injuries, ophthalmia, respiratory and rheumatic affections and ulcers. There was no epidemic. Numerous surgical operations were performed. Vaccination is performed by the State vaccinator. Six *post-mortem* examinations were made, and opinion given in 15 other medico-legal cases. The dispensary was inspected by the Darbár Surgeon in February. The total cost was Rs. 4,122-3-4, the cost per patient Re. 0-4-9, as compared with Rs. 4,472-12-7 and Re. 0-2-6 respectively in the previous year.

MUDHOL.—*In charge of* Mr. S. C. FASCOL, L.M. & S.

The buildings are convenient and in good repair, the furniture and fittings sufficient and in good order. There is no committee. The dispensary was visited by the Political and Assistant Political Agents. Conservancy is attended to; the water-supply is good and abundant. The total number treated was 6,229 out-door and 13 in-door patients as compared with 6,787 and 15 respectively in the previous year. The most common diseases were worms, ophthalmia, malarious fevers, skin-diseases and respiratory affections. There was no epidemic. Six major surgical operations were performed. One hundred and three children were successfully vaccinated and 2 re-vaccinated. The dispensary was inspected by the Darbár Surgeon in March. The total cost was Rs. 2,604-7-2, the cost per patient Re. 0-6-8 as compared with Rs. 2,679-2-6 and Re. 0-6-6 respectively in the previous year.

MALKA'PUR.—*In charge of* Hospital Assistant R. Y. DHANAWDE.

The building, an old temple, is in very bad repair. The necessary furniture has been supplied. There is no committee. The officials of the State occasionally visit the dispensary, and His Highness the Chief of Vishálgad visited it in December. The sanitary condition of the town is unsatisfactory; the water-supply is bad and insufficient. The total number treated was 6,920 out-door and 26 in-door patients against 6,766 and 23 respectively in the previous year. Skin-diseases, worms, malarious fevers, ophthalmia and respiratory and rheumatic affections were the most common complaints. There was no epidemic. Eleven major surgical operations were performed. Vaccination is performed by a State vaccinator. Opinion was given in 19 medico-legal cases. The total cost was Rs. 1,261-0-0, the cost per patient Re. 0-2-10 as compared with Rs. 1,257-5-9 and Re. 0-3-0 respectively in the year 1885.

RÁMDURG.—*In charge of* Mr. D. A. PATWARDHAN, L.M.

The buildings are new, two new wards are being added. The furniture and fittings are complete. The dispensary is frequently visited by the State officials and annually by the Political officers. Conservancy is satisfactory. The water-supply is sufficient. The total number treated was 9,933 out-door and 52 in-door patients as compared with 8,674 and 81 respectively in the previous year. The most common complaints were malarious fevers, skin-diseases, respiratory affections and worms. There was no epidemic. Twenty major surgical operations were performed, including 4 cases of lithotomy. Vaccination is performed by the State vaccinator. The dispensary was inspected by the Darbár Surgeon in March. The total cost was Rs. 2,788-11-0, the cost per patient Re. 0-4-5 against Rs. 2,857-3-6 and Re. 0-5-2 respectively in the previous year.

KA'GAL—*In charge of* Hospital Assistant NARSU LINGU.

The building is in good repair and is provided with all necessary furniture. There is no committee, but the State officials visit the dispensary. Conservancy is attended to; the water-supply is good and sufficient. The total number treated was 2,632, all out-door patients, as compared with 2,788 in the previous year. The most common diseases were those of the skin, worms, ophthalmia, and respiratory affections. There is no epidemic. Vaccination is carried on by the State vaccinator. The total cost was Rs. 895-9-3, the cost per patient Re. 0-5-5 against Rs. 934-5-7 and Re. 0-5-4 respectively in the previous year.

ÁJRA.—*In charge of* Mr. DATTÁTRAYA RÁMCHANDRA SÁTHE.

The new buildings have been occupied and are found suitable. Some articles of furniture are required. There is no committee, but the officers of the State frequently visit the dispensary. Sanitary arrangements are unsatisfactory. The water-supply is from wells liable to pollution from soakage. The total number treated was 5,378 out-door and 35 in-door patients against 6,129 and 44 respectively in the previous year. The most common complaints were skin-diseases, worms, respiratory affections, ophthalmia and malarious fevers. There was no epidemic. Several major surgical operations were performed. Vaccination is carried out by the táluka vaccinator. Two *post-mortem* examinations were made, and opinion given in 12 other medico-legal cases. The total cost was Rs. 1,037-1-2, the cost per patient Re. 0-3-1 against Rs. 1,182-14-4 and Re. 0-3-7 respectively in the previous year.

GÁRGOTI.—*In charge of* Hospital Assistant MÁROTI NÁNA CHAVÁN.

The building, part of a dharmshála, is suitable and in good repair; there is no dead-house. The furniture and fittings are in good order. There is no committee. The State officials visit the dispensary. The sanitary condition of the town is not satisfactory. The water-supply is abundant but liable to contamination. The total number treated was 5,269 out-door and 31 in-door patients as compared with 4,481 and 34 in the previous year. The more common complaints were skin-diseases, worms, malarious fevers, and respiratory and rheumatic affections. A mild epidemic of measles occurred in September and October. Several major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. One *post-mortem* examination was made, and opinion given in 26 medico-legal cases. The total cost was Rs. 1,045-1-5, the cost per patient Re. 0-3-1 as compared with Rs. 1,128-13-11 and Re. 0-4-0 in the previous year.

LAKSHMESHVAR.—*In charge of* Mr. M. H. BHÁTAVADEKAR, L.M. & S.

The hired building is still used; a special building is now being erected. The furniture is sufficient and in good order. A committee has been formed and visited the dispensary once. Conservancy is well attended to. The total number treated was 2,551 out-door and 10 in-door patients as compared with 2,298, all out-door, during the time the dispensary was open in the previous year. The more common complaints were worms, skin-diseases, ulcers, ophthalmia and malarious fevers. Hooping-cough prevailed in September and October. Seven major surgical operations were performed. Vaccination is carried on by the State vaccinator. Four *post-mortem* examinations were made, and opinion given in 9 other medico-legal cases. The total cost was Rs. 1,937-2-0, the cost per patient Re. 0-12-1 as compared with Rs. 2,750-7-0 and Rs. 1-3-1 respectively in 1885.

RA'YBA'G.—*In charge of* Mr. HARI RAGHUNA'TH.

The present hired building is not well suited to the purpose; the furniture is in good order. There is no committee, but the State officials visit the dispensary. Considerable attention is paid to conservancy. The water-supply is abundant but liable to contamination by soakage. The total number treated was 5,167, all out-door patients, against 4,192 in the ten months the dispensary was open in the previous year. The more common complaints were skin-diseases, worms, ophthalmia, respiratory affections and malarious fevers. Ten major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. One *post-mortem* examination was made at the request of the police. The dispensary was inspected by the Darbár Surgeon in February. The total cost was Rs. 919-8-10, the cost per patient Re. 0-2-10 as compared with Rs. 1,726-4-10 and Re. 0-6-7 respectively in the previous year.

SHIROL.—*In charge of* Hospital Assistant L. B. VAKHÁRDA'R.

This dispensary was removed from Narsobá's Wádi on the 8th July 1886; it occupies part of the State Wáda. The furniture and fittings are sufficient. There is no committee, but the State officials often visit the dispensary; little attention is paid to conservancy. The water-supply is indifferent. The total number treated was 3,409 out-door and 3 in-door patients. The most common complaints were skin-diseases, worms, respiratory affections, and malarious fevers. There was no epidemic. Seventeen major surgical operations were performed. Vaccination is carried on by the State vaccinator. The dispensary was inspected by the Darbár Surgeon in February. The total cost was Rs. 954-11-9, the cost per patient Re. 0-4-5.

KATKOL.—*In charge of* Hospital Assistant S. B. BHÁGWAT.

The dispensary was opened on 1st October 1886 and occupies part of Karama's temple, which is not well suited to the purpose; there is neither accommodation for in-patients nor establishment. Furniture and fittings are in good order. There is no committee, but the State officials visit the institution. The town is kept clean; the water-supply is abundant and good. The total number treated was 1,322 out-door and 1 in-door patients. The more common diseases were malarious fevers, worms, skin-diseases, and respiratory affections. There was no epidemic. Five major surgical operations were performed. Vaccination is carried on by the State vaccinator. One *post-mortem* examination was made. The total cost was Rs. 1,010-11-11, the cost per patient Re. 0-12-0.

INCHALKARANJI.—*In charge of* Mr. D. PARASHRA'M.

The dispensary was opened on the 1st October 1886 and occupies the verandah of a temple. It is only suited for the reception of out-patients. The furniture and fittings are good. There is no committee, but the State officers visit the institution. The sanitary condition of the town is fair. The water-supply from the river Panch Ganga is of good quality. The total number treated was 2,975, all out-door patients. The more common diseases were those of the skin, worms, respiratory affections and malarious fevers. There was no epidemic. Vaccination is carried on by the State vaccinator. The total cost was Rs. 1,505-4-7, the cost per patient Re. 0-8-1.

GUJARA'T.

SURAT COLLECTORATE.

COWASJI JEHÁNGIR CIVIL HOSPITAL, SURAT.—*In charge of* Surgeon-Major S. O'B. BANKS till 20th April, Surgeon-Major PA'REKH till 29th May, and afterwards Assistant Surgeon DOSA'BHA'I PESTONJI, G.G.M.C.

Conservancy.—The town of Surat is very dirty and increase of conservancy establishment is required. The conservancy of the hospital is well attended to, but the latrines should be stone instead of chunam.

Water-supply.—From wells more or less impure. The municipality has under contemplation a scheme for supply of pure water, which with effective drainage is much required.

Hospital Buildings.—Are kept in good order by the municipality. The dead-house is too much exposed to the road and requires a screen wall.

General Health.—Has been satisfactory, complete immunity from cholera or small-pox.

Attendance of Patients.—In-door 554, out-door 6,572, against 603 and 6,891 for the previous year.

Prevailing Diseases.—Among both in-door and out-door patients the prevailing diseases were malarious fevers, affections of the respiratory organs, diseases of the stomach and bowels, rheumatism, worms, ulcers, debility. Among the latter were persons brought by the police in a state of starvation.

Surgical Operations.—There were 12 major and 482 minor operations. Among the major were included one case of lithotomy, three amputations, removal of large tumours, and the operation for the relief of hepatic abscess.

Mortality and its Causes.—Dysentery, phthisis, fevers, injuries and starvation were the principal causes of mortality which reached 5·4 per cent of the total in-door patients. The medical officer observes "it is but fair to remark that most of these cases were brought into hospital in a state of great prostration and when medical skill could be of little or no avail.

Vaccination.—Is performed at the hospital twice a week by municipal vaccinators. The medical officer states "the people avail themselves of this prophylactic most willingly." There were 2,723 successful cases of primary and 31 of secondary vaccination.

Medico-legal Cases.—Number 170, among which were 8 dead bodies sent for examination and report by the police.

Conduct of Establishment.—The conduct of the establishment has not afforded cause for complaint and Hospital Assistant Narayenrao Jadhow is reported to have well sustained his reputation as zealous and willing.

Cost.—The total cost was Rs. 13,002-3-2 and the cost per patient Rs. 1-13-2, as compared with Rs. 12,729-10-10 and Rs. 1-11-2 respectively in the previous year.

Inspected by the Surgeon-General on the 26th of December.

GRANT-IN-AID DISPENSARIES.

PÁREKH DISPENSARY, SURAT.—*In charge of* Assistant Surgeon DOSÁBHÁI PESTONJI, G.G.M.C.

The building is in good condition. The furniture and fittings are in accordance with the rules. No meeting of the committee was held but the Secretary visited the dispensary. The total number treated was 10,153 out-door and 9 in-door patients as compared with 11,855 and 14 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, respiratory affections, inflammation of the ear and ophthalmia. There was no epidemic. Five major surgical operations were performed. The dispensary was inspected by the Surgeon-General and by the Civil Surgeon, Surat. The total cost was Rs. 6,078-5-3, the cost per patient Re. 0-9-6, as compared with Rs. 8,770-6-11 and Re. 0-11-9 respectively in the previous year.

OLPÁD.—*In charge of* Hospital Assistant RÁMCHANDRA WARUNG.

The building has not been repaired during the year. The furniture and fittings are in good order. The committee visited the dispensary eleven times. The sanitary condition of the town is fairly good. The water-supply is ample and of good quality. The total number treated was 5,508 out-door and 41 in-door patients as compared with 3,974 and 25 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, ophthalmia, respiratory affections, inflammation of the ear and rheumatism. There was no epidemic. Five major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Three *post-mortem* examinations were made at the request of the police. The dispensary was inspected in April and December by the Civil

Surgeon, Surát. The total cost was Rs. 888-7-1, the cost per patient Re. 0-2-6, as compared with Rs. 883-5-3 and Re. 0-3-6 respectively in the previous year.

BÁRDOLI.—*In charge of* Hospital Assistant GOVINDRÁO POWÁR.

The building has not been repaired during the year. The committee visited the dispensary eleven times. The sanitary condition of the town is defective. The water-supply is ample and of fair quality. The total treated was 4,573 out-door and 35 in-door patients as compared with 4,885 and 44 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases, and respiratory affections. There was no epidemic. One major surgical operation was performed. One hundred and thirty-four children were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Surat, in February. The total cost was Rs. 1,212-4-1, the cost per patient Re. 0-4-2, as compared with Rs. 1,277-15-7 and Re. 0-4-1 respectively in the previous year.

DINSHAW MÁNECKJI PETIT DISPENSARY, CHIKHLI—*In charge of* Hospital Assistant GOVIND KESHAV.

The building is in good repair, the furniture and fittings are in good order. The committee met five times. The sanitary condition of the town is unsatisfactory. The water-supply is abundant and of good quality. The total number treated was 7,043 out-door and 20 in-door patients as compared with 7,155 and 16 respectively in the previous year. The most common diseases were malarious fevers, ophthalmia, worms, skin-diseases and respiratory affections. There was no epidemic. Vaccination is performed by the táluka vaccinator. Three *post-mortem* examinations were made. The dispensary was inspected in March and December by the Civil Surgeon, Surat. The total cost was Rs. 1,161-0-8, the cost per patient Re. 0-2-7, as compared with Rs. 997-13-1 and Re. 0-2-2 respectively in the previous year.

PÁRDI.—*In charge of* Hospital Assistant MA'NEKLA'L HARJIVAN.

The building is in good repair; some alterations are recommended. The furniture is sufficient. The committee visited the dispensary six times. The sanitary condition of the town is unsatisfactory; the water-supply is liable to contamination by soakage. The total number treated was 10,594 out-door and 46 in-door patients as compared with 10,832 and 28 respectively in the previous year. The most common diseases were worms, malarious fevers, skin-diseases, respiratory affections and ophthalmia. There was no epidemic. Four major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected in December by the Acting Civil Surgeon, Surat. The total cost was Rs. 1,466-7-7, the cost per patient Re. 0-2-2, as compared with Rs. 1,681-0-6 and Re. 0-2-5 respectively in the previous year.

MÁNDVI.—*In charge of* Hospital Assistant NARAYEN DHONDU.

The roof of the building leaks in the rains. The furniture is in good condition. The committee met four times. The sanitary condition of the town is fair; the water-supply from the river Tápti good and abundant. The total number treated was 4,121 out-door and 82 in-door patients as compared with 4,316 and 75 respectively in the previous year. The most common complaints were malarious fevers, skin-diseases, ophthalmia, respiratory affections and inflammation of the ear. There was no epidemic. Two major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Three *post-mortem* examinations were made and opinion given in 6 medico-legal cases. The total cost was Rs. 1,082-3-5, the cost per patient Re. 0-4-1, as compared with Rs. 1,134-14-5 and Re. 0-4-1 respectively in the previous year.

RÁNDER.—*In charge of* Hospital Assistant HORMUSJI EDULJI.

The building, a hired one, is in good repair. The furniture is in good order; another press is required. The committee meet every month. Sanitary matters meet with little attention; the water-supply from the Tápti is good and abundant. The total number treated was 12,027, all out-door patients, against 11,728 in the previous year. The most common complaints were skin-diseases, malarious fevers, ophthalmia, respiratory affections, rheumatism and diarrhœa. There was no epidemic. Thirty-three major-surgical operations were performed. There were 278 successful vaccinations. The dispensary was inspected by the Civil Surgeon, Surat, in January and December. Hospital Assistant Hormusji Edulji is highly commended. The total cost was Rs. 1,194-12-8, the cost per patient Re. 0-1-7, as compared with Rs. 1,496-6-0 and Re. 0-2-0 respectively in the previous year.

NUSSERVANJI MANOCKJI PETIT DISPENSARY, KHAIRGAUM.—*In charge of* Hospital Assistant NARSAPPA ERAPPA.

The buildings are in good order; there is no dead-house. The furniture and fittings are sufficient. The committee meet quarterly. The sanitary condition of the town is unsatisfactory. The water-supply is ample and of good quality. The total number treated was 3,111 out-door and 5 in-door patients as compared with 3,126 and 6 respectively in the previous year. The most common diseases were malarious fevers, worms, skin-diseases, respiratory affections and ophthalmia. There was no epidemic. One major surgical

operation was performed. Vaccination is carried on by the táluka vaccinator; 83 children were successfully vaccinated. The total cost was Rs. 731-3-5, the cost per patient Re. 0-3-8, as compared with Rs. 1,516-3-7 and Re. 0-7-8 respectively in the previous year.

ENDOWED DISPENSARY.

VICTORIA DISPENSARY, NAVSÁRI.—*In charge of* Assistant Surgeon JAMSETJI BYRAMJI, G.G.M.C.

The building is in good repair, contains the ordinary furniture and fittings, and is kept in a good state of repair. The committee have visited regularly every three months. Sanitation of locality reported fair. Water-supply sufficient. The total numbers treated were 37 males, 6 females and 1 child, in-door, and 2,821 males, 3,130 females and 2,894 children, out-door, being a grand total of 8,889, or nearly the same as for the previous year. The number of females giving a daily average of 42·9 at the dispensary is satisfactory. The prevailing diseases were fevers, respiratory affections, intestinal worms, ear affections, rheumatic affections and skin-diseases. Eighteen major and 293 minor operations were performed. Two deaths occurred among in-door patients, one from old age, another from injury. One hundred and forty children were vaccinated; 137 successful cases. The dispensary was inspected by the Civil Surgeon, Surat, who reported "the whole management of the dispensary is efficiently carried on." The total cost was Rs. 3,255-9-10, the cost per patient Re. 0-5-10, as compared with Rs. 3,053-13-4 and Re. 0-5-6 respectively in the previous year.

GOVERNMENT DISPENSARY.

DINSHA MANOCKJI PETIT DISPENSARY, BULSÁR.—*In charge of* Assistant Surgeon R. R. DADINA, L. M. & S.

Buildings in good repair and well fitted. The committee visited the dispensary frequently and take interest in their work. Drainage is required in the town. Water-supply sufficient; number treated 16,172, of which 5,080 were males, 3,022 females and 8,070 children. The total is an increase on the 14,875 of the previous year. The average attendance of females was 42·2 daily. Of the total, 84 were in-door patients, 5 being females. Most common diseases malarious fevers, worms, skin-diseases, eye and respiratory affections. Eleven major surgical operations were performed, including one amputation of the leg, two of the forearm and two cases of turning. Three *post-mortem* examinations were made and opinions given in 37 medico-legal cases. The dispensary was inspected by the Acting Civil Surgeon, Surat, in December, who reports very favourably. The Collector, Mr. Mulock, remarks, "reflects much credit on the officer in charge, Mr. Dadina." The total cost was Rs. 5,346-11-5, the cost per patient Re. 0-5-3, as compared with Rs. 3,607-7-4 and Re. 0-3-10 respectively in 1885.

NATIVE STATE DISPENSARY.

DUMAS.—*In charge of* Hospital Assistant ISAAC AARON.

The buildings are in good order. The furniture and fittings are sufficient and also in good order. The sanitary condition of the town is very unsatisfactory. The water-supply from wells is abundant and of good quality. The total number treated was 2,414 out-door and 5 in-door patients as compared with 2,784 and 7 respectively in the previous year. The prevailing diseases were malarious fevers, skin-diseases, and respiratory and rheumatic affections. There was no epidemic. Five major surgical operations were performed. One hundred and one children were vaccinated. One *post-mortem* examination was made and opinion given in one other medico-legal case. The dispensary was inspected in January and December by the Civil Surgeon, Surat. Hospital Assistant Isaac Aaron is again most favourably spoken of. The total cost was Rs. 1,104-2-0, the cost per patient Re. 0-7-3, against Rs. 1,168-8-1 and Re. 0-6-8 respectively in the previous year.

BROACH COLLECTORATE.

CIVIL HOSPITAL, BROACH.—*In charge of* Surgeon FERGUSON till 5th July, Surgeon-Major P. MURPHY till 20th September, and afterwards Assistant Surgeon D. H. MOTIVALA, L. M. & S.

Conservancy.—The streets and wards are cleaned by the municipal servants. There are two blocks of public latrines and increase is proposed. There are also open spaces allotted for natural purposes. There are numerous private privies and cess-pools cleaned daily or periodically.

Water-supply.—Is from the river Narbada, wells, three public, and also private tanks. It is not satisfactory.

Hospital Buildings.—Satisfactory, excepting the want of quarters for the medical subordinate and an additional cook-room.

General Health.—Has been good during the year.

Attendance of Patients.—423 in-door and 10,031 out-door, being a slight decrease attributable to a more healthy season.

Prevailing Diseases.—Fevers, rheumatic and syphilitic affections, diseases of the eye, ear, respiratory system, stomach and bowels, and skin-diseases.

Surgical Operations.—There were 40 major and 1,190 minor operations. The major operations consisted of several reductions of dislocations, amputations and abscesses.

Mortality and its Causes.—Twenty deaths—1 from remittent, 1 ague, 2 phthisis, 1 anæmia, 1 fracture of skull, 6 diarrhœa, 2 debility, 1 vesical calculus, 1 ulcer, 1 chronic rheumatism, 1 penitonitis, 1 tubercular meningitis, 1 bronchitis.

Vaccination.—Municipal, under the Sanitary Department.

Medico-legal.—Number of cases 51.

Conduct of Establishment.—Reported fairly good.

Cost.—The total cost was Rs. 10,527-9-7, and the cost per patient Rs. 1-0-1, as compared with Rs. 10,229-11-3 and Re. 0-13-11 respectively in 1885.

Inspected by the Surgeon-General on 27th December.

GRANT-IN-AID DISPENSARIES.

ANKLESVAR.—*In charge of* Hospital Assistant LAXUMAN ANANT.

Buildings in good repair. The committee visited the dispensary twenty times. The sanitary condition is attended to, but drainage required. The water-supply is good. Numbers treated were 16 males and 3 females in-door, and 5,079 males, 2,627 females and 4,200 children out-door; total 11,925. Attendance of females 33·4 daily. The total is somewhat less than for the previous year owing to a more healthy season. Most common diseases were fevers, rheumatic, and syphiliticaff ections, diseases of the respiratory system, dysentery, diarrhœa, skin-diseases. Eight major operations were performed. There was a compounder attached up to December last when he was discharged by the municipality. The dispensary was inspected by the Civil Surgeon, Broach, in March and November and by the Surgeon-General in January. The total cost was Rs. 1,164-10-2, the cost per patient Re. 0-1-6, as compared with Rs. 1,355-7-8 and Re. 0-1-8 respectively in the previous year.

ILA'V.—*In charge of* Hospital Assistant PHEROZSHA DINSHAJI COOPER.

The building has been repaired; there are no quarters for servants. The furniture is in accordance with the rules. There was no meeting of the committee. The sanitary condition of the town is unsatisfactory. The water-supply is good and abundant. The total number treated was 4,302 out-door and 1 in-door patients as compared with 4,425 and 5 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, respiratory affections, skin-diseases and worms. Measles was prevalent from March to August in a mild form. One major surgical operation was performed. The number of children successfully vaccinated was 79. Two *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Broach, in March and November. Hospital Assistant Pherozsha Dinshaji Cooper is much praised for zeal and care in the performance of his duty. The total cost was Rs. 1,179-12-9, the cost per patient Re. 0-4-4, as compared with Rs. 1,196-12-6 and Re. 0-4-3 respectively in the previous year.

HÁNSOT.—*In charge of* Hospital Assistant GANESH GOPAL.

The dispensary is a hired house, scarcely fit for the purpose, but the local board decide that "there is no necessity for building a new dispensary." The dispensary was visited once by the President, twice by the Vice-President and 24 times by members of the committee. Sanitation indifferent, there being no municipality; water-supply sufficient. Numbers treated 6,056, all out-door, being 401 in excess of the previous year. Most prevalent diseases, fevers, rheumatic affections, ophthalmia, affections of the ear, of the respiratory system, and of the skin. One major operation. Vaccination is performed by the táluka vaccinator. The dispensary was inspected twice by the Civil Surgeon, Broach, who reports favourably. The total cost was Rs. 1,200-15-8 and the cost per patient Re. 0-3-2, as compared with Rs. 1,029-5-1 and Re. 0-2-10 respectively in the previous year.

JAMBUSAR.—*In charge of* Hospital Assistant MALHAR SITARAM.

The building is in a good state of repair. The furniture is serviceable. The committee visited the dispensary 18 times. The sanitary condition of the town is fair. The water-supply is good and sufficient. The total number treated was 8,036 out-door and 85 in-door patients as compared with 8,281 and 88 respectively in the previous year. The most common diseases were malarious fevers, skin-diseases, ulcers, inflammation of the ear, respiratory affections, and ophthalmia. There was no epidemic. One major surgical operation was performed. Vaccination is carried on by the táluka vaccinator. Nine *post-mortem* examinations were made and opinion given in several other medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner in January and by the Acting Civil Surgeon, Broach, in December. The total cost was Rs. 1,620-13-1, the cost per patient Re. 0-3-2, as compared with Rs. 973-6-1 and Re. 0-1-10 respectively in the previous year.

ÁMOD.—*In charge of* Hospital Assistant BHASKER SITARAM.

Buildings suitable; repaired during the year; furniture sufficient. Members of the committee visited the dispensary 12 times during the year. Sanitation of town very indifferent. Water-supply reported sufficient. Total number treated 3,734, of which 558 were females and 1,228 children. Of the total 21 were in-door including 4 females. The total is somewhat less than for the previous twelve months, the diminution being attributed to less prevalence of skin-diseases. Most common maladies, fevers, rheumatic affections, ophthalmia, respiratory affections, ear and skin-diseases. Four *post-mortem* examinations were made at the request of the police. The dispensary was inspected by the Deputy Sanitary Commissioner in January and by the Acting Civil Surgeon, Broach, in December, both reports favourable. The total cost was Rs. 1,414-10-1, the cost per patient Re. 0-6-0, as compared with Rs. 1,071-12-2 and Re. 0-4-3 respectively in the previous year.

VÁGRA.—*In charge of* Hospital Assistant TUKARAM NARAYAN.

The building is in good repair. The furniture and fittings are in good order. The committee visit the dispensary every month and individual members very frequently. Sanitary matters meet with very little attention. The water-supply is sufficient but of doubtful quality. The total number treated was 4,073 out-door and 11 in-door patients as compared with 3,777 and 11 respectively in the previous year. The more common complaints were skin-diseases, malarious fevers, ulcers, respiratory affections and ophthalmia. There was no epidemic. Vaccination is performed by the táluka vaccinator. Two *post-mortem* examinations were made and opinion given in 25 other medico-legal cases. The dispensary was inspected by the Acting Civil Surgeon, Broach, in December. The total cost was Rs. 1,004-7-6, the cost per patient Re. 0-3-11, as compared with Rs. 597-4-9 and Re. 0-2-6 respectively in the previous year.

KAVI.—*In charge of* Hospital Assistant CHOONILAL RAMDASS.

The building, a hired one, is unsuitable. The furniture is in good order. The committee visited the dispensary 12 times. The sanitary condition of the town is not satisfactory. The water-supply is of good quality and abundant. The total treated was 4,645 out-door and 5 in-door patients as compared with 5,383 and 7 respectively in the previous year. Skin-diseases, malarious fevers, respiratory affections, inflammation of the ear, ophthalmia, rheumatism and diarrhœa were the most common diseases. There was no epidemic. Three major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. One *post-mortem* examination was made. The dispensary was inspected by the Acting Civil Surgeon, Broach, in December. The total cost was Rs. 739-8-1, the cost per patient Re. 0-2-6 as compared with Rs. 491-12-3 and Re. 0-1-5 respectively in the previous year.

DEHEJ.—*In charge of* Acting Hospital Assistant SHIVRAM NARAYEN.

The building, a hired one, is suitable, but requires repairs. A dead-house and latrine are required. The furniture and fittings are in good order and sufficient. The sanitary condition of the village is unsatisfactory. The water-supply is abundant but liable to pollution. The total number treated was 1,672 out-door and 1 in-door patients as compared with 2,039, all out-door patients, in the previous year. The most common complaints were malarious fevers, skin-diseases, respiratory affections and ulcers. There was no epidemic. Three major surgical operations were performed. Vaccination is carried on by the local fund vaccinator. The total cost was Rs. 520-14-9, the cost per patient Re. 0-4-11, as compared with Rs. 539-10-6 and Re. 0-4-2 respectively in the previous year.

KAIRA COLLECTORATE.

CIVIL HOSPITAL, KAIRA.—*In charge of* Surgeon D. C. DAVIDSON till 16th September and afterwards Assistant Surgeon T. C. KHANDWALA.

Conservancy.—There are public latrines and night-soil is removed and deposited in pits. Garbage is also collected and removed, but the conservancy is not as it should be. The medical officer points out defects and suggests remedies, involving alterations in the structure of the latrines to separate solid and fluid mixture of the night-soil and earth before removal, and depositories at a greater distance from the town.

Water-supply.—From rivers and wells. Many causes of impurity of the river water are mentioned, one being the carrying across of the night-soil by the municipal bhangis.

Hospital Buildings.—Are in good order. Quarters for the medical subordinates are required.

General Health.—Good throughout the year.

Attendance of Patients.—In-door 299, out-door 4,506, against 251 and 4,886 of the previous year.

Prevailing Diseases.—Malarious fevers, skin-affections, syphilitic-affections, rheumatism, injuries.

Surgical Operations.—Eleven major, 253 minor: the major were three lithotomy, 1 excision of orbital tumour, 1 obliteration of varicocele, 1 amputation, 2 paracentesis abdominis, 1 reduction of dislocation of the shoulder, 1 for large abscess, 1 for imperforate anus.

Mortality and its Causes.—Eleven deaths in hospital—3 from pneumonia, 1 from ascitis, 1 apoplexy, 1 diarrhœa, 1 Bright's disease, 1 fractured skull, 1 chronic cystitis, 1 ulcer, 1 ague with convulsions.

Medico-legal.—Twenty-one *post-mortem* examinations were required in medico-legal cases in which the causes of death discovered are given by the medical officer. Viscera were sent to the Chemical Analyser in 8 instances. Seven articles were examined and 61 cases of assault were treated.

Vaccination.—Not carried on at the hospital but performed in the town under the Sanitary Department.

Conduct of Establishment.—No complaints.

Cost.—The total cost was Rs. 9,501-3-4 and the cost per patient Rs. 1-15-7, as compared with Rs. 8,586-13-7 and Rs. 1-10-8 respectively in the previous year.

Inspected by the Surgeon-General in January.

GRANT-IN-AID DISPENSARIES.

MEHMADABAD.—*In charge of* Hospital Assistant VITHAL BALVANT.

The building requires repair; a ward for females and quarters for the medical officer are required. Furniture and fittings complete. The committee met eleven times. The town is kept fairly clean. The water-supply is abundant and good. The total number treated was 10,565 out-door and 133 in-door patients against 11,231 and 94 respectively in the previous year. The more common complaints were skin-diseases, ophthalmia, malarious fevers, inflammation of the ear, and respiratory affections. There was no epidemic. Two major surgical operations were performed. Two hundred and seventy-eight persons were vaccinated. The dispensary was inspected by the Civil Surgeon, Kaira, in March and October. The total cost was Rs. 1,832-12-9, the cost per patient Re. 0-2-8, as compared with Rs. 1,050-13-7 and Re. 0-1-5 respectively in the previous year.

NADIÁD.—*In charge of* Hospital Assistant RAM SING.

Buildings in good repairs and furnished with necessaries; second class servants' quarters much required; more room for in-door patients also wanted. Visited by the dispensary committee 9 times; sanitary condition of town very indifferent; water-supply good and abundant. Number treated males 107, females 18, children 7, as in-door; 8,482 males, 3,406 females, 6,271 children as out-door, grand total 18,291. The average daily attendance of women was 37·3. Diseases causing these admissions were malarious fevers, rheumatic affections, diseases of the eye and ear, respiratory affections, bowel-complaints and skin-diseases. There was no epidemic of any kind; several major operations were performed, among them an impacted calculus from the urethra. Ninety-four medico-legal cases occurred, involving eleven *post-mortem* examinations. The Civil Surgeon, Kaira, inspected the dispensary in January and October, and his reports are favourable representing the medical officer to be intelligent, active and efficient. The total cost was Rs. 2,809-5-2, the cost per patient Re. 0-2-5, as compared with Rs. 2,543-0-10 and Re. 0-2-2 respectively in the previous year.

BORSAD.—*In charge of* Hospital Assistant SHAIK USUF.

The buildings are in good repair; the furniture and fittings in accordance with rule. The committee frequently visited the dispensary and regular quarterly meetings were held. The sanitary condition of the town remains unsatisfactory. The water-supply is ample and good. The total number treated was 7,796 out-door and 212 in-door patients as compared with 8,602 and 178 respectively in the previous year. The more common complaints were skin-diseases, ophthalmia, malarious fevers, ulcers and inflammation of the ear. There was no epidemic. Four major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Six *post-mortem* examinations were made. The dispensary was inspected by the Acting Civil Surgeon, Kaira, in October. The total cost was Rs. 1,603-15-4, the cost per patient Re. 0-3-2 as compared with Rs. 1,135-8-1 and Re. 0-2-0 respectively in the previous year.

MADHA.—*In charge of* Hospital Assistant POPATLAL LALLUBHAI.

The building consists of five rooms, cook-room and latrines, but there are no quarters for the establishment and no dead-house; so that *post-mortem* examinations are made in the open place. Ventilation is defective; committee quarterly meetings have been regularly held. Sanitation indifferent; water-supply fair; numbers treated were 42 males, 7 females and 3 children in-door, and 3,355 males, 1,162 females and 2,649 children out-door, which gives a grand total of 7,218. There was no epidemic. Several major operations were performed during the year, among which was an amputation of the penis. Vaccination

is performed by the táluka vaccinator. The dispensary was inspected in March by the Deputy Sanitary Commissioner and in September by the Civil Surgeon, Kaira. The total cost was Rs. 1,105-13-10, the cost per patient Re. 0-2-5, as compared with Rs. 1,099-0-2 and Re. 0-2-4 respectively in the previous year.

DÁKOR.—*In charge of* Hospital Assistant SHANKAR HARI.

The building is in good repair; the furniture and fittings sufficient and serviceable. The committee meet quarterly. The sanitary condition of the town is fair; the water-supply is sufficient and of good quality. The total number treated was 8,572 out-door and 128 in-door patients as compared with 9,446 and 144 respectively in the previous year. The more common complaints were skin-diseases, malarious fevers, ophthalmia, ulcers, and inflammation of the ear. There was no epidemic. Nine major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Two *post-mortem* examinations were made and opinion given in several other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Kaira, in May and October. The total cost was Rs. 1,219-14-1, the cost per patient Re. 0-2-2, as compared with Rs. 1,965-5-10 and Re. 0-3-3 respectively in the previous year.

KAPADVANJ.—*In charge of* Hospital Assistant ABRAHAM SHALLOM.

The building is in good repair; there are no quarters for the establishment. The committee visit the dispensary every month. The sanitary condition of the town is fair; the water-supply from wells, some of which are liable to soakage. The total number treated was 18,686 out-door and 60 in-door patients as compared with 17,067 and 62 respectively in the previous year. The most common diseases were malarious fevers, skin-diseases, ophthalma, inflammation of the ear and respiratory affections. There was no epidemic. Three major surgical operations were performed. There were 451 successful vaccinations. Three *post-mortem* examinations were made. The dispensary was inspected by the Deputy Sanitary Commissioner in March and by the Civil Surgeon, Kaira, in October. The total cost was Rs. 1,848-1-9, the cost per patient Re. 0-1-6 as compared with Rs. 1,095-5-9 and Re. 0-1-0 respectively in the previous year.

PANCH MAHA'LS.

CIVIL HOSPITAL, GODHRA.—*In charge of* Surgeon J. W. T. ANDERSON till the 27th April, Assistant Surgeon C. M. RODRIGUES till the 13th December, and afterwards Surgeon K. S. NARIMAN.

Conservancy.—The Civil Surgeon remarks:—"The ghanchees are very dirty in their habits. Their houses are dark, dirty, ill ventilated and crowded. It is not at all unusual to find a ghanchee family sleeping with fowls under the bed, a buffalo tied to a peg in the corner, a pair of bullocks on the verandah and perhaps a cart laden with gram, mhowa flower, or worse still sun-dried skins standing near the door. . . . . Dirty and filthy as the town is, the municipality has been making efforts to improve it as much as possible with the limited funds at its disposal." But more latrines and better conservancy establishment are required; and the condition of the ground on the eastern side of the fort is described as little better than a cess-pool. The sloping ground of the bank of the river is also described as abounding in all imaginable sorts of dirty things.

Water-supply.—From wells, river, and tank. The best wells are in the fort. The river Mesri dries in the hot weather but water is obtained by making wells in the bed. The tank water is very impure.

Hospital Buildings.—The buildings are those formerly used for a dispensary when the Civil Surgeon was at Dohad. Defective ventilation of the cook-room and police ward has been remedied. A ceiling to the office and surgery is badly required, also servants' quarters. The pauper ward is too small and too far from the main building, being the detached rooms formerly occupied by the dispensary Hospital Assistant.

General Health.—There was no epidemic of cholera during the year; a few cases of small-pox were treated in February and June. On the whole the general health was equal to the average.

Attendance of Patients.—Number of in-door 346 against 294 for the preceding year. Of the 346 patients 279 were from the Gujarát Bhil Corps and police; of out-patients there were 6,946 against 6,440 for the previous twelve months.

Prevailing Diseases.—The most common diseases, both among in and out-door patients, were malarious fevers, rheumatic, eye and ear affections, syphilis, diseases of the respiratory organs, diarrhœa, dysentery, and skin-diseases.

Surgical Operations.—There were 8 major and 303 minor operations; of the major operations 2 were performed on the eye, 1 for large abscess, 1 for harelip, 1 removal of foreign body, 1 mammary abscess.

Mortality and its Causes.—Seventeen deaths occurred in Hospital. Of these 5 occurred from pneumonia, 3 from remittent fever, 3 from dysentery, others from small-pox, enteric fever, phthisis, debility, leprosy, and punctured wound.

Vaccination.—Is carried on by a local fund vaccinator.

Conduct of Establishment.—Is reported satisfactory, and the Civil Surgeon states Hospital Assistant Bápuji Jadow performs his duties with zeal and ability.

Cost.—The total cost was Rs. 5,818-2-4 and the cost per patient Re. 0-12-9, as compared with Rs. 7,674-13-3 and Rs. 1-2-2 respectively in the previous year.

Inspected by the Surgeon-General on the 31st of December.

GOVERNMENT DISPENSARY.

DOHAD.—*In charge of* Assistant Surgeon GANGADHAR GOPAL BOPARDIKAR., L.M. & S.

The dispensary is located in the old Civil Hospital. There are no quarters for the Assistant Surgeon and no dead-house. There is no dispensary committee. Conservancy and surface cleansing is attended to, to a certain extent. Water-supply indifferent, most of the wells being brackish. Total number treated 7,698, of whom 284 were in-door. Average attendance of females daily 13·87. Many of the patients belong to the Bhil Corps. The prevailing diseases were malarial fevers, skin-diseases, ophthalmia. Several important surgical operations occurred, *viz.*, lithotomy, external urethrotomy and extraction of cataract. Twelve *post-mortem* examinations were necessitated. The locality was healthy during the whole year; the dispensary was inspected by the Deputy Sanitary Commissioner in December, who reports several wants and very favourably of the medical officer. The total cost was Rs. 2,720-9-3 and the cost per patient Re. 0-5-7, as compared with Rs. 4,494-5-8 and Re. 0-8-8 respectively in the previous year.

AHMEDABAD COLLECTORATE.

HUTTEESINGH PREMA'BHAI HOSPITAL, AHMEDABAD.—*In charge of* Surgeon-Major J. ROBB, M.D.

Conservancy.—The light tramway mentioned in last report has now been working some time. It is about 5½ miles long passing outside and round the city and extending to a distance of 3 miles from the city. Cost more than half a lákh of rupees. All the night-soil and solid refuse which used to remain is now removed, but no satisfactory arrangement has been come to with regard to liquid filth and sullage water.

Water-supply.—Abundant but inferior.

Hospital Buildings.—Are in good order but much needing additions.

General Health.—The number of deaths recorded by the municipal authorities for 1886 was 4,638, or 2,091 less than for 1885. The mortality instead of being 53 per mille has fallen to 35. This satisfactory decrease must in a large measure be the direct result of improved conservancy: (for during the previous year when the death ratio was 53 there were only 49 deaths from cholera and no small-pox).

Attendance of Patients.—The number of in-door patients was 1,669 against 1,752 for 1885; of out-door 21,240 against 21,130 for 1885. There was an increase of female attendance.

Prevailing Diseases.—Among the in-door patients injuries, syphilitic diseases, and poisons occupied the chief places among the causes more than malarious fevers, ulcers, leprosy and skin-diseases. Among out-door patients fevers, skin-diseases, ophthalmia, ulcers, abcesses, and diseases of the respiratory system.

Surgical Operations.—There were 198 major operations including 38 cases of vesical calculus and 2 cases of urethral calculus. In one case of vesical calculus the supra-pubic operation was performed successfully, in three cases the washing operation after Bigelow's method, and in all the others perinæal section. Amputations of various kinds numbered 35: there were 7 cataract extractions, and 8 cases of plastic operation for the repair of cut nose.

Mortality and its Causes.—There were 81 deaths among in-door patients; nearly 25 per cent. of the whole number were caused by bowel-complaint, and 14 per cent. were connected with operations. Seven deaths were the result of malarious fever, five of injuries, while cholera, leprosy and opium-poisoning each contributed 4 deaths. No fewer than 28 of the cases were moribund on admission, chiefly religious mendicants brought by the police.

Vaccination.—By the municipal vaccinator twice weekly at the hospital. Number of primary operations 4,180 with 97·9 percentage of success.

Medico-legal.—The medico-legal work of the year was very heavy. No fewer than 512 police cases, exclusive of 21 dead bodies sent up for examination and report, were disposed of.

Conduct of Establishment.—Generally the conduct has been satisfactory; the services of 1st Class Hospital Assistant Luxumon Singh Arjun Singh were again brought to notice. (It must be re-collected with reference to the Civil Surgeon's remarks now quoted that there is a medical school attached to this hospital). The medical officer and Superintendent of

the school states: "The position he (the Hospital Assistant) occupies is a very responsible one and the method and despatch which with firmness and tact he carries into his various and sometimes difficult duties merit high praise, and I again take pleasure in recommending Mr. Luxuman Singh to favourable notice."

Cost.—The total cost was Rs. 22,819-3-10 and the cost per patient Re. 0-15-11, as compared with Rs. 23,694-9-5 and Re. 1-0-6 respectively in the previous year.

The Ahmedabad Hospital was inspected by the Surgeon-General on the 7th of January.

GRANT-IN-AID DISPENSARIES.

RAIPUR.—*In charge of* Hospital Assistant BHAU SUCCARAM.

Buildings in good repairs. Furniture and fittings suitable. Dispensary committee visited monthly. The numbers treated were 15,595, of which 37 males, 4 females and 2 children were in-door, while 6,205 were males, 3,845 females and 5,502 children out-door. The daily average attendance of females was 40·7. The total treated is an increase on any former year. The dispensary is used as No. 3 Vaccine Station by the Sanitary Department. The dispensary was inspected by the Surgeon-General and twice by the Civil Surgeon of Ahmedabad. The dispensary is a very popular institution and Hospital Assistant Bhau Succaram continues to conduct his duties efficiently and with success. The total cost was Rs. 1,737-4-0, the cost per patient Re. 0-1-9, as compared with Rs. 2,167-5-1 and Re. 0-2-4 respectively in the previous year.

SÁNAND.—*In charge of* Hospital Assistant JOSEPH BENJAMIN.

The buildings are in good repair; the furniture is sufficient. The committee visited the dispensary three times. The sanitary condition of the town is defective but improvements are in progress. The water-supply from wells is plentiful and of fair quality. The total number treated was 7,974 out-door and 79 in-door patients as compared to 7,731 and 72 respectively in the previous year. The most common complaints were skin-diseases, malarious fevers, ophthalmia, ulcers and respiratory affections. Measles was epidemic in March and April. Two major surgical operations were performed. Vaccination is conducted by the local fund vaccinator. Eight *post-mortem* examinations were made at the request of the police, and opinion was given in many other medico-legal cases. The dispensary was inspected in June and December by the Civil Surgeon, Ahmedabad, who again reports favourably on Hospital Assistant Joseph Benjamin. The total cost was Rs. 1,145-6-1, the cost per patient Re. 0-2-3, as compared with Rs. 837-6-6 and Re. 0-1-8 respectively in the previous year.

VIRAMGAM.—*In charge of* Hospital Assistant NARSU SAYAJI.

The buildings are in good order; the furniture and fittings are sufficient. The committee visited the dispensary every month. Some progress is being made in sanitary matters. The water-supply is insufficient and of doubtful quality. The total treated was 8,169 out-door and 65 in-door patients against 8,732 and 95 respectively in the previous year. The more common complaints were malarious fevers, skin-diseases, ophthalmia, ulcers and respiratory affections. There was no epidemic. Vaccination is conducted by the táluka vaccinator. Five *post-mortem* examinations were made. The dispensary was inspected in May and December by the Civil Surgeon of Ahmedabad, who reports that the management of the institution is a credit to Hospital Assistant Narsu Sayaji. The total cost was Rs. 1,694-3-2, the cost per patient Re. 0-3-3, against Rs. 1,688-15-11 and Re. 0-3-0 respectively in the previous year.

DHOLKA.—*In charge of* Hospital Assistant RAMCHANDAR GOVIND NICUM.

The dispensary buildings are in good order except the Hospital Assistant's quarters, the roof of which is in need of repairs, and a receptacle is required to collect fluid excreta. These defects have been brought to the notice of the Collector. The furniture is sufficient and no fittings are required. The dispensary committee visit regularly monthly. There were 7,640 patients treated, 87 being in-door. The attendance of females was 18·6 daily. Principal diseases, ague, affections of the eye and ear, respiratory and intestinal maladies and skin-diseases. No epidemic occurred; seven dead bodies were examined at the instance of the police. The dispensary was inspected twice by the Civil Surgeon, Ahmedabad, who states the management of the dispensary testifies to the efficiency of Hospital Assistant Ramchandar Govind. He further remarks: "There were five in-door patients at the time of my visit, and all of them were attentively looked after." The total cost was Rs. 1,491-15-1, the cost per patient was Re. 0-3-1, as compared with Rs. 1,956-13-10 and Re. 0-4-2 respectively in the previous year.

DHANDHUKA.—*In charge of* Hospital Assistant BÁBURÁO NÁRÁYAN.

The buildings are in good repair. The furniture is sufficient, but some articles are old and require replacing. The committee visited the dispensary nine times during the year. The sanitary condition of the town meets with attention. The water-supply is abundant and good. The total number treated was 7,109 out-door and 115 in-door patients as com-

pared with 5,879 and 66 respectively in the previous year. The most common diseases were malarious fevers, ulcers, skin-diseases, inflammation of the ear and rheumatic and respiratory affections. There was no epidemic. One major surgical operation was performed. Vaccination is carried on by the local fund vaccinator. One *post-mortem* examination was made. The total cost was Rs. 2,017-0-10, the cost per patient Re. 0-4-5, as compared with Rs. 1,270-2-1 and Re. 0-3-5 respectively in the previous year.

DHOLERA.—*In charge of* Hospital Assistant BANKAY BEHARI.

The building, a hired one, has been repaired. There is no dead-house. The furniture is in good order and sufficient. The committee visited the dispensary eleven times. The sanitary condition of the town is unsatisfactory. The water-supply is insufficient and of inferior quality. The total number treated was 5,232 out-door and 60 in-door patients against 4,610 and 54 respectively in the previous year. The more common complaints were skin-diseases, malarious fevers, respiratory and rheumatic affections and venereal diseases. There was no epidemic. Five major surgical operations were performed. There were 95 successful vaccinations. Four *post-mortem* examinations were made. The total cost was Rs. 866-14-0, the cost per patient Re. 0-2-7, as compared with Rs. 1,110-14-8 and Re. 0-3-9 respectively in the previous year.

PARÁNTIJ.—*In charge of* Hospital Assistant ANNÁJI PÁNDURANG.

The buildings are in good repair. The furniture and fittings are sufficient and in good order. The committee visited the dispensary 14 times. The sanitary condition of the town receives attention. The water-supply from numerous wells is of good quality and abundant. The total number treated was 5,650 out-door and 55 in-door patients as compared with 5,061 and 72 respectively in the previous year. The most common complaints were skin-diseases, ophthalmia, malarious fevers, ulcers and respiratory affections. There was no epidemic. Two major surgical operations were performed. Three *post-mortem* examinations were made. The total cost was Rs. 673-15-1, the cost per patient Re. 0-1-10, as compared with Rs. 1,095-7-6 and Re. 0-3-4 respectively in the previous year.

GOGHA.—*In charge of* Hospital Assistant MORESHWAR TRIMBAK.

The buildings require repair. Some articles of furniture are worn out and should be replaced. The Chairman of the committee visited the dispensary seven times. The sanitary condition of the town is not satisfactory. The water-supply is sufficient in quantity but of doubtful quality; some wells are liable to soakage. The total treated was 7,306 out-door and 54 in-door patients as compared with 7,819 and 32 respectively in the previous year. The more common diseases were malarious fevers, ophthalmia, worms and skin-diseases. There was no epidemic. Three major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Two *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Ahmedabad, in December. The total cost was Rs. 758-11-3, the cost per patient Re. 0-1-7, as compared with Rs. 979-3-8 and Re. 0-1-11 respectively in the previous year.

MODÁSA.—*In charge of* Hospital Assistant RÁMA MALUP.

The buildings are in good order and were repaired by the municipality during the year. There are various requirements, *viz.* bath-rooms, store-room, private room, cook-room and dead-house. Certain articles of furniture are also wanted. The committee visited monthly. The numbers treated were 9,397, of whom 54 were in-door. The average daily female attendance was 21·2. The prevailing maladies were ague, rheumatism, diseases of the respiratory organs, eye and ear affections, disorders of the alimentary canal, and skin-diseases. Vaccination is performed by the táluka vaccinator. The majority of the in-door patients were police cases. The total cost was Rs. 1,478-10-7, the cost per patient Re. 0-2-6, as compared with Rs. 1,321-7-4 and Re. 0-2-2 respectively in the previous year.

RANCHHODLÁL DISPENSARY.—*In charge of* Assistant Surgeon P. H. DÁDÁCHÁNJI.

The buildings are kept in good order. The furniture and fittings are quite sufficient. There are no quarters for the Assistant Surgeon in charge. The new wards attached to but detached from the hospital have been open during the year and are furnished newly. These wards were intended by Ráo Bahádur Ranchhodlál for patients of a better class who, unable to pay for medical attendance at home, do not wish to associate with ordinary dispensary patients. The wards comprise two blocks with two rooms in each. Each room contains two beds and there are separate kitchens, bath-room and latrine. The patients in these wards find their own food. Forty-three patients took advantage of these wards during the year. The dispensary committee visit regularly every month and Ráo Bahádur Ranchhodlal was a very frequent visitor. The numbers treated were in-door 122, a considerable increase on former year, and 12,600 out-door. The daily average number of female patients was as high as 33·6. The most common diseases were skin-affections, malarious fevers, abscess and boils, affections of the ear, respiratory affections, ophthalmia and ulcers

in the order named. There was no epidemic. Twenty-five major operations were performed including 3 for calculus of the bladder, and amputation of the tongue for cancer and a delivery with forceps. Mr. Dádáchánji forwards notes of some interesting cases. The dispensary was inspected twice by the Civil Surgeon, Ahmedabad, and once by the Surgeon-General. The Civil Surgeon remarks that the attendance of women and children has not fallen off in consequence of the recently opened Zenana Mission Dispensary. The Civil Surgeon also remarks that Assistant Surgeon Dádáchánji is a zealous and painstaking officer. His qualifications are of a high order and the conduct of the dispensary does him much credit. The good work done at this dispensary is referred to in the Surgeon-General's inspection report. The total cost was Rs. 4,696-0-5, the cost per patient Re. 0-5-10, as compared with Rs. 3,305-14-6 and Re. 0-4-0 respectively in the previous year.

ENDOWED DISPENSARY.

BAICHARDÁS DISPENSARY, AHMEDABAD.—*In charge of* Assistant Surgeon K. B. COOPER, L.M.

The buildings are in very good repair; a low-caste ward and a dead-house have been constructed. The furniture and fittings are in good order. There have been nine meetings of the committee and individual members have paid several visits. The dispensary district is a crowded one and sanitary arrangements are defective. The total number treated was 19,224 out-door and 73 in-door patients as compared with 19,430 and 61 respectively in the previous year. The more common complaints were skin-diseases, ophthalmia, malarious fevers and respiratory affections. There was no epidemic. Fifty-six major surgical operations were performed, including 25 lithotomies and 2 amputations. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon, Ahmedabad, in June and November, and by the Surgeon-General in January. The total cost was Rs. 5,626-10-9, the cost per patient Re. 0-4-7, as compared with Rs. 4,613-2-4 and Re. 0-3-9 respectively in the previous year.

GOVERNMENT DISPENSARY.

KHÁRÁGHODA.—*In charge of* Assistant Surgeon ABDUL GHANI HAKIM, L.M.

The building is in good repair and the furniture in good order. There is no committee. The sanitary condition of the town is satisfactory. The water-supply scanty and brackish in quality. The total treated was 3,844 out-door and 21 in-door patients as compared with 2,970 and 31 respectively in the previous year. The most common diseases were malarious fevers, skin-diseases, ophthalmia, respiratory affections and ulcers. There was no epidemic. One surgical operation was performed. The number of children successfully vaccinated was 77. There were two medico-legal cases. The dispensary was inspected by the Civil Surgeon, Ahmedabad, in June and November. The total cost was Rs. 4,290-9-5, the cost per patient Rs. 1-1-9, as compared with Rs. 2,977-13-1 and Re. 0-15-10 respectively in the previous year.

MAHI KANTHA.

CIVIL HOSPITAL, SÁDRA.—*In charge of* Assistant Apothecary J. J. MASCARENHAS till 3rd August, afterwards Assistant Surgeon D. E. ANKLESARIA, L.M. & S.

Conservancy.—Of the camp, fair, as regards surface cleansing, but public latrine wanted. Sádra village unsatisfactory but improved.

Water-supply.—Ample and good from the Sábarmati River and wells.

Hospital Buildings.—A tolerably good building occupying an open site on the eastern bank of the Sábarmati. It has only one ward capable of accommodating 8 patients which is well ventilated, but extension is required in the shape of female accommodation and examination room. There is a detached cholera ward.

General Health.—The general health of Sádra and surrounding villages was good.

Attendance of Patients.—Two hundred and nineteen in-door and 5,986 out-door, as compared with 184 and 7,007 respectively in 1885.

Prevailing Diseases.—Malarious fevers, skin-diseases, ophthalmia, bronchitis, diarrhœa, dysentery, rheumatic and syphilitic affections, injuries.

Surgical Operations.—Six major, 406 minor.

Mortality and its Causes.—One death in hospital from dysentery.

Vaccination.—Practised once; weekly numbers of operations 134, successful 130.

Conduct of Establishment.—Reported satisfactory by the medical officer in charge, Assistant Surgeon D. E. Anklesaria, who submits the concise yet full report from which the above is extracted.

Cost.—The total cost was Rs. 3,267-15-0, and the cost per patient Re. 0-8-5, against Rs. 2,851-12-10 and Re. 0-6-4 respectively in the previous year.

KÁTHIÁWÁR.

CIVIL HOSPITAL, RÁJKOT.—*In charge of* Surgeon-Major BARKER, M.D.

Conservancy.—Reported satisfactory.

Water-supply.—Abundant and good throughout the year.

Hospital Buildings.—Last year it was reported that the hospital buildings have been much improved by re-roofing and stone paving to the verandahs and by an operating room which had been built and fitted. This year it is reported that the foundation stone of new additions to the hospital was laid by His Excellency Lord Reay on December 9th. It is anticipated these additions will add greatly to the usefulness of the hospital. They comprise eye ward, male and female low caste wards, enlargement of the general women and children's wards. The cost is paid by subscriptions from the Káthiáwár Chiefs as a memorial of the late Colonel West.

General Health.—The general health is considered to have been good, no epidemic occurring during the year.

Attendance of Patients.—A large increase of patients occurred, 939 in-door, and 8,408 out-door were treated against 554 and 6,839 for the previous year. This large increase is due to the growing popularity of the hospital and in a lesser degree to more police being admitted from the new corps. Under this head the Civil Surgeon remarks on the extended range of responsibility consequent on the medical duties of the newly enrolled Káthiáwár police corps, 807 strong.

Prevailing Diseases.—Fevers, bowel, respiratory and syphilitic complaints, eye affections, rheumatism, boils, abscesses and ear diseases, especially in children.

Surgical Operations.—There were 83 major operations against 62 in the previous year. Among these operations there were 30 for vesical calculus, including one litholopaxy with Bigelow's instruments. Only two cases were unsuccessful. Among the operations of special interest was the successful excision of an osseous tumour weighing 1 lb. 7 ozs. from the saphenous region and groin; one for vesico-vaginal fistula, and the division of extensive contraction of the right side and axilla consequent on burn.

Mortality and its Causes.—Sixteen deaths took place in the hospital. This low death-rate is explained by patients being habitually removed by their friends when hopes of recovery cease. The causes of death were 3 after operations, 1 extravasation of urine, from dysentery and diarrhœa 5, opium-poisoning 1, respiratory affections 2, intussusception 1, imperforate anus 1, and 1 case moribund and insensible on admission.

Vaccination.—Under the Superintendent, Gujarát Western Circle.

Conduct of Establishment.—Second Class Hospital Assistant Bábáji Santu continues to do excellent work and a peon Geega is also mentioned by name. Steady 2nd class servants of intelligence are difficult to procure and the additional establishment sanctioned under Government Resolution No. 4170, dated 30th November 1886, General Department, was not recruited at the end of the year. It is mentioned that Mr. Syed Edroos (now Khán Bahádur) still continues to give valuable and gratuitous assistance to the hospital.

Cost.—The total cost was Rs. 15,211-5-6 and the cost per patient Rs. 1-10-0, as compared with Rs. 15,361-7-6 and Rs. 2-1-2 respectively in the previous year.

CUTCH.

CIVIL HOSPITAL, BHU'J.—*In charge of* Mr. BHIKÁJI JIVÁJI DAMANIA.

Conservancy.—Is described as satisfactory.

Water-supply.—Abundant from wells and tanks.

Hospital Buildings.—In good order.

General Health.—Tolerably fair. No epidemic.

Attendance of Patients.—Four hundred and thirty-one in-door and 14,817 out-door against 463 and 13,634 for 1885.

Prevailing Diseases.—Ague, worms, bronchial complaints, ulcers, diseases of the ear, rheumatic and syphilitic affections, abscesses, conjunctivitis.

Surgical Operations.—Seventy major are recorded among which were removal of the eye-ball, 7 extractions of cataract, 11 amputations of limbs, 1 removal of breast, 5 for mycetoma, 18 vesical calculus, 6 rhino-plastic operations. The medical officer gives an account of the most important, and a tabulated statement of the operations for stone in the bladder. Minor operations 1,189.

Mortality and its Causes.—Among in-door patients there were 22 deaths, the causes being remittent fevers, leprosy, dropsy, apoplexy, pneumonia, dysentery, hepatitis, cirrhosis of the liver, vesical calculus, necrosis, gangrene, wound of the lung, compound fracture.

Vaccination.—There were 795 primary and 61 secondary vaccinations, 781 and 36 being successful.

Conduct of Establishment.—Reported satisfactory.

CUTCH MÁNDVI.—*In charge of* Mr. ROWJI JÁDOWJI.

The building is in good condition and is supplied with the necessary fittings. There is no committee. Attention is paid to conservancy. The water-supply from wells is brackish. The total number treated was 17,017 out-door and 146 in-door patients as compared with 20,861 and 163 respectively in the previous year. The most common complaints were worms, skin-diseases, ophthalmia, inflammation of the ear, ulcers and malarious fevers. There was no epidemic. Twenty-five major surgical operations were performed; there were 864 successful vaccinations. The total cost was Rs. 5,966-0-9, the cost per patient Re. 0-5-6, as compared with Rs. 7,040-5-0 and Re. 0-5-4 respectively in the previous year.

SETH DATOOBHÁI IBRÁHIM DISPENSARY, CUTCH MÁNDVI.—*In charge of* Mr. PRANLÁL MOHANLÁL.

This dispensary was opened on 7th October 1886. The building is a hired one. The furniture and fittings are sufficient for present wants. There is no committee. The total number treated was 2,450, all out-door. The more common complaints were skin-diseases, ulcers, respiratory affections, and malarious fevers. The total cost was Rs. 1,924-0-4 and the cost per patient Re. 0-12-6.

CUTCH ANJAR.—*In charge of* Native Doctor ATMÁRÁM KESHAV.

The building is in good condition but requires whitewashing. The furniture is sufficient. There is no committee. Attention is paid to sanitary matters. The water-supply is abundant. The total number treated was 15,132 out-door and 55 in-door patients as compared with 17,171 and 73 respectively in the previous year. The more common complaints were skin-diseases, worms, ophthalmia, malarious fevers and ulcers. Some cases of small-pox and measles were reported at the beginning of the year. Four major surgical operations were performed. Vaccination was conducted by a State vaccinator. The total cost was Rs. 3,070-8-2, the cost per patient Re. 0-3-2, as compared with Rs. 3,523-0-0 and Re. 0-3-1 respectively in the previous year.

CUTCH NALIYA.—*In charge of* Native Doctor JENATALLY PIRMAHOMED.

The building, a hired one, is unchanged. The furniture and fittings are sufficient. There is no committee. Conservancy is attended to. The water-supply is good and abundant. The total treated was 7,086, all out-door patients, against 6,135 in the previous year. The more common complaints were skin-diseases, ophthalmia, ulcers, respiratory affections and malarious fevers. There was no epidemic. Vaccination is conducted by a State vaccinator. The total cost was Rs. 1,518-4-0, the cost per patient Re. 0-3-5, as compared with Rs. 1,594-6-4 and Re. 0-4-1 respectively in the previous year.

CUTCH RAPUR.—*In charge of* Native Doctor HIRJI HANSRÁJ.

The building requires repair, especially the roof. The furniture and fittings are sufficient. There is no committee. The sanitary condition of the town is unsatisfactory. The water-supply is good and abundant. The total number treated was 3,618 out-door and 60 in-door patients as compared with 3,685 and 53 respectively in the previous year. The more common complaints were skin-diseases, worms, ulcers, malarious fevers, ophthalmia, inflammation of the ear, and respiratory and rheumatic affections. There was no epidemic. One major surgical operation was performed. Vaccination is carried on by a State vaccinator. The total cost was Rs. 1,402-9-11, the cost per patient Re. 0-6-1, as compared with Rs. 1,410-15-8 and Re. 0-6-0 respectively in the previous year.

CUTCH BÁCHÁO.—*In charge of* Native Doctor LAKHAMSEY TULSIDÁS.

The building is suitable. The necessary furniture and fittings are supplied. There is no committee. The town is kept fairly clean. The water-supply is plentiful but generally brackish. The total number treated was 4,858, all out-door patients, as compared with 3,035 in the previous year. The most common diseases were those of the skin, ulcers, ophthalmia, respiratory affections, malarious fevers and worms. There was no epidemic. Three major surgical operations were performed. Vaccination is carried on by a State vaccinator. The total cost was Rs. 987-1-7, the cost per patient Re. 0-3-3, as compared with Rs. 1,069-14-5 and Re. 0-5-8 respectively in the previous year.

CUTCH MUNDRA.—*In charge of* Hospital Assistant RÁMCHANDRA DALPATRÁM.

The building is new. The furniture and fittings are in good order and sufficient. There is no committee. The town is kept clean. The water-supply is abundant and good. The total treated was 11,377 out-door and 81 in-door patients as compared with 8,551 and 38 respectively in the previous year. Skin-diseases, worms, ulcers, ophthalmia and respiratory affections were the most common diseases. A few cases of small-pox occurred in the neighbourhood of the town. Vaccination is performed by the State vaccinator. Two *post-mortem*

examinations were made at the request of the police. The dispensary was inspected by the Chief Medical Officer, Cutch, in April. The total cost was Rs. 2,162-11-10, the cost per patient Re. 0-3-0, as compared with Rs. 1,667-5-3 and Re. 0-2-11 in the previous year.

NÁRA'YENSAROVAR.—*In charge of* Native Doctor MANISHANKAR GOKALJI.

The building, a hired one, is in good repair but not very suitable. The necessary furniture has been supplied. There is no committee. The sanitary condition of the town requires much improvement. The water-supply is scanty in the hot months and liable to pollution. The total treated was 3,480, all out-door patients. The prevailing diseases were those of the skin, ulcers, respiratory affections and malarious fevers. There was no epidemic. Vaccination is performed by a State vaccinator. The total cost was Rs. 942-3-4 and the cost per patient Re. 0-4-3.

WADHWÁN.—*In charge of* Assistant Surgeon THAKORDA'S KIKA'BHA'I, L.M. & S.

The buildings are in a good state of repair. The furniture is in good order. There is no committee. The dispensary is visited by the Political officers. The sanitary condition of the town is good. The water-supply from wells and the river is brackish. The total number treated was 4,973 out-door and 88 in-door patients as compared with 4,939 and 114 respectively in the previous year. The more common complaints were malarious fevers, skin-diseases, ophthalmia, worms and respiratory affections. Ten major surgical operations were performed. One hundred and thirty-four children were successfully vaccinated. One *post-mortem* examination was made and opinion given in 14 medico-legal cases. The dispensary was inspected by the Surgeon-General in January. The total cost was Rs. 4,899-0-7, the cost per patient Re. 0-15-5, as compared with Rs. 4,486-15-8 and Re. 0-14-2 respectively in the previous year.

MHOW.

ENDOWED DISPENSARY.

DORA'BJI PESTONJI DISPENSARY, MHOW.—*Superintended by* Surgeon-Major W. E. SAUNDERS *and in charge of* pensioned Hospital Assistant KRISHNA'PPA.

The buildings, the furniture and fittings are in excellent order. The Superintendent visits the dispensary every day. Conservancy is most carefully attended to. The water-supply is deficient; the construction of water-works has been sanctioned. The total number treated was 8,030 out-door and 74 in-door patients as compared with 7,434 and 67 respectively in the previous year. The prevailing diseases were malarious fevers, respiratory affections, ophthalmia, diarrhœa and skin-diseases. Cholera occurred in the Nimar District in the months of August and September. The total cost was Rs. 1,938-0-5, the cost per patient Re. 0-3-9, as compared with Rs. 2,100-3-2 and Re. 0-4-5 respectively in the previous year.

SIND.

In Administrative charge of DEPUTY SURGEON-GENERAL J. PINKERTON, M.D.

KARÁCHI COLLECTORATE.

CIVIL HOSPITAL, KARÁCHI.—*In charge of* SURGEON-MAJOR J. F. KEITH, M.D., till 12th August and afterwards Surgeon-Major BAINBRIDGE, M.D.

Conservancy.—Arrangements fairly satisfactory. It is however difficult to keep the hospital privies properly clean owing to the habits of the people and the inattention of sweepers.

Water-supply.—Water from the Muleer works. Water-pipes from the town mains were laid on at the end of the year, nine taps having been provided in different parts of the hospital premises, so that there is now an ample and pure supply.

Hospital Buildings.—Roomy and well built. Additional ventilation of the wards above the doors considered advisable. Floors of the south wards, now of mud, should be paved.

General Health.—On the whole good; no epidemic but a considerable number of cases of enteric fever, but in no instance definitely traced to its origin.

Attendance of Patients.—A total of 799 in-door and 8,805 out-door was treated. For the two previous years the number of in-door patients was 1,166 and 914 and of out-door 11,140 and 9,173. The medical officer remarks: "the number of out-door patients is declining. With the existing reduced establishment it is impossible to do justice to this class, nor does it seem desirable that the more ordinary cases of illness in non-officials should receive attendance and medicines at a Government Hospital, now that ample provision for their wants has been made by the opening of municipal dispensaries."

Prevailing Diseases.—Ague, skin-diseases, conjunctivitis, various injuries, different forms of rheumatism, affections of the respiratory organs and of the digestive organs.

Surgical Operations.—One hundred and seventy-seven major and 1,220 minor, major including lithotomy 15, amputations of parts 22, excision of upper jaw 2, forceps delivery 2, craniotomy 2. The medical officer makes remarks on some of these major operations explaining the cases and his procedure.

Mortality and its Causes.—The fatal cases in hospital numbered 64, as many as 11 being from debility and privation, the persons being pilgrims or mendicants. Six deaths took place from diarrhœa and 5 from dysentery, 5 from bronchitis, 3 from fractured limbs, 2 from other injuries, 2 from arsenical poisoning and the others from various causes.

Medico-legal.—Nine *post-mortem* examinations were made for the police, six reports made on other subjects, and numerous certificates in minor cases to the number of 103.

Vaccination.—Is under the Sanitary Department.

Conduct of Establishment.—That of the superior establishment has been good, and for the most part the inferior servants behaved well. But the medical officer complains that the establishment is inadequate, since it was tentatively reduced in June last. (A report has been recently submitted to Government with a proposition statement of revised establishment, but the only saving possible is Rs. 22 per mensem.) The medical officer also complains of the paucity of the Assistants but with the present demand, even if sanctioned, additional assistance would not be supplied.

Cost.—The total cost was Rs. 21,286-5-9 and the cost per patient Rs. 2-3-5 as compared with Rs. 21,600-0-1 and Rs. 1-12-1 respectively in the previous year.

CIVIL HOSPITAL, KOTRI.—*In charge of* Apothecary E. H. COOKE till the 18th June, afterwards Honorary Surgeon BROWNE till the 17th of November when it was made over to the Railway under Government Resolution No. 3876, dated 3rd November 1886, General Department.

Conservancy.—The sanitary condition of the town and station is good.

Water-supply.—Is from the Indus and reported good.

Hospital Buildings.—Good, lofty, airy, accommodation ample; furniture requiring repairs.

General Health.—Good, no epidemic.

Attendance of Patients.—The total number treated was 440 in-door and 5,046 out-door against 1,229 and 13,039 for the previous year. The diminution is accounted for by the medical officer as follows: "It may be from the population of Kotri and the districts being more healthy, or it may be from the people emigrating elsewhere." But the Deputy Surgeon-General, Sind, "states the real reason of the decrease is that the hospital was virtually a railway hospital from June although not officially abolished till November."

Prevailing Diseases.—Malarious fevers, rheumatism, syphilis and respiratory affections, diseases of the digestive organs, skin-diseases, ulcers and injuries.

Surgical Operations.—There were no important surgical operations, although 517 of all classes were performed.

Mortality and its Cause.—The deaths were from pneumonia 5, remittent fever 2, diarrhœa 3, wound of chest 1, comminuted fracture of leg 1, total 12.

Vaccination.—Is carried on by the táluka vaccinator under the Deputy Sanitary Commissioner and it is stated his work is well performed.

Conduct of Establishment.—Good.

Cost.—The total cost was Rs. 4,390-4-2 and the cost per patient Re. 0-12-9 as compared with Rs. 5,517-15-11 and Re. 0-6-2 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

KARA'CHI BANDAR ROAD.—*In charge of* Hospital Assistant A. X. D'SOUZA.

The buildings are in good order; the furniture and fittings are sufficient. The committee meet every month. The conservancy of the quarter is fair. The water-supply is good and abundant. The total number treated was 13,134, all out-door patients, as compared with 12,701 in the previous year. The prevailing diseases were ophthalmia, malarious fevers, skin-diseases, respiratory affections, ulcers, and inflammation of the ear. Vaccination is carried on by the Sanitary Department. Two major surgical operations were performed. The dispensary was inspected by the Deputy Surgeon-General, Sind, in October and by the Civil Surgeon, Karáchi, in April and November. The total cost was Rs. 2,067-3-1, the cost per patient Re. 0-2-6, as compared with Rs. 1,747-12-0 and Re. 0-2-2 respectively in the previous year.

KARÁCHI LAYARI.—*In charge of* Hospital Assistant M. SHALLOMJI.

No change in the building. The furniture is sufficient and good. The committee visited the dispensary every month. The sanitary condition of the quarter is fair. The water-supply is abundant and good. The total number treated was 9,258, all out-door patients, as against 10,376 in the previous year. The prevailing diseases were ophthalmia, malarious fevers, ulcers, inflammation of the ear, skin-diseases and respiratory and rheumatic affections. There was no epidemic. One major surgical operation was performed. The dispensary was inspected in October by the Deputy Surgeon-General and in April and October by the Civil Surgeon, Karáchi. The total cost was Rs. 1,634-4-8, the cost per patient Re. 0-2-9, as compared with Rs. 1,098-2-6 and Ré. 0-1-8 respectively in the previous year.

EDULJI DINSHAW DISPENSAARY, KARA'CHI, SADAR BA'ZA'R.—*In charge of* Hospital Assistant P. RODRIGUES.

The building is in a good state of repair; the furniture and fittings are in good order. The committee meet regularly every month. The sanitary condition of the quarter is unsatisfactory. The water-supply is good and abundant. The total number treated was 11,885, all out-door patients, as compared with 14,876 in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases and respiratory affections. There was no epidemic. Seven major surgical operations were performed. The dispensary was inspected by the Deputy Surgeon-General, Sind, in October and by the Civil Surgeon, Karáchi, in April and October. The total cost was Rs. 1,956-10-7, the cost per patient Re. 0-2-7, as compared with Rs. 1,533-4-9 and Re. 0-1-7 respectively in the previous year.

JAMNA'BA'I DISPENSARY, TATTA.—*In charge of* Assistant Surgeon J. B. UNVA'LA, L.M. & S.

The buildings require repair. The furniture is incomplete and some articles require repair. The committee visited the dispensary every month. Some attention is paid to conservancy. The water-supply is fairly good. The total number treated was 6,731 out-door and 13 in-door patients as compared with 7,052 and 20 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases and respiratory and rheumatic affections. There was no epidemic. Forty-nine persons were successfully vaccinated. The dispensary was inspected by the Civil Surgeon, Karáchi, in April and December and by the Deputy Sanitary Commissioner in April. The total cost was Rs. 2,995-6-11, the cost per patient Re. 0-7-1, as compared with Rs. 3,978-0-6 and Re. 0-9-0 respectively in the previous year.

KETI BANDAR.—*In charge of* Hospital Assistant SATRÁMDA'S RÁMCHAND.

Better accommodation for in-patients is needed; the hut at present in use requires repair. The furniture is old and some articles are required. The committee visit the dispensary every month and quarterly meetings are also held. Some attention is paid to conservancy. The water-supply is good and abundant. The total number treated was 3,364 out-door and 78 in-door patients as compared with 2,008 and 7 respectively in the

previous year. The prevailing diseases were malarious fevers, ophthalmia, respiratory affections and ulcers. There was no epidemic. There were 42 primary vaccinations. One *post-mortem* examination was made and opinion was given in 5 other medico-legal cases. The total cost was Rs. 936-1-5, the cost per patient Re. 0-4-4, as compared with Rs. 815-7-2 and Re. 0-6-5 respectively in the previous year.

JERRUCK.—*In charge of* Hospital Assistant REUBEN SUDKIEL.

Buildings in good repair, furniture sufficient. Dispensary committee visit monthly. Town fairly clean. Water good and abundant from the Indus. Numbers treated were 8 in-door and 1,635 out-door, being an increase on the previous year which was an increase on the previous twelve months. As there was no epidemic, this evidences increasing popularity of the dispensary. Ninety-seven minor surgical operations were performed. Forty-two primary and 54 re-vaccinations performed, being also an increase. The dispensary was inspected in April and December by the Civil Surgeon, Karáchi, who brings to notice the want of a mortuary. The Hospital Assistant is very favourably mentioned. The total cost was Rs. 834-0-8, the cost per patient Re. 0-8-1, as compared with Rs. 929-2-0 and Re. 0-9-9 respectively in the previous year.

MIRPUR BATORO.—*In charge of* Hospital Assistant PARMA'NAND VISHINDA'S.

The building, a hired one, is quite unsuited for the purpose. A new building is to be erected. The furniture and fittings are in good order and sufficient. The committee meets every month or more frequently if necessary. Conservancy is attended to. The water-supply from wells is not sufficiently protected. The total number treated was 5,654 out-door and 44 in-door patients as compared with 6,412 and 214 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, respiratory affections, bowel complaints and ulcers. There was no epidemic. Vaccination is carried on by the táluka vaccinator. Two *post-mortem* examinations were made. The dispensary was inspected by the Deputy Sanitary Commissioner in March. The total cost was Rs. 1,391-0-7, the cost per patient Re. 0-3-10, as compared with Rs. 936-10-4 and Re. 0-2-3 respectively for the previous year.

PARUMAL KHUBCHAND DISPENSARY, SEHWAN.—*In charge of* Hospital Assistant E. BENJAMIN.

The buildings are in thorough repair; the furniture and fittings are sufficient. The committee meets regularly. The sanitary condition of the town is fairly satisfactory. The water-supply from the river and wells is good and ample. The total number treated was 4,247 out-door and 109 in-door patients as compared with 4,169 and 89 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, ulcers, skin-diseases and respiratory affections. There was no epidemic. Thirty-one major surgical operations were performed, including 6 cases of lithotomy. There were 77 primary vaccinations. Ten *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Karáchi, in April and December, by the Deputy Surgeon-General, Sind, in November and by the Deputy Sanitary Commissioner in December. The total cost was Rs. 3,787-6-3, the cost per patient Re. 0-13-10, as compared with Rs. 1,940-15-5 and Re. 0-7-3 respectively in the previous year.

GOVERNMENT DISPENSARIES.

THA'NO BULA KHA'N.—*In charge of* Native Doctor M. D'SOUZA.

The buildings are in a fair state of repair. There is no committee. There is no attempt at conservancy. The water-supply is good and plentiful. The total treated was 1,143 out-door and 7 in-door patients as compared with 1,215 and 11 respectively in the previous year. The most common diseases were ophthalmia, malarious fevers, skin-diseases, respiratory and rheumatic affections. There was no epidemic. Eleven children were successfully vaccinated. Two *post-mortem* examinations were made. The total cost was Rs. 868-14-11, the cost per patient Re. 0-12-1, as compared with Rs. 793-3-5 and Re. 0-10-4 respectively in the previous year.

MANORA.—*In charge of* Assistant Surgeon E. MACKENZIE.

The building, a single room and verandah, is in good repair. The sanitary condition is good. The water-supply good and abundant. There is no committee. The total number treated was 3,184, all out-door patients, as compared with 2,252 in the previous year. The prevailing diseases were malarious fevers, respiratory affections, ophthalmia and skin-diseases. There was no epidemic. Seven major surgical operations were performed. The dispensary was inspected by the Deputy Surgeon-General, Sind, in February and by the Civil Surgeon, Karáchi, in April and December. The total cost was Rs. 4,807-10-5, the cost per patient Rs. 1-8-1, as compared with Rs. 2,950-5-8 and Re. 0-8-11 respectively in the previous year.

HYDERABAD COLLECTORATE.

CIVIL HOSPITAL, HYDERABAD.—*In charge of* Surgeon-Major DETATHAM, M.D., till May 12th; Surgeon B. N. KOYA'JI till May 18th; Surgeon-Major KEELAN till end of the year.

Conservancy.—In the city of Hyderabad there is a conservancy cess levied. The total charge of conservancy and cleansing for the year was Rs. 11,779-6-8 or about 4½ pies per head of population. The general conservancy of the town is carried out under the orders of the municipality with Mr. Lee as Engineer and Secretary, but the Civil Surgeon considers a sanitary officer should be appointed. It is mentioned that a scheme for better drainage has been proposed by Colonel Ducat, R.E.

Water-supply.—Water is raised from the Indus and conveyed into settling tanks and from thence into the city. The supply is copious.

Hospital Buildings.—The hospital accommodation is all that can be desired and in good repair except that part of it looked after by the municipality, which is soon to be taken in hand. The furniture is in good condition, but new iron cots are required as the wooden ones in use are out of repair and harbour vermin.

General Health.—Better than last year's. No epidemic.

Attendance of Patients.—In-door patients 629 against 892 for the previous year. Out-patients 20,735 against 24,583; the decrease is attributed to three other dispensaries in the town—two private and one municipal—having been opened lately.

Prevailing Diseases.—Ague, conjunctivitis, respiratory affections, bowel-complaints, skin-diseases, vesical calculus.

Surgical Operations.—Two hundred and four major surgical operations occurred during the year, of which 176 were cases of lithotomy, 13 only terminating fatally. The ages of the patients varied from 18 months to 60 years. There were 10 amputations of limbs, one for cancer of the breast and one of abdominal paracentesis.

Mortality and its Causes.—Thirty-six deaths occurred in hospital—13 from calculus, 5 from phthisis, 3 from pneumonia, 2 from anæmia, 2 from diarrhœa and 1 from the following diseases: chronic rheumatism, scirrhus, cardiac disease, bronchitis, dysentery, ascites, ulcer, debility, caries, fractured ribs, compound fracture of thigh bone. Many of these cases were admitted in a hopeless condition, being pilgrims brought by the police.

Medico-legal Cases.—Nine human bodies and 6 other medico-legal cases were examined and many persons were sent for treatment. The Civil Surgeon also had to give evidence in cases of murder at the Sessions on various occasions.

Vaccination.—Municipal, under the Deputy Sanitary Commissioner, Sind Circle.

Conduct of Hospital Establishment.—The Civil Surgeon remarks: "It would be difficult to speak too strongly of the manner in which Assistant Surgeons T. H. Acquino and J. E. Bocarro performed their duties in the hospital and school." He also states: "1st Class Hospital Assistant E. Jacob has performed his duties most satisfactorily." 3rd Class Hospital Assistant Saval Sing Mánikrái lately attached "gives great satisfaction."

Cost.—The total cost was Rs. 13,241-10-3 and the cost per patient Re. 0-9-11, as compared with Rs. 13,614-1-10 and Re. 0-8-6 respectively in the previous year.

GRANT-IN-AID DISPENSARIES.

TANDO ALAHYAR.—*In charge of* Hospital Assistant MOSES ELIJAH.

The building is in good repair and is convenient; the furniture is in good order. The committee visits the dispensary every month. The sanitary condition of the town is fairly good. The water-supply is good and sufficient. The total number treated was 4,250 out-door and 8 in-door patients as compared with 5,233 and 9 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fever, ulcer, inflammation of the ear and respiratory affections. There was no epidemic. Two major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. One *post-mortem* examination was made. The dispensary was inspected by the Civil Surgeon, Hyderabad, in March and September. The total cost was Rs. 1,409-5-1, the cost per patient Re. 0-5-3, as compared with Rs. 1,493-13-5 and Re. 0-4-6 respectively in the previous year.

TANDO MAHOMED KHA'N.—*In charge of* Hospital Assistant SAMUEL DAVID.

The buildings are in good repair. There are no quarters for second class servants. The committee meet regularly once a month. The sanitary condition of the town is fairly good. The water-supply is sufficient and good. The total treated was 4,994 out-door and 48 in-door patients as compared with 3,885 and 41 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, ulcers, respiratory affections and skin-diseases. There was no epidemic. One major surgical operation was performed. Sixty-one persons were vaccinated. The dispensary was inspected in March and November by the Civil Surgeon, Hyderabad, and in March by the Deputy Sanitary Commissioner. The

total cost was Rs. 1,329-2-0, the cost per patient Re. 0-4-2, as compared with Rs. 1,306-15-0 and Re. 0-5-3 respectively in the previous year.

HA'LA.—*In charge of* Hospital Assistant PESTONJI DORA'BJI TALA'TI.

The buildings are in good repair; there is no dead-house. The furniture and fittings, though old, are in good condition and sufficient. The committee meets every month. The sanitary condition of the town is fairly good. The water-supply is good and plentiful. The total treated was 4,513 out-door and 44 in-door patients as compared with 4,100 and 34 respectively in the previous year. The prevailing diseases were malarious fevers, diarrhœa, ulcer, ophthalmia, skin-diseases and respiratory affections. There was no epidemic. Five major surgical operations were performed. There were 150 primary and 4 re-vaccinations. Four *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Hyderabad, in March and November. The total cost was Rs. 1,101-9-2, the cost per patient Re. 0-3-10, as compared with Rs. 723-1-6 and Re. 0-3-10 respectively in the previous year.

THA'RU SHA'H.—*In charge of* Hospital Assistant D. C. D'SILVA.

The building requires repair. The furniture and fittings are good and sufficient. The committee meets every month and individual members frequently visit the institution. The sanitary condition of the town is fairly good. The water-supply is abundant but is liable to contamination. The total treated was 4,407 out-door and 114 in-door patients as compared with 4,211 and 121 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, ulcers, skin-diseases and respiratory affections. A few cases of small-pox occurred. Seven major surgical operations were performed. Forty-six persons were vaccinated. The dispensary was inspected by the Civil Surgeon, Hyderabad, in March and December. The total cost was Rs. 825-8-8, the cost per patient Re. 0-2-11, as compared with Rs. 1,057-1-8 and Re. 0-3-10 respectively in the previous year.

TANDO ADAM.—*In charge of* Hospital Assistant TEJMAL DHALUMAL.

The building is in good order. The committee visits the dispensary every month. The sanitary condition of the town is fairly good. The water-supply is abundant; some of the wells are badly situated. The total number treated was 3,157 out-door and 18 in-door patients as compared with 3,070 and 10 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, ulcers, respiratory affections and skin-diseases. There was no epidemic. The dispensary was inspected by the Civil Surgeon, Hyderabad, in March and November. The total cost was Rs. 752-3-4, the cost per patient Re. 0-3-9, as compared with Rs. 550-3-9 and Re. 0-2-10 respectively in the previous year.

MIRPUR KHA'S.—*In charge of* Hospital Assistant S. A. RAYMAN.

The buildings require repair; a latrine is to be built. The furniture is sufficient; a table for the dead-house and a cupboard for poisonous drugs have been supplied. The committee met eleven times. The sanitary condition of the town is fairly good. The water-supply is abundant; some of the wells are badly situated. The total treated was 2,730 out-door and 19 in-door patients as compared with 2,063 and 16 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases, respiratory affections and ulcers. Three major surgical operations were performed. Twenty persons were vaccinated and 2 re-vaccinated. One *post-mortem* examination was made and opinion given in two other medico-legal cases. The dispensary was inspected by the Civil Surgeon, Hyderabad, in March and October. The total cost was Rs. 830-11-2, the cost per patient Re. 0-4-10, as compared with Rs. 918-5-2 and Re. 0-7-0 respectively in the previous year.

BOULTON DISPENSARY, TANDO BA'GO.—*In charge of* Hospital Assistant JOHN JOEL.

The buildings are in good repair; a cook-house is required. The furniture and fittings are in good condition except the chairs which require to be replaced. The committee meets every month. The sanitary condition of the town is not satisfactory. The water-supply from wells and a canal is abundant. The total treated was 2,285 out-door and 99 in-door patients as compared with 2,163 and 98 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, ulcers, respiratory affections and diarrhœa. There was no epidemic. Two major surgical operations were performed. Thirty-seven persons were vaccinated and 2 re-vaccinated. Three *post-mortem* examinations were made at the request of the police. The total cost was Rs. 699-4-1, the cost per patient Re. 0-4-8, compared with Rs. 1,040-10-6 and Re. 0-7-4 respectively in the previous year.

THAR AND PARKAR.

GRANT-IN-AID DISPENSARIES.

UMARKOT.—*In charge of* Hospital Assistant GIRDHARI DANAJI.

The building is suitable; some articles of furniture are wanted. The committee meets every month. Conservancy is attended to. The water-supply is plentiful and of good

quality. The total number treated was 1,307 out-door and 146 in-door patients as compared with 1,345 and 196 respectively in the previous year. The most common diseases were malarious fevers, ulcers, ophthalmia and respiratory affections. There was no epidemic. Three major surgical operations were performed. The total cost was Rs. 1,136-4-9, the cost per patient Re. 0-12-6, as compared with Rs. 775-10-10 and Re. 0-8-0 respectively in the previous year.

KHIPRA.—*In charge of* Hospital Assistant PIRA'JI KA'MA'JI.

Buildings are in good order and a cook-room and latrine have been added. The Chairman visits the dispensary occasionally, the other members of the committee on rare occasions. Conservancy and cleansing bad, water-supply good. Total number treated 60 in-door and 2,729 out-door, almost the same as for the previous year. Prevailing diseases, malarious fevers, ophthalmia, respiratory affections and skin-diseases. One hundred and thirty-nine minor operations occurred. Forty vaccinations were performed, 36 being successful. Three dead bodies were examined at the instance of the police. The dispensary was inspected by the Deputy Sanitary Commissioner on the 30th March 1886. Cost was Rs. 633-0-10, the cost per patient Re. 0-3-7, as compared with Rs. 707-14-3 and Re. 0-4-1 respectively in the previous year.

MITTI.—*In charge of* Hospital Assistant MULCHAND LALCHAND.

Buildings in good order, furniture sufficient, dead-house and female ward required. Committee visit monthly; 1,617 persons treated, of whom 22 were in-door. Principal diseases malarious fevers, ophthalmia, ulcers and cutaneous affections. There were 122 minor operations. Vaccination by the táluka vaccinator. The dispensary was inspected once by the Deputy Sanitary Commissioner. Cost was Rs. 957-9-8, the cost per patient Re. 0-9-5, as compared with Rs. 745-0-2 and Re. 0-7-0 respectively in the previous year.

NAGAR PÁRKAR.—*In charge of* Hospital Assistant P. LELY.

The buildings are in good repair; the furniture and fittings with some exceptions are in good order. The committee meets every month; individual members attend frequently. Conservancy is fairly looked after. The water-supply is ample and of good quality. The total number treated was 3,032 out-door and 78 in-door patients as compared with 2,415 and 41 respectively in the previous year. The prevailing diseases were malarious fevers, ophthalmia, skin-diseases, ulcers and respiratory affections. There was no epidemic. Vaccination is carried on by the táluka vaccinator. The total cost was Rs. 1,047-8-0, the cost per patient Re. 0-5-4, as compared with Rs. 568-7-8 and Re. 0-3-8 respectively in the previous year.

SHIKA'RPUR COLLECTORATE.

CIVIL HOSPITAL, SHIKA'RPUR.—*In charge of* Surgeon STREET to 25th April, Assistant Surgeon POSTVA'LLA to 15th May, Surgeon STREET to 8th June, Assistant Surgeon POSTVA'LLA to the end of the year.

Conservancy.—Satisfactory so far as it is carried out by the municipality, but the arrangements for private houses not satisfactory. Garbage not removed to a sufficient distance and not burnt so soon as it ought to be.

Water-supply.—From wells, and good.

Hospital Buildings.—Satisfactory as regards sanitation, but inconvenient on account of distance; but there is a dispensary in the town.

General Health.—Good, although there were some cases of small-pox.

Attendance of Patients.—Four hundred and fifty-six in-door, 2,117 out-door, being a decrease of 207 and 852 from the numbers of the previous year. The decrease is attributed by the medical officer to less prevalence of malarious fevers and absence of cholera.

Prevailing Diseases.—Ague, abscess, boils, skin-diseases, ulcers, bronchitis.

Surgical Operations.—Thirty-three major operations were performed with considerable success owing, as the medical officer opines, to the careful employment of antiseptic precautions. Among the operations were 23 for stone in the bladder.

Mortality and its Causes.—Five deaths occurred in hospital from chronic diarrhœa, anæmia after the operation of lithotomy, pneumonia, compound fracture.

Vaccination.—Carried on by the municipal vaccinator. Successful operations 1,184.

Conduct of Hospital Establishment.—Satisfactory.

Cost.—The total cost was Rs. 6,844-9-5 and the cost per patient Rs. 2-10-6, as compared with Rs. 6,984-3-7 and Rs. 1-14-9 respectively in the previous year.

CIVIL HOSPITAL, SUKKUR.—*In charge of* Surgeon-Major M. L. BARTHOLOMEUSZ, M.B., till 26th April, Surgeon A. W. F. STREET till 15th May, Surgeon H. P. DIMMOCK till the end of year.

Conservancy.—No change. Fairly satisfactory.

Water-supply.—No improvement. From river and wells.

Hospital Buildings.—Remain as before. They are old barracks badly lighted and draughty. Doors narrow, so that a cot cannot be carried through. A new latrine has been provided which is a great convenience; the dispensary has been improved and a waiting-room constructed.

General Health.—Unusually good.

Attendance of Patients.—In-door 379, almost the same as for the previous year; out-door 5,817, an increase on the previous year.

Prevailing Diseases.—Malarious fevers, spleen affections, rheumatism, anæmia, conjunctivitis, ear, lung and bowel complaints, skin-diseases, boils, ulcers.

Surgical Operations.—Fifty-five major including 35 lithotomy, 5 paracentesis abdominis, 3 supra-pubic lithotomy, 1 amputation at the shoulder joint, 3 other amputations, 1 abdominal section. Of the 35 lithotomy cases 5 were fatal, the causes of death being kidney complications. The medical officer, Surgeon Dimmock, submits with his report an account of the supra-pubic lithotomy cases with an account of his system of bladder drainage. This paper has been forwarded to the Secretary of the Bombay Medical and Physical Society.

Mortality and its Causes.—Fifty-four deaths occurred in hospital, 10 from dysentery, 6 from fever, 6 from pneumonia, 9 from diarrhœa, 4 from phthisis, 5 from calculus and the remainder from various causes. Many of the deceased were workmen who came from Sibi in a state of exhaustion.

Medico-legal.—43 medico-legal cases were examined.

Vaccination.—Is carried on under the Sanitary Department.

Cost.—The total cost was Rs. 9,834-14-1, the cost per patient Re. 1-9-4, as compared with Rs. 9,527-1-1 and Re. 1-13-6 respectively in 1885.

GRANT-IN-AID DISPENSARIES.

SUKKUR.—*In charge of* Hospital Assistant BA'LLA'JI CADDUM.

Buildings in good repair; furniture and fittings complete and in good order. Committee meetings monthly. Numbers treated 159 in-door and 9,121 out-door, being less than for 1885, but increase on previous years. Prevailing diseases malarious fevers, conjunctivitis, affections of the ear, and skin-diseases in the order named. Seven hundred and sixty-six minor operations. Vaccination carried on separately by a municipal vaccinator. Inspections were made twice by the Civil Surgeon and once by the Deputy Surgeon-General, who reports satisfactorily of the Hospital Assistant. The total cost was Rs. 3,773-14-5, the cost per patient Re. 0-6-6, as compared with Rs. 2,422-7-11 and Re. 0-3-9 respectively in the previous year.

SHIKA'RPUR.—*In charge of* Assistant Surgeon M. S. POSTWA'LA, L.M.

The building is very old and is not well suited to the purpose. A new building is to be erected. The furniture and fittings are in good condition. The committee met once a month, and individual members visit the dispensary frequently. The total treated was 10,006 out-door and 98 in-door patients as compared with 11,464 and 101 respectively in the previous year. The most common diseases were inflammation of the ear, ophthalmia, ulcer, malarious fevers and respiratory affections. Thirty-two cases of small-pox with 5 deaths were reported. Twenty major surgical operations were performed, including 8 for stone in the bladder. Vaccination is carried on by a municipal vaccinator. The dispensary was inspected by the Deputy Surgeon-General, Sind, in November and by the Civil Surgeon, Shikárpur, in June. The total cost was Rs. 4,195-4-6, the cost per patient Re. 0-6-7, as compared with Rs. 4,102-1-1 and Re. 0-5-8 respectively in the previous year.

ROHRI.—*In charge of* Hospital Assistant BA'BU SHUMSHEERSING.

The building has been repaired; a latrine and dead-house are required. The committee visited the dispensary 14 times. The sanitary condition of the town is not good. The water-supply from the Indus is good and abundant. The total number treated was 2,383 out-door and 53 in-door patients as compared with 2,286 and 73 respectively in the previous year. The prevailing diseases were ophthalmia, ulcers, malarious fevers, respiratory affections, and skin-diseases. There was no epidemic. There were 61 primary and 2 re-vaccinations; a municipal vaccinator has been employed for this duty. The dispensary was inspected by the Deputy Surgeon-General, Sind, in November and by the Civil Surgeon, Sukkur, in June and December. The total cost was Rs. 1,103-6-1, the cost per patient Re. 0-7-2, as compared with Rs. 1,758-8-3 and Re. 0-11-11 respectively in the previous year.

LA'RKHA'NA.—*In charge of* Assistant Surgeon M. M. VAKIL, L.M. & S., from 17th August; previously Assistant Apothecary RODRIGUES.

Dispensary in good repair; furniture and fittings ample. Committee visit monthly. Numbers admitted 176 in-door and 10,234 out-door, being less than the former and nearly same as the latter for the previous year. Prevailing diseases, fever, ophthalmia, respiratory affections, skin-affections, ulcers, ear affections, and injuries. Nineteen major and 1,097 minor operations; among the former being 1 lateral lithotomy, 1 lithotrity, 2 amputations

of extremities, 1 excision of eye-ball. Thirteen *post-mortem* examinations were made in police cases. Vaccination municipal. Inspected by the Civil Surgeon, Sukkur, twice, once by the Deputy Sanitary Commissioner, once by the Deputy Surgeon-General. The total cost was Rs. 2,586-0-2, the cost per patient Re. 0-3-11, as compared with Rs. 3,022-0-11 and Re. 0-4-7 respectively in the previous year.

MEHAR.—*In charge of* Hospital Assistant MAHOMED YUSUFF.

The buildings have been recently repaired. The furniture and fittings are good and serviceable. The committee holds quarterly meetings. The sanitary condition of the town is fair. The water-supply is ample and of good quality. The total number treated was 4,065 out-door and 69 in-door patients as compared with 5,163 and 42 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, ulcers, respiratory affections, and skin-diseases. Thirteen major surgical operations were performed. Thirty-five persons were successfully vaccinated. Eleven *post-mortem* examinations were made. The dispensary was inspected by the Civil Surgeon, Sukkur, in December, by the Civil Surgeon, Shikárpur, in May, and by the Deputy Sanitary Commissioner in January. The total cost was Rs. 1,431-3-3, the cost per patient Re. 0-5-6, as compared with Rs. 1,182-0-10 and Re. 0-3-7 respectively in the previous year.

KAMBAR.—*In charge of* Hospital Assistant JOSEPH ISRAEL.

Buildings and furniture in good order. Cook-room for in-door patients wanted. Committee meetings monthly. Numbers treated in-door 275, out-door 6,649, being an increase on the previous year. Six hundred and fifty-three operations, none of any great importance. Prevailing diseases, malarious fevers, rheumatic affections, and maladies implicating the respiratory, digestive, and cutaneous systems. Seven *post-mortem* examinations were made in police cases. Eighty-two vaccinations were performed. Inspected twice by the Civil Surgeon, Sukkur, and once by the Deputy Sanitary Commissioner. The total cost was Rs. 2,107-4-11, the cost per patient Re. 0-4-10, as compared with Rs. 1,427-9-10 and Re. 0-3-5 respectively in the previous year.

GHOTKI.—*In charge of* Hospital Assistant SHAIK SHAHABUDIN.

The building requires repair to the roof and door-frames. The furniture with some exceptions is sufficient. The committee visited the dispensary every month. The sanitary condition of the town is fair. The water-supply is abundant but liable to pollution by soakage. The total number treated was 3,047 out-door and 16 in-door patients as compared with 2,093 and 6 respectively in the six months the dispensary was open in the previous year. The prevailing diseases were malarious fevers, respiratory affections, ophthalmia, skin-diseases and ulcers. Small-pox and measles were prevalent. Seven major surgical operations were perfo rmed. Vaccination is carried on by a táluka vaccinator. Four *post-mortem* examinations were made and opinion given in several other medico-legal cases. The dispensary was inspected in June and December by the Civil Surgeon, Sukkur. The total cost was Rs. 1,585-8-6, the cost per patient Re. 0-8-3, as compared with Rs. 557-2-2 and Re. 0-4-2 for the six months of last year.

UPPER SIND FRONTIER.

GOVERNMENT DISPENSARY.

JACOBABAD.—*In charge of* Surgeon H. H. STEVENSON.

The sanitary state of the town is fair and the water sufficient and good. The hospital buildings are in good condition having been repaired during the year; new cots required. The general health was good with the exception of 20 cases of small-pox and an epidemic of measles. Numbers treated were 233 in-door and 3,716 out-door, which is an increase on the number of out-door patients over the previous year but a decrease for the five years before. Prevailing diseases were malarious fevers, respiratory affections, ophthalmia, rheumatic affections, dysentery, diarrhœa, ulcers and skin-diseases. There were 24 major surgical operations including 15 for stone in the bladder and 415 minor. The dispensary committee visits monthly and inspection was made by the Deputy Surgeon-General in November. The medical officer submits report of several interesting cases. The total cost was Rs. 4,330-7-7, the cost per patient Rs. 1-1-6, as compared with Rs. 4,843-2-0 and Rs. 1-6-4 respectively in the previous year.

GRANT-IN-AID DISPENSARY.

KASHMOR.—*In charge of* Hospital Assistant TAIJI AHEER.

The building is in good repair. A dead-house has been built. The furniture is sufficient and in good order. The committee meet once a month. The town is kept clean. The water-supply is abundant. The total number treated was 1,839 out-door and 48 in-door patients as compared with 1,704 and 47 respectively in the previous year. The prevailing diseases were ophthalmia, malarious fevers, respiratory affections and ulcers. One major surgical operation was performed. The total cost was Rs. 1,216-15-7, the cost per patient Re. 0-10-3, as compared with Rs. 1,357-7-7 and Re. 0-12-4 respectively in the previous year.

FOREIGN.

ADEN.

Deputy Surgeon-General Bruce, Her Majesty's Forces, Presidency Circle, Bombay, has forwarded his inspection report on Aden institutions. Of the European General Hospital he states "it is a wretched building for the purpose. A new hospital is contemplated," but neither the question of site nor of provision of means has yet been decided upon. Of the Civil Hospital, Aden, it is stated that a special bath-room would be a great boon. As regards the Prince of Wales Dispensary the Deputy Surgeon-General was satisfied, and he has no recommendations to make concerning the Shaik Othman dispensary. Deputy Surgeon General Bruce in his careful and full reports gives much additional information, and he attaches a memorandum from the Municipal Officer showing what has been effected since his last inspection as follows:—

Since last inspection by the Deputy Surgeon-General of the Circle, the following measures of a sanitary nature have been undertaken by the Aden Municipality—

(1). Drains (surface) for the sullage of the pukka houses at Shaikh Othman: completed.

(2). Laying down of pipes for the better removal of the sullage above noted: in progress.

(3). Provision of a slaughter-house for Shaikh Othman: completed.

(4). Substitution of an iron Crawford Latrine for the stone and plaster latrine near the vegetable and fish market, Crater position: completed.

(5). Provision of a new slaughter-house at the Crater position in Aidroos Valley: in progress.

(6). Provision of a Hindu Burning Ghát at Shaikh Othman: in progress.

(7). An iron Crawford Latrine has been ordered from Bombay to be erected in the Saila between the chowkey and cloth market where the Kafila camelmen congregate.

(8). A Crawford Latrine has been ordered from Bombay for the Native Infantry Lines built at Shaikh Othman.

(9). Since the 13th September 1886 the municipality has maintained a special vaccinator for Shaikh Othman and the adjacent districts. Up to 15th November he had performed 130 operations, of which 120 were successful.

2. In addition to the above the meat, fish and poultry market in the town of Aden, which is the property of a private individual, has been practically rebuilt and vastly improved under the superintendence of the Registrar of the Court of the Resident.

3. A special establishment has been maintained since 1st September by the municipality for the registration of births and deaths, the police being relieved of this work. The result has been a far better registration of births.

4. It would materially strengthen our hands, if the Deputy Surgeon-General's opinion as to the necessity of closing the existing slaughter-houses at Town and Tawahi was recorded. We have decided on their abolition as they are in one case close to the Lock and Civil Hospitals, and in the other case surrounded by dwelling houses: but I hear that "vested interests" will endeavour to obtain a prolongation of the existing nuisances.

5. In conclusion, it may be noted that by certain rules recently brought into force the amount of intra-fortress burials has been largely reduced. Of the entire number of burials, which average 113 per mensem, an average of 76 are effected at the Shaik Othman cemeteries.

EUROPEAN GENERAL HOSPITAL, ADEN.—*In charge of* Surgeon-Major COLSON till 16th April, afterwards Surgeon-Major HAY, M.D.

Conservancy.—The conservancy in the immediate locality of the hospital well provided for.

Water-supply.—Codnensed water is used.

Hospital Buildings.—The hired bungalow is still in use. It has been frequently mentioned as unfit for a hospital. "It is a source of wonder to all visitors that something better cannot be provided."

General Health.—The general health of the Steamer Point division of Aden satisfactory during the whole year.

Attendance of Patients.—The number of in-door patients admitted was 88, the same number as in 1885. The number of out-door patients was 2,723, an increase of 739 over the previous year. Most of the in-door patients are from the shipping.

Prevailing Diseases.—The diseases giving rise to the greatest number of admissions of in-door patients were fevers (19), debility, generally after other diseases previously suffered from elsewhere, (10), diseases of the respiratory system (8), syphilis (7), injuries (6), rheumatism (5), liver disease (5), diarrhœa (4), dysentery 3. Among out-door patients, ague and injuries head the list. The medical officer states that conjunctivitis of the granular type is on the increase owing to the increasing number of Egyptians who come to Aden with the disease and act as foci.

Mortality and its Causes.—Eight deaths occurred among in-door patients, 2 from remittent fever, 1 from continued fever, 3 from phthisis, 1 from diarrhœa and 1 from hepatic abscess. All were persons from ships, one being a Captain R. N., one a Barrister from Australia, one a police inspector from Manilla, the others seamen.

Surgical Operations.—The major operations were two amputations, removal of necrosed bone, removal of injured corpus, lithotomy.

Conduct of Establishment.—Reported satisfactory.

Cost.—The total cost was Rs. 7,891-8-3 and the cost per patient Rs. 2-12-5 as compared with Rs. 9,216-12-3 and Rs. 4-5-5 respectively in the previous year.

ADEN CIVIL HOSPITAL.—*In charge of* Surgeon WILLIS till the 16th April and afterwards Surgeon-Major COLSON.

Conservancy.—Is carried out by the municipality.

Water-supply.—Principally condensed.

Hospital Buildings.—Are in good order; and repairs were carried out in November. The medical officer mentions that two cells which are used for the accommodation of lunatics, infectious diseases, &c., among the civil population were occupied with the permission of the Political Resident by lunatics from the Native Infantry Regiment and the medical officer thinks there ought to be a cell for such cases in the Native Military Hospital.

General Health.—Good. No epidemic occurred.

Attendance of Patients.—The total number of in-door patients admitted during the year was 478 and 2,215 against 465 and 1,452 for the previous year.

Prevailing Diseases.—The principal causes of admission as in-door patient were as usual ulcer, privation, fever. Among out-door ulcer, fever, injuries.

Surgical Operations.—There were 24 major operations against 15 in the previous year. Among them were 11 lithotomies, four amputations of the leg, one removal of the eye-ball; three extractions of cataract.

Mortality and its Causes.—There were 129 deaths against 65 in the previous year. This large increase of mortality is attributed to famine prevailing in Arabia.

Vaccination.—The total number vaccinated was 528 against 543 in the previous year; 522 are reported as successful.

Conduct of Establishment.—Satisfactory on the whole.

Cost.—The total cost was Rs. 21,129-11-11 and the cost per patient Rs. 7-9-8, as compared with Rs. 17,032-0-11 and Rs. 8-9-7 respectively in the previous year.

GRANT-IN-AID DISPENSARY.

PRINCE OF WALES DISPENSARY, ADEN.

The building, a hired one, is kept in fair repair. The furniture and fittings are in good order. Two members of the committee visited the dispensary every month. The surroundings of the building are unsatisfactory in a sanitary view. The total number treated was 6,800 out-door and 1 in-door patients as compared with 6,686, all out-door patients, in the previous year. The most common complaints were skin-diseases, malarious fevers, respiratory affections, ulcers, ophthalmia and rheumatism. There was no epidemic. Thirty major surgical operations were performed. The dispensary was inspected by Deputy Surgeon-General Bruce in December. The total cost was Rs. 3,639-8-0, the cost per patient Re. 0-8-6, as compared with Rs. 3,662-12-3 and Re. 0-8-9 respectively in the previous year.

MUNICIPAL DISPENSARY.

SHAIK OTHMAN.—*In charge of* Hospital Assistant GOOLAB KHAN.

A new building was procured and occupied in November, which is suitable, but quarters for servants are wanted. Furniture sufficient. There is no dispensary committee. The number treated was 52 in-door and 2,289 out-door, being an increase of the former and a decrease of the latter. The most common diseases are reported as fevers, rheumatic affections, bowel affections, ulcers, skin-diseases; 150 minor operations; 26 medico-legal cases occurred. Vaccination is now municipal. Inspected by the Deputy Surgeon-General, Presidency Circle, who was pleased with the smartness and interest shown by 2nd Class Hospital Assistant Goolab Khan and with the improvement of the dispensary since his last visit. The total cost was Rs. 1,460-8-0 and the cost per patient Re. 0-9-11 against Rs. 1,237-4-10 and Re. 0-7-3 respectively in 1885.

GOVERNMENT DISPENSARY.

BERBERA.—*In charge of* Hospital Assistant ESSOOBJEE SALAMONJEE.

The dispensary was established under Government Resolution No. 1022, dated 19th March 1885, G. D., and was opened on the 5th of February 1886. The dispensary is a small building consisting of 3 rooms. In-door patients are placed in a separate adjoining building. Patients belonging to the Native troops stationed at Berbera are also attended to by the dispensary medical officer and are located in another building about 100 yards distant. There are no quarters for servants. The population of Berbera is very fluctuating from 4,000 in the hot season to 15,000 in the trading season and a branch dispensary in the town is said to be advisable as the camp dispensary is a considerable distance from the town. The sanitary arrangements of the camp are excellent, but the town is uncared for and sanitary arrangements are neither appreciated nor desired by the people. The water-supply is dependent on hot springs in the hills some seven miles away, the water from which is first received into a cistern and then conducted to the town through 6-inch iron pipes which discharge into a large reservoir two hundred yards from the landing pier. The main is tapped on all sides when entering the town, and there is an elaborate system of connections leading down each street, and into nearly every house in the Egyptian quarter. The water being impregnated with chlorides is somewhat unpleasant to the taste, but as it contains no organic matter is not regarded as unwholesome. There was no rainfall during the year, hot sandy winds prevailing from March to September. Numbers treated were 24 in-door, 2 being females, and 2,420 out-door, 540 being women. The daily average attendance was 29·1. The most common diseases were ulcers, rheumatism and affections of the respiratory organs. The medical officer thinks the prevalence of ulcers may be accounted for by a bad state of health consequent on an absence of fresh vegetable food, and neglect of trivial wounds. Only the richer classes, *i. e.* Arabs and Natives of India, are able to obtain vegetables. The medical officer describes the treatment adopted by the people for ulcers to be placing a brass foil or heavy copper coin on the diseased part. But he states very little can be done for these ulcers unless the general health is first improved by suitable diet. The prevalence of rheumatism and diseases of the respiratory organs is attributed to the people being very insufficiently clothed, and to their habit of sleeping in the open air and wind with merely a sheet for covering. It is added that the climate being quite dry, ague is not common. Surgical operations number 66, one being an amputation of a finger necessitated from a human bite. No medico-legal *post-mortem* examination was made, but opinion was given in several cases of wound. Arrangements are being made to introduce vaccination. The medical officer acknowledges the interest taken in the dispensary by Mr. Walshe, Assistant Political Resident and Vice-Consul, Somáli Coast. The total cost was Rs. 1,737-4-8 and the cost per patient Re. 0-11-4.

PERSIAN GULF.

CIVIL HOSPITAL, MUSKAT.—*In charge of* Surgeon-Major A. S. G. JAYAKAR.

Conservancy.—No attempt is made to improve the conservancy.

Water-supply.—Reported good and abundant.

Hospital Buildings.—Underwent slight repairs during the year; accommodation sufficient.

General Health.—Small-pox prevailed during the greater part of the year. In other respects public health good.

Attendance of Patients.—In-door 52, a decrease of 8; out-doors 3,680, a decrease of 97.

Prevailing Diseases.—Malarious fevers, rheumatic affections, respiratory affections, diseases of the intestines, ulcers, and skin-diseases.

Surgical Operations.—Only one major operation was performed, *viz.* craniotomy.

Mortality and its Causes.—Six deaths occurred among in-door patients.

Vaccination.—198 operations, 178 successful.

Conduct of Establishment.—Reported good.

Cost.—The total cost was Rs. 10,325-5-0 and the cost per patient Rs. 2-12-3, as compared with Rs. 10,766-6-1 and Rs. 2-13-1 respectively in the previous year.

CIVIL HOSPITAL, BUSHIRE.—*In charge of* Surgeon D. R. ROSS, M.D.

Conservancy.—Conservancy and sanitation generally altogether neglected.

Water-supply.—Good but from a distance, the wells in town being brackish.

Hospital Buildings.—In good repair.

General Health.—Fevers very prevalent after the setting in of the cold season.

Attendance of Patients.—Out-door 4,141, against 4,545.

Prevailing Diseases.—Malarious fevers, eye diseases, respiratory affections, rheumatism, scorbutic maladies, syphilitic, intestinal worms, spleen disease, skin-diseases, ulcers in the order named.

Surgical Operations.—Five major operations were performed, two being for the removal of tumours, three for paracentesis of the chest for empyema, and one of the abdomen for ascites.

Vaccination.—209 children were vaccinated during the year.

Conduct of Establishment.—Satisfactory.

Cost.—The total cost was Rs. 10,552-5-11 and the cost per patient Rs. 2-8-9, as compared with Rs. 10,566-5-0 and Rs. 2-5-2 respectively in the previous year.

APPENDIX II.

SUMMARIES OF THE ANNUAL REPORTS

OF THE

MEDICAL SCHOOLS.

Byramji Jijibhoy Medical School, Poona.

This school was under the superintendence of Surgeon-Major Cook, M.D., during the whole year. At the beginning of the year 1886 there were 22 first year's, 15 second and 10 third year's students (total 47). One of the latter, however, was absent from sickness previous to the commencement of the year, and is supposed to have died. Of the remaining 46 students 29 were native medical pupils, 10 stipendiary, 4 paying and 3 State.

Of the first year's pupils 22 were examined on the 1st of April, of whom 17 passed, while 5 failed and were dismissed. At the second examination in September, 17 were examined and 15 passed, 1 was put back for another year in consideration of his service in Afghanistan, and one was dismissed.

Of the second year's pupils at the first examination 15 were examined and 12 passed, and 3 failed and were dismissed. At the second examination all the remaining 12 passed.

Of the third year's pupils 9 were examined on the 15th of September and all were found qualified, 4 were native medical pupils, 4 stipendiary and 1 State (Kolápur).

The following prizes were awarded at the final examination. The Balkrishna Chintoba prize of Rs. 30 for proficiency in medicine and therapeutics to stipendiary pupil Rámchandra Gangadhar. The Balkrishna Chintoba prize of Rs. 30 for medical jurisprudence to Rámchandra Gangadhar. Balkrishna Chintoba scholarship of Rs. 5 for twelve months for anatomy and physiology to paying pupil Bhaskar Krishna. At the entrance examination in October, 26 candidates appeared, of whom 12 were from local schools, 2 (the best qualified) from the Elphinstone High School, and the remainder from various mofussil schools. Nine of the best were selected for stipends, of whom one absented and one resigned before the school term commenced; 5 others were admitted as paying pupils, one being a failed stipendiary of last year. The different changes taking place in the school by passing out, dismissal, &c., gave the following numbers at the commencement of the winter term on the 1st of November: 18 native military pupils, 11 stipendiary, 2 State, 9 paying, total 40. As regards caste 17 of the above were Bráhmin, 14 Marátha, 4 Telagu, 2 Mussalmán, 2 Goanese, 1 Native Christian. The Superintendent submits a full detail of all the examination questions, those for the 3rd year being previously submitted to the Surgeon-General. Full details of expenditure are also submitted. The total cost amounted to Rs. 13,001, fees from paying pupils realizing Rs. 150. The interest on Rs. 10,000 contributed by Mr. Byramji Jijibhoy forms the endowment fund from which the establishment at Rs. 18 per month and contingencies as light, water-rates, &c., averaging from Rs. 12 to Rs. 15 per month, is paid. The Superintendent offers his best thanks to Surgeon-Major Parakh and his successor Surgeon Eaton for their able assistance as teacher lecturers in the school; also to the other teachers Assistant Surgeons Bhikájee A. Chobe and D. E. Sabnis. Apothecary Gallaghar, and his successor Apothecary Fearn who taught materia medica and pharmacy are mentioned, the one as deserving of the "warmest acknowledgments" and the other of "unqualified praise."

Byra'mji Jijibhoy Medical School, Ahmedabad.

This school was under the superintendence of Surgeon-Major Robb, M.D., during the whole year. The seventh year of the school opened with the winter session commencing in November 1885, and there were then 70 students, *viz.*, 15 third year, 27 second year, and 28 first year. In February 1886 two pupils of the first year were dismissed from the school for carelessness and general misconduct, and a first year's paying pupil withdrew having passed the Matriculation Examination. The first year's class was thus reduced to 25, of whom 12 passed the examination, 2 failed in anatomy, two in chemistry, and 8 in both subjects, the last 8 being allowed to resign. Of the 27 second year's students two failed and left the school, and one paying pupil died. Owing to these 14 removals the numbers on the school rolls at the commencement of the winter session of 1886 was reduced to 56, *viz.*, 14, 25, and 17 of the first, second and third classes respectively. At the terminal examination 4 Native Military medical pupils, 1 State, 3 stipendiary and 5 paying pupils passed, and one died previously, accounting for the total 14 as noted above. Two dismissals were also necessitated by the introduction into the examination-room of books and notes. Five scholarships of the aggregate value of Rs. 100 were awarded. At the entrance examination held in October, 22 boys presented, of whom 16 passed but 13 only chose to enter the school. A Pársi paying pupil was re-admitted after satisfactory explanation of his hasty resignation during the

previous year, and Mr. McAfee of the Irish Mission High School, who expressed a desire to join the medical school, was received as a paying pupil of the 1st year, total 15. The eighth *annus medicus* of the school therefore began on the 1st of November 1886 with 53 students, namely, 19 Native Military, 11 stipendiary, 4 Native States, 19 paying. Of these 19 are third year's, 19 second year's and 15 first year's. But during November one of the first year's paying pupils absented without giving notice of, or reason for, his withdrawal, and one of the second year's stipendiary pupils did not join the school, and no information has been received about him. Thus the calendar year ended with 51 students in attendance at the school instead of 70 as in 1885. (This is a considerable reduction and the greatest loss occurred after the examination in April 1886, when 8 students of the first class who all failed were allowed to resign. Every case of dismissal, resignation &c., was referred to, and considered *seriatim* by the Surgeon-General and sanction accorded.—W. J. Moore.)

Of the whole number in the school as above no fewer than 40 belong to some one or other of the Hindu castes, exactly half the number being Bráhmins (which agrees with the report of the Poona School), six are Mahomedans, two are Pársis, one a Goanese, one a Jew, and one European.

The expenditure amounted to Rs. 15,156-1-4, being Rs. 2,607-6-7 less than for 1885. The decrease is owing to the lower scale of pay drawn by two of the Assistant Surgeons on the teaching staff who were appointed towards the close of 1885. There is no endowment as at the Poona School. The receipts from school-fees amounted to Rs. 504. There was a small credit of Rs. 34-14-10 on account of sales.

Lastly the Superintendent certifies to the zeal with which the teachers (mentioned at page 11) perform their duties, and he again specially refers to the excellent services of First Class Hospital Assistant Luximon Singh who continues to teach materia medica and pharmacy without any remuneration whatever (Mr. Luximon Singh is also mentioned at page 11 and page 43 of this report).

Medical School, Hyderabad.

Surgeon-Major H. DeTatham was in charge of this school from the beginning of the year till the 12th of May on which date sickness compelled him to give over charge to Surgeon B. N. Koyaji, but on the 18th of May Surgeon-Major Keelan returning from furlough resumed charge of the appointment.

At the beginning of the year there were 31 students, 21 belonging to the Native Military Pupil class, and 10 to the Stipendiary class. Of these 7 were in the third year, 7 in the second, and 17 in the first. In February one of the latter disappeared. Examinations took place at the usual periods. At the pass examination in September six students passed the ordeal successfully, four being Native Military pupils and two High School or Stipendiary. A student who failed to pass was granted extension of one year. The four medical pupils passing were detailed for Military duty and the other two for Civil duty. Two first year's pupils were dismissed, one who signally failed and one who absented without cause.

At the entrance examination in October, 19 candidates presented. Most of these passed the examination but only 7 joined as only 7 stipends were available. The Superintendent states: "I have the great pleasure of recording that an Amir gentleman, Native of Hyderabad and a B.A. of the University of Calcutta, has been attending the school since September last as a free student." The numbers therefore at the end of the year were Native Medical pupils 17, stipendiary 12, free 1, total 30. Of these 7 Native Military pupils are third year's students and 10 second year's. Of the stipendiary pupils 1 is in the third year of the course, 4 in the second and 7 in the first. The Military pupils are all Natives of India and most of them Hindus. The others are all Natives of Sind and most from Hyderabad. The Deputy Surgeon-General in Sind presided over the examinations and expressed himself quite pleased with the manner in which the students acquitted themselves.

The Superintendent brings to notice that the want is much felt of a complete skeleton, of diagrams for the study of anatomy, physiology and midwifery, and of certain chemical apparatus. He also states the building used as the school is very old and in so bad a state of repair as to appear unsafe.

In conclusion the Superintendent brings to notice the services of Assistant Surgeons T. H. Acquino and J. E. Bocarro, the two clinical teachers attached to the school.

APPENDIX III.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT I.

Showing the Classification of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1886.

1	2	3	4	5	6	7

No. 2607.

GENERAL DEPARTMENT.

Bombay Castle, 1st September 1887.

Letter from the Surgeon General with the Government of Bombay, No. S.B.—200, dated 18th June 1887—Submitting the Administration and Progress Report on the Civil Hospitals and Dispensaries in this Presidency for the year 1886; and adding that there is nothing in the report the immediate publication of which can be considered of doubtful expediency.

RESOLUTION.—The total number of hospitals and dispensaries open at the beginning and close of the year 1886 is shown in the marginal table. Two dispensaries were closed during the year, and six, besides the Káma Hospital, were opened. The Surgeon General explains that the employment of 25 Civil Medical Subordinates in the Military Department owing to demands for Burma rendered impossible the appointment of Hospital Assistants to 10 additional sanctioned dispensaries the opening of which was in consequence postponed.

	1st January 1886.	31st December 1886.
State Hospitals and Dispensaries ...	47	49
Local Fund Institutions...	34	35
Private Institutions—		
1.—Maintained entirely at cost of private individuals or associations	31	34
2.—Partly supported by private subscriptions	105	104
Total ...	217	222

2. The numbers of in-door and out-door patients treated at the various institutions during the year under review were respectively 36,444 and 1,576,677, as contrasted with 37,642 of the former and 1,568,326 of the latter in the previous year. Dr. Moore submits some interesting remarks regarding the more common diseases, and as regards malarious fevers, which as usual headed the list, draws attention to their prevalence to an almost equal extent in very moist and very dry hot climates. Cholera was happily almost absent from the Presidency during the year, and the number of cases of small-pox treated was only 69.

3. The inspection tours of Surgeon General Moore and Deputy Surgeons General Pinkerton and Bruce were complete, and the sketch given in this report of the condition of the various hospitals and dispensaries visited is both interesting and instructive. The Governor in Council observes with regret that the sanitation of the neighbourhood of the Jamshedji Jijibhái Hospital is reported to be "as bad as it well can be" and that this is believed to be the cause of several cases of erysipelas in the surgical wards. The Municipal Commissioner of Bombay should be asked to report on this very important subject at an early date. The opening of the Káma Hospital for females during the year has apparently not affected the attendance of females at other hospitals in Bombay. The attention of district officers should be drawn to the remarks of Dr. Moore regarding the hospitals and dispensaries in their respective districts. Any recommedations they can make will receive the careful attention of Government, but it is obvious that want of funds will necessitate the postponement for a long time to come of many of the improvements which the Surgeon General considers to be required. The work of the Nursing Sisters is said to be highly appreciated and Dr. Moore should be asked to convey to them the warm thanks of Government for their services.

4. It is satisfactory to hear that the Dispensary Committees took an interest in those institutions and visited them frequently; but on the other hand the Surgeon General somewhat complains of their desire in many cases to secure economy at the expense of efficiency and points out his objections to placing unqualified men in charge of dispensaries. He explains in detail the various modifications in the Committee Rules found necessary during the year.

5. The number of students at the Poona, Ahmedabad and Hyderabad Medical Schools fell from 148 to 123. There were 35 new admissions while 28 students passed out, 3 died, 13 retired and 16 were dismissed. These figures are not altogether satisfactory, and it is likewise a matter for regret that though

12 Native Military Pupils passed out, none joined, and that even in the case of the Civil Department the number of pupils educated was less than the estimate of requirements, an estimate which as Dr. Moore points out must continually increase. He has not attempted to conjecture the cause of the failure of these institutions to attract sufficient students, but as the subject is one of considerable interest he should be asked to favour Government with his opinion thereon. He explains in the 25th paragraph of his report that in consequence of this failure endeavours have been made to obtain pupils for the different hospitals, who after a course therein will be transferred to the schools. A revision of the Subordinate Medical Department effected during the year which involved the promotion of 53 passed pupils to the class of Hospital Assistants will it is hoped do much to attract men to the department.

6. The transfer of commissioned Medical officers to the Military Department for service in Burma made it necessary to substitute Assistant Surgeons at 10 civil stations in the Presidency, to combine Civil and Military charges at 3 others and to stop the furlough of Indian Medical officers. In 3 stations also Apothecaries transferred to the Military Department had to be relieved by Assistant Surgeons.

7. The cash balance of the whole number of civil hospitals and dispensaries combined in hand at the beginning of the year was Rs. 1,14,298-11-5, the income during the year Rs. 10,45,010-9-3 of which Government contributed Rs. 7,83,229-0-2, and the expenditure Rs. 9,79,209-2-4. The slight increase in expenditure as compared with the previous year when it was Rs. 9,65,445-9-2 was chiefly on account of establishment, European medicines and miscellaneous charges. The details of income and expenditure and the discrepancies in the accounts of certain institutions are sufficiently explained by the Surgeon General and no remarks thereon are called for.

8. The Governor in Council has read with much satisfaction paragraph 32 of this report in which the Surgeon General has noted the liberal offers made by several native gentlemen in aid of the Medical Department.

9. Dr. Moore's administration of his department continued to be as efficient as usual. His satisfaction with the work of the officers who served under him is shared by the Governor in Council, who is especially gratified to hear of the manner in which Assistant Surgeons placed temporarily in commissioned officers' charges acquitted themselves.

J. DE C. ATKINS,
Under Secretary to Government.

No. S.B. 147 OF 1888.

From

THE SURGEON GENERAL
WITH THE GOVERNMENT OF BOMBAY;

To

THE SECRETARY TO GOVERNMENT,
General Department.

Bombay, 30th May 1888.

SIR,

I have the honour to forward, for the information of Government, the Administration and Progress Report on the Civil Hospitals and Dispensaries of the Presidency for the year 1887.

2. The general plan and the maps formerly used are again adopted.

3. In accordance with Government Resolution No. 2426 of 17th August 1887, General Department, the appendices noted in the margin, which found a place in the reports of previous years, are omitted from the present report. Hospital and dispensary statistics, and the statements regarding patients treated, the diseases which prevailed, the operations performed, the financial statements, and the statement giving information regarding the number of Government servants treated, are all shown.

1. Summaries of the Annual Reports of Medical Officers.

2. Summaries of the Annual Reports of Medical Schools.

Medical Schools.

4. At the end of the year 1886 the number of students in the different schools were:—

Poona	40
Ahmedabad	53
Hyderabad	30
Total ...	123

At the end of the year 1887, there were 112, classified as follows:—

Classes of Students.	Poona.				Ahmedabad.				Hyderabad.				Total.			
	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.
Native Military	7	1	1	9	8	2	1	11	10	...	1	11	25	3	3	31
Stipendiary	2	6	7	15	3	4	5	12	2	5	9	16	7	15	21	43
Native State	1	1	1	3	...	...	2	2	...	...	...	...	1	1	3	5
Paying	2	2	7	11	6	7	8	21	...	1	...	1	8	10	15	33
Total ...	12	10	16	38	17	13	16	46	12	6	10	28	41	29	42	112

From the foregoing table it will be seen that there were eleven pupils less at the termination of 1887 than in 1886. The difference is accounted for by the resignation or dismissal of 21 pupils and by 35 passing out. On the other hand, there were 45 admissions, leaving the number as shown in the above statement. Of the 35 pupils who passed the final examination, 4 were stipendiary, 21 Native Military pupils, 5 paying, and 5 Native State.

5. The teaching staffs of the different schools were the same as on the previous year, *viz.*,—

Poona.

Brigade-Surgeon Cook, Superintendent and Lecturer on Medicine, Clinical Medicine, and Therapeutics.

Surgeon Eaton: Surgery, Clinical Surgery, and Midwifery.

Assistant Surgeon Bhikáji Amrit Chobe : Anatomy and Physiology.

„ „ Dattu Ganesh Sabnis : Chemistry and Medical Jurisprudence.

Apothecary Fearn : Materia Medica and Pharmacy.

Ahmedabad.

Surgeon-Major Robb (except for 3 months during which the duties were performed by Surgeon Milne), Superintendent and Lecturer on Medicine, Clinical Medicine, and Therapeutics.

Assistant Surgeon B. H. Nánávati : Surgery, Clinical Surgery, and Midwifery.

„ „ N. Dayábhái : Anatomy and Physiology.

„ „ J. D. Khambáta : Chemistry and Medical Jurisprudence.

Hospital Assistant Lakshman Singh : Materia Medica and Pharmacy.

Hyderabad.

Surgeon-Major Keelan : Clinical Medicine and Surgery.

Assistant Surgeon Aquino : { Medicine and Chemistry in Winter. / Midwifery and Physiology in Summer.

„ „ Bocarro : { Surgery and Anatomy in Winter. / Medical Jurisprudence and Materia Medica in Summer.

The Superintendents report well of the teachers attached to the schools and in a fairly commendatory manner regarding the pupils.

6. Regarding the statements of this report I beg to remark :—

(*a*) Statement I shows the classification of civil hospitals and dispensaries in accordance with the instruction of the Government of India's Resolution No. 3-163-74, dated 4th May 1883—

Statement I.

Class I, State hospitals and dispensaries, including all institutions maintained by Provincial Funds and under Government management, shows 45 against 49 last year.

Class II, which includes local fund institutions, shows an apparent increase from 35 in 1886 to 142 in 1887.

Class III-A, which represents all institutions maintained by private individuals or associations, also shows an increase, *viz.* from 34 to 36.

Class III-B, Institutions supported by private subscriptions or donations, but receiving aid from Government or Local Funds, number 7 in 1887 against 104 in 1886.

It will be seen that whilst the number of hospitals and dispensaries under each class varies considerably—especially those under classes II and III-B—that the total of the four classes for the year under report exceeds that of 1886 by 8, which is accounted for by the opening of this number of new dispensaries. The discrepancies referred to in classes II and III-B are due to the transfer of a number of institutions maintained by Municipalities from the former to the latter class by the Accountant General, on the ground that the Municipalities are constituted by Government in the same way as Local Funds. The new dispensaries which were opened during the year are specified in column 7 of the statement.

(*b*) Statement II deals with the number of sick treated at the various hospitals and dispensaries throughout the year. The total number of in-door patients was 37,123, and of out-door 1,657,710, giving a grand total of 1,694,833. It will be seen from the following tabular comparison that whilst the in-door patients exceed in number those treated in 1886, yet they do not quite reach the total of 1885, but on the other hand the number of out-door patients very considerably exceeds that of either of the previous years :—

Statement II.

	In-door.	Out-door.	Total.
1885	37,642	1,568,326	1,605,968
1886	36,444	1,576,677	1,613,121
1887	37,123	1,657,710	1,694,833

The increase in the number of sick may be taken in round numbers at 90,000. A reference to Statement III will not explain this great increase by the excessive prevalence of any special diseases; probably the increase may be accounted for by the increasing number of dispensaries established throughout the country, which serve to bring home to the people the greater advantages of modern treatment as compared with that of native hakims.

Results of treatment.

It is only amongst the in-patients that the results of treatment are recorded, and the records show 25,928 cured, 3,801 relieved, 3,131 "discharged otherwise," and 2,586 died, the percentage of deaths being 6·9 as compared with 6·8 in 1886 and 7·4 in 1885. The total number of beds available was 3,421, an increase of 23 over that of last year and due to the opening of the new dispensaries. The daily average number of in-door sick was 1,824·2, lower than the averages of both previous years which were 1,837. The number of out-patients treated at civil hospitals was 359,389 against 341,495 in 1886, and at dispensaries 1,298,321 as compared with 1,235,182 in the previous year. The daily average out-door attendance at civil hospitals in 1886 increased from 3,231·1 to 3,430·6, and at dispensaries from 13,202·5 to 13,432·0.

Statement III.

(*c*) This statement shows the diseases for which the sick sought relief:—

Small-pox gives almost double the number of cases which occurred in 1886, *viz.* 121 against 69, and of this number more than half appeared in the Konkan and Deccan, the remaining cases being almost equally distributed over Gujarát, Sind, and foreign territory.

Cholera shows a great increase in the number of its victims as compared with 1886, there having been 4,081 cases against 55. The disease prevailed chiefly in the Deccan, giving there 3,222 cases; 401, 336, 115, and 7 cases appeared respectively in the Konkan, Gujarát, Sind, and foreign territory. These figures represent only those cases which came under the notice of medical officers and subordinates.

Malarial Fevers show an increase as compared with 1886, *viz.* 256,069 against 251,291. These fevers represent 15·1 per cent. of the total sick treated, their rate varying from 10·8 per cent. in the Deccan to 19·9 per cent. in Sind. The Konkan gives a percentage of 19, Gujarát 16·7, and foreign territory 18·3, as the ratios of malarial cases to total treated.

Venereal Diseases, including both syphilis and gonorrhœa, show a decrease as compared with the previous year, 33,598 against 34,221,—1·9 per cent. of the total treated against 2·1 per cent. in 1886. Syphilis has increased in the Konkan and Deccan, and diminished in prevalence in Gujarát, Sind, and foreign territory, but the differences are not great.

Respiratory Diseases give 99,394 or 5·8 per cent. of the total treated, as compared with 92,328 in 1886 and 85,717 in 1885.

Rheumatic affections caused 50,325 or 2·9 per cent. to sick relief. This class of diseases shows a tendency to increase during recent years.

Dysentery gives about the same number of cases as in previous years, *viz.* 27,790 or 1·6 per cent. The geographical distribution of this disease according to its degree of prevalence is, Deccan with 9,977 cases, Gujarát 7,401, Konkan 6,875, Sind 3,109, and Foreign 428.

Diarrhœa gives 46,680 cases or 2·7 per cent. of the total treated: in the Konkan 14,855 or 4·9 per cent., in the Deccan and Gujarát 14,126 and 13,548 respectively, and in Sind 3,598.

Intestinal Parasites comes fourth on the list with 161,626 cases, or 9·5 per cent. of the total, distributed as follows:—Deccan 96,322 or 13·8 per cent., Konkan 35,922 or 11·9 per cent., Gujarát 27,654 or 5·5 per cent., Sind 888 or 0·5 per cent., and Foreign 770 or 2·9 per cent. As compared with last year there is an increase in the first three geographical divisions of this Presidency and a slight decrease in the latter two.

Skin-diseases come second on the list, in close succession on malarial fevers as causes of illness, with 251,635 or 14·8 per cent,—an increase of over 23,000 on last year. These diseases apparently prevail most in the Deccan, which gives 121,257 cases; Gujarát follows with 87,780, the Konkan with 30,538, and Sind with 10,391.

Eye-diseases return 166,477 or 9·8 per cent. of the total, a slight decrease on 1886.

Ear-diseases show 47,963 cases last year as compared with 46,609 in 1886, 2·8 per cent. against 2·9.

Leprosy shows an increase as compared with the two previous years, there having been 1,361 cases in 1887 against 1,204 in 1886 and 1,240 in 1885.

Hepatic affections show 6,091 cases, or 0·3 per cent. of the total. The returns of the European General Hospital in Bombay show 106 only out of this total.

Diseases of the Spleen give 7,021 or 0·4 per cent. of the total.

Cases of poisoning were numerous, *viz.* 6,590 or 0·3 per cent. This class includes besides lethal drugs, such as arsenic, opium, caustic alkalies, acids, &c., animal and gaseous poisons, alcohol and poisoned wounds.

(*d*) This statement shows the number and results of major surgical operations performed throughout the year. On the 31st December 1886 there remained under treatment 128 cases which had undergone operation, and on the 31st December 1887 the number was 134. 4,651 operations were performed in 1887, giving with the number remaining at the end of 1886 a total of 4,779,—a slight increase on the previous years. As a number of operations were performed on out-patients the results in such cases were not always obtainable; as far as can be ascertained 3,976 cases were cured, 171 relieved, 91 "discharged otherwise," and 138 were attended with fatal results,—leaving 134 cases under treatment and 269 in which the results are not recorded for the reasons stated. Of the total operations about a third, or 1,557, were performed on the eye and its appendages; the removal of calculi from the bladder comes next with 691 cases, and, in their order of frequency, incisions 595, operations on joints 490, removal of tumors 382, amputations 268, obstetric operations 141, operations on bones 99, and reparative 64; unclassified operations yield 391 cases. The death-rate in operated cases is 2·9 per cent., an exceedingly favourable result, considering that in many cases patients are admitted in an advanced state of disease, but it must be noted that this result is obtained by including operations on the eye among which there was only one death, and this was probably neither due to the disease for which the operation was performed nor to the operation itself.

Statement III-A.

Removal of Calculi from the bladder gives 39 deaths, or a rate of 5·6 per cent. on the number operated on. *Incisions*, or rather operations classified under this heading, give 29 deaths, or a percentage of 4·8, but it will be noted that this class includes such serious operations as herniotomy, perineal section, ovariotomy, and hepatic abscess. *Obstetric and gynæcological operations* caused 14 deaths, or 9·9 per cent., a result not to be surprised at considering the almost hopeless condition in which many women are brought to hospital. The deaths in this class all occurred in women in labour. *Unclassified operations* yielded 27 deaths, or a mortality of 6·9 per cent., but these operations also include such as are in themselves dangerous or which are resortd to in order to relieve the last stages of otherwise fatal illnesses, *e.g.* paracentesis of the abdomen and aspiration of hepatic abscess. *Amputations* give a mortality of 5·9 per cent. These operations are resorted to frequently in injuries attended by severe shock, or in advanced diseases.

(*e*) Statement IV shows the sex and caste of the sick. The following tabular statements give the ratios per cent. of men, women, and children, and of castes, and a comparison with the previous year :—

Statement IV.

	Men.		Women.		Children.	
	1886.	1887.	1886.	1887.	1886.	1887.
Konkan	46·9	46·8	18·8	18·7	34·3	34·5
Deccan	42·7	43·0	16·6	16·7	40·7	40·3
Gujarát	43·6	43·8	19·8	19·8	36·6	36·4
Sind	54·8	54·8	16·1	15·9	29·1	29·3
Foreign	65·2	64·6	17·8	18·0	17·0	17·4
Total ...	45·5	45·5	17·9	17·9	36·6	36·6

	1886.	1887.
Hindus	69·0	69·3
Mahomedans	24·6	24·6
Native Christians	2·5	2·5
Pársis	2·2	2·1
Europeans	0·5	0·5
Eurasians	0·3	0·3
Other castes	0·9	0·7

(*f*) The total income in 1887 was Rs. 12,07,403-14-0, an increase of Rs. 48,094-9-4 over the previous year; the expenditure was Rs. 10,80,776-6-0 as compared with Rs. 10,25,984-5-7 in 1886. The cash balance in hand at the end of the year was Rs. 1,26,627-8-0. Government contributed Rs. 8,06,474-7-6 out of the total income,—Local and Municipal funds and miscellaneous receipts (hospital stoppages, sales of medicines, &c.), Rs. 2,35,642-15-4; interest on invested capital and sale of securities or withdrawals of deposits yielded Rs. 20,233-15-1; subscriptions from Europeans Rs. 1,089 and from Natives Rs. 11,190-15-6, showing increases as compared with 1886 of Rs. 235 and Rs. 3,049-2-5 respectively. From the total expenditure, Rs. 10,80,776-6-0, must be deducted Rs. 13,550 invested during the year, Rs. 32,948-4-1 realised from the sale of drugs, hospital stoppages, &c. (included under miscellaneous charges), which have been remitted to the treasury, and Rs. 1,276-10-11, the unexpended balance of the Government grant to the Ratnágiri Leper Hospital which lapses to Government. After making these deductions the net cost during 1887 was Rs. 10,33,001-7-0, an increase of Rs. 53,792-4-8 over 1886, and due chiefly to the increased cost of establishments and Europe medicines. Civil Hospitals absorbed Rs. 6,95,178-13-6 of the net expenditure, Dispensaries Rs. 3,37,822-9-6. As anticipated in last year's report there has been a further saving on diets owing to more favourable contracts; the average cost per diet was 2 annas and 6 pies. Each patient cost on an average Re. 0-11-3 against Re. 0-11-1 in 1886, and Government paid 78· per cent. against 79·9 in 1886, or, if Native States be added, 72·2 per cent. against 73·9. The cost of dispensaries alone to Government was 45·2 per cent., an increase of 0·9 per cent. on 1886.

Statement V, Part I, Income and Expenditure.

The Trombay Leper Home financial statement did not show the separate expenditure on establishment, bazar and Europe medicines, and diet; the total expenditure was alone shown.

Several dispensaries again show discrepancies between the closing balances of 1886 and the opening balances in hand at the beginning of 1887. The following is the list of the institutions which show these errors in their accounts:—

	Balance on 31st December 1886.			Balance on 1st January 1887.		
	Rs.	a.	a.	Rs.	a.	p.
Goculdas Tejpal Hospital	4,728	5	6	.....		
Yelláp ur Dispensary	1,057	4	1	1,811	12	4
Málegaon „	205	8	8	1,859	15	6
Mhasvad „	563	12	3	183	5	10
Bárdoli „	.....			441	13	11
Hansot „	239	0	4	455	13	9
Vágra „	.....			1,730	7	1
Kavi „	2,789	4	1	2,064	8	9
Mahuda „	678	11	11	803	7	6

The balance to the credit of the Goculdas Tejpal Hospital lapsed as usual to the Bombay Municipality. Regarding the *Yelláp ur Dispensary*, 3rd Class Hospital Assistant Sampson, No. 217, is responsible for the error, inasmuch as, although he was there from March 1885, he failed to keep up his cash accounts, so that when the error was once made it was perpetuated in the returns and there was no means of rectifying it; it was only after reference to the Huzúr Treasury Officer, Kárwár, that the error was discovered. The *Málegaon Dispensary* accounts show a discrepancy last year as well as in the previous year, but the error is explained by including in the 1886 transactions Rs. 1,654-6-10 on account of the salaries of Assistant Surgeons, which amount was adjusted in March 1887. An error has existed in the *Mhasvad Dispensary* accounts since 1879 and the seeming balance of Rs. 380-6-5 was written off by the Collector on 26th March 1887; it cannot be explained how the error arose. The balance now shown to the credit of the *Bárdoli Dispensary* is correct according to the Treasury Officer, Surat; the error cannot be explained. At *Vágra Dispensary* no accounts were kept showing the income, and the subordinate, knowing the Local Fund grant and the total expenditure, simply represented as the Government grant the difference between these two known quantities and showed no balance on 31st December 1886. The balance on the 31st December to the credit of the *Hansot* Dispensary seems to have been an error in calculation by the subordinate then in charge. In the *Kavi* and *Mahuda* Dispensaries accounts, an error seems to have been perpetuated for several years: in the former institution since 1884. At Kavi it arose from a misapprehension on the part of the subordinate as to what items should be included; no explanation is given as to the manner in which the error arose in the Mahuda accounts.

As strict departmental orders have again been issued, it is hoped that in future such discrepancies will cease to occur.

(*g*) The balance on 1st January 1887 was Rs. 3,74,900,—Rs. 13,550 were invested during the year,—making a total of invested capital during the year Rs. 3,88,450. Rs. 500 worth of securities having been sold and deposits to the value of Rs. 3,000 withdrawn, there remained as invested capital on 31st December 1887 Rs. 3,84,950.

Statement V, Part II.

7. The *European General Hospital* was visited several times and was inspected by me on the 21st March 1888. The same medical staff is attached to this hospital as in last year, *viz.*, Brigade-Surgeon Hojel and Resident Surgeon Baker. During the absence of the latter officer on sick leave to Europe, Surgeon Burke acted as Resident Surgeon. The hospital wards were in excellent order and there was no overcrowding. The nursing arrangements are very good.

Hospitals—European General Hospital.

The out-patients treated during the year numbered 1,777 against 1,824 in 1886 and the in-patients 1,543 against 1,576. As regards epidemic diseases, small-pox and cholera gave 3 admissions each and measles 48 amongst the classes who frequent this hospital. Malarial fevers, as in former years, gave the highest percentage of cases treated. Syphilitic affections in the returns show a marked decrease; and whilst diseases of the liver, poisoning by alcohol, show a decrease, dysentery and delirium tremens give a slight increase. The general mortality

was 3·8 per cent. against 4·4 in 1886. Brigade-Surgeon Hojel reports favourably on Surgeons Baker and Burke and on the Apothecaries attached to the hospital. Regarding the Lady Superintendent and nursing staff, he writes: "It affords me great pleasure to repeat my thanks for the willing and efficient assistance accorded me and for their devotion and attention to the sick in hospital."

The question of rebuilding or otherwise improving this hospital is at present before Government.

The Jamsetjee Jeejeebhoy Hospital.

8. On the 19th March I inspected this hospital. Brigade-Surgeon Carter is Principal and 1st Physician, and Surgeon-Major Waters and Surgeon Manser, 2nd and 3rd Physicians respectively. During the absence of Surgeon-Major Waters, Surgeon Manser acted for him and Surgeon Boyd for the latter officer. Surgeon-Major Gray, the Senior Surgeon, went to England on sick leave in December last and was relieved by Surgeon-Major Banks; Surgeon Hatch returned from furlough in October last relieving Surgeon Kirtikar who was acting as Second Surgeon. Surgeon-Major Arnott continued in charge of the Obstetric Hospital.

I consider the Jamsetjee Jeejeebhoy Hospital and the Obstetric Hospital were overcrowded at the time of my visit. Both hospitals in other respects were in excellent order.

The floors of several of the wards have been laid with Minton tiles as sanctioned by Government, and the improvements in the servants' quarters sanctioned some time since have been completed, but they are reported as "small and apt to be overcrowded." The reconstruction of the House Surgeon's quarters, though sanctioned, had not been taken in hand at the date of the report, and the unhealthy and uninhabitable quarters assigned to the Assistant Apothecaries were in much need of attention and repair. The new Dwarkadas Lalloobhoy cholera ward had not been begun at the beginning of the year pending decision as to the accommodation required and the site. The total number of sick treated, including casual, medical, and surgical cases, was 45,172. The daily average number of sick had increased from 393·2 in 1886 to 407·1 in 1887, and of the out-patients from 244·8 to 312·8. The total number of in-door patients had increased to 6,385 against 5,637 in 1886. The numbers have seldom previously been exceeded and certainly not recently. There has been a large augmentation in the number of women and children treated, notwithstanding the existence of five special female hospitals and a dispensary. This last remark also applies to the number of labour cases treated in the obstetric institution, *viz.* 193 against the annual mean of 174; including other cases the total treated at the Obstetric Hospital also exceeded that of previous years. The high mortality, 13·5 per cent., is due to the almost hopeless condition in which a large proportion of the sick are admitted,—366 out of the 865 deaths having occurred within 72 hours of admission and of these two-thirds died within 24 hours.

The staff of this hospital as well as the sick derive great advantages from the voluntary aid given by the nursing Sisters from All Saints.

9. The *Cowasji Jehangir Ophthalmic Hospital* I inspected on the 17th March 1888. Surgeon-Major Maconachie returned from furlough on the 27th April and relieved Surgeon Boyd, who was acting for him. The construction of this hospital is bad, the building is very liable to be overcrowded, the facilities for teaching are imperfect, and the means for providing for the comforts of the sick, *e. g.* hot water, are of the worst description. The rations for the sick are cooked at the Jamsetjee Jeejeebhoy Hospital and have to be brought a considerable distance in all weathers. The accommodation available does not meet the demands of the public, and Surgeon-Major Maconachie remarks that it would have been easy to fill 100 beds instead of 40. The number of patients who can be admitted must always remain about the same, unless the building can be enlarged. The Out-patient Department, on the other hand, shows a great increase.

I consider this hospital was overcrowded at the time of my visit. In other respects my inspection was satisfactory.

10. The *Goculdas Tejpal Hospital* was inspected by me on the 13th March. The number of both in-door and out-door patients treated in this hospital show a decrease as compared with the previous year. The proximity of this hospital to the Docks and the Railway Termini accounts for the large number of serious cases admitted and the consequent high death-rate of 11·5 per cent; 71 out of the total of 295 deaths occurred within 24 hours, and 64 within a week of admission. There are several important improvements called for in this hospital and which deserve attention,—notably the provision of isolation wards for the treatment of serious cases,—such as patients suffering from violent delirium, erysipelas &c. When this latter disease appears in a hospital it is extremely liable to excite fatal septic complications in surgical cases. A reception and examination room for new admissions is much needed, as well as the construction of a bathing place and the erection of a proper compound wall.

Goculdas Tejpal Hospital.

Surgeon-Major Parakh, who is in medical charge of this hospital, speaks in the highest possible terms of the efficiency and zeal of Mr. Easden, the House Surgeon. There was no overcrowding in this hospital at the time of my visit and the wards, storerooms &c. were all in good order.

11. The *Cama Hospital* was inspected by me on the 20th March. The quarters for the pupil nurses have been completed at the expense partly of Mr. Pestonjee Hormusjee Cama and partly of the Lady Reay's fund. A new disinfecting chamber has been sanctioned. The number of out-patients treated at the Jaffer Suliman Dispensary was 2,242 and there were 809 cases admitted into the Cama Hospital, 65 of which were lying-in cases. The deaths, 2·7 per cent., resulted from general diseases. Dr. Ellaby, the 2nd Physician, was succeeded when she went on furlough by Miss Littlewood, whose post was subsequently filled by Miss Overbeke on Miss Ellaby resigning. The services of Miss Atkinson and the nursing staff are highly spoken of by Dr. Pechey.

12. When serving as Deputy Surgeon General in Sind, I inspected 25 hospitals and dispensaries, and was well satisfied with what I saw at all these institutions as regards medical officers and subordinates. I desire, however, to specially bring to notice the names of officers and subordinates whom I deemed as deserving of commendation for their work during 1886, *viz.* Surgeons-Major Bainbridge and Keelan and Surgeon Dimmock. The first has done a good many surgical operations and is bringing the Civil Hospital, Karáchi, to some notice for surgery. Surgeon-Major Keelan has done a very large number of lithotomies with great success, and it is with much regret that I have learned that this officer has been obliged to proceed to Europe on medical certificate. Surgeon Dimmock has zealously carried on the duties first at Sukkur and later at Shikárpur. Besides these three officers, who have all done excellent work, I may mention Surgeon Stevenson, who performed the civil duties at Jacobabad in addition to his military duty, and I was highly satisfied with what I saw. Surgeon-Major Bartholomeusz returned from furlough in November.

Assistant Surgeon Mackenzie at Manora has been zealous and is in all respects a very good officer.

Surgeon-Major Keelan brought to notice the good services of his two Assistants in the medical school, Assistant Surgeons Aquino and Bocarro, which I have much pleasure in endorsing.

Among the Hospital Assistants I would specially bring to notice the names of J. F. Mendez, Purson Sing, and Baboo Shumsher Sing.

13. The following institutions were inspected by Surgeon-General Moore previous to vacating office, and the notes he made thereon are as follows:—

"*Mahábaleshvar Dispensary.*—Inspected in May and visited in November. In good order."

"*Sátára Civil Hospital.*—Inspected on 17th November. Remarks made on last inspection are applicable."

"*Sassoon Civil Hospital, Poona.*—Inspected 21st November and visited on various occasions. In good order. Nurses' quarters approaching completion (since completed and furnished by a subscription got up by Mrs. Sheppard, and occupied). Roads are required to the new isolation and pauper wards. The establishment is insufficient for the wants of this institution, and an out-patient dispensary is much required."

"*Poona City Dispensary.*—Inspected in August. Working satisfactorily. Is not such a building as there should be in Poona, being only a native house. Ráo Bahádur Assistant Surgeon Ghollay as usual most attentive and efficient."

"*Civil Hospital, Sholápur.*—The following are the requirements: 1, *post mortem* table in dead-house; 2, cesspool to dead-house: 3, drain from water tank to road drain; 4, ceiling cloth to two wards; 5, stone flooring to wards; 6, operating, examination and bathing rooms; 7, a female ward servant; 8, additional male ward servant; 9, infectious disease ward for male and female; 10, quarters for two medical pupils; 11, extra pay for sweepers. The latter was the subject of my letter No. 7091, dated 15th December 1887, to Government, General Department."

"*Dispensary, Sholápur.*—Inspected 26th November. As usual a large attendance. The following remarks were placed on the visitors' book:—'Last year I remarked on various requirements, among other things the disgraceful state of the latrine. The visitors afterwards reported they found everything in good order. Therefore it is useless making observations year after year.'"

"*Civil Hospital, Bijápur.*—Inspected 28th November. As the new hospital is near completion nothing need be said about the old one. The new hospital will be a very good one, but several minor wants were noticed which were the subject of my letter No. 125, dated 9th January 1888, to Government, General Department. The civil charge has been under Assistant Surgeon Kothawala during the whole year, who has acquitted himself satisfactorily."

"*Dhárwár Civil Hospital.*—Inspected 2nd December and found in a satisfactory condition under the able charge of Surgeon-Major McConaghy. New beds being much required, it was proposed by my letter No. 6614, dated 17th November 1887, to transfer some old iron beds from the Military Department."

"*Belgaum Civil Hospital.*—Inspected 4th December. There is no private room. A woman who had undergone Cæsarean section was obliged to be placed among the other patients. The long male ward might be divided into two for police and paupers. Surgeon-Major Hughes in charge is a most able and attentive officer."

"*Belgaum Dispensary.*—In good order, but the position is inconvenient and the building not adapted to the purpose. The rules regarding payment have not been brought into operation. The municipality do not seem able to appreciate that a charitable dispensary is not for the use of persons able to pay, and that the Government grant-in-aid is not given for such a purpose."

"*Civil Hospital, Surat.*—Inspected 27th December. Temporarily in charge of Assistant Surgeon Dosábhái, Surgeon-Major Banks having joined the J. J. Hospital. The dead house being close to the road with a door opening on to it, the door should be divided, so that the lower portion being shut people could not look in, while air would be admitted through the upper half. The municipality were about laying down porous brick flooring in the detached contagious disease ward, which is most objectionable,—bricks, especially ordinary Indian bricks, being very absorbing. The Collector was communicated with on this subject.

"*Parakh Dispensary, Surat.*—Inspected 28th December. As usual in good order and a large attendance. Latrines not yet moved further away as previously recommended when the compound was enlarged."

"*Civil Hospital, Broach.*—In good order under Surgeon Nariman. Hospital Assistants' quarters and a cook-room for the police required. Plans have been sent in for the former and a piece of ground was obtained for the latter under Government Resolution No. 10125, dated 24th December 1884."

"*Civil Hospital, Godra.*—Inspected 1st January. Under the charge of Assistant Surgeon Mistri. There has been a large increase of patients at this hospital, nearly double that of the previous year, chiefly from malarious fevers. The daily average number in November was 274 out-door patients, 39 per cent. being females. It is observed that during the same month out of 17 in-door patients (not counting police) admitted, 16 were mendicants of some variety or other. The police ward accommodates eight only. In the monsoon the verandahs were necessarily occupied. The police ward was sufficient when Godra was not the head-quarters of the Collectorate, but it now should accommodate three times the number. The pauper ward is detached from the civil hospital and accommodates only 4,—not nearly sufficient for the wants of the place. Irrespective of buildings, the following are requirements:—A compounder, a bheestee, and an increase of pay to the dispensarry servant who now receives only Rs. 5. There is a branch of this hospital at Jambughoda, 40 miles distant, and a similar remark applies to the dispensary servant there. Assistant Surgeon Mistri had the hospital in very good order."

"*Civil Hospital, Ahmedabad.*—Inspected 2nd January. Under the charge of Surgeon-Major Robb. Number of in-door patients present on inspection 90. The female ward was full and more accommodation for females is much required. Other matters remain as formerly reported. At the medical school attached to the hospital there were 11 military pupils, 12 stipendiary, 2 Native State, and 21 paying, total 46. The quarters these students reside in was visited and found sufficient. The leper and cholera asylum otherwise called the Kagdapeith Hospital, situated some distance away, was also visited and some 35 lepers

seen, mostly in the advanced stage of the malady. The Police Hospital, also some distance away, was visited and found in good order."

"The three dispensaries at Ahmedabad were visited on the 3rd of January. In the *Bechardass Dispensary,* which is under the charge of Assistant Surgeon Cooper, who has an established reputation as an accomplished surgeon, there were 7 stone cases at the time of inspection; and 30 stones were removed during the year, all successful. The attendance is very large and increasing especially since the advent of Mr. Cooper. It was established in 1866 and the first year showed an attendance of 4,208. The first year of Mr. Cooper's charge shows a considerable increase, until in last year (1887) there were 19,882 patients, about 30 per cent. being females. The *Ranchorlall Dispensary* under Assistant Surgeon Dadachanji also shows a large increase, from 7,419 during its first year to 13,493 last year. Such facts demonstrate the increasing popularity of dispensaries when under clever and attentive medical officers. The *Ráipur Dispensary* under Hospital Assistant Bhow Saccaram retains its popularity although the increase of attendance is not so evident; still 15,500 patients during the year is sufficient for any one man to attend to.

"Before concluding my remarks on inspections at Ahmedabad I repeat my words of last year that 'Surgeon-Major Robb performs all his multifarious duties honestly, zealously, and efficiently.'

"*Nadiád Dispensary.*—By special request of Ráo Bahádur Bechardáss Veháridass, C.I.E., President of the Nadiád Municipality, I visited the Nadiád Dispensary, as the Municipality wanted my opinion regarding some proposed alterations of the dispensary compound. This was the subject of my letter to Government, No. 178, dated 11th January 1888. The dispensary is a very successful institution. At the period of visit there were 5 in-door patients, several being serious cases of injury, and a daily attendance of 182, nearly 40 per cent. being females. The Municipality unanimously attributed the success of the dispensary to the exertion of Hospital Assistant Ramsing, who is painstaking and capable beyond the average of his class.

"*Násik Civil Hospital.*—Inspected January 12th. There were 12 in-door patients, several being cases of stone in the bladder. The hospital is in as good order under Surgeon Milne as possible for such a place. It is a mud native house with central yard and numerous compartments around, both on the ground and upper story, all being more or less dark and dismal. The building is utterly unsuited for the purpose and moreover is in a dangerous condition. This was represented to the Collector in my letter No. 231, dated 16th January 1888, as it appears the owner is willing to repair if the Municipality will pay an increase of Rs. 5 rent. There is an excellent site for a new hospital near the mutton market and another some distance away on the other side of the town.

"*Civil Hospital, Dhulia.*—Inspected 16th January This hospital maintains its reputation for surgery under Surgeon-Major Boyd. Previous remarks are applicable as regards its being too distant from the town, hence the necessity of a dispensary as well.

"*Dispensary, Dhulia.*—Inspected December 16th, and found working satisfactorily. The Municipality are building another dispensary as a temporrary arrangement in the adjoining compound of the court-house with a frontage opening to the town street. The work is very 'kutcha,' and unless the building can be utilized afterwards for some other purpose the money will be misspent as it is not suitable for a permanent dispensary.

"*Ahmednagar Civil Hospital.*—Inspected January 20th. In good order under Surgeon-Major Boustead. The new Ripon Hospital is near completion, but, as previously pointed out in the two last annual reports and elsewhere, the site is cramped by projecting buildings. The Hospital Assistant's quarters are not provided with a latrine, and the cramping is such that it is difficult to fix on a site. It was therefore suggested to fix a temporary zinc latrine which might be moved and the least objectionable site obtained by experience. The Hospital Assistant's quarters ought to have been built in the rear, but the projecting buildings prevented this. Sooner or later the site of those projecting buildings on either side of the hospital must be thrown into the hospital compound. The inferior work in this hospital was the subject of my letter to Government, No. 765, dated 11th February 1888. The doors are already cracking and warping; the cracks in the wood-work have been filled up with putty and paint, and the glass in the windows is of the most inferior description. Cement flooring is required for the store-room and the barred windows and doors thereto must be covered with wire netting or perforated zinc as they now would admit not only rats but large bandecoots also."

14. The delay in submitting this report is due to Apothecary Scroggie at Sholápur and Hospital Assistant Shivram Narayen at Honávar not having submitted their annual papers in time, notwithstanding that frequent calls were made, and I must add no satisfactory excuse was given by either for the delay.

I have the honour to be,

Sir,

Your most obedient Servant,

J. PINKERTON, M.D.,

Surgeon-General.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT No. I.

Showing the Classification of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1887.

Civil Hospitals and Dispensaries: Report on the —— for the year 1887.

No. 2318-A.

GENERAL DEPARTMENT.

Bombay Castle, 4th July 1888.

Letter from the Surgeon General with the Government of Bombay, No. S.B.—154, dated 4th June 1888—Forwarding the Administration and Progress Report on Civil Hospitals and Dispensaries in the Bombay Presidency for the year 1887.

RESOLUTION.—The orders of Government, contained in their letter No. 46, of the 8th of January 1880, to the address of the Surgeon General, fixed the 1st of May as the *latest* date upon which the annual report on the administration of the Hospitals and Dispensaries in this Presidency should be despatched from his office. Sufficient attention is not given to this direction, as every year a greater or less delay occurs in its submission. On this occasion the unpunctuality of Apothecary Scroggie at Sholápur, and of Hospital Assistant Shivrám Náráyan at Honávar, are given as the reason for the delay. His Excellency in Council feels sure that next year Dr. Pinkerton will take steps to see that practical effect is given to the express directions of Government upon the matter of punctuality.

2. The number of students in the Medical Schools at Poona, Ahmedabad and Hyderabad, which had fallen from 148 to 123 between the 1st of January and the 31st of December 1886, again decreased to 112 during the year 1887. In reviewing the report of the Surgeon General last year Government had occasion to remark in paragraph 5 of their Resolution No. 2607 of the 1st of September, upon the apparently somewhat indifferent success of these institutions, and Dr. Moore was invited to favour them with his opinion upon the subject. It does not appear that he had done so up to the date of his departure; and in view of the continued decrease in numbers, especially in those of the Native Military Students of whom only 3 newly joined during the year against 21 who passed out, and whose total is now reduced to 31, Dr. Pinkerton should be asked to submit at an early date any comments or suggestions he may have to make in the matter.

3. The number of hospitals and dispensaries open at the commencement of the year was 222 and at its close 230, the difference being due to the establishment of 7 new dispensaries in the places marginally noted, and of the opening of Allbless Leper Home at Trombay. Of the 7 dispensaries that at Suriban is maintained entirely by the Native State of Rámdurg in which it is situated, while the remaining 6 are supported from Local and Municipal funds assisted by Government grants-in-aid. The Leper Home is supported by voluntary subscriptions aided by a contribution from Government. No institution was closed during the year. It is noticeable that in this report the transfer of dispensaries maintained by Municipal Funds has been made, under directions from the Accountant General, from Class III. B of institutions "supported by private subscriptions or donations, but receiving aid from Government or Local Funds," to Class II. "which includes Local Fund Institutions," whence arise the apparent discrepancies in the figures of these two classes for the last two years. The total of 230 above given is exclusive of 13 medical institutions maintained for the treatment of police and other public servants, details concerning which are separately given in Appendix II. to the report.

1. Rájápur.
2. Párner.
3. Dharangaon.
4. Sindkheda.
5. Rahimatpur.
6. Khánápur.
7. Suriban.

4. The total number of persons medically treated at these 230 institutions was 1,694,833 or 81,712 in excess of the number in the previous year, of whom 37,123 were in-door and 1,657,710 out-door patients. The large increase in the year under report is attributed not so much to any greater prevalence of disease

as in part to the opening of eight new dispensaries, which were attended by 15,732 patients, and partly to the growing recognition of the superiority of European methods of treating disease over those of the native *vaidyas* and *hakims*. But though disease is stated not to have been particularly prevalent, it is yet observable that the number of cholera cases rose from 55 in 1886 to 4,081, whilst more than 23,000 more patients were treated for various forms of skin-disease. An increase in cases of leprosy, malarious fever, rheumatic affections and respiratory diseases is reported, whilst cases of venereal diseases were somewhat less numerous. The results obtained from the treatment of disease in general were similar to those recorded in the former year, the percentage of recorded deaths among patients only exceeding by ·1 the figure (6·8) given for 1886. The number of major operations treated during the year was 4,779, of which about one-third were on the eye and its appendages, while amongst those of other classes the removal of calculi (691), incisions (595), operations on joints (490), removal of tumors (382), and amputations (268) were most numerous. The fact that the percentage of deaths in cases operated upon fell from 3·9 to 2·9 is highly satisfactory.

5. The income of civil hospitals and dispensaries from all sources (exclusive of balances which stood at Rs. 1,32,772-8-7 on the 1st of January) was Rs. 10,74,631-5-5 during the year under report. Of this sum Rs. 8,06,474-7-6 were contributed by Government. Their net expenditure, after deducting sums invested, those paid into the Government treasuries on account of the sale of drugs, and hospital stoppages and the lapsed unexpended balance of the Government grant to the Ratnágiri Leper Hospital, amounted to Rs. 10,33,001-7-0. There are the usual discrepancies in several cases between the opening balances for 1887 and the closing balances for 1886. Government are glad to learn that "strict departmental orders have been issued" upon this subject. For such errors there can as a rule be no valid excuse, and it seems incredible how they are permitted to occur year after year. His Excellency in Council would desire to know how far the orders of Government regarding the disposal of balances of over Rs. 500, given in paragraph 4 of Government Resolution No. 4207 of the 13th December 1881, are strictly carried out. An examination of the figures given in Statement V., Part I., seems to indicate that in the case of a considerable number of dispensaries unnecessarily large cash balances, of the expenditure of which there is no immediate prospect, remain uninvested. The attention of the Surgeon General should be more particularly drawn to the cases of the dispensaries at Shevgaon, Jalgaon, Akluj, Bársi, Ránder and Ketti Bandar, to all of which these remarks seem to apply. Circumstances may no doubt exist in some, or even in all these cases, explanatory of the apparently unnecessary amounts of the balances with which the year opened and closed, but it seems likely that in many cases a portion of the money lying idle might with advantage be invested. His Excellency in Council is pleased to direct that in future in all cases in which the balance in hand at the close of the year amounts to twice the expenditure or more, some special explanation of the reason of its non-investment should be given.

6. Dr. Pinkerton only assumed charge of the office of Surgeon General during the current year and is therefore unable to report any personal inspections of the medical institutions of the mofussil. As Deputy Surgeon General in Sind however he appears to have visited 25 institutions with all of which he expresses himself as well satisfied. Notes made after the inspection of 23 dispensaries in the Presidency were left on record by Dr. Moore, and are incorporated in the present report. Action has subsequently been taken to carry out the improvements or changes indicated by him in some of these notes, as in the case of the transfer of additional beds to the civil hospital at Dhárwár, of additions to the new hospital at Bijápur, and repairs to that at Ahmednagar. The question of the new hospital so urgently needed at Násik is under the consideration of Government, and the Public Works Department have recently been requested to expedite the completion of the plans which are in course of preparation. It is not apparent what further steps have been taken to provide quarters for the Hospital Assistant at Broach, which are said to be required, or for building the cook-room for which ground was obtained as long ago as 1884.

Several requirements are mentioned in connection with the civil hospital at Godhra, and the Collector of the Panch Mahâls should be asked to report upon the subject.

7. Inspections of the five principal hospitals in the City of Bombay have been made by Dr. Pinkerton since the close of the year, remarks upon which are made in paragraphs 7 to 11 of his report. Attention is called by him to the more obvious needs of several of these institutions, but as schemes for improvement and extension of the hospital accommodation of the city are at the present time engaging the separate attention of Government, it is unnecessary to discuss them in this place. It is hoped that in next year's report the inception of several important works, partly at the expense of Government, and partly at that of private benefactors, will hold a conspicuous place. His Excellency the Governor in Council notes with satisfaction the commendation bestowed by Dr. Pinkerton upon Surgeons-Major Keelan and Bainbridge, Surgeon Dimmock and Assistant Surgeon Mackenzie for the good work done by them in Sind, as also the record left by the late Surgeon General of the able management of the civil hospitals under their care by Surgeons-Major Robb, Boyd and McConaghy, as well as his tribute to the reputation as "an accomplished Surgeon" established by Assistant Surgeon Cooper at the Bechardâs Dispensary at Ahmedabad, and the exertions of Hospital Assistant Râmsing of the Nadiâd Dispensary, who is reported to be unusually capable and painstaking.

E. LAWRENCE,
Acting Under Secretary to Government.

To

The Surgeon General with the Government of Bombay, The Sanitary Commissioner, The Commissioner in Sind, The Commissioner, N. D., The Commissioner, C. D., The Commissioner, S. D., All Collectors, including the Collectors and Deputy Commissioners in Sind, The Municipal Commissioner for the City of Bombay, The Accountant General, The Compiler, General Administration Report for 1887-88, The Political Department of the Secretariat, The Marine Department of the Secretariat, The Military Department of the Secretariat,	With copies of the report.

ADMINISTRATION AND PROGRESS REPORT

ON THE

CIVIL HOSPITALS AND DISPENSARIES

UNDER THE

GOVERNMENT OF BOMBAY

FOR THE YEAR 1888.

J J. K-3

Bombay:
PRINTED AT THE GOVERNMENT CENTRAL PRESS.
1889.

No. S. B. / 247 of 1889.

From

THE SURGEON GENERAL

WITH THE GOVERNMENT OF BOMBAY,

To

THE CHIEF SECRETARY TO GOVERNMENT,

General Department.

Bombay, 18th April 1889.

SIR,

I have the honour to submit, for the information of Government, the Administration and Progress Report on the Civil Hospitals and Dispensaries of the Bombay Presidency for the year 1888.

2. The Summaries of the annual reports of Medical Officers and of the annual reports of Medical Schools are not included in this year's report in accordance with Government Resolution No. 2426 of the 17th August 1887, General Department.

Provincial Medical Schools.

3. At the end of 1888, 142 students were attending the three Provincial Medical Schools, and were distributed as follows :—

Classes of Students.	Poona.				Ahmedabad.				Hyderabad.				Total.			
	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.
Native Military	3	1	9	13	3	...	4	7	2	1	...	3	8	2	13	23
Stipendiary	6	6	3	15	4	4	6	14	6	5	8	19	16	15	17	48
Native State	2	1	2	5	...	1	1	2	...	...	...	...	2	2	3	7
Paying	2	7	20	29	5	6	14	25	1	...	...	1	8	13	34	55
Civil Medical Pupils	...	...	9	9	...	...	...	...	...	...	...	...	...	..	9	9
Total ...	13	15	43	71	12	11	25	48	9	6	8	23	34	32	76	142

4. The following estimates will show the present prospects of recruiting the Military and Civil Hospital Assistant classes :—

(*a*)—*Military Hospital Assistant Class.*

Sanctioned strength, including 15 per cent. reserve		143
Actual strength on 31st March		158
	Excess ...	15
In the Medical Schools, will pass in 1889		5
Do. will pass in 1890...		2
	Total ...	22

At 10 casualties per annum 20 will be absorbed in 1890.

The 9 Native Military pupils admitted last year at Poona and the 4 at Ahmedabad should pass out in 1891, and allowing for failures at the examinations will meet the requirements of that year.

(*b*)—*Civil Hospital Assistant Class.*

Sanctioned strength, including 10 per cent. reserve		273
Present strength...		247
	Deficiency	26

It is estimated that the 3 Provincial Schools will turn out the following numbers in September 1889 and 1890 :—

	1889.	1890.
Poona	6	6
Ahmedabad	4	4
Hyderabad	6	5
	16	15
Total ...	31	

At 10 casualties per annum the strength will be 258 in 1890.

Twenty-six Stipendiary and Civil Medical Pupils were admitted last year at the 3 schools; this will bring the strength of the Civil Hospital Assistant class up to 274 in 1891, allowing for 10 casualties, but, as a certain margin must be given for failures at the school, it is doubtful if the Civil Hospital Assistant class will reach even its present sanctioned strength on that date.

But should the strength of this class be raised to 294 as recently proposed by the Government of India, the prospect of speedily bringing it up to the required strength is rather bad as will be seen from the following estimate :—

Strength according to the recent proposals of the Government of India, including 20 per cent. reserve	294
Present strength	247
To pass out of the schools in 1889, 1890 and 1891	57
	304
Casualties at 10 per annum. for 1889-90-91...	30
Total ...	274

Thus in 1891 the Civil Hospital Assistant class will be 20 below strength, and this only by taking a low estimate for casualties. It is only by refusing applications for retirement in all cases, except where a Hospital Assistant's health has completely broken down that it has been possible to maintain the department at a workable strength, and I would suggest the Government of India be asked to pass early orders on the proposed increase in the strength of establishment so as to allow, if possible, of a large number of pupils being admitted in September of this year to recruit the Service.

5. The teaching staffs at the 3 schools remain the same as during the previous year, with the following exceptions :—

Poona.—Brigade Surgeon Cook was succeeded by Brigade Surgeon Hughes, and Surgeon-Major Eaton by Surgeon Bull.

6. As summaries of the reports of medical officers are not given as an appendix, the following remarks bring forward the points of interest in the reports received from the officers in charge of the principal hospitals.

European General Hospital, Bombay.

7. The total number of patients treated was 3,586, there being an increase of 351 out-patients and a decrease of 85 in-patients as compared with 1887. Amongst the diseases that chiefly affect Europeans it is noted that enteric fever gave 6 admissions against 12 in 1887, remittent fever 19 against 23, dysentery 104 against 77, hepatic affections 166 against 106, alcoholic poisoning including delirium tremens 81 against 62. The number treated in the Obstetric ward was 46 against 37 in the previous year. There were 53 major operations against 41 in 1887. 71 deaths occurred against 60, or a mortality of 4·8 per cent. against 3·8 per cent. in 1887 : 17 deaths occurred within 48 hours of admission. The income from Port Trust, paying patients &c. was Rs. 28,789 against Rs. 28,147 and the expenditure was Rs. 73,069 against Rs. 72,337, the actual cost to Government being Rs. 44,280. The chief items of increase were :— cost of Establishment Rs. 1,400, on account of the Resident Surgeon's return

from furlough and the transfer of an ayah and sweeper to the permanent establishment as sanctioned in Government Resolution No. 2525, dated 20th July 1888, G.D. Rs. 210 more were spent on contingencies, Rs. 854 on clothing, and Rs. 160 on petty supplies. The chief items of decrease were: Rs. 202 on extra servants owing to the transfer of the ayah and sweeper from the temporary to permanent establishment; Rs. 579 on diets, there being fewer patients; and Rs. 885 less on repairs. The average cost of each patient was Rs. 2-10-8 per diem or 1 anna 8 pies more than last year. The average cost of each diet was 7 annas 7 pies against 7 annas 8 pies in 1887, including wines. The nursing in this hospital by the Sisters is again well reported on by the Medical Officer.

The Jamsedji Jeejibhoy Hospital.

8. The total number of patients treated was 44,423, giving an increase of 5,471 on 1887. There were 7,132 in-patients against 6,385 in 1887, giving a daily average of 400·3. 37,291 out-door patients obtained relief against 32,567 in the previous year; the daily average number of out-patients was 327·7. 203 cases of small-pox were admitted, occurring chiefly amongst inhabitants of Goa and the Konkan. Cholera also gave 176 cases. There were 417 major operations and 4,711 minor. The total cost of diets was Rs. 33,996 or 3 annas 8 pies per diet against Rs. 39,946 and 4 annas 3 pies in 1887.

The flooring of the wards with Minton tiles has been completed, and there can be no doubt of the great advantages from a sanitary point of view. Erysipelas and septicæmia broke out in the surgical wards in October; the wards were vacated and thoroughly cleansed, and these diseases have not reappeared.

In the Obstetric Hospital 427 patients were treated against 422 in 1887; there were 222 labours against 193; 16 deaths occurred—chiefly in those cases admitted in an almost moribund condition. One Soldier's wife and 6 other women were trained and granted certificates as qualified midwifes.

The Cowasjee Jehangir Ophthalmic Hospital.

9. 512 in-patients were treated during the year and 8,016 out-patients. On account of the overcrowding noted at the previous inspection the number of beds was reduced from 40 to 35; 32·3 beds were always full, but at some seasons of the year the accommodation does not meet the public demand for admission. The number of patients who attend for errors of refraction has increased from 300 in 1885 to 860 in the past year. Great difficulty has been experienced in giving pauper patients the full benefit of the operation for cataract; formerly Government gave cataract spectacles for distribution to the poor, but this boon has been withdrawn, and the operation is practically useless unless proper spectacles can be supplied to the poor who are unable to purchase them. Local charity might meet this want as it does so many others.

Goculdass Tejpal Hospital.

10. There were 2,278 in-patients and 17,464 out treated during the year against 2,565 and 17,285 respectively in 1887. The expenditure was Rs. 46,298 against Rs. 45,967 in 1887. The walls of the wards have been oil-painted of a softer colour which is a marked improvement. The erection of a bathing platform and its enclosure for servants has supplied a long felt want. There is great need of trained women nurses in this hospital, and Surgeon-Major Parakh considers some cases, such as dysentery and diarrhœa, end fatally which might recover with efficient nursing.

Kama Hospital and Jaffar Suleiman Dispensary.

11. 6,983 out-patients were treated against 2,242 in 1887 and 761 were admitted as in-patients against 809 in the previous year. There were 85 labors treated, being an increase of 20. The net expenditure was Rs. 27,882 against Rs. 31,616 in 1887.

Remarks on certain requirements in Bombay.

12. Before passing from the Presidency Town Hospitals I would beg to indicate a few of the chief requirements of a city like Bombay. *First*, there is great need for a large hospital for the treatment of acute infectious and conta-

gious diseases. It is manifestly undesirable to admit cases of small-pox and relapsing fever into a large general hospital. Regarding the contagious nature of both these diseases there can be no doubt, and Brigade Surgeon Gray has pointed out that if it be known relapsing fever may be contracted within the hospital it would certainly injure the reputation and utility of the Jamsedji Jeejibhoy Hospital. Relapsing fever, the product mainly of overcrowding, insufficient food, and general insanitary conditions, has occurred amongst the sweepers of the Bombay Municipality, who furnished 32 cases to the Jamsedji Jeejibhoy Hospital. There are localities in Bombay where relapsing fever frequently breaks out in almost epidemic form, and as it frequently occurs amongst municipal servants, it is only right to expect the Municipality should provide for their isolation, comfort, and treatment. I agree with Brigade Surgeon Gray that it must be considered the duty of a wealthy Municipality like Bombay to provide suitable accommodation for all contagious diseases as they should not be admitted into any general hospital.

Second.—One of the greatest needs—in fact the greatest—is the removal of lepers from Bombay and their compulsory segregation and detention in a leper asylum. There can be no doubt the lepers who reside in Bombay, go about the streets, frequent markets, the neighbourhood of all public places and importunately beg, ought to be removed to a leper home or asylum. The Leper Dharmshála in Byculla is a most dangerous institution in a crowded and populous city like Bombay, considering there is no doubt that leprosy is contagious. The Allbless Leper Home at Trombay meets a want and is a step in the right direction; but in the absence of power to segregate and detain lepers it falls short of what is required. An Act is required to confine vagrant lepers within a cordon drawn round a leper village. Such a village could be established in the wilds of the Thána districts; there the lepers could cultivate the land and help to maintain themselves and they would not be a nuisance and a menace to the health of others.

A *third* want I have already adverted to, *viz.* the supply of spectacles for the absolutely poor who have been operated on for cataract.

And *fourth.*—The want of trained women nurses in the Goculdas Tejpal Hospital.

These requirements I have intentionally brought forward in this report, for I know there are philanthropists in Bombay able and willing to aid in any scheme for the improvement of public health.

Poona Civil Hospital.

13. There were 2,613 in-patients and 11,364 out. Amongst these there were 43 cases of small-pox and 61 of cholera. 243 deaths occurred, cholera giving 38 and dysentery 39. 94 major and 707 minor operations were performed. The cost was Rs. 41,760 against Rs. 48,438. The Wantage Sisters took charge of the nursing early in July 1888 and Brigade Surgeon Hughes speaks very highly of the benefit derived. The increased establishment sanctioned in Government Resolution No. 3637, dated 13th October 1888, G.D., has met a long-felt want. A ward with 4 cells for the temporary location of supposed insanes has been constructed. In 2 separate wards there is great need of ceilings to obviate the nuisance and discomfort to patients created by birds roosting on the rafters; this matter is still under the consideration of Government. The need of a separate out-patient dispensary for natives has been represented by Brigade Surgeon Hughes, and I am of opinion it is required, for it is extremely undesirable the slightly ailing and seriously ill should all be received in common in the overcrowded scanty space available in the entrance hall.

European General Hospital, Aden.

15. 3,028 out-patients and 142 in-patients were treated during the year as compared with 2,696 and 82 in 1887, an increase of 60 for in-patients. The in-patients were almost without exception removed from boardship, and the increase is chiefly due to the greater commerce of the port and the greater number of large passenger ships visiting Aden. Enteric fever is generally imported, it being asserted that Port Said is frequently a place of infection. Cases of remittent fever of an obstinate type came from Zanzibar and

the East Coast of Africa. A sharp outbreak of small-pox visited Aden, believed to have been imported from ports on the Red Sea littoral, the East Coast of Africa, and the Persian Gulf.

The total cost of this hospital was Rs. 8,264 against Rs. 7,642 in 1887, the increased cost being due to the greater number of in-patients. Rs. 1,758 were received as fees from in-patients against Rs. 1,218 in 1887.

I am glad to record steps have been taken to provide a new hospital, as the present one is a disgrace to civilization, and is seen with surprise and criticised in no measured terms by medical and other officers of all nations who come to visit their compatriots who are undergoing treatment in the tumble-down, dingy shed which serves at present as a hospital. I hope no effort will be spared to push on to speedy completion the new building. To the new hospital should be added, in the opinion of Deputy Surgeon General Cates, a detached building for the reception of insanes. This is absolutely necessary in my opinion.

16. The reports received from Assistant Surgeons and Hospital Assistants in charge of dispensaries show that good work has been performed throughout the year. The dispensaries at the following places are said to be in bad repair or unsuitable :—

Chikhli.	Hubli.	Rápur.
Khergaum.	Gadag.	Cutch-Bhachao.
Rander.	Uran.	Hansot.
Pardi.	Bándra.	Dehej.
A'landi.	Jamnabai (Tatta).	Kavi.
Akola.	Mirpur Batoro.	Ilav.
Sháháda.	Manora.	Kalliawadi.
Gogha.	Umarkot.	Wai.
Dholka.		

17. The dispensary committees are reported not to have held quarterly meetings in accordance with the dispensary rules at the following places :—

Chikhli.	Murbád.	Dholka.
Navalgund.	Bulsár.	Paráutij.
Indápur.	Olpád.	Khed.
Akola.	Sháhada.	Párner.
Shirpur.	Pandharpur.	Sháhápur.
Dhulia Branch Dispensary.	Gadag.	Bándra.
Uran.	Hubli.	Mehmadabad.
Panvel.	Vágra.	Khergaum.
Pen.	Hánsot.	Kalliawadi.
Kalyán.		

18. I would suggest the attention of Collectors be called to these remarks, with a view to their enquiring into and disposing of the reports regarding buildings and the meetings of committees.

19. On the statements which form the appendices of this report I submit the following remarks :—

(*a*)—*Appendix I, Statement I.*—237 charitable hospitals and dispensaries were open on the 31st December 1888, 7 new institutions, all grant-in-aid, being opened during the year.

(*b*)—*Statement II*—Shows the total number of patients treated. 37,248 in-patients were treated,—125 more than in 1887. 1,677,928 out-patients obtained relief, being an increase of 20,218 on 1887. In the Konkan there was an increase on 1887 in the total of in and out-patients treated of 10,932, to which the Jamsedji Jeejibhoy Hospital contributed 5,471, the Kama Hospital 4,693 and the new dispensary at Murbad 2,284. In the Deccan 16,294 more patients obtained relief than in 1887 to which the three new dispensaries of Akola, Trimbak, and Ránebennur contributed 9,427. Gujarát and foreign stations showed fewer patients treated than in 1887 by 8,603 and 740 respectively. In Sind 2,460 more patients were treated.

The results of treatment are only noted amongst in-patients, the proportion of cured and relieved being 67·8 and 10 per cent. respectively. The death rate, 8·1 per cent., is 1·2 higher than last year, and is accounted for by the greater prevalence of cholera.

20. 110 more beds were available during 1888 than in 1887—62 male and 48 female. In the Konkan the institutions at the following places increased their in-patient accommodation:—Sávantvádi 25 beds, Murbad 8, Honávar 7, and the number of beds was reduced by 5 at the Cowasji Jehangir Ophthalmic Hospital, Bombay, and by 14 at Vengurla. It will be observed that the net increase of 21 in the number of beds in the Konkan was due chiefly to the opening of a fine new hospital at Sávantvádi on the 20th December; this hospital has 36 beds for general diseases, 12 in the Leper Asylum, 8 for insanes and 8 for contagious diseases; the superficial area allowed to each bed is 80 square feet and the cubic space 1,800 cubic feet; the building cost Rs. 45,350.

In the Deccan there is a net increase of 64 beds, due chiefly to the opening of the Ripon Hospital at Ahmednagar on the 10th July and the new Bijápur hospital on the 24th July. The detailed increase and decrease in the number of beds in the Deccan is as follows:—

	Increase.		*Decrease.*
Ahmednagar ...	... 10	Sásvád ...	... 6
Bijápur ...	... 37	The Khán Bahádur Pestonji Sorabji Dispensary, Poona ...	5
Jejuri ...	... 5	Parner ...	... 4
Akola ...	... 2	Bársi	... 2
Trimbak ...	... 4		17
Bhadgaon ...	... 4		
Islámpur ...	... 1		
Sholápur Civil Hospital ...	1		
Chikodi ...	... 3		
Háveri ...	... 4		
Ránebennur ...	... 2		
Ráibág ...	... 4		
Shirol ...	... 4		
	81		

Net increase 64.

In Gujarát 9 additional beds were provided,—Ánand, a new dispensary, 8 beds, and Viramgam 1 bed extra.

In Sind, Kotri and Dokri give each 8 additional beds.

21. Shows the diseases for which the patients were treated; these are classified in accordance with the revised Nomenclature of Diseases, Edition of 1885. *Small-pox* was very prevalent in certain parts of the Presidency, notably so in Bombay, Ahmednagar, Poona, and also in Shaik Othman and Berbera. *Cholera* was also very prevalent in Ahmedabad, where the total deaths from all causes were 2,000 in excess of 1887. Surgeon-Major Robb considers there were probably about 1,400 cases of cholera: 388 deaths from this disease were recorded in the Municipal Office between the 17th May and 26th September. In Cutch territory 4,013 cases of cholera were recorded with 1,864 deaths. Gujarát suffered most severely from the epidemic, then the Deccan, Konkan and Sind, whilst the "foreign" States in the statement were not visited by the disease.

Statement III.

Dysentery, classified now as a general disease instead of a local one, gave 1,209 more cases than in 1887. It gave 2·3 per cent. of the total treated in the Konkan, 1·2 per cent. in the Deccan, 1·8 per cent. in Gujarát and Foreign States, and 1·9 in Sind; throughout the whole Presidency it gave 1·6 per cent. of all diseases.

Malarial Fevers show a decrease of over 10,000 cases on 1887, and represent 14·3 per cent. of the total treated against 15·1 per cent. in 1887. In the Deccan the percentage was 10, Gujarát 14·6, Sind 19·2, Konkan 20·1 and Foreign States 20·5.

Syphilis, Primary and Secondary, give 18,159 cases, or somewhat less than in 1887.

Worms, Intestinal, come fourth as a cause of disease, giving 9·5 per cent. of the total. In the Deccan they are more fruitful of disease than malarial fevers, the percentage being 13·6. The Konkan follows with 11·1 per cent.

Leprosy gave 295 more cases than 1887, but the total of 1,656 treated by no means represents the degree of prevalence of this disease in the districts of this Presidency.

Diseases of the Eye gave 10·5 per cent. of the total, being the third most frequent class of diseases met with. The rates are highest in Sind and the Deccan with 13·7 and 13·4 per cent. respectively.

Diseases of the Ear are peculiarly prevalent in Sind, the chief affection being inflammation of the external auditory meatus.

Hepatic Affections give the same percentage on the total as last year, *viz.* 0·3. Over a sixth of the total was treated in the Bombay hospital, but many of the cases come from up-country.

Splenic diseases show a satisfactory decrease on last year, the percentage being 0·3 against 0·4.

Diseases of the Skin give a percentage of 16·3 on the total, being thereby the most frequent class of ailment in the Presidency as a whole. In Gujarát and the Deccan, skin-diseases are most prevalent, 19·7 and 17·9 per cent. respectively; but in the Konkan they come second to malarial fevers with a percentage of 12·1, whilst in Sind and "Foreign" States the percentage are 9·4 and 7·8.

22. A total of 4,779 operations were performed during the year, which, with 134 remaining under treatment on the 31st December 1887, gives a grand total of 4,913 treated. 4,146 cases were cured or 84·3 per cent., 4·3 per cent. relieved and the mortality was 3·2 per cent. Amputations gave a mortality of 7·4 per cent. on 323 cases. The mortality on lithotomies, lateral and suprapubic, was 8·2 per cent. Lithotrity gives 10 per cent. of deaths. Operation by incision for hepatic abscess gave 68·8 per cent. recoveries; aspiration of hepatic abscess gave 66·6 per cent.

Statement III-A.

23. Statement IV calls for no remark.

24. This is the financial statement. The total income was Rs. 12,25,385, an increase of Rs. 17,982 on 1887. Of the total income, Rs. 1,14,108 was cash balance on 1st January 1888. Government contributed Rs. 8,01,397 or Rs. 5,077 less than in 1887. The income derived from Local and Municipal Funds, and from miscellaneous receipts was Rs. 2,62,296, being Rs. 26,653 more than in the previous year; of this increase Local Funds contributed Rs. 10,886, Municipalities Rs. 7,785 and Miscellaneous, Rs. 7,982. The "Miscellaneous" sources of income comprise the sale of unserviceable articles; contributions from Station Funds, Port Trust contributions, Advances or Loans from Municipal Funds and Hospital Stoppages. The total amount received on account of hospital stoppages was Rs. 26,530; of this sum, Rs. 23,180 was received at the large general hospitals, where fixed scales of fees have been in force for some time. Rs. 3,350 were collected at the different grant-in-aid dispensaries throughout the Presidency, where the scale of charges laid down in Government Resolution No. 1235, dated 23rd April 1887, General Department, were adopted. These stoppage rules have been adopted by the majority of the dispensary committees, and although there has been considerable opposition to the measure in many places still the scheme has had some measure of success, and I anticipate the opposition will disappear in a short time. The principle of charging those able to afford the fees levied is undoubtedly correct, as gratuitous treatment should only be given to the absolutely poor. In no dispensary has the scheme been so successful as at Hubli, where the total amount received was Rs. 491, and Assistant Surgeon Cardoz deserves great credit for so successfully carrying out the orders without friction.

Statement V, Part I.

The amount of interest derived from invested capital was somewhat less than in 1887. Rs. 12,086 were realised by sale of Securities or withdrawal of deposits, being Rs. 8,586 more than in 1887.

The income derived from subscriptions was Rs. 18,833, being Rs. 6,553 more than in 1887; natives contributed Rs. 16,173 and Europeans Rs. 2,660. Rs. 9,299 represent the amount specially collected for the Allbless Leper Home, Trombay.

It will be observed that the direct burden on Government has diminished, being 76·9 per cent. against 78 per cent. in 1887. If the cost of Native States be added the proportion paid by Government is 70·9 per cent. or 1·3 per cent. less than in 1887. The Government share for the maintenance of dispensaries alone is 43·8 against 45·2 in the previous year.

From the total expenditure of Rs. 10,99,965 must be deducted Rs. 18,975 invested during the year, Rs. 39,734 realised from the sale of medicines, hospital stoppages, &c. (included under Miscellaneous charges) which have been remitted to the Treasury, and Rs. 1,146, the unexpended balance of the Government grant to the Ratnágiri Leper Hospital, which lapses to Government. After making these deductions the net cost during the year under report was Rs. 10,41,256, an increase of Rs. 8,255. Civil Hospitals absorbed Rs. 6,88,433 of the net expenditure, dispensaries Rs. 3,52,823. The items of increase in the expenditure are Establishments Rs. 32,860 and Buildings and Repairs Rs. 22,516.

Diets show a reduction of Rs. 2,517 on 1887 notwithstanding a larger number of in-patients. More favourable contract rates were obtained last year. The average cost per diet is the same as last year, *viz.* 2 annas 6 pies. The great reduction of Rs. 42,960 in the expenditure on European medicines is due to the continued care with which medical officers administer their charges. It was discovered that in some instances such as Gogha, Ránder, Párdi, Nandurbar, Hospital Assistants instigated Committees to purchase drugs privately in addition to those obtained on indent from the Government Medical Stores, thereby considerably increasing the charges under this head and in some cases placing the Committees in pecuniary difficulties.

Rs. 18,975 were invested during the year, being an increase of Rs. 5,425.

The average cost per patient was 11 annas 4 pies or 1 pie more than in 1887. In the Konkan the average cost was 10 pies less than in 1887, being Re. 1-7-1; in the Deccan Re. 0-7-7 or 1 pie more; in Gujarát and Sind the same as in the previous year—6 annas 6 pies and 10 annas 1 pie respectively, but in Foreign States there has been an increase from Rs. 2-0-2 to Rs. 2-3-7.

The following discrepancies have been found between the closing balances of 1887 and the opening balances of 1888; with a view to reducing these to a minimum in future as well as to more effectively control expenditure, monthly cash accounts have been called for from all dispensaries. It was on examining these monthly accounts that many discrepancies were found, and it is hoped that in future the number of errors may diminish if not disappear altogether:—

	Balance on 31st December 1887.	Balance on 1st January 1888.	Remarks.
	Rs. a. p.	Rs. a. p.	
Gokuldáss Tejpál Hospital.	5,618 8 8	.....	The balance to the credit of the Gokuldás Tejpál Hospital lapsed as usual to the Bombay Municipality.
Bái Sákarbái Dispensary, Chinchni.	270 0 0	280 4 2	Not explained.
Candy Dispensary, Vengurla.	1,681 9 0	678 5 9	The present balance is correct, and that shown in the last year's report is incorrect; the error is due to the oversight of the municipal clerk.
Rájápur Dispensary ...	179 4 3	90 13 1	The balance on 1st January 1888 is correct and the discrepancy cannot be explained.

	Balance on 31st December 1887.	Balance on 1st January 1888.	Remarks.
	Rs. a. p.	Rs. a. p.	
Honávar Dispensary ...	302 6 11	348 12 4	Not explained.
Supa do. ...	371 5 0	382 6 0	The discrepancy is owing to the accounts not being kept regularly.
Siddápur do. ...	.....	365 9 11	The present balance is correct and the discrepancy cannot be explained.
Sásvad do. ...	93 6 7	280 6 7	The present balance is correct, and the discrepancy is owing to the deposit in the Government Savings Bank not being shown.
Nevása do. ...	535 12 7	528 4 7	Unexplained.
Shevgaon do. ...	7,304 7 2	424 12 1	Unexplained, *vide* Government Resolution No. 4548, dated 22nd December 1888, General Department.
Párner do. ...	328 13 8	553 3 2	The present balance is correct and the discrepancy is owing to the accounts not being compared with the Huzúr accounts.
Pimpalgaon Basvant Dispensary.	.....	103 8 11	The present balance is correct and the discrepancy cannot be explained.
Dharangaon do. ...	506 5 2	546 13 11	The present balance is correct and the discrepancy unexplained.
Karád do. ...	431 12 6	934 11 8	Do. do.
Islámpur do. ...	146 8 2	62 9 2	Do. do.
Tásgaon do. ...	1,866 6 6	1,860 9 10	The present balance is correct and the discrepancy is owing to the accounts not being compared with the Treasury accounts.
Athni do. ...	133 3 3	144 5 7	Do. do. do.
Chikodi do. ...	14 6 4	8 5 4	The present balance is correct and the difference of Rs. 6-1-0 is on account of medicines supplied to the dispensary not being taken to account was included in the closing balance in 1887.
Khánápur do. ...	.....	—15 14 4	Unexplained.
Olpád do. ...	146 15 0	1,215 6 2	The present balance is correct and the discrepancy is owing to the accounts not being compared with the Huzúr accounts.
Párdi do. ...	.....	37 8 9	The present balance is correct and the discrepancy cannot be explained.
Mándvi do. ...	31 5 11	29 6 11	Do. do. do.
Ránder do. ...	3,086 13 5	147 0 7	The present balance Rs. 147-0-7 together with the amount of Rs. 2,000 invested in Government promissory notes since the opening of the dispensary is correct, and the discrepancy in the last year's balance is owing to the amount—Rs. 939-12-10—being doubly debited.
Khairgaon do. ...	663 12 3	662 8 3	The present balance is correct and the discrepancy was an error.
Anklesvar do. ...	.....	226 6 0	Do. do.
Iláv do. ...	15 0 0	68 10 8	Do. do.
Jambusar do. ...	390 11 10	320 15 11	Do. do.
A'mod do. ...	1,345 5 6	636 4 10	Do. do.
Dehej do. ...	.....	1,080 15 3	Do. do.
Kapadvanj do. ...	662 11 10	797 4 7	Do. do.
Tháru Sháh do. ...	193 6 4	218 6 4	The present balance is correct and the discrepancy of Rs. 25 is owing to this sum not being included in last year's account.

25. Shows account of invested capital. There is a discrepancy between the balance on 31st December 1887 and 1st January 1888 of Rs. 13,500; this is due, *1st*, to Rs. 1,000 being shown as the invested capital of the Sirsi dispensary instead of Rs. 11,000, and *2ndly*, to Rs. 1,500 and Rs. 2,000 invested on account of the Dehej and Ránder dispensaries, respectively, not having been shown last year; these errors can only be explained as clerical in the first case and ignorance in the latter two as the returns for last year did not show these sums. During the year Rs. 18,975 were invested, an increase of Rs. 5,425 on 1887. The total invested was Rs. 4,17,425, from which must be deducted Rs. 12,100 as securities sold and deposits withdrawn, leaving a balance invested on 31st January 1888 of Rs. 4,05,325.

Statement V, Part II.

26. Appendix II calls for no remark.

27. The following private contributions have been received during the year:—

(1) Rs. 1,50,000 ... From Bái Motlibái for the erection of a new Obstetric Hospital in connection with the J. J. Hospital.

(2) „ 1,25,000 ... From Sir Dinshaw Mánackji Petit (Lady Sákarbái Petit) for the erection of a hospital for women and children in connection with the J. J. Hospital.

(3) „ 10,000 ... From Mr. Dwárkádáss Lallubhai for the erection of an out-door dispensary for women and children in connection with the J. J. Hospital.

(4) „ 60,000 ... From Mr. Bomanji Edulji Allbless for the erection of an Obstetric Hospital in connection with the Káma Hospital.

(5) „ 6,000 ... From Mr. Bomanji Edulji Allbless for the erection and equipment of a Pársi dead-house in connection with the Káma and Allbless Hospitals.

(6) „ 18,000 ...
- Rs. 6,000 contributed by the Trustees of the late Bomanji Edulji Allbless.
- Rs. 2,000 from savings in the estimate for the Female Medical Students and Nurses' quarters with the consent of Mr. Káma.
- Rs. 5,000 from the balance of Mr. Káma's original contribution for the construction of the Káma Hospital with the consent of Mr. Káma.
- Rs. 5,000 from the grant made by the Bombay Branch of the Countess of Dufferin Fund for the erection of Lady Doctors' quarters in connection with the Káma and Allbless Hospitals.

(7) „ 10,000 ...From Mr. Jamsetji Nasserwanji Petit for the erection of a dispensary at Váda in the Thána Collectorate.

(8) „ 2,000 ...From Mr. Nusserwanji Mánackji Petit for the erection of female ward to the Sádra Civil Hospital.

28. INSPECTION TOUR.

On my tour the following medical institutions were inspected:—

Mahábleshvar Dispensary—Was in good order when inspected on the 21st April 1888 and on the several occasions I visited it.

Pánchgani Dispensary—Was inspected on the 4th June 1888 and found in good order, except the books were not correctly numbered. A house for the compounder required.

Wái Dispensary—Was inspected on the 5th June. The building is not suited for its purpose. There are two small rooms for in-patients with very low ceilings. Records, instruments and medicines all in good order and well cared for.

On the 7th June I inspected the Sátára Civil Hospital. It was clean and in good order. Formerly there was a Police hospital here and two distinct sets of books are still kept up; but as the Police hospital has been demolished and the police treated in the Civil Hospital, I directed that in future only one set of records should be kept. The latrine arrangements were very bad, but have since been improved.

On the 12th and 13th June the Sassoon Hospital, Poona, was inspected and several times visited. The compound and buildings were all perfectly clean and in good order. The stores and records carefully kept. The wards were in excellent order. The menial establishment was insufficient and has lately been increased by Government Resolution

No. 3637, dated 13th October 1888. There were two lady nurses and two matrons (Government servants). The latter have since been placed under the Sisters and their salaries and ration allowance have been given as a grant to the Sisters—*vide* Government Resolution No. 4470, dated 18th December 1883, G. D. I also saw the students who are attending the Medical School, and I am glad to say they are fairly well educated lads and of good intelligence. Surgeon-Major Hughes and Surgeon Eaton have a heavy charge here, especially in the rainy season when there are so many Government officers in Poona. I regret to say Surgeon Eaton was compelled to proceed to Europe on account of ill-health. Surgeon-Major Murphy during the rainy season performed the Assistant Civil Surgeon's duties and was relieved by Surgeon Bull, who has been favorably reported on by the Civil Surgeon. There is a great deficiency of bathing accommodation in this hospital, which was brought to Government notice in my letter No. 6573, dated 16th November 1888, and I hope to see this remedied soon.

On the 16th June the Khán Bahádur Pestonji Sorabji Dispensary was inspected and visited on several other occasions. Assistant Surgeon Selke had the place in as good order as such an unsuitable building can be. He has a very large attendance of out-patients.

On the 9th September the Civil Hospital, Thána, was inspected and found to be all in good order. The dispensary in the town and several in the districts had not been visited by Surgeon Kirtikar, but he overtook this duty before the close of the year.

The Wadia Dispensary in Thána was undergoing repair and the medicines &c. had been placed in a shed where the work of the dispensary had been carried on for many months. The dispensary building has been recently re-occupied, but the repairs had not then been quite completed. There are two Civil Medical Pupils here who should have received some daily instruction from Assistant Surgeon Burjorji in charge. This will be attended to in future.

Ratnágiri Civil Hospital—Was inspected on the 15th October. The records, instruments and medicines in good order. Surgeon Burke takes a deep interest in his duties, which are heavy here, as he is Superintendent of the Jail, Lunatic Asylum and in charge of the Leper Asylum. The Leper Asylum was inspected on the 17th and found in perfect order. There were 30 men, 12 women and 1 small boy in it. The boy is a native of Ratnágiri, whose parents are not lepers, but it is not known how he became infected. The lepers belong to nearly every caste. 13 of the 43 are Maráthas. During the year 7 men and 1 woman died. 8 men and 2 women absconded.

Belgaum Civil Hospital—Was inspected on the 24th October. The building was formerly a gun carriage shed. It answers its purpose fairly well, but the light in the operating room requires to be improved. Medicines, instruments, clothing and records well cared for and everything in good order. I also inspected the Belgaum Dispensary. The Hospital Assistant in charge had his records, instruments, and medicines in good order.

There are two leper homes in Belgaum. The home for males is on one side of the town and the home for females on the other. The lepers are allowed to go out of the homes freely and go about the town. Such homes only afford shelter to the lepers and are in no way any aid to the prevention of this loathsome disease being communicated to the healthy.

Dhárwár Civil Hospital—Was inspected on the 29th October. The building is an excellent one and very well suited for its purpose. It was formerly the hospital for European soldiers. The stores, instruments and medicines were all in good order, well arranged and cared for. The records are carefully kept and up to date. The service books of the establishment were all written up, but some not quite correctly; they were to be put right. There were 12 men and 4 women in-patients at the time of my inspection. There is no leper asylum or home here, but I saw some lepers in the town.

Dhárwár Jail Hospital—Was inspected on 31st October. Very few sick. The jail was as clean as it could be, the prisoners looked healthy. Surgeon-Major McConaghy has a good deal of work here and does it well.

Hubli Dispensary—Was inspected on the 1st November 1888. The buildings are temporary; the old dispensary was knocked down some time ago and it is proposed to build a new one at a cost of Rs. 20,000, but there has been some difficulty about selecting a site. It seems to me the present, though not perfect, would be a very convenient and suitable site. There were 5 men and 1 woman in-patients when I was there. The out-patients are very numerous. The stores, instruments, medicines and records all in good order except the books had not been numbered correctly. I came here chiefly to see the site of the proposed new hospital for the Southern Marátha Railway. It was suggested by the Government of India that this Railway's employés might be accommodated in the grant-in-aid dispensary. I am convinced the Railway people should have a hospital of their own near the quarters of the employés. The present grant-in-aid dispensary is too far off to be useful to the Railway people. There is a Railway doctor already who travels along the line and here there is a small dispensary with an apothecary, &c., but wards are wanted for in-patients. In the evening I went on to Gadag and there made a

hurried inspection of the dispensary. The books, instruments and medicines were all in order.

Bijápur Civil Hospital—Was inspected on the 3rd November. The building was opened on the 24th July last. It is a very good and suitable building with 40 beds. The equipment of the old civil hospital is not nearly sufficient. Government has been asked for a special grant to purchase cots, &c. The records, instruments and stores are all kept well. The establishment is barely sufficient for 40 beds.

On the 4th I saw all the prisoners in the jail and gang. They look healthy and only 7 sick out of 586. Books, instruments and stores in good order. Both the jail and the quarters of the gang were perfectly clean.

On the 5th I visited the Countess of Dufferin Hospital in Bijápur. It is in the building which was formerly occupied by the dispensary. When the new civil hospital was opened, the old building was placed at the disposal of the Countess of Dufferin Fund Committee and now Mrs. LeMarche, a diplomaed midwife, resides there, and has 3 beds for lying-in cases, but up to the date of my visit only one case had been admitted. It was a difficult and dangerous one and was successfully treated by instruments by Surgeon-Major Peters. The woman would have died had she not been brought to hospital.

Sholápur Civil Hospital—Was inspected on the 9th November. There are two male wards and one female. The compound was not just as clean and nice as I like to see. The wards were so and in good order in all respects. The medicines and instruments well kept but some old stores in the store-room were not well arranged and a lot of useless old clothing should have been disposed of. The books were not all correctly numbered nor as neatly written as they should be. This hospital would be much improved by the addition of an operating room with good light and by the floors of the wards being paved, and this in the end would be economical as the cost of leeping is about Rs. 9 per mensem.

Sholápur Municipal Dispensary—Was inspected on the 10th November. It is entirely maintained by the municipal funds. All in good order. The attendance is very large.

Ahmednagar Civil Hospital—Was inspected on the 14th November; it is a new building and named the "Ripon Hospital." It has about 40 beds. Everything was in first rate order.

Dhulia Municipal Dispensary—Was inspected on 17th November. It consists of 2 rooms in a street in the town and the Hospital Assistant has quarters next door. Medicines are obtained free from the civil hospital. All the rest of the cost is borne by the Municipality. On the 18th I visited the jail; there was no sick. Saw all the prisoners, they look healthy. The jail was perfectly clean. Books, instruments and medicines all in good order. The civil hospital was inspected on the 19th. This is a very fine building with ample accommodation. It was built for a military hospital and made into the civil hospital in 1872 when the troops were withdrawn. The wards very clean and in good order; latrines well looked after and the compound clean. Stores, instruments and books all in excellent order. There were 24 in-patients, of whom 3 were women. The service books of the establishment all in good order.

Násik Civil Hospital—Was inspected on the 22nd November. This is a wretched building and quite unsuited for its purpose. A new one is to be constructed soon. The place is in as good order as can be under the circumstances. I visited the Lady Dufferin Fund hospital which is close by the civil hospital. There were a few women in it.

On the 8th January 1889 I inspected the Jamsetji Jeejibhoy Hospital and found it in good order.

On the 9th the Sir Cawasji Jehangirji Ophthalmic Hospital was inspected. It was full of patients but not so crowded as it was on my previous inspection. The attendance of out-patients here is very large. Books, instruments, &c., were all in good order. The obstetric hospital was next inspected and found in good order.

The Goculdas Tejpal Hospital—Was inspected on the 10th. The whole place, inside and outside, in excellent order.

The European General Hospital was inspected on the 11th and found to be in excellent order.

Byculla School Hospital—Was inspected on the 12th: no sick. Stores and instruments well kept, but some of the latter very old and should be returned to the Medical Stores. Then I went with Surgeon-Major Banks to the House of Correction. No sick among the Europeans but a few natives were in hospital. Medicines and books in good order but some of the instruments old and useless, which will be returned to the Stores. The hospital of the Common Jail was also inspected and found in good order.

On the 24th January 1889 the Kama Hospital was inspected. Everything in excellent order. The wards very clean and the beds very nice. Instruments and medicines well kept. The records are few and kept somewhat differently from other hospitals; for instance,

letters, bills, &c., are kept in bundles. Next day I visited the Jaffer Sulleman dispensary about 7 a.m. There were a good many women and children present waiting to be seen by Miss Van Overbeke. All in good order.

I inspected the A'nand dispensary on the 1st of March. It is a very good and suitable building. Everything was in good order.

Next day I inspected the civil hospital at Godhra. The building was formerly a grant-in-aid dispensary and is quite insufficient for its present purpose. It is contemplated to increase the accommodation. There are no beds for women. It is very desirable there should be six beds for women and children and a new ward for the police of 12 beds. The hospital establishment will also require to be increased. The place was in good order, the records neatly written and up to date, instruments and stores were all well cared for.

On the 4th of March I inspected the civil hospital in Ahmedabad. The grounds and buildings are in good condition. Wards clean and well ordered. Books properly kept; the instruments and stores well cared for. This hospital is a very good one, but could be much improved by a few additions,—1*st*, an out-door dispensary is required, 2*nd*, an operating room, 3*rd*, a store-room, and 4*th*, an examination room. I was told there is about half a lákh of the original gift to build this hospital still in the hands of Government available which might be used to make these necessary additions.

I also saw the Medical School. The buildings are good and suitable.

The Bechardas Dispensary—Was inspected in the afternoon, when everything was found in excellent order. Here I saw a few very interesting surgical cases.

On the 5th the Lunatic Asylum was inspected: all in good order. The Police hospital was found in good order. In the afternoon I visited the Leper Asylum. There are 17 men and 7 women in it. They are rationed by the civil hospital. The Jail hospital was inspected. Only 5 sick. The records, instruments and stores were in good order. I saw the prisoners at their evening meal; they looked healthy. The jail was perfectly clean. The quarters for the hospital assistant are very bad.

On the 6th the Ranchodlal Dispensary was inspected. All in good order. Here there are several small detached wards of one or two beds each which are found very useful especially for Hindus. I also saw the Jubilee Hospital which was being built and has recently been opened. This hospital is for women and has been put in charge of Madame Blim. In it there are 8 beds, an out-door dispensary and quarters upstairs for the lady-doctor.

In the evening the Raipur dispensary was inspected. All in good order.

On the 7th I visited the Dhuliakot Jail. Only 2 sick. Books in order and the stores well cared for. The jail was quite clean.

On the morning of the 8th I left Ahmedabad and at midday inspected the Wadhwán dispensary, which is a very good one, and all in good order.

On the 9th the West Hospital, Rájkot, was inspected. Some additions were made to the old civil hospital and the name changed to commemorate the late Colonel West. The hospital is now a very good one. There is a large number of surgical cases here. The records, instruments and stores are all in good order. The wards and beds clean and nice.

On the 10th I visited the Leper Asylum. There are usually from 24 to 40 lepers in it, but they come and go at their own pleasure. I had a conversation with the late Colonel Watson about this asylum, and he told me he contemplated removing the asylum from Rajkot to an island in the Gulf of Cutch. There the lepers would be isolated, a very desirable thing. Inspected the Jail hospital. No sick. Prisoners looked healthy. The jail is perfectly clean and all in good order.

At the request of the chief Kárbhári of Wankaneer I visited the hospital there on 12th March. It is a new one, opened about 2 years ago by His Excellency the Right Honourable the Governór of Bombay. The building is handsome and substantial. It has male and female wards, dispensary, receiving-room and office. The accommodation is ample. There were no in-patients but a large attendance of out-door sick.

On the 14th March I inspected the dispensary at Mehmadabad. Satisfactory.

Next day I inspected the Civil Hospital of Kaira. The buildings in good repair. The wards in excellent order. The instruments and stores well cared for. The books neatly written and up to date. The jail was also visited, in which there were very few sick. The jail was perfectly clean. The records, medicines and instruments in good order.

On the 16th I inspected the Civil Hospital of Broach. The buildings all in good repair, the wards in excellent order, the books neatly written up to date. Medicines well cared for, the instruments clean and in good order.

On the 18th I inspected the Civil Hospital, Surat. It is a large building and has ample accommodation. The wards were in good order. Records correct and written up

to date. Medicines and other stores carefully kept and the instruments clean and in good order. I visited the jail; there was no one sick. The place was perfectly clean and those prisoners I saw looked healthy. The records and stores in good order.

Next day I inspected the Parakh Dispensary. It is a very good building: only one ward, for males. New latrines have been built on one side of the compound and the old ones, which were too near the dispensary, removed. Everything was in good order.

29. Deputy Surgeon General Turnbull carefully inspected all the civil hospitals, asylums and jail hospitals in Sind and has submitted favorable reports. He also inspected the following dispensaries:—Jacobabad, Sehwan, Sukkur, Shikárpur, Larkhana, Rohri, Ghotki, Kotri, and the dispensaries in Karáchi; also the following railway dispensaries:—Laki, Radhan, Ruk, Jacobabad, Sukkur, Rohri, Khanpur, Reti, Kotri and Karáchi. The reports on several of the medical officers attached to the railway dispensaries were not favorable.

30. In conclusion, I beg to report that at all my inspections I carefully inquired into the expenditure, and I am satisfied the medical officers do their best to work their charges economically, having due regard to the welfare of their patients.

I have the honour to be,

Sir,

Your most obedient Servant,

J. PINKERTON, M.D., Surgeon General
with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT No. I.

Showing the Classification of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1888.

Civil Hospitals and Dispensaries in the Bombay Presidency: Administration and Progress Report on the—for the year 1888.

No. 3355.

GENERAL DEPARTMENT.

Bombay Castle, 19th August 1889.

Letter from the Surgeon-General with the Government of Bombay, No. S. B.—248, dated 3rd May 1889—Submitting the Administration and Progress Report on the Civil Hospitals and Dispensaries in the Bombay Presidency for the year 1888.

RESOLUTION.—The total number of pupils attending the Poona, Ahmedabad and Hyderabad Medical Schools which, as observed by Government in their reviews of the last two annual reports had been steadily decreasing, rose in the year under review to 142 or 30 in excess of the previous year's figures. Of 76 newly admitted pupils, 13 were classed as "Native Military," and the Governor in Council is glad to learn that there is no longer reason to suppose that the recruitment for Military Hospital Assistants is insufficient to meet probable future requirements, to which subject the attention of the Surgeon-General was called in Government Resolution No. 3529, General Department, dated 6th October 1888. The Civil Hospital Assistant Class, on the other hand, which is even now considerably below the *proposed* normal strength, is likely at the present rate of recruitment to continue to be so for some years. The Surgeon-General should be requested to expedite his reply to Government memorandum No. 2117 of 31st May 1887 regarding the future strength of the Civil Hospital Assistant Class. Though increased admission of Civil Medical Pupils appears to Government to be undoubtedly desirable, definite orders cannot be passed on the information now supplied, and the Surgeon-General should be requested to submit separately without delay any proposals he may have to make on the subject.

2. A concise summary is given by the Surgeon-General of the principal statistics relating to the Presidency hospitals. It is chiefly interesting as showing a very remarkable increase in the popularity and usefulness of the Káma Hospital, the number of out-patients treated at which increased from 2,242 in 1887 to 6,983 in the year under report. The increase in attendance at the Jamshedji Jijibhai Hospital, at which no less than 44,423 patients were treated, was also considerable.

In connexion with the Presidency hospitals the Surgeon-General brings prominently to notice, in paragraph 12 of his report, the most important requirements of the City of Bombay, with a view to attracting the attention of philanthropists able and willing to aid in schemes for the improvement of the public health, and the Governor in Council trusts that the publicity given to the Surgeon-General's remarks will secure the desired object, and that Government may have the pleasure of acknowledging further instances of such munificent and generous liberality as has already been evinced in the cases mentioned in detail in paragraph 27 of this report. The supply of spectacles to the absolutely poor who have been operated on for cataract and the provision of trained women nurses for the Jamshedji Jijibhai and the Goculdas Tejpal Hospitals appear to be specially deserving objects for private benevolence. The subject of the segregation of lepers is under consideration and measures are in progress for the removal of those at the Jamshedji Jijibhai Hospital pending such arrangements as may be expedient when the Leper Bill becomes law. The attention of the Municipal Commissioner should be invited to the Surgeon-General's remarks on the necessity for a large hospital for infectious and contagious diseases in the City of Bombay.

3. The remarks in paragraphs 16 and 17 of the report regarding the bad state of repair and unsuitability of various dispensary buildings, and the neglect of several dispensary committees to hold regular quarterly meetings in accord-

ance with the prescribed rules, should be brought to the notice of the Collectors concerned.

4. The total number of charitable hospitals and dispensaries open at the close of the year under review was 237 or 7 more than at the end of 1887. The seven new institutions, which were all grant-in-aid dispensaries, were opened respectively at Murbád, Akola, Trimbak, Ránebennur and A'nand in the Presidency proper and Keamari and Dokri in Sind. There was a slight increase as compared with the previous year's figures in the number of in-patients (37,248) and an increase by no less than 20,218 in that of out-patients (167,982), due mainly to the opening of the new dispensaries and the largely increased attendance at the Jamshedji Jijibhai and Káma Hospitals.

5. As regards classes of diseases treated the most noticeable facts are the decrease in cases of malarial fever and increase in those of skin diseases. The latter numbered 280,748 as compared with 251,635 in the previous year, being more numerous than any other class of disease and no less than 16·3 per cent. of the total number of cases treated. The number of cholera cases increased from 4,081 to 7,833, of which more than half occurred in Gujarát. A slight increase is reported in the number (4,779) of major surgical operations performed. The Surgeon-General has not, otherwise than by supplying the usual statistics, complied with the instructions in paragraph 3 of Government Resolution No. 3529, dated 6th October 1888, to show in this report what advance has been made in surgical work in the hospitals under his control.

6. The total income of the Civil Hospitals and Dispensaries, including their cash balance in hand, is given in the financial statement as Rs. 12,25,385 or Rs. 17,982 in excess of the income of the previous year. The marginal table, which gives the chief items comprised in this total, shows that Local Bodies are, to the relief of Government, taking an increased share in the cost of these institutions,—a result which, in view of the strictly *local* character of the majority of them, is entirely in accordance with the policy of the Governor in Council, who trusts to see a still more marked improvement in the same direction reported in future years, as a consequence of orders which have recently been passed on the subject. Private subscriptions, though they increased from Rs. 12,280 in 1887 to Rs. 18,834 in the year under review, continued to form but a small fraction of the total income, and the same may be said of "Hospital stoppages," which were appreciable in amount in only the large General Hospitals, where the payment of these fees has for a long time past been enforced. Rules for their levy have however recently been adopted by the majority of the dispensary committees, and the Governor in Council trusts with the Surgeon General that the opposition to the measure will disappear in a short time. He learns with satisfaction the marked success which has already attended the efforts of Assistant Surgeon Cardoz at Hubli.

	1888.	1887.
	Rs.	Rs.
Contribution of Government ...	8,01,398	8,06,474
Do. Local Funds ...	76,328	65,441
Do. Municipalities ...	1,37,009	1,29,224

The gross expenditure is given as Rs. 10,99,966, which however is reduced to Rs. 10,41,256 *net* by deducting certain items mentioned by the Surgeon General, which are only included in the former total for departmental account purposes. The latter sum is in excess by Rs. 8,255 of the *net* cost in 1887: the increase occurred chiefly under the heads "Establishment" and "Buildings and Repairs." The large saving which it has been found possible by careful management to effect in the cost of European medicines is observed with satisfaction.

The discrepancies between opening and closing balances of several dispensaries, mentioned by the Surgeon General in the table appended to paragraph 24 of his report, must again be pronounced very unsatisfactory, and it can only be hoped that the measures which that officer has now adopted with a view to preventing the recurrence of such mistakes in making up the accounts of future years will prove more successful than the checks which have been applied hitherto.

The Surgeon General should be requested to consider and report whether the present system of accounts is suitable, and whether it admits of the ordinary test of working out the cash balance daily by deducting expenditure from receipts and comparing that balance, as struck in the accounts, with the cash *actually* in hand. If such a test is applied it is impossible to understand how there can be large discrepancies year after year in the accounts of numerous dispensaries, between the cash balance at the end of one calendar year and that at the beginning of the next year, *i.e.* on the following day: discrepancies which not only point to gross and unchecked carelessness, but indicate the possibility of fraud.

The balances in hand of some dispensaries appear to have been excessive at the end of the year under review; but as the report relates to the calendar year, whereas the orders of Government regarding the investment of unnecessarily large balances apply to the official year only, further comment on this matter is here unnecessary.

7. The tours of both Surgeon-General Pinkerton and Deputy Surgeon-General Turnbull appear to have been complete. Their remarks on their inspections have, it is presumed, been communicated to the local officers respectively concerned.

From

The SURGEON GENERAL with the
GOVERNMENT of BOMBAY,

To

The SECRETARY to GOVERNMENT,
General Department.

Bombay, 12th May 1890.

Sir,

I have the honour to submit the administration and progress report on the Civil Hospitals and Dispensaries of the Presidency for the year 1889. Summaries of the annual reports of medical officers and subordinates in charge of civil hospitals and dispensaries, also those of the medical schools, are appended.

2. At the end of 1889, 182 students were attending the three Provincial Medical Schools, and were distributed as follows:—

Classes of Students.	Poona.				Ahmedabad.				Hyderabad.				Total.			
	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.
Native Military	1	6	12	19	..	2	3	5	1	..	..	1	2	8	15	25
Stipendiary	4	3	6	13	5	6	4	15	7	7	11	25	16	16	21	53
Native State	1	1	1	3	1	1	2	4	..	..	..	..	2	2	3	7
Paying	4	6	31	41	5	9	24	38	..	..	..	..	9	15	55	79
Civil Medical Pupils	..	7	5	12	..	..		5	..	..	1	1	..	7	11	18
Total ..	10	23	55	88	11	18	33	67	8	7	12	27	29	48	105	182

3. The following estimates will show the present prospects of recruiting the Military and Civil Hospital Assistant classes:—

(a)—Military Hospital Assistant Class.

Sanctioned strength, including 15 per cent. reserve ...	...	143
Actual strength on 31st March ...	...	154
Excess ...		11
In the Medical Schools, will pass in 1890 ...	...	2
Do. do. will pass in 1891 ...	...	8
Total ...		21

At 10 casualties per annum, 20 will be absorbed in 1891.

The 12 Native Military Pupils admitted at Poona and the 3 at Ahmedabad in 1889 should pass out in 1892, and allowing for failures at the examination will meet the requirements of that year.

(b)—Civil Hospital Assistant Class.

Sanctioned strength	...	234
20 per cent. reserve	...	47
Total ...		281
Present strength	...	249
Deficiency ...		32

It is estimated the three medical schools will supply the following numbers:—

	1890.	1891.	1892.
Poona	4	10	11
Ahmedabad	5	6	9
Hyderabad	7	7	12
	16	23	32

Taking the casualties at 10 per annum and allowing for failures at the school examinations it is probable the present strength will be reached about the end of 1892. But this does not take into account the 11 Hospital Assistants required for the North-Western Railway.

The teaching staffs at the three schools remain the same as during the previous year, with the following exceptions:—at Poona, Surgeon-Major Murphy acted for Brigade Surgeon Cook during the time he was appointed to act as Deputy Surgeon-General, Her Majesty's Forces, Presidency Circle; at Ahmedabad, Surgeon-Major Bartholomeusz succeeded Surgeon-Major Robb in May last.

4. As the summaries of the annual reports of all medical institutions for 1889 are given in Appendix I, I shall only briefly note the important conclusions to be gathered from the statistical tables given in Appendix III.

5. Statement No. I shows the classification of hospitals and dispensaries according to the orders of the Government of India conveyed in Resolution No. 3-163-74 of May 4th, 1883. On the 1st January 1889 there were 237 institutions open. 8 new ones were opened and 1 closed during the year and 244 civil hospitals and dispensaries remained on 31st December 1889. The names of the new dispensaries opened during the year are Navápur and Sávda in the Khándesh Collectorate, Kolhápur City Dispensary, Gadgiri and Budgaon in the Southern Maratha Country, Kálol in the Panch Maháls, Victoria Jubilee Dispensary in Ahmedabad, and the Victoria Dispensary at Shahdádpur in the Upper Sind Frontier. The one closed was the Belgaum City Dispensary.

6. Statement No. II gives the number of in-door and out-door patients treated. There were 37,549 in-door and 1,659,065 out-door patients as compared with 37,248 and 1,677,928 respectively in 1888. The decrease of 18,863 in the out-door patients is mainly due to a healthy season. Of the in-door patients 25,068 were cured, 3,641 relieved, 4,190 absented, 3,011 died or 8 per cent. to the total treated against 8·1 in 1888. The daily average sick was 1,815 as compared with 1,892 in the previous year. Of the out-door patients 1,489,969 attended personally and 169,096 were represented by friends. 361,315 were treated in the civil hospitals and 1,297,750 in dispensaries. The average daily attendance was 17,000 against 16,404. The total number of beds available was 3,565 or 34 more than in the previous year, chiefly due to the opening of new dispensaries.

7. Statement No. III gives the diseases for which the in and out-door patients are treated. Small-pox gives 944 cases against 741 in 1888. Out of these, 357 were treated at Shaikh Othman in Arabia. There were 5,318 cases of cholera or 2,515 less than in the previous year; 3,239 were in the Deccan, 1,222 in Gujarát, 496 in the Konkan and 361 in Sind. Dysentery shows a slight increase of 526, *viz.* 29,525 against 28,999. Malarial fevers head the list as usual. There were 262,791 cases or 15·4 per cent. on the total treated against 245,697 or 14·3 in 1888. In the Konkan the percentage was 18·6, in the Deccan 10·9, Gujarát 18·4, Sind 19, and foreign 18·7. Venereal diseases, including both syphilis and gonorrhœa, gave 30,028 or 1·7 per cent. on the total treated against 28,785 or 1·6 in the previous year. Worms (intestinal parasites) come fourth on the list with 157,912 or 9·3 per cent. of the total treated distributed as follows: Deccan 100,865 or 14·5, Konkan 29,152 or 9·8, Gujarát 25,943 or 5·3, Sind 1,028 or 0·5, and foreign 924 or 3·4. Rheumatic affections give 46,469 or 2·7 per cent. of the total treated against 48,600 or 2·8 in 1888. Leprosy caused 1,354 cases against 1,656 in 1888. Diseases of the eye return 187,396 cases or 11·1 per cent. of the total treated as compared with 180,547 or 10·5 in the previous year. Diseases of the skin give a percentage of 13·3 of the total treated. In the Konkan it is

10·6 per cent., Deccan 14·1, Gujarát 15·8, Sind 9·5, and foreign 6·5. Ulcers are more prevalent in Aden and Sind, giving 8·3 and 6·6 per cent. of the total treated. Diarrhœa gave 47,451 cases, showing a decrease of 259 on the previous year. Dengue attacked a great number of the European community in Karáchi during the last four months of the year.

8. Statement No. III-A shows the number of major surgical operations performed and their results. On 1st January 1889 there remained under treatment 136 cases which had undergone operation and 5,161 were performed during the year, giving a total of 5,297, showing an increase of 384 over the previous year. Of these, 4,440 were cured, 225 relieved, 137 discharged otherwise; and 179 ended fatally, leaving 116 under treatment at the close of the year, and 200 cases in which the results of operations performed on out-door patients being not obtainable are not recorded: 3,866 were performed in civil hospitals and 1,431 in dispensaries. Of the total operations about one-third or 1,560 were performed on the eye and its appendages, of which 1,294 cases were performed in the Ophthalmic Hospital, Bombay. The removal of calculi comes next with 758 cases and 62 deaths or 8·1 per cent. on the number operated on. Next in order are incisions 668, operations on joints 501, unclassified operations 490, amputations 436 and removal of tumours 420. The death-rate in operated cases was 3·3 per cent. as compared with 3·2 in 1888.

9. Statement No. IV shows the sex and caste of the patients. The following statements give the ratios per cent. of men, women and children, and of castes, as compared with the previous years :—

	Men.		Women.		Children.	
	1888.	1889.	1888.	1889.	1888.	1889.
Konkan...	47·5	48·0	20·3	19·6	32·2	32·4
Deccan...	42·6	42·2	16·9	17·7	40·5	40·1

Sind	55·0	54·5	15·5	15·9	29·5	39·6
Foreign...	64·3	64·3	18·2	16·1	17·5	19·6
Total ...	45·4	45·2	18·5	18·7	36·1	36·1

	1888.	1889.
Hindus	68·9	67·7
Mahomedans	25·1	26·2
Native Christians ...	2·6	2·6
Párs is	1·9	1·8
Europeans	0·4	0·6
Eurasians	0·2	0·2
Other castes	0·9	0·9

10. Statement No. V, Part I, gives income and expenditure during the year. The total income was Rs. 12,48,079 against Rs. 12,25,385 in 1888. Of this, Rs. 1,12,811 was cash balance on 1st January 1889. Rs. 8,00,353 were received from Government. The receipts from local and municipal funds, and from miscellaneous sources such as hospital stoppages, sale of medicines and unserviceable articles, &c., amounted to Rs. 2,76,339 as compared with Rs. 2,62,296 in 1888. Hospital stoppages realized Rs. 34,497 or Rs. 7,967 more than in the previous year. The interest on the invested capital yielded Rs. 19,137 and sale of securities Rs. 2,575. From Europeans Rs. 1,942 were received as subscription and from natives Rs. 34,921.

11. The total expenditure was Rs. 11,26,705, from which must be deducted Rs. 42,125 invested during the year, Rs. 47,659 realised from the sale of

medicines and unserviceable articles, hospital stoppages, &c. (included under miscellaneous charges) and Rs. 681, the unexpended balance of the Government grant to the Dinsha Mánekji Petit Leper Asylum, Ratnágiri, lapsed to Government. After making these deductions the net cost was Rs. 10,36,240 as compared with Rs. 10,41,256. Civil hospitals absorbed Rs. 7,26,291 of the net cost, and dispensaries Rs. 3,09,949. The average cost of each diet was Re. 0-2-6, the same as last year. The average cost of each patient was Re. 0-11-7, or 3 pies more than in the previous year. In the Konkan it was Re. 1-9-3, in the Deccan Re. 0-7-4, in Gujarát Re. 0-6-5, in Sind Re. 0-9-6, and in foreign institutions Rs. 2-4-11 as compared with Re. 1-7-1, Re. 0-7-7, Re. 0-6-6 Re. 0-10-1 and Rs. 2-3-7 respectively in 1888. The percentage of total cost paid by Government was 77·2 against 76·9. If the cost of the Native State institutions be added, the percentage paid by Government would be 70·4 against 70·9 in the previous year. The cost of dispensaries alone to Government was 39·7 as compared with 43·8 in 1888.

12. It is satisfactory to observe the discrepancies in the closing balances of dispensaries are diminishing; but I have to notice the following:—

	Balance on 31st December 1888.			Balance on 1st January 1889.			Remarks.
	Rs.	a.	p.	Rs.	a.	p.	
K. B. Pestonji Sorábji Dispensary, Poona.	1,323	0	6	.....			Balance shown in the last year's report is incorrect, as there was no balance in hand.
Sinnar Dispensary	567	3	7	491	11	5	The present balance is correct, the discrepancy being due to the accounts not being kept correctly.
Sundar Mulji Dispensary, Jalgaon ...	496	9	5	696	9	5	Not explained.
Wái Dispensary	548	9	0	496	9	3	The present balance is correct; the last year's balance is incorrect owing to the discrepancy in the Huzúr Deputy Collector's accounts.
Ránebenur Dispensary	980	15	0	844	13	2	The present balance is correct, and that shown in the last year's report is incorrect.
Dinsha Manekji Petit Dispensary, Chikhli.	.....			396	4	0	Not explained.
Victoria Dispensary, Navsári ...	4,408	8	1	1,055	10	10	The present balance is correct, and that shown in the last year's report is incorrect; the error was due to the accounts not being correctly kept.
Gogha Dispensary	487	3	9	195	7	2	The present balance is correct, and the discrepancy cannot be explained.
Sukkur Dispensary	2,641	8	4	.....			The balance shown in last year's report is incorrect, as there was no balance in hand that year.

13. Statement No. V, Part II, shows the account of invested capital. On 1st January the balance was Rs. 4,05,325, Rs. 42,125 were invested during the year, making a total of invested capital Rs. 4,47,450 as compared with Rs. 4,17,425. Rs. 2,575 were withdrawn, leaving a balance of Rs. 4,44,875 at the end of the year.

14. The following contributions have been given during the year under report by private individuals for medical institutions, or to advance medical science:—

(1) Rs. 18,000—From His Highness the Gáekwár of Baroda for a Professorship of Therapeutics in the Grant Medical College for 3 years at Rs. 500 per mensem.

(2) Rs. 75,000—From Mr. Frámji Dinsha Petit for constructing a laboratory for scientific medical research in the vicinity of the Grant Medical College.

(3) Rs. 1,00,000—From His Highness the Thákor Sáheb of Bhávnagar for the training of the nurses at the Jamsetji Jeejeebhoy Hospital, and a bust of Her Majesty the Queen-Empress for the Victoria Jubilee Technical Institution.

(4) Rs. 2,000—From the Trustees of the Pársi Panchávet Fund for the construction of a mortuary for the Pársis at the J. J. Hospital.

INSPECTIONS.

15. On the 12th and 13th November 1889 I inspected the Sassoon General Hospital in Poona. The wards clean and well ordered. The addition of the new bathrooms is a great improvement. The buildings in good repair and the compound clean. There is a large quarry hole in the compound which should be filled up. The books, instruments, clothing and medicines all in good order. The nurses here are doing good work. Brigade Surgeon Cook has so much to do here that it is not easy for him to go out to inspect dispensaries. During the monsoon the work is very heavy.

On the 16th the Khán Bahádur Pestanji Sorábji Dispensary in the City of Poona was inspected and found satisfactory. In the afternoon the Yerrowda Jail Hospital was inspected and found in good order.

The Goculdás Tejpál Hospital was inspected on 27th November 1888. The wards and beds very clean and neat. The books properly numbered, carefully, neatly and correctly kept up to date. Instruments well looked after. The buildings all in good order. I was well pleased with the result of my inspection of Surgeon-Major Parakh's charge.

The Pestanji Hormasji Káma Hospital was inspected on the 28th November. Wards clean, beds nicely arranged and everything connected with the sick in excellent order. Clothing, medicines and instruments well taken care of; the books and records are not kept in the usual way, though carefully kept in the manner Dr. Edith Pechey Phipson has them, still I think it would be better to keep them in the way laid down for all hospitals. This institution was opened after my predecessor's circular order was issued on the subject of how the records should be kept. I have sent a printed copy of that circular to the physician in charge. The class here for training native nurses is working satisfactorily. The new quarters for the 2nd and resident physicians nearly completed and will shortly be occupied by these ladies.

On the 30th November the Jamsetji Jijibhoy Hospital was inspected. The wards were all in good order. The books carefully and correctly kept. The clothing, medicines and instruments are well cared for. The compound clean. Brigade Surgeon Gray is in charge and he reported to me that his establishment was efficient and the conduct of all quite satisfactory. The 2 lady nurses here are very valuable in superintending the nursing of the sick. The Obstetric institution, of which Surgeon Baker has been in charge since Surgeon-Major Arnott went to Europe on sick leave, was in as good order as such an inferior place can be. The attendance of out-patients here is considerable and there is no very good place for seeing them; but this will be made right when the new hospitals for women and children is opened as there will be a proper out-door dispensary. I was very well pleased with the result of my inspection. Brigade Surgeon Gray has a very heavy charge, but he manages the affairs of this large hospital in a most satisfactory way and at the same time as senior surgeon he has charge of the surgical wards in connection with which he performs many very important surgical operations with eminent success.

The Sir Cáwasji Jehangir Ophthalmic Hospital was inspected on the 3rd December. The wards were in good order and not overcrowded. The books, instruments and medicines were in good order. Surgeon-Major Maconachie has to turn away a considerable number of patients who require hospital treatment and, I think, there is no doubt he is right in reporting there is not sufficient beds for the wants of the people; but, before recommending any addition

to this hospital it will be advisable to wait and see whether the special practitioners in eye diseases in the City of Bombay will not be able to make up for the deficiency. In the event of this hospital being enlarged, it seems doubtful if the walls could stand an upper floor being put on them. No doubt Surgeon-Major Maconachie's reputation as an operator has increased the demand for admission. This hospital is made use of by people from all parts of this Presidency and many places beyond it. I think a good many out-patients here could well afford to pay for the services of a private practitioner, but it is a difficult as well as a very invidious thing to turn such persons away.

The European General Hospital was inspected on the 5th December and found in excellent order. The wards, beds and furniture were all as clean and neat as a new pin. The Sisters and Nurses here are doing a most excellent work. The records, medicines, instruments and clothing were all in good order. Brigade Surgeon Hojel and the Resident Medical Officer, Surgeon Collie, have very important duties here and have performed them satisfactorily.

On the 7th December I visited the Jáffer Sullemán Dispensary. It is in charge of Dr. Isabella M. Macdonald. The attendance is very considerable and I found Dr. A. Walke, the Resident Medical Officer of the Kama Hospital, was there assisting Dr. I. M. Macdonald. This dispensary meets a want and is availed of by a great many poor women and children, but I think there is a risk of people going to this dispensary who could afford to pay a private practitioner.

On the 9th the hospitals of the Byculla School and House of Correction were inspected. In the former there were many children suffering from chicken-pox. Every thing was in order. In the House of Correction there were very few sick. The books, stores, &c., were all in good order. Next day the hospital of the Jail was inspected, and found in good order.

On 13th January 1890 the Civil Hospital of Ratnágiri was inspected. Records carefully written up to date and correctly numbered. This hospital would be much improved by the addition of a new store-room and a surgery. In the afternoon the Jail hospital was inspected. All in good order.

On the 18th the Civil Hospital of Kárwár was inspected and found in good order; the records well kept and written up to date; the instruments are old but well looked after, the medicines and clothing carefully kept. In the afternoon the Jail hospital was inspected and found in good order.

On the 22nd the Civil Hospital of Dhárwár was inspected. The buildings in excellent order and very clean; it would be a great improvement if the floors were paved instead of plastered with cow-dung and clay. The records all in order and neatly written up to date. Medicines, clothing and instruments all carefully looked after. Surgeon-Major McConaghy has a heavy charge in Dhárwár but manages to do all his duties well.

The Dhárwár Jail Hospital was inspected on the 23rd and found in good order.

On the 27th the Civil Hospital of Belgaum was inspected. The records, medicines, instruments, &c., all in good order. This hospital would be much improved by the addition of two cells for supposed lunatics, a store-room and some second class servants' quarters. The hospital is a converted gun-shed and has never been thoroughly completed for the purposes and wants of an hospital though it answers its object fairly well. Since the closing of the grant-in-aid dispensary in the town the out-patients have much increased here.

On the 30th inspected Hubli dispensary. Everything in good order, but the buildings are very unsuitable. The new dispensary is not yet begun owing to disputes about a site. I am of opinion the old dispensary site is more convenient than any site near the travellers' bungalow, though the latter is no doubt better in a sanitary point of view. The municipal commissioners want the new dispensary to be built on the site of the present dispensary and they should get their own way especially as there is nothing actually bad about the site.

On the 1st February I inspected the Civil Hospital at Bijápur. The place is clean and in good order. Instruments, medicines, &c., well cared for. The records in order and up to date.

On the 2nd I inspected the Jail Hospital at Bijápur. I saw the prisoners who looked healthy. The hospital records in order, the instruments well cared for. The jail was very clean and the clothing of the prisoners suitable for the time of year. Very few sick.

On the 4th the Civil Hospital of Sholápur was inspected. The buildings in good repair, but the earth floors should be paved and ceilings put up in the wards. The compound is clean. Medicines and instruments all in good order. The records are correctly kept up to date.

On the 7th the Ripon Hospital at Ahmednagar was inspected. The compound clean, buildings in good order. The wards clean and well arranged. The medicines, instruments and records all in good order.

On the 9th inspected the Jail Hospital, Dhulia. All in good order.

On the 10th the Civil Hospital, Dhulia, was inspected. The compound and buildings clean and in good repair; the medicines, instruments and records all in good order.

On the 11th inspected the Municipal Dispensary, Dhulia. It is not a very suitable building, but answers the purpose in a way. The records are few but written up and in order. The instruments are few and old but sufficient. The stock of medicines ample.

The Civil Hospital, Násik, was inspected on the 13th. The books, instruments and medicines found in good order. This is a very bad hospital; and it is desirable no further delay should take place in building the new one.

On the 14th March the Civil Hospital, Thána, the Jail Hospital and the Rustomji Wádia Endowed Dispensary were inspected and everything found satisfactory.

On the 22nd April the Civil Hospital, Mahábaleshvar, was inspected. The medicines are kept in shelves in the room used as an office and dispensary. The store-room is far too small. The records and instruments all in good order. A few additions are required, (*a*) new storeroom, (*b*) mortuary and (*c*) dispensing room.

1st Class Hospital Assistant Báláji Cuddum did not send the annual return and report of the Umarkot dispensary in time, which delayed the preparation of this report.

Deputy Surgeon-General Turnbull, M.D., inspected the Civil Hospitals, Jail Hospitals, and several dispensaries in Sind. He reports favourably on all of them. He specially commends Surgeons-Major Bainbridge and Keith for their zeal; also Assistant Surgeons Mackenzie, Bocarro and Aquino.

The following Hospital Assistants he also reports specially on :—Hospital Assistants P. Rodrigues, E. Jacob, E. Benjamin, Babu Shamshersing, Shaik Abdul Raymon, and Peeraji Kamaji.

I have the honor to be,
Sir,
Your most obedient Servant,
J. PINKERTON, M.D.,
Surgeon General.

APPENDIX I.

SUMMARIES OF THE ANNUAL REPORTS

OF THE

CIVIL HOSPITALS AND DISPENSARIES

OF THE

BOMBAY PRESIDENCY AND SIND,

FOR THE YEAR 1889.

KONKAN.

BOMBAY CITY.

EUROPEAN GENERAL HOSPITAL.—*In charge of* Brigade Surgeon A. N. HOJEL.

Conservancy.—The conservancy of the hospital compound is well looked after. In 1887 complaints were made by people living in the neighbourhood of the insanitary condition of the cattle shed situated at the south-east corner of the hospital compound, the place is always kept clean, and after careful investigation the nuisance complained of could not be attributed to the assigned cause.

Water-supply.—An additional pipe was laid down during the year 1889 and the bhisti sanctioned in 1886 to keep the tanks of the female ward full was discharged.

Buildings.—In the reports for the years 1887-88 the present buildings were reported as being unsuitable for the purposes of a hospital. On the 20th February 1889 His Excellency Lord Reay, Governor of Bombay, laid the foundation stone for the new hospital and the buildings are in progress.

General Health.—Health of the city was fairly good. The admissions from small-pox were 32, measles 98 and cholera 10 in the past three years.

Attendance of Patients.—The out-patients were 2,578 and the in-patients 1,461, of whom 1,159 were Europeans, 292 Eurasians and 10 others; 1,028 were males, 305 females and 128 children.

Prevailing diseases.—Percentages of the more common diseases have been as follows:—

	1887.	1888.	1889.
Malarial fevers	11·6	9·8	12·3
Dysentery	2·3	2·8	3·8
Phthisis	0·9	0·7	0·5
Rheumatic affections	3·2	3·1	2·5
Diarrhœa	3·7	3·7	5·9
Syphilitic affections	2·9	2·3	2·2

Eighteen cases of enteric fever were admitted during the year with 9 deaths as compared with 6 admissions and 1 death in the previous year. There were 5 cases of cholera with 4 deaths as compared with 2 admissions and no death in 1838. There were 84 cases of syphilis as compared with 83 and 168 cases of liver disease against 166 in the previous year. Poisoning by alcohol shows a great decrease, being 57 against 73. There were 53 admissions in the obstetric ward as compared with 46 in 1888. In one case only was instrumental interference necessary.

Surgical operations.—There were 52 major operations with a mortality of 5—of the fatal cases, one was for paracentesis of abdomen for cirrhosis of liver, one was amputation of foot for necrosis and 3 were for incisions for hepatic abscess.

Mortality and its causes.—There were 95 deaths. The largest number (11) was from diarrhœa, 9 were from enteric fever, 8 from remittent fever, 7 from dysentery, 6 from hepatic abscess, 4 each from cholera and pneumonic phthisis, 3 each from septicæmia and heat apoplexy, 2 each, from small-pox, phthisis pulmonalis, valvular disease of heart,

hepatitis, cancer, delirium tremens, apoplexy and intussusception. The remaining deaths resulted from various diseases, 1 was from accidental gunshot wound. Of these 29 died within 24 hours, 26 within 48 hours, and 17 within 72 hours.

It is impossible to speak too highly of the manner in which the Sisters of All Saints have managed the nursing of the hospital and of the nurses under them.

Cost.—The total cost was Rs. 73,289-7-0, the cost per patient Rs. 18-2-3 against Rs. 73,069-10-3 and Rs. 20-6-0 respectively in 1888. The cost of each diet was Re. 0-7-9 or 2 pies more than in the previous year. Rs. 17,501-4-0 were received from paying patients on account of hospital stoppages against Rs. 15,239 in 1888.

The following is the Report by the Sister Superintendent of Nurses:—

Statement of the Expenditure during the past year of Rs. 4,080 granted by Government for nursing.

	1889. Rs.	a.	p.
Salary of 2 Nurses, board and uniform, at Rs. 60 per mensem each ...	1,440	0	0
Salary of 3 Nurses at respectively Rs. 40, Rs. 30, Rs. 20 per mensem.	1,080	0	0
Board of 4 persons, *viz.*, 2 Sisters and 2 Nurses, at Rs. 18 each per mensem	864	0	0
Servants and Dhobie at Rs. 58 per mensem...	696	0	0
Total Rs.	4,080	0	0

The nursing staff of the European General Hospital now consists of 2 Ward Sisters and 1 Lady Nurse who takes the place of a Ward Sister, 12 trained nurses, 6 probationer nurses and 4 probationers; of these 3 trained nurses, 5 probationer nurses and 4 probationers work in the hospital.

The staff of private nurses though greatly increased is still quite inadequate to the demand for them. Those trained in this hospital, as also our English nurses, have given great satisfaction to the doctors under whom they have nursed as well as to their patients. They have been sent to all parts of India and on several occasions have accompanied their patients to England.

JAMSETJI JIJIBHOY HOSPITAL.—*In charge of* Brigade Surgeon W. GRAY.

Conservancy and Water-Supply.—There has been no change in the hospital conservancy arrangements during the past year. They have worked quite as well as the existing circumstances permit, but cannot be made satisfactory until the city sewerage scheme is completed. Water-supply has been sufficient.

Hospital Buildings.—All the hospital buildings are in good repair and have been kept clean. Important additions are being made. The Bai Motlibai Obstetric Hospital and the Sir Dinshaw Maneckji Petit Hospital for women and children are in course of construction. The Dwarkadas Lallubhai Dispensary for women and children has been sanctioned, and the Pársi Punchayet has erected a Pársi dead-house near the disinfecting chamber. Attention is once more requested to the insanitary condition of the House Surgeon and Assistant Apothecary's quarters.

General Health of the Town and District.—The past year has been an average one in this respect. Public health may be called fairly good and except for a small outbreak of relapsing fever during the cold weather of 1888-89, there has been nothing in the form of an epidemic. The returns would appear to indicate that venereal diseases are increasing in prevalence.

Attendance of Patients.—The in-patients numbered 7,125 as compared with 7,132 in 1888. Of these 5,801 were discharged from hospital, 989 died, and 335 remained at the close of the year. The percentage of deaths to treated was 13·8, and the daily average number of sick 370·4. The corresponding figures for the previous year being 14·5 and 400·3. The out-patients numbered 43,435, and the daily average attendance was 405·8. For the year 1888 the figures were 37,291 and 327·7 respectively.

Prevailing diseases.—The principal diseases treated amongst in-patients were fevers, cholera, syphilis, affections of the respiratory system, phthisis, dysentery and diarrhœa, and injuries. Amongst out-patients the chief causes of admission were fevers, skin diseases, syphilis and gonorrhœa, affections of the respiratory system, rheumatism, ulcers, and injuries. It is significant that venereal diseases have undergone a large and sudden increase, as compared with a successive diminution during the four preceding years.

Surgical operations.—There were 305 major and 771 minor operations on in-patients. For the preceding year the numbers were 322 and 953 respectively. On out-patients 21 major and 3,424 minor operations were performed. Amongst amputations there were 6 of the arm, 9 of the forearm, 2 of the hand, one at the knee-joint, 7 of the leg, and 3 of the foot. All recovered. Twenty-three large tumours were removed with recovery in every case. Lithotrity was performed on 28 occasions, with two deaths; lateral lithotomy 29 times, with one death; and suprapubic lithotomy twice, both cases being fatal. Herniotomy was done in 8 cases, with five deaths, the mortality being due to the late stage at which patients

are brought to hospital. Laparotomy was performed once for intestinal obstruction, and inguinal colotomy also once for malignant disease of the sigmoid flexure. The first ended fatally, the latter was successful. Eight large scrotal elephantoid tumours were removed, with cure in every case. There was one ovariotomy, with an unsuccessful result.

Obstetric Institution.—Surgeon-Major Arnott left in August on sick certificate and was succeeded by Surgeon Baker. During the year the admissions from all causes numbered 457, as compared with 427 in the previous year. Of these 275 were labour cases, and a large proportion of them natural labours. In 1887 the labours were only 193, and in 1888, 222. This progressive increase shows that the institution is gaining in popularity. The chief obstetric operations were 3 cases of cæsarian section, with one recovery; 13 of craniotomy, with one death. Decapitation was performed 3 times, turning 8, and delivery by forceps on 17 occasions. On in-patients 814, and on out-patients 960 minor operations were performed. The number of deaths during the year was 26, of which 18 were due to labour, nearly all resulting from the late period at which the cases came to hospital. The other deaths were due to ordinary causes.

Mortality.—The mortality amongst in-patients was principally due to cholera, lung affections and phthisis, dysentery, diarrhœa, and injuries. As regards the mortality per cent., the most fatal diseases were cholera 61·2, tetanus 45·5, opium poisoning 41·1, hepatic abscess 37·6, phthisis 34·4, and diarrhœa 31·8.

Conduct of the Establishment.—The House Surgeon, Apothecary and Assistant Apothecary performed their duties in a most satisfactory manner. The menial establishment has given no particular cause of complaint.

Hospital supplies.—The new arrangement of dealing through one contractor only has answered admirably, with an absence of friction and a considerable diminution in clerical work. The supplies were of superior quality. Persistent efforts were made to keep down expenditure. The total cost of diets and the average cost per diet were Rs. 30,112 and Re. 0-3-7$\frac{7}{8}$ respectively. The corresponding figures for the preceding year were Rs. 33,996 and Re. 0-3-8$\frac{3}{4}$.

General observations.—In October last the lepers were transferred to the Albless Leper Asylum at Trombay. The hospital for incurables is now devoted to its original purpose, and the general wards of the main hospital have thereby been considerably relieved. Contagious and epidemic disease is no longer to be admitted; all cases in future will be provided for by the municipality. A new and improved operating theatre is badly required, and it is proposed to utilise No. 1 ward for this purpose. The commissioned medical officers have done their work well, and the valuable services rendered by the All Saints Sisters in the surgical wards are acknowledged.

Cost.—The total cost was Rs. 1,72,126-12-10, the cost per patient Rs. 3-6-5 against Rs. 1,57,243-12-3 and Rs. 3-8-7 respectively in 1888. Rs. 145-13-0 were received from paying patients on account of hospital stoppages against Rs. 210-10-0 in 1888.

Vaccination.—Is carried out by the Sanitary Department.

COWASJI JAHANGIR OPHTHALMIC HOSPITAL.—*In charge of* Surgeon-Major G. A. MACONACHIE, M.D.

This hospital has accommodation for 35 beds, 25 for males, 10 for females. It is a very popular institution, many of the patients coming long journeys to Bombay for treatment.

The total treated during the year was in-patients 492 and out-door 8,525. The daily average of both in and out-patients was 116·5, or nearly the same as last year 116·8. Of the in-door patients 355 were males, 117 females and 20 children. The in-door patients consisted of 13 Europeans, 1 Eurasian, 218 Hindus, 170 Musalmans, 40 Pársis and 7 Jews. Among the out-patients 5,185 were males, 2,023 females, 1,317 children; 180 were Europeans, 51 Eurasians, 3,868 Hindoos, 3,071, Musalmans, 689 Parsis, 447 Native Christians, 217 Jews and 2 others.

The most common diseases of the eye and its appendages were, conjunctivitis, diseases of the cornea, lens and capsule, disorders of vision, injuries of the eye, disease of the iris and glaucoma.

1,294 major operations were performed during the year. The most frequent were extraction of the lens and of foreign bodies, puncture of the globe, iridectomy and artificial pupil. The minor operations numbered 1,421.

The conduct of the establishment was good.

Cost.—The total cost was Rs. 21,489-1-7, the cost per patient Rs. 2-6-1 against Rs. 21,481-8-2 and Rs. 2-8-3 respectively in 1888.

GOCULDAS TEJPAL HOSPITAL.—*In charge of* Surgeon-Major D. N. PARAKH.

Conservancy.—Good.

Water-supply.—Good and sufficient.

Hospital Buildings.—Are in good order, the usual annual repairs were done. Separate wards for noisy and violent patients, a receiving room for in-door patients, and a special room for the examination of the eyes, throat and ear, fitted with proper appliances, would be useful additions.

Attendance of Patients.—The total number of in-door patients was 2,257, or 21 less than in the previous year. Each bed accommodated during the year about 19 patients, and the average detention in hospital was about 15 days. The out-door patients numbered 16,358. The daily average of sick in-door was 91·2, out-door 109·8.

Prevailing diseases.—Injuries, malarial fevers, diseases of the generative system, diarrhœa, dysentery, affections of the lungs and liver.

Surgical operations.—There were 91 major operations or 9 less than in the previous year; 5 proved fatal giving a mortality of 5·5 per cent. The principal operations performed were amputations 26, of these 13 were of the lower extremity including 2 of the thigh, and 13 of the upper extremity, 11 tumours, 6 lithotomies, 3 lithotrities, and 9 hepatic abscesses.

Mortality and its causes.—The total number of deaths was 253 or 11·2 per cent. to total treated. The chief causes of death were diarrhœa, tubercle, dysentery, privation, fevers and surgical injuries.

Medico-legal cases.—1,748 police cases were brought to the hospital during the year. There were 40 inquests, 26 for fatal injuries, 9 for poisoning, 2 for apoplexy, 1 for traumatic tetanus, 1 for burns and 1 for erysipelas.

Conduct of establishment.—Very satisfactory. The House Surgeon Mr. Easdon is praised.

Cost.—The total cost was Rs. 49,217-1-11, the cost per patient Rs. 2-10-3 against Rs. 46,297-12-5 and Rs. 2-5-6 respectively in 1888. The cost of each diet was Re. 0-3-9, or 1 pie less than in 1888.

PESTONJI HORMUSJI CAMA HOSPITAL FOR WOMEN AND CHILDREN.—*In charge of* Mrs. PECHEY PHIPSON, M.D.

Conservancy and Water-supply.—The conservancy is well looked after; the water-supply is sufficient.

Hospital Buildings.—These are kept in excellent repair by the Public Works Department. During the year a shed has been erected for the dhobie. The new Allbless Hospital, which is to accommodate 30 beds and the quarters for the Resident Medical officers, are completed. Government has sanctioned the addition of the roads on each side of the compound to the hospital premises. This has given room for the new building and has greatly added to the comfort of the resident officials, who were formerly greatly annoyed by the intrusion of vagrants, who committed petty thefts and coolies who made a thoroughfare of the hospital compound.

Attendance of patients.—The total number of in-door patients was 781 against 761 in 1888. The number of lying-in cases was 155 against 85 in 1888.

Of the in-door 657 were women and 124 children; 79 Europeans, 99 Eurasians, 144 Hindus, 135 Musalmans, 159 Pársis, 116 Native Christians and 49 others.

The First Physician states that the patients requiring lengthened treatment are more content to remain in hospital than they were formerly. The total number of out-patients treated at the Jaffer Sulleiman Dispensary was 7,529 against 6,983 in 1888, the daily average attendance being 77·8; of these 5,529 were women and 2,000 children; 96 Europeans, 177 Eurasians, 3,049 Hindus, 3,060 Musalmans, 497 Pársis, 431 Native Christians and 219 others.

Prevailing diseases.—Amongst the in-door patients more than one third were gynœcological cases, then came diseases of the digestive system, respiratory system, nervous system, debility, dysentery and general diseases. Amongst the out-patients the most prevalent were diseases of the genito-urinary tract, next came diseases of the liver, digestive organs, skin diseases and affections of the respiratory organs.

Mortality and its causes.—35 deaths occurred during the year, giving a percentage 4·4 per cent. against 42 or 5·5 per cent. in 1888. The causes of death were chiefly tuberculosis and diarrhœa.

Surgical operations.—There were 3 major, 29 obstetric and 38 minor operations. The obstetric cases are still brought in too late when the patient is exhausted, but in future this will, it is hoped, be not the case, as soon as the hospital gets better known.

Conduct of Establishment.—This has been uniformly good. The First Physician reports very favourably of Miss Macdonald and Miss Walke, and remarks that the "nursing establishment keeps up its high character under the able supervision of Miss Atkinson."

Cost.—The total cost was Rs. 35,926-6-9, the cost per diet Re. 0-5-5 and the cost per patient Rs. 4-5-2, as compared with Rs. 27,882-1-7, Re. 0-5-4 and Rs. 3-9-7 respectively in 1888. The amount realized on account of hospital stoppages was Rs. 598-0-0.

BYCULLA CENTRAL SCHOOLS.—*In charge of* Brigade Surgeon S. O'B. BANKS *till 18th November, afterwards* Surgeon-Major P. MURPHY.

Conservancy arrangements are good. There is an ample supply of water; there has been no change in the hospital arrangements. The floor of the girls' school which is paved with flags is very damp especially in the evenings. The ferns and flowers which are close round the walls outside are to be removed, so that the moisture from them may not be condensed by the cold stone. There has been an increase of 13 patients as compared with the previous year. The prevailing diseases were measles, intermittent fever and skin affections. No deaths. All children admitted into the schools were either vaccinated or re-vaccinated. Conduct of the establishment good. The schools were not moved during the year.

GRANT-IN-AID DISPENSARY.

JEHANGIR NASSARVANJI WADIA DISPENSARY, MAHIM.—*In charge of* Mr. NUSSERVANJI JEHANGIRJI, L.M.

The dispensary building is conveniently situated and in good repair. Two members of the committee visited the dispensary occasionally. Conservancy is attended to. Water-supply is plentiful, partly from wells and partly from Vehar lake. The total treated was 7,463 out-door patients, against 11,133 in 1888 and 8,407 in 1887. The most common diseases were malarious fever, diarrhœa, intestinal parasites and skin diseases. There was no epidemic. Vaccination is compulsory and performed by the Bombay City vaccinators. The dispensary was inspected by the Presidency Surgeon, 3rd District. The total cost was Rs. 2,329-9-9 and the cost per patient Re. 0-4-11, as compared with Rs. 2,545-11-6 and Re. 0-3-7 in 1888 and Rs. 2,337-0-4 and Re. 0-4-5 in 1887.

THA'NA COLLECTORATE.

THA'NA CIVIL HOSPITAL.—*In charge of* Surgeon-Major K. R. KIRTIKAR.

Conservancy.—The conservancy of the town is defective; no drainage system of a regular kind exists.

Water-supply—Is good and abundant.

Hospital Buildings.—The hospital, though of great service to the sick and poor, requires some improvement to make it a much more useful institution than it is at present.

General health—Good. No epidemics.

Attendance of Patients.—262 in-door and 3,534 out-door patients against 404 and 3,407 respectively in 1888.

Prevailing Diseases.—Malarious fevers, respiratory affections, diarrhœa, rheumatic affections and skin diseases.

Mortality.—22 deaths during the year against 38 in 1888; the deaths were due to—6 diarrhœa, 4 dysentery, 1 hemiphlegia, 2 phthisis, 1 bronchitis, 2 remittent fever, 1 pneumonia, 1 hepatic abscess, and 2 injuries.

Surgical Operations.—Seven major and 60 minor operations were performed. Of the former 2 proved fatal.

Vaccination—By the municipal vaccinator.

Medico-legal.—There were 30 cases examined and reported upon, and three post-mortem examinations made at the request of the Police, against 33 and 5 respectively in the previous year.

Conduct of Establishment.—Is well reported on.

Cost.—The total cost was Rs. 8,465-15-6, the cost per patient Rs. 2-3-8 against Rs. 9,449-0-9 and Rs. 2-7-8 respectively in 1888. The cost of each diet was Re. 0-3-2, or 1 pie less than in the previous year.

GRANT-IN-AID DISPENSARIES.

SIR COWASJI JEHÁNGIR DISPENSARY, BÁNDRA—*In charge of* Assistant Surgeon J. F. GONSALVES, L.M.

No addition or alteration has been made to the dispensary building. It is maintained in good repair. The committee met six times. Conservancy of the town is looked after by the municipality, but there is no halálkhore service, the want of which is much felt. Water-supply is insufficient and in some parts defective. The total treated was 15,837 out-patients against 17,836 in 1888 and 16,348 in 1887. The most common diseases were malarial fevers, intestinal worms, respiratory affections, diarrhœa and dysentery. Cholera occurred—67 deaths as compared with 25 in 1888. Six major surgical operations were performed. 240 children were primarily vaccinated and 102 re-vaccinated. Six dead bodies were examined at the request

of the Police. The dispensary was inspected in December by the Civil Surgeon, Thána. The total cost was Rs. 3,675-12-7, the cost per patient Re. 0-3-8 against Rs. 5,451-4-11 and Re. 0-4-10 in 1888, and Rs. 5,889-6-2 and Re. 0-5-9 in 1887, respectively.

DINSHAW MANECKJI PETIT DISPENSARY, BASSEIN.—*In charge of* Assistant Surgeon F. A. Moos, L.M. & S.

The new building is the gift of Sir Dinshaw Maneckji Petit, and was occupied in March 1888. It affords ample accommodation to the dispensary patients. The floors want repairs and walls white-washing. The municipal committee constitutes the dispensary committee who visit every third month. There is great room for sanitary improvement both as to conservancy and water-supply; the latter is liable to contamination. The total treated was 17,882 out-door and 11 in-door patients as compared with 20,153 and 9 in 1888 and 18,300 and 3 in 1887 respectively. The most common diseases were malarial fevers, respiratory affections, intestinal worms, diarrhœa and dysentery. A mild epidemic of cholera and measles broke out in the town. There were 48 cases of cholera with 19 deaths. Fourteen major surgical operations were performed. Four post-mortem examinations were made. The dispensary was inspected once by the Civil Surgeon of Thána. The total cost was Rs. 3,957-6-0, the cost per patient Re. 0-3-6 against Rs. 4,595-13-4 and Re. 0-3-8 in 1888, and Rs. 3,749-15-1 and Re. 0-3-3 in 1887, respectively.

GULBÁI DINSHAW MANECKJI PETIT DISPENSARY, BHIWNDI.—*In charge of* Assistant Surgeon D. H. MOTIVÁLA, L.M. & S.

The building is new and in thorough repair. Servants' quarters and cook-room for in-patients are badly wanted. The committee visited the dispensary eleven times. Conservancy is fairly attended to. Water-supply is good and abundant. The total treated was 10,095 out-door and 17 in-door patients as compared with 11,064 and 33 in 1888 and 15,690 and 21 in 1887, respectively. The most common diseases were malarious fevers, skin diseases, worms and diarrhœa. Cholera made its appearance in the town during the months of June and July. Two post-mortem examinations were made at the request of the Police. The dispensary was inspected in December last by the Civil Surgeon, Thana. The total cost was Rs. 2,479-4-5, the cost per patient Re. 0-3-11 against Rs. 3,227-13-0 and Re. 0-4-7 in 1888, and Rs. 1,804-10-4 and Re. 0-1-10 in 1887, respectively.

KELVA MÁHIM.—*In charge of* Hospital Assistant GANESH BÁBÁJI.

The dispensary has been removed from the old hired building to a new one given gratis by Mr. Abaji Ganesh Dandekar. It is said not to be very suitable for dispensary purposes. The committee met at the dispensary eleven times. The sanitary condition of the town is fair. The water-supply is ample, but liable to contamination by soakage. The total treated was 7,216 out-door and 8 in-door patients against 7,548 and 11 in 1888 and 8,606 and 15 in 1887 respectively. The most common diseases were malarious fevers, bowel complaints, respiratory affections, worms and skin diseases. Thirty-seven cases of cholera with 20 deaths occurred in the town. Four major operations were performed. Seven post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Thána, in December. The total cost was Rs. 1,536-14-8, the cost per patient Re. 0-3-4 as compared with Rs. 2,471-1-3 and Re. 0-5-2 in 1888, and Rs. 2,802-15-7 and Re. 0-5-2 in 1887, respectively. The decrease is due to the non-payment for Europe medicines during the year under report.

SHA'HA'PUR.—*In charge of* Hospital Assistant MORO NILKANTH.

The dispensary building and out-houses are not in good repair. There is no regular dispensary committee. The Vice-President of the táluka local board and the Mámlatdár of the town visit the dispensary occasionally. The conservancy of the town is not good. The water-supply is ample from wells and river. The total treated was 6,242 out and 12 in-patients as compared with 6,908 and 10 in 1888 and 7,989 and 9 in 1887 respectively. The most common diseases were malarious fevers, rheumatic and respiratory affections, worms, and diseases of the eye and ear, bowel-complaints and skin diseases. Cholera and small-pox prevailed to a great extent in the villages of the town. Of the former there were 551 cases with 395 deaths and of the latter 961 cases with 704 deaths. Two major operations were performed. Vaccination was carried on by the táluka vaccinator. Eight post-mortem examinations were made at the request of the Police. The dispensary was inspected by the Civil Surgeon, Thána, in May. The total cost was Rs. 827-14-6 and the cost per patient Re. 0-2-1 against Rs. 1,059-13-2 and Re. 0-2-5 in 1888, and Rs. 1,364-10-11 and Re. 0-2-8 in 1887, respectively.

BÁI SAKARBÁI DISPENSARY, CHINCHNI.—*In charge of* Hospital Assistant MORESHWAR TRIMBAK.

The building is in good repair. A dead-house and a store-room are required. The furniture is insufficient. The committee visited the dispensary twelve times. The sanitary condition of the town is unsatisfactory. Water-supply is good and abundant. The total treated was 10,864 out-door and 36 in-door patients against 12,218 and 40 in 1888 and 11,558 and 47 in 1887, respectively. The most common diseases were malarious fevers, worms, rheumatic and respiratory affections and diseases of the digestive system and skin. There was no epidemic. Three major surgical operations were performed. Vaccination is carried

on by the táluka vaccinator. Two post-mortem examinations were made. The total cost was Rs. 1,194, the cost per patient Re. 0-1-9 as compared with Rs. 1,388-15-10 and Re. 0-1-9 in 1888, and Rs. 2,209-8-10 and Re. 0-3-0 in 1887, respectively.

COWASJI DINSHAW PETIT DISPENSARY, UMBARGAON.—*In charge of* Hospital Assistant SHRIPAT HARI.

The buildings are in good repair. The compound should be enclosed. The committee hold monthly and quarterly meetings. Sanitary arrangements are not good. The water-supply is sufficient, but inferior in quality. The total treated was 6,683 out-door and 41 in-door patients, as compared with 6,645 and 77 in 1888 and 5,358 and 23 in 1887 respectively. The most common diseases were malarious fevers, worms, diarrhœa and skin diseases. There was no epidemic. Vaccination is performed by the táluka vaccinator. The dispensary was inspected in December by the Civil Surgeon, Thána. The total cost was Rs. 853-1-0, the cost per patient Re. 0-2-0 against Rs. 1,315-15-2 and Re. 0-3-1 in 1888, and Rs. 1,958-10-6 and Re. 0-5-9 in 1887, respectively.

SIR DINSHAW MANEKJI PETIT DISPENSARY, MURBA'D.—*In charge of* Hospital Assistant MOSES ELIJAH.

The institution was opened on 1st July 1888. The buildings require repairs. The committee visited the dispensary seven times. The sanitary condition of the town is bad. The water-supply is scanty. The total treated was 2,620 out-door and 9 in-door patients. The prevailing diseases were malarious fevers, diseases of the digestive system and skin-diseases. There was no cholera but measles, chicken-pox and small-pox were prevalent. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Thána, in December. The total cost was Rs. 1,525-9-11 and the cost per patient Re. 0-9-3.

EDULJI FRAMJI ALLBLESS LEPER HOME, TROMBAY—*In charge of* Mr. MANOEL DESILVA.

The building is in good repair. The committee visited frequently. The sanitary condition of the town is good. The water supply is deficient and inferior in quality. The total treated of in-door lepers was 40 as compared with 34 in 1888 and 33 in 1887. Of these 14 left the asylum and 3 died,—1 from old age and debility, 1 from chronic dysentery and 1 committed suicide. The total cost was Rs. 6,295-5-6, the cost per patient Rs. 157-6-0 against Rs. 3,662-10-3 and Rs. 107-11-7 in 1888 and Rs. 2,887-14-8 and Rs. 87-8-2 in 1887, respectively.

ENDOWED DISPENSARIES.

RUSTOMJI WADIA DISPENSARY, THA'NA.—*In charge of* Assistant Surgeon BARJORJI ARDESIR, G.G.M.C.

The building is well situated and in fair order. The work of building an upper story on the dispensary for the medical officer's quarters was completed during the year. Conservancy is defective, the water-supply is ample and of good quality. The committee visited the dispensary seven times. The total treated was 7,079 out-door patients as compared with 8,396 in 1888 and 8,553 in 1887. The most common diseases were malarious fevers, skin-diseases, worms, bowel-complaints, respiratory and rheumatic affections. No epidemic occurred in the town, but cholera was present in the districts more or less. The total cost was Rs. 6,261-10-6, the cost per patient Re. 0-14-1 against Rs. 7,880-14-8 and Re. 0-15-0 in 1888, and Rs. 5,743-7-0 and Re. 0-10-8 in 1887, respectively.

RAKMABAI DISPENSARY, KALYÁN—*In charge of* Assistant Surgeon PESTONJI BAMANJI, G.G.M.C.

The buildings are in proper order, except the roof of the main building which is leaky. Some articles of furniture are old and rickety, bought some 25 years ago, and require to be renewed. The committee met only twice. The cleanliness of the town is fairly well attended to. The scheme for fresh water-supply for the town has made a slight onward progress. Plans and estimates are being prepared by the Executive Engineer, Thána. The total treated was 5,116 out-door and 59 in-door patients as compared with 5,417 and 63 in 1888 and 5,760 and 57 in 1887, respectively. The most prevalent diseases were malarious fevers, intestinal parasites and affections of the chest and skin. Cholera was prevalent in the town. There were 77 cases with 54 deaths. Eight major surgical operations were performed. Vaccination is carried on by a municipal vaccinator. Seven post-mortem examinations were made and opinion given in a large number of medico-legal cases. The dispensary was inspected twice by the Civil Surgeon, Thána, during the year. The total cost was Rs. 5,161-0-8, the cost per patient Re. 0-15-11 against Rs. 5,760-13-2 and Rs. 1-0-9 in 1888 and Rs. 5,419-14-11 and Re. 0-14-10 in 1887, respectively.

BAI MITHIBAI DISPENSARY, KURLA.—*In charge of* Assistant Surgeon NUSSERWANJI DHANJISHA, G.G.M.C.

The building and out-houses are conveniently situated and in good order. The committee visit the dispensary almost every month Some attention is paid to sanitary matters.

The water-supply is partly from Vehar but chiefly from wells and a tank; from the latter source of bad quality. The total treated was 8,161 out-door and 7 in-door patients as compared with 8,119 and 13 in 1888 and 7,710 and 14 in 1887, respectively. The most common diseases were malarious fevers, skin-diseases, diarrhœa, diseases of the respiratory and digestive systems and worms. Cholera prevailed in an epidemic form in the months of January, August, September and November. One major surgical operation was performed. There were 197 vaccinations and 46 re-vaccinations. Five post-mortem examinations were made and opinion given in several medico-legal cases. The dispensary was inspected twice during the year by the Civil Surgeon, Thána. The total cost was Rs. 5,207-7-1, the cost per patient Re. 0-10-2 against Rs. 5,589-10-1 and Re. 0-10-11 in 1888, and Rs. 5,476-9-0 and Re. 0-11-4 in 1887, respectively.

GOVERNMENT DISPENSARY,

MÁTHERA'N.—*In charge of* Surgeon-Major J. WILKINS.

The dispensary is located in one of the rooms of the Superintendent's office. There is no committee. The sanitary condition of the town is very fair and the water-supply is sufficient. The total number of patients treated were 956 out-door, against 911 in 1888 and 853 in 1887. The most common diseases were worms, malarious fevers, respiratory affections, skin-diseases, bowel complaints and rheumatism. There was no epidemic. The total cost was Rs. 751-14-1, the cost per patient Re.0-12-7 as compared with Rs. 743-10-0 and Re. 0-13-0 in 1888, and Rs. 1,005-6-5 and Re. 1-2-10 in 1887, respectively.

KOLÁBA COLLECTORATE.

GRANT-IN-AID DISPENSARIES.

PEN.—*In charge of* Hospital Assistant MANAJI CUDDUM.

The building is a hired one. The furniture is insufficient. The chairman of the committee visited the dispensary five times. The conservancy of the town is defective; the water-supply good and sufficient. The total treated was 9,656 out-door and 36 in-door patients as compared with 11,108 and 39 in 1888 and 12,467 and 36 in 1887 respectively. The most common diseases were malarious fevers, worms, rheumatic pains, and diseases of the eye, ear and skin. There was no epidemic. Six major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Five medico-legal cases were examined. The dispensary was inspected by the Civil Surgeon, Alibág, in March and October. The total cost was Rs. 1,669-10-9 and the cost per patient Re. 0-2-9 against Rs. 1,722-1-5 and Re. 0-2-5 in 1888 and Rs. 1,777-9-9 and Re. 0-2-3 in 1887 respectively.

MAHÁD.—*In charge of* Hospital Assistant NURSAPPA.

The building is in good repair. The committee visited the dispensary ten times. The sanitary condition is fair but the water-supply is scanty. The total treated was 6,423 out-door and 31 in-door patients as compared with 8,257 and 42 in 1888 and 8,369 and 37 in 1887 respectively. The most common diseases were malarious fevers, worms, rheumatic affections, diarrhœa and skin diseases. There was no epidemic. Six major surgical operations were performed. Vaccination is conducted by the táluka vaccinator. One post-mortem examination was made and opinion given in nine medico-legal cases at the request of the police. The Civil Surgeon, Alibág, inspected the dispensary in March and December. The total cost was Rs. 1,554-2-4, the cost per patient Re. 0-3-10 against Rs. 2,038-13-2 and Re. 0-3-11 in 1888 and Rs. 2,076-12-3 and Re. 0-3-11 in 1887 respectively.

PANVEL.—*In charge of* Hospital Assistant AARON SAMSON.

The building is in a dilapidated condition and requires repair. The committee held only two meetings and the individual members visited the dispensary ten times. The sanitary condition of the town is fair. The water-supply from tanks and wells is insufficient. The new scheme of water-work is under consideration. The total treated was 6,142 out-door and 13 in-door patients as compared with 7,690 and 21 in 1888 and 7,179 and 26 in 1887 respectively. The prevailing diseases were malarious fevers, worms, rheumatic affections, ear and skin diseases, and diarrhœa. Small-pox was prevalent in the town. Six major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Three post-mortem examinations were made at the request of the police. The dispensary was inspected by the Civil Surgeon, Alibág, in April and December. The total cost was Rs. 943-0-2, the cost per patient Re. 0-2-5 against Rs. 1,437-3-9 and Re. 0-3-1 in 1888 and Rs. 1,475-1-6 and Re. 0-3-3 in 1887 respectively.

ENDOWED DISPENSARY.

MRS. PASCOAL DESOUZA DISPENSARY, URAN.—*In charge of* Assistant Surgeon KASIM VIRJI PATEL, L.M.

The building is very unsuitable. The erection of a new building is under contemplation. The committee visited the dispensary several times. The sanitary condition of the town is fair and the water-supply from tanks and wells liable to contamination. The total treated was 6,512 out-door and 4 in-door patients against 7,152 and 8 in 1888 and 6,850 and 1

in 1887 respectively. The most common diseases were malarious fevers, diarrhœa and skin diseases. Two major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Only 117 primary vaccinations and 3 re-vaccinations were performed. One post-mortem examination was made at the request of the police and opinion given in several medico-legal cases. The dispensary was inspected by the Assistant Surgeon, Alibág, in December. The total cost was Rs. 4,486-13-4, the cost per patient Re. 0-11-0 against Rs. 4,123-13-0 and Re. 0-3-2 in 1888 and Rs. 2,846-13-6 and Re. 0-6-7 in 1887 respectively.

GOVERNMENT DISPENSARY.

ALIBÁG.—*In charge of* Assistant Surgeon M. F. PEREIRA, L.M.

The buildings are in good repair. A female ward is badly needed. Some of the articles of furniture and clothing are required. The sanitary condition of the town is good. The water-supply is plentiful. The total treated was 8,243 out-door and 44 in-door patients as compared with 8,300 and 42 in 1888 and 9,069 and 51 in 1887 respectively. The most common diseases were malarious fevers, bronchitis, rheumatism, dysentery, diarrhœa and worms. There was no epidemic. Two major surgical operations were performed. Four post-mortem examinations were made at the request of the police. The total cost was Rs. 4,700-10-4, the cost per patient Re. 0-9-0 against Rs. 5,193-0-7 and Re. 0-9-11 in 1888 and Rs. 5,226-1-0 and Re. 0-9-2 in 1887 respectively.

RATN'AGIRI COLLECTORATE.

RATNÁGIRI CIVIL HOSPITAL.—*In charge of* Surgeon-Major H. MCCALMAN, M.D.

Conservancy—Is bad; the municipality maintain a small staff of sweepers and levy a halálkhor cess on about 195 badly constructed privies. There are no public latrines; the rice fields, nálas and sea shore are the usual resorts for natural purposes.

Water-supply.—From the Náchni spring, is of excellent quality but very inadequate. The repairs to the works lately undertaken will save about 66 per cent. of leakage. The wells supply a fair amount of tolerably good water.

Hospital buildings.—The buildings though in good repair are not quite suitable for the purpose. Additional rooms for an office and operating are required, the plan and estimate for which have been submitted to Government.

General health—Was good, except for the unusual prevalence and severity of dysentery during the rains, aggravated in Ratnágiri by the insanitary condition of the town. Cholera broke out near Rájápur and had not ceased at the end of the year; the mortality was severe, nearly 50 per cent.

Attendance of Patients.—There were in-door patients 129 and out-door 4,436 as compared with 175 and 4,923 in the previous year. The amount collected as hospital stoppages was Rs. 254-11-0. The introduction of the stoppage rules accounts for the decrease in attendance.

Prevailing diseases.—Dysentery, malarial fevers, worms, rheumatic affections, diarrhœa and skin diseases.

Surgical operations.—There were 29 major and 185 minor operations against 20 and 150 respectively in 1888.

Mortality and its causes.—There were 5 deaths—1 from dysentery, 1 from inflammation of the prostate and chronic cystitis, 1 from hydrophobia, 1 from extensive burn, 1 from fatty degeneration of the heart.

Vaccination.—Performed by the táluka vaccinator.

Conduct of establishment—Is reported to be good. First Class Hospital Assistant Mahadeo Cuddum continues to give great satisfaction.

Cost.—The total cost was Rs. 10,051-4-11, the cost per patient Rs. 2-3-2 against Rs. 9,590-8-8 and Rs. 1-14-1 respectively in 1888. The cost of each diet was Re. 0-3-1, or 3 pies less than in the previous year.

SIR DINSHAW MANECKJI PETIT LEPER ASYLUM, RATNA'GIRI.—*In charge of* Surgeon-Major H. MCCALMAN, M.D.

Conservancy.—There being no facilities for the burial of night-soil, it is mixed and covered with dry earth in an adjoining shed, and the resulting poudrette removed from time to time to some distance.

Water-supply.—From a well close to the Asylum gate. It is excellent and sufficient.

Hospital building.—In excellent repair. The three large wards accommodate 100 lepers. The daily average at present is seldom over 45, but in the event of legislation for the confinement of vagrant lepers, the asylum would be filled up and the present accommodation would be found inadequate.

Details of admissions.—There were 28 admissions during the year which, with the 28 remaining on 1st January 1889, give a total of 56 treated. The daily average sick was 34·4. Of the 28 admissions 26 were males and 2 females; by caste 25 Hindus and 3 Mussulmáns. Of the males 14 were cultivators, 4 traders, 1 servant, 1 labourer, 1 beggar,

1 sailor, 1 packer from the Medical Stores, 1 carpenter and 2 had no employment. Two females (married) complete the list. As regards family history, one had a leprous wife and one had a brother who died of the disease; 24 were cases of lepra anæsthetica and 4 of lepra tuberculata.

Mortality.—There were 4 deaths, 3 from general exhaustion and 1 from dysentery. The percentage of deaths to total treated was 7·1 against 12·6 in 1888. Average duration of the disease in these fatal cases was 6¼ years, and the average stay in the hospital 4¼ years.

Results of treatment.—Of the total treated, 1 was discharged at his own request, 25 absconded and 26 remain.

Conduct of Establishment.—Pensioned 1st Class Hospital Assistant Dowlutrao Ghag is reported to be very intelligent, attentive, conscientious and trustworthy.

Cost.—The total cost was Rs. 5,030-1-10, the cost per patient Rs. 89-13-2 as compared with Rs. 4,990-9-2 and Rs. 79-3-6 respectively in 1888.

WESTROPP HOSPITAL, SA'VANTVA'DI.—*In charge of* Dr. D. G. DALGADO, M.D.

Conservancy—Is fairly looked after.

Water-supply.—From a small tank, is hardly sufficient for the wants of such a large town as Sávantvádi. A scheme has been submitted to Government for the supply of water by means of pipes. The new well has been dug but not yet built.

Hospital buildings.—The new buildings were occupied in December 1888 and are in good repair. Two wards of 4 beds each have since been added.

General health.—Good.

Attendance of patients.—Out-door 6,168 and in-door 456 against 5,486 and 410 respectively in 1888.

Prevailing diseases.—Malarial fevers, worms, bronchial catarrh and diarrhœa.

Surgical operations.—19 major and 246 minor as compared with 18 and 286 in the previous year. Among the major were 4 obstetric, 2 hepatic abscess, 2 abscess of the spleen and 1 amputation of the penis.

Mortality and its causes.—There were 26 deaths. Causes,—tubercular phthisis, leprosy, remittent fever, bronchitis and debility.

Vaccination.—238 primary and 19 re-vaccinations against 240 and 24 respectively in 1888.

Medico-legal.—There were 36 medico-legal cases, of which 13 were post-mortem examinations.

Conduct of Establishment.—Reported quite satisfactory.

Cost.—The total cost, including that of the Lunatic and Leper Asylums was Rs. 9,394-15-10, the cost per patient Rs. 1-6-8 against Rs. 9,266-4-0 and Re. 1-9-1 respectively in 1888.

GRANT-IN-AID DISPENSARIES.

DÁPOLI—*In charge of* Hospital Assistant GOPAL HARI.

The building is in good repair. There is no committee. The general health of the town is good. The water-supply is abundant and good. The total treated was 4,332 out-door and 45 in-door patients as compared with 4,384 and 39 in 1888 and 4,177 and 36 in 1887, respectively. The most common diseases were malarious fevers, and rheumatic, respiratory and skin affections. There was no epidemic. Four major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Four post-mortem examinations were made at the request of the Police. The dispensary was inspected by the Deputy Sanitary Commissioner in January and by the Civil Surgeon, Ratnágiri, in December. The total cost was Rs. 1,608-2-10, the cost per patient Rs. 0-5-10, against Rs. 2,607-1-9 and Re. 0-9-5 in 1888 and Rs. 3,239-1-9 and Re. 0-12-3 in 1887, respectively.

CANDY DISPENSARY, VENGURLA.—*In charge of* Assistant Surgeon C. M. RODRIGUES.

The building is in good repair. The committee held twelve meetings. The conservancy of the town is defective. Water-supply is good and abundant. The total treated was 5,304 out-door and 116 in-door patients as compared with 4,838 and 81 in 1888 and 4,892 and 31 in 1887, respectively. The prevailing diseases were malarious fevers, rheumatic and bronchial affections, worms and skin-diseases. There was no epidemic. Eleven major surgical operations were performed. Vaccination was conducted by the municipal vaccinator. One post-mortem examination was made and opinion given in four medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner and the Civil Surgeon, Ratnágiri. The total cost was Rs. 2,715-0-2, the cost per patient Re. 0-8-0 against Rs. 4,798-11-11 and Re. 0-15-7 in 1888, and Rs. 1,755-7-0 and Rs. 0-5-8 in 1887, respectively.

RÁJÁPUR.—*In charge of* Hospital Assistant RAMCHANDRA WARANG.

The dispensary was opened on 1st April 1887. The building is in good repair. The committee visited the dispensary once, but the individual members on several occasions. The sanitary condition of the town is fairly good. Water-supply is good and ample. The total treated was 3,229 out-door and 33 in-door patients as compared with 3,457 and 23 in 1888 and 3,060 and 13 in 1887, respectively. The prevailing diseases were skin-diseases, ague, respiratory and rheumatic affections, worms and dysentery. Cholera made its appearance in December. Fourteen major surgical operations were performed. Vaccination was carried out by the táluka vaccinator. Three post-mortem examinations were made and opinion given in 7 medico-legal cases. The total cost was Rs. 921-7-3, the cost per patient Re. 0-4-6 against Rs. 1,666-3-11 and Re. 0-7-7 in 1888, and Rs. 1,128-11-9 and Re. 0-5-10 in 1887, respectively.

KA'RWA'R COLLECTORATE.

CIVIL HOSPITAL, KÁRWÁR.—*In charge of* Surgeon-Major J. A. HOWELL.

Conservancy—Is well attended to. Night-soil is removed to a distance so as not to interfere with public health.

Water-supply—From wells, is good and abundant.

Hospital Buildings.—In good repair.

General health.—Good. No epidemic of any kind, but syphilis was very common and seen in its various forms in a majority of patients.

Attendance of patients.—In-door 334 and out-door 5,628, as compared with 399 and 6,796 respectively in 1888.

Prevailing diseases.—Malarious fevers, worms, dysentery, syphilitic, rheumatic and skin affections.

Surgical operations.—Six major and 124 minor against 7 and 55 respectively in 1888. The major were amputation of penis for sloughing chancre, paracentesis of the abdomen, reduction of dislocated humerus, and removal of epithelial cancer of the lip.

Mortality and its causes.—There were 9 deaths against 18 in the previous year. Causes: debility 1, leprosy 1, bronchitis 2, pneumonia 1, ascites 1, suppression of urine 1, abscess 1, and starvation 1.

Medico-legal.—One case was examined at the request of the police.

Vaccination—Is conducted by the municipal vaccinator. There were 690 primary and 176 re-vaccinations.

Conduct of Establishment.—First Class Hospital Assistant Ittoo Chowan continues to perform his duties with zeal and ability, and is obliging, attentive and popular amongst all classes of the community. The conduct of the other members of the establishment is satisfactory.

Cost.—The total cost was Rs. 8,890-11-11, the cost per patient Re. 1-7-10 against Rs. 9,843-3-2 and Re. 1-5-10 respectively in 1888. The cost of each diet was Re. 0-2-2 against Re. 0-1-11 in 1888.

GRANT-IN-AID-DISPENSARIES.

KUMTA.—*In charge of* Assistant Surgeon R. J. KAPADIA, L.M. & S.

The buildings are in good condition. The committee visited the dispensary seven times. The general health of the town is fair. Water-supply is fairly good. The total treated was 4,995 out-door and 54 in-door patients as compared with 5,958 and 72 in 1888 and 6,209 and 88 in 1887 respectively. The most common diseases were malarious fevers, worms, respiratory affections, bowel complaints, syphilis and skin diseases. There was no epidemic. Vaccination was carried out by the táluka vaccinator. Three post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Kárwár, in November. The total cost was Rs. 4,039-2-4, the cost per patient Re. 0-12-9 against Rs. 2,555-13-7 and Re. 0-6-9 in 1888 and Rs. 2,428-5-4 and Re. 0-6-2 in 1887 respectively.

HONA'VAR.—*In charge of* Hospital Assistant KESHAV GOVIND.

The building is in good condition. The committee held four regular meetings. The sanitary condition of the town is fair and the water-supply good. The total treated was 2,222 out-door and 41 in-door patients against 2,850 and 42 in 1888 and 4,670 and 64 in 1887 respectively. The prevailing diseases were malarial fevers, dysentery, worms and skin diseases. Cholera and small-pox occurred in the town and surrounding villages. Four post-mortem examinations were made at the request of the police. The Civil Surgeon, Kárwár, inspected the dispensary in November. The total cost was Rs 981-9-5, the cost per

patient Re. 0-6-11 as compared with Rs. 448-1-8 and Re. 0-2-5 in 1888 and Rs. 595-2-0 and Re. 0-2-0 in 1887 respectively.

SUPA.—*In charge of* Hospital Assistant DATTATRAYA GANESH.

The building is in good repair. The furniture and fittings require repair. The committee visited the dispensary nine times. The conservancy is not well attended to. Water-supply is abundant but liable to pollution. The total treated was 1,094 out-door and 28 in-door patients as compared with 1,137 and 47 in 1888 and 1,036 and 50 in 1887 respectively. Malarious fevers, rheumatic affections, worms and skin diseases were the most common diseases. Some cases of small-pox occurred in March and May. Vaccination is conducted by the táluka vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner in April and by the Civil Surgeon, Kárwár, in December. The total cost was Rs. 858-7-10, the cost per patient Re. 0-12-2 against Rs. 882-5-11 and Re. 0-11-11 in 1888 and Rs. 902-3-11 and Re. 0-13-3 in 1887 respectively.

HALIYÁL.—*In charge of* Hospital Assistant BENJAMIN SOLOMON.

The buildings are in good repair. The committee held four meetings. The conservancy is well attended to. Water-supply is sufficient and of good quality. The total treated was 2,875 out-door and 64 in-door patients as compared with 3,281 and 93 in 1888 and 2,971 and 63 in 1887 respectively. The prevailing diseases were malarious fevers, worms, diseases of the eye, chest and digestive system and skin diseases. There was no epidemic. Vaccination was carried on by the local fund vaccinator. Four post-mortem examinations were made. The dispensary was inspected by the Deputy Sanitary Commissioner in July. The total cost was Rs. 890-10-7, the cost per patient Re. 0-4-10 against Rs. 1,381-14-0 and Re. 0-6-6 in 1888 and Rs. 1,161-2-2 and Re. 0-6-1 in 1887 respectively.

SIRSI.—*In charge of* Assistant Surgeon V. B. KARANDIKAR, L.M. & S.

The buildings are in good repair. The committee met regularly every month. Sanitary arrangements are not satisfactory. The water-supply is abundant but liable to contamination by soakage. The total treated was 8,445 out-door and 103 in-door patients against 9,457 and 95 in 1888 and 8,052 and 89 in 1887 respectively. The most common diseases were malarious fevers, worms, skin and respiratory affections, chronic rheumatic and venereal diseases. Slight epidemic of small-pox prevailed at the beginning of the year. Nine major surgical operations were performed. Vaccination was conducted by the táluka vaccinator. Three post-mortem examinations were made at the request of the police. The total cost was Rs. 3,303-5-1, the cost per patient Re. 0-6-2 as compared with Rs. 3,125-1-10 and Re. 0-5-2 in 1888 and Rs. 3,056-8-11 and Re. 0-6-0 in 1887 respectively.

YELLÁPUR.—*In charge of* Hospital Assistant SAMUEL SAMSON.

The buildings are in good repair. The committee visited the dispensary ten times. The sanitary condition of the town fair and water-supply sufficient. The total treated was 2,409 out-door and 42 in-door patients as compared with 2,553 and 94 in 1888 and 2,414 and 77 in 1887 respectively. The prevailing diseases were malarious fevers, worms, bowel complaints and skin diseases. There was no epidemic. Vaccination is performed by the local fund vaccinator. The total cost was Rs. 1,003-13-9, the cost per patient Re. 0-6-6 against Rs. 2,298-1-5 and Re. 0-13-10 in 1888 and Rs. 1,590-14-4 and Re. 0-10-2 in 1887 respectively.

SIDDÁPUR.—*In charge of* Hospital Assistant RAMCHANDRA VISHNU.

The building is in good repair. The committee visited the dispensary fourteen times. The town is kept clean; the water-supply is sufficient and good. The total treated was 2,858 out-door and 31 in-door patients as compared with 3,458 and 38 in 1888 and 1,742 and 34 in 1887 respectively. The most common diseases were malarious fevers, rheumatic and respiratory affections, dysentery, worms, and skin diseases. Small-pox prevailed in the surrounding villages but not in the town. Three post-mortem examinations were made at the request of the police. The total cost was Rs. 979-14-7, the cost per patient Re. 0-5-5 against Rs. 1,219-10-3 and Re. 0-5-7 in 1888 and Rs. 1,075-5-4 and Re. 0-9-8 in 1887 respectively.

GOVERNMENT DISPENSARY.

MUNDGOD.—*In charge of* Hospital Assistant D. NARAYENRAO.

The building is in good repair. The sanitary condition of the town is good and the water-supply from the tank is sufficient but not good. The total treated was 2,610 out-door and 56 in-door patients as compared with 2,202 and 69 in 1888 and 2,157 and 60 in 1887 respectively. Malarious fevers, skin diseases, worms, bowel-complaints and respiratory affections were the most common diseases. Cholera and small-pox occurred in two villages of the petha. Vaccination is conducted by the petha vaccinator. The total cost was Rs. 1,012-12-2, the cost per patient Re. 0-6-0 against Rs. 925-13-8 and Re. 0-6-6 in 1888 and Rs. 923-2-2 and Re. 0-6-7 in 1887 respectively.

DECCAN.

POONA COLLECTORATE.

SASSOON GENERAL HOSPITAL, POONA.—*In charge of* Brigade Surgeon H. COOK, M.D.

Conservancy.—A city conservancy establishment is maintained at a cost of Rs. 53,748 per annum. No change has been made in the system of conservancy during the year. The surface drainage works are in progress in the city. The hospital conservancy is well attended to by the hospital establishment.

Water-supply.—The quantity is abundant and the quality good, supplied by aqueducts and canal. The hospital is supplied by pipes from the Khadakvásla water works.

Hospital Buildings.—No new buildings were erected. Plank ceilings were fixed to the three private wards. Four new bath-rooms were put up on the upper floor of the hospital for males and females, European and native, separately. Addition was made in the bath-room of the obstetric, and the small room on the south end was enlarged so as to accommodate 3 lying-in cases.

General health.—The general health of the town and district has been fairly good. A few cases of cholera were admitted in the months of July and August after the Pandharpur fair, and again in October after the Jejuri fair, and a few sporadic cases occasionally during most of the other months of the year. The total admitted into hospital was 31, of which 18 died.

Details of treated.—The total number of in-door patients treated was 2,632 against 2,613 in previous year, of out-door patients 11,433 against 11,364. Of the in-door patients 1,623 were discharged cured, 320 relieved, 370 absented, 231 died and 88 remained under treatment.

Prevailing diseases.—The principal diseases among out-patients were malarial fevers, diseases of the digestive system, skin and eye diseases, rheumatic and syphilitic affections, and injuries. Among in-patients malarial fevers, syphilis, diseases of the digestive system, and injuries.

Mortality.—Total number of deaths 231, or 8·7 per cent to total treated. The chief causes of death were dysentery 36, cholera 18, diarrhœa 19, lung complaints 14, debility 11.

Surgical operations.—156 major operations were performed and 1,092 minor operations. Of these, 36 were amputations, 10 paracentesis abdominis, 32 lithotomies, 10 exploration of hepatic abscess.

Vaccination—Is regularly practised every Monday morning with calf-lymph. The vaccinator does his work successfully and is not wholly occupied at the hospital but works at other places.

Medico-legal cases.—There were 60 dead bodies examined during the year sent by the police. Of these 32 were males, 18 females, 4 children and 6 fœtuses. The causes of death were drowning 14, poisons 6, natural causes 25, violence 3, unascertained 8, and still-born 4.

Conduct of Establishment.—The Civil Surgeon speaks highly of the care and ability with which Surgeon G. H. Bull performed the duties of Assistant Civil Surgeon. Senior Apothecary Fearn performed his duties satisfactorily. Assistant Surgeon Ráo Sáheb Bhicaji Amrut Chobbe performed his duties with zeal and ability, and Assistant Surgeon D. G. Sabnis gave satisfaction.

The Sisters and nurses are highly praised, and did much to alleviate the sufferings of the sick.

The total cost was Rs. 44,469-13-6, the cost per patient Rs. 3-2-7 against Rs. 41,759-14-11 and Rs. 2-15-8 respectively in 1888. The cost of each diet for Europeans was Re. 0-9-2 and for natives Re. 0-3-6 against Re. 0-7-2 and Re. 0-3-7 respectively in 1888.

ROMAN CATHOLIC ORPHANAGE SCHOOL.—*In charge of* Surgeon E. W. YOUNG.

The conservancy is well looked after, the water-supply is abundant and of excellent quality. The general health of the inmates is good. The sick children and ladies of the community are treated in well-ventilated rooms attached to the Saint Anne School within the compound of the convent. The cases of contagious nature are treated in separate rooms

attached to the building. Besides the above persons, sick nuns are frequently sent from the Bombay convent for treatment. The total number of admissions was 349 as compared with 382 in 1888. The prevailing diseases were malarial fevers and bronchial catarrh. One death occurred from rupture of the stomach in May. Vaccination is carefully attended to. Conduct of the establishment is good. The total cost was Rs. 1,104-7-8, the cost per patient Rs. 3-1-10 against Rs. 1,246-8-5 and Rs. 3-3-6 respectively in 1888.

GRANT-IN-AID DISPENSARIES.

SÁSVAD.—*In charge of* Hospital Assistant SHAIK USIFF.

The building is a hired one. There is no accommodation for in-patients. The committee visited the dispensary nine times. The conservancy of the town is well looked after. The water-supply is obtained from the river, and is liable to pollution. The total treated was 8,013 patients as compared with 4,793 in 1888 and 4,823 in 1887. The prevailing diseases were malarial fevers, worms and diseases of the eye, ear and skin. Cholera prevailed in the town from July to October. There were 73 cases and 46 deaths. Three major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Three post-mortem examinations were made at the request of the Police. The dispensary was inspected in February by the Deputy Sanitary Commissioner and in December by the Civil Surgeon, Poona. The total cost was Rs. 921-13-5, the cost per patient Re. 0-1-10 against Rs. 890-4-8 and Re. 0-2-11 in 1888, and Rs. 1,474-4-0 and Re. 0-4-10 in 1887, respectively.

JEJURI.—*In charge of* Hospital Assistant SEVA'PPA' LAXUMON.

The building is suitable and in good repair. The dispensary was visited by the committee six times. The sanitary condition of the town is indifferent, the water-supply abundant, but liable to contamination. The total treated was 5,001 out-door and 4 in-door patients as compared with 5,451 and 9 in 1888 and 5,909 and 5 in 1887, respectively. The most common diseases were malarial fevers, eye, ear and skin diseases, worms and rheumatic affections. There was no epidemic. There were 19 major surgical operations performed. Vaccination is carried out by the táluka vaccinator. Four post-mortem examinations were made at the request of the Police. The institution was inspected by the Deputy Sanitary Commissioner in February and by the Civil Surgeon, Poona, in December. The total cost was Rs. 1,026-5-11, the cost per patient Re. 0-3-3 against Rs. 1,513-14-5 and Re. 0-4-5 in 1888, and Rs. 1,048-9-7 and Re. 0-2-10 in 1887, respectively.

BÁRÁMATI.—*In charge of* Hospital Assistant GANGA'DIN.

The building, a hired one, is in good repair. The committee visited the dispensary every month. The sanitary condition of the town is fairly good. The water-supply from the canal and river is good, but deficient in the hot weather. The total treated was 4,594 out-door and 21 in-door patients as compared with 6,096 and 15 in 1888 and 5,967 and 18 in 1887, respectively. The prevailing diseases were ophthalmia, malarious fevers, worms, dysentery, diarrhœa, and skin diseases. Cholera occurred during the year. There were 48 cases and 16 deaths. Seven major surgical operations were performed. Vaccination is conducted by the táluka vaccinator. Four post-mortem examinations were made, and opinion given in 16 medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner in February and by the Civil Surgeon, Poona, in December. The total cost was Rs. 995-14-5, the cost per patient Re. 0-3-3 against Rs. 1,227-13-9 and Re. 0-3-2 in 1888, and Rs. 1,435-14-10 and Re. 0-3-10 in 1887, respectively.

INDÁPUR.—*In charge of* Native Doctor RA'MJI MALHAR.

The building, a hired one, is in fair repair. The dispensary was visited by the committee three times. The sanitary condition of the town is fairly good. Water-supply is abundant and of good quality. The total treated was 6,202 out-door and 35 in-door patients as compared with 7,186 and 17 in 1888 and 7,090 and 36 in 1887 respectively. The most common diseases were malarial fevers, worms, rheumatic affections, diseases of the eye and skin, and injuries. Cholera was prevalent in July and August—63 cases and 22 deaths. Vaccination was conducted by the táluka vaccinator. Five post-mortem examinations were made, and advice given in several medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner and by the Civil Surgeon, Poona. The total cost was Rs. 956-12-8, the cost per patient Re. 0-2-5 against Rs. 1,126-10-7 and Re. 0-2-6 in 1888, and Rs. 1,082-7-1 and Re. 0-2-5 in 1887, respectively.

JUNNAR.—*In charge of* Hospital Assistant BA'PUJI JANA'RDHAN.

The building is convenient for out-patients only; accommodation for in-door patients as well as a post-mortem room is much needed. The committee did not visit the dispensary. Conservancy of the town is fairly attended to. The water-supply was sufficient. The total treated was 6,963 out-door against 6,636 in 1888 and 6,535 in 1887. The most common diseases were malarial fevers, worms, ophthalmia and skin diseases. There were 402 cases of cholera in the town and its surrounding villages, of which 180 proved fatal. One major surgical

operation was performed. Vaccination is carried on by the táluka vaccinator. Five post-mortem examinations were made at the request of the Police, and opinion given in 20 medico-legal cases. The dispensary was inspected by the Civil Surgeon on the 26th December. The total cost was Rs. 832-10-1, the cost per patient Re. 0-1-10 against Rs. 901-13-1 and Re. 0-2-2 in 1888 and Rs. 1,120-6-0 and Re. 0-2-8 in 1887, respectively.

KHED.—*In charge of* Hospital Assistant SHAIK ABDUL RAJUK.

The building is in good repair. The committee visited the dispensary once. Sanitation of the town is unsatisfactory; the water-supply from the river is abundant, but liable to pollution. The total treated was 4,374 out-door and 32 in-door patients as compared with 4,156 and 33 in 1888 and 4,251 and 48 in 1887, respectively. The prevailing diseases were ophthalmia, worms, skin diseases, malarial fevers and other diseases of digestive system. There was no epidemic. Seven major operations were performed. Vaccination is performed from house to house. Three post-mortem examinations were made at the request of the Police, and several medico-legal cases were reported on. The dispensary was inspected by the Civil Surgeon, Poona, on 26th December. The total cost was Rs. 859-15-0, the cost per patient Re. 0-3-1 against Rs. 794-13-7 and Re. 0-3-0 in 1888 and Rs. 1,177-12-7 and Re. 0-4-4 in 1887.

TALEGAON DÁBHÁDA.—*In charge of* Hospital Assistant BHUYAH SING.

The building is in good repair; a female ward is badly needed. The committee visited the dispensary every month. The sanitary condition of the town is fair. The water-supply is abundant and of good quality. The total treated was 8,594 out-door and 17 in-door patients against 10,294 and 15 in 1888 and 7,963 and 16 in 1887, respectively. The prevailing diseases were ophthalmia, worms, skin diseases, malarial fevers, diseases of the respiratory and digestive systems. There was no epidemic. Four major operations were performed. Vaccination is conducted by the Local Fund vaccinator from house to house. Two post-mortem examinations were made and opinion given in several medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner on the 10th April and by the Civil Surgeon, Poona, on 3rd December. The total cost was Rs. 941-0-6, the cost per patient Re. 0-1-8 as compared with Rs. 1,309-7-7 and Re. 0-2-0 in 1888 and Rs. 911-10-11 and Re. 0-1-9 in 1887, respectively.

TALEGAON DHAMDHERA.—*In charge of* Hospital Assistant NARSAPA POCHAYA.

The building, a hired one, is in good repair. A dead-house is wanted. The committee visited the dispensary every three months. There is no attempt at sanitation whatever. The water-supply from the river and two wells is liable to pollution. The total treated was 3,851 out-door and 3 in-door patients against 3,336 and 3 in 1888 and 3,612 and 3 in 1887, respectively. The most common complaints were ophthalmia, skin diseases, worms and malarial fevers. Cholera broke out in September and October in the town and surrounding villages. Nineteen cases were reported, of which 12 proved fatal. Three major operations were performed. Vaccination is carried on from house to house by táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Poona, on the 14th December. The total cost was Rs. 757-7-8, the cost per patient Re. 0-3-1 against Rs. 800-13-4 and Re. 0-3-10 in 1888 and Rs. 956-0-3 and Re. 0-4-2 in 1887, respectively.

ÁLANDI.—*In charge of* Hospital Assistant ANTAJI GOPAL.

The building is a portion of the dharmshála, and though in good repair, is quite unsuitable for the purpose. A dead-house and a latrine are much needed. The committee visited the dispensary every month. Sanitation is bad. The water-supply is ample but liable to pollution. The total treated was 3,901 out-door and 1 in-door patients against 4,217 and 12 in 1888 and 4,702 and 8 in 1887, respectively. The prevailing diseases were worms, ophthalmia and skin diseases. There were only 6 cases of cholera during the year. Vaccination is performed from house to house by the táluka vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner on the 16th November and by the Civil Surgeon, Poona, on the 7th December. The total cost was Rs. 686-14-2, the cost per patient Re. 0-2-9 against Rs. 966-14-5 and Re. 0-3-7 in 1888 and Rs. 841-6-1 and Re. 0-2-10 in 1887, respectively.

ENDOWED DISPENSARY.

KHÁN BAHÁDUR PESTONJI SORABJI DISPENSARY, POONA.—*In charge of* Assistant Surgeon DADA NATHAJI SELKE.

The building is kept in good repair by the Public Works Department but is quite unsuitable for the purpose. The dispensary was visited by a single member of the committee every month. Sanitation is bad. The water-supply is plentiful and of good quality but liable to contamination. The total treated was 20,944 out-door and 21 in-door patients as compared with 22,368 and 17 in 1888 and 20,352 and 42 in 1887, respectively. The prevailing diseases were skin diseases, worms, malarial fevers, diseases of the digestive and respiratory system, ophthalmia and ear diseases. There were 804 cases of cholera in the town with 297 deaths.

Ten major operations were performed. Vaccination is performed by municipal vaccinators. There were 3,066 primary vaccinations and 1,420 re-vaccinations. The dispensary was inspected thrice by the Civil Surgeon, Poona. The total cost was Rs. 4,495-6-5, the cost per patient Re. 0-3-5 against Rs. 5,317-9-1 and Re. 0-3-9 in 1888 and Rs. 4,873-0-8 and Re. 0-3-9 in 1887, respectively.

AHMEDNAGAR COLLECTORATE.

RIPON HOSPITAL, AHMEDNAGAR.—*In charge of* Surgeon-Major R. BOUSTED *till 31st January,* Surgeon A. PETERKIN *up to 22nd February,* Surgeon W. P. CARSON *till 20th December, afterwards* Surgeon-Major W. H. HENDERSON.

Conservancy.—Is the same as previously described. Cess-pits are numerous and badly cleaned. More latrines are necessary.

Water-supply.—Abundant and derived from four aqueducts supplied by wells and springs in their vicinity. Two new wells have been lately sunk to increase the supply about two miles off the city.

Hospital buildings.—On the 10th July 1888, the Ripon Hospital was opened. The buildings are almost new and afford excellent accommodation for the sick.

General health.—Fair on the whole; cholera broke out in the city and there were 164 cases with 72 deaths from June to October.

Attendance of patients.—318 in-door and 13,418 out-door patients were treated against 292 and 12,715, respectively, in 1888.

Prevailing diseases.—Malarious fevers, ophthalmia, chest and skin affections and worms.

Surgical operations.—64 major operations were performed—all successfully. Of the 1,117 minor operations, the most important were the reductions of dislocations and injuries caused by assault of a very serious nature.

Mortality and its causes.—18 deaths occurred in the hospital, 2 general debility, 3 dysentery, 2 pneumonia croupous, 2 chronic and 1 acute pneumonic phthisis, 1 acute nephritis, 1 extravasation of urine, 2 chronic diarrhœa, 1 enteritis, 1 hepatic abscess, 1 syphilis ulcerative and destructive and 1 hemiphlegia.

Medico-legal.—There were 38 cases including 13 for post-mortem examination; of these 2 were cases of cattle-poisoning.

Vaccination—1,562 primary vaccinations were performed, of which 1,488 were successful.

Conduct of establishment.—Very good. 1st Class Hospital Assistant Sitaram Daji and 2nd Class Hospital Assistant Piraji Jadow are commended for the excellent work done by them.

Cost.—The total cost was Rs. 5,959-15-0, the cost per patient Re. 0-6-11 against Rs. 14,622-0-1 and Rs. 1-1-11 respectively in 1888. The cost of each diet was Re. 0-3-0, being the same as last year. The great reduction in cost was due to the charge being held, for the greater part of the year, by a regimental officer in addition to his own duty.

GRANT-IN-AID DISPENSARIES.

SANGAMNER.—*In charge of* Hospital Assistant HURRI KAKAJI.

The building is in good repair. The dispensary committee visited the dispensary twice. The sanitation of the town is satisfactory. The water-supply is copious. The total treated was 8,516 out-door and 37 in-door patients as compared with 10,977 and 30 in 1888 and 11,728 and 49 in 1887, respectively. The prevailing diseases were ophthalmia, skin diseases, malarial fevers, worms, diseases of the digestive and respiratory systems. There were 31 cases of cholera, of which 14 proved fatal. Small-pox was prevalent in April. Five major operations were performed. Vaccination is carried on by the local fund vaccinator. Twenty-eight medico-legal cases were sent by the Police for examination and report. Of these, 9 were for post-mortem examination. The dispensary was inspected by the Civil Surgeon on 15th May. The total cost was Rs. 1,018-11-0, the cost per patient Re. 0-1-10 against Rs. 1,369-6-10 and Re. 0-1-11 in 1888 and Rs. 1,598-14-6 and Re. 0-2-2 in 1887, respectively.

NEVÁSA.—*In charge of* Hospital Assistant RAMCHANDRA ATMAJI.

The building is in good repair. The committee visited the dispensary every third month. No system of conservancy is in force. The water-supply from the river is good and plentiful. The total treated was 3,276 out-door and 30 in-door patients against 3,532 and 15 in 1888, and 4,152 and 18 in 1887 respectively. The most common complaints were ophthalmia, skin-diseases, worms and malarial fevers. There was no epidemic. Three major operations were performed. Vaccination is carried out by the táluka vaccinator. Several

post-mortem examinations were made at the request of the police, and opinion given on 22 medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner and the Civil Surgeon, Ahmednagar. The total cost was Rs. 893-11-4, the cost per patient Re. 0-4-3, as compared with Rs. 599-2-1 and Re. 0-2-8 in 1888, and Rs. 904-0-4 and Rs. 0-3-5 in 1887, respectively.

SHEVGAON.—*In charge of* Hospital Assistant ABRAHAM DAVID.

The building is in good repair. A cook-house is needed. The latrine requires repair. The committee visited the dispensary four times. The sanitary and conservancy arrangements are unsatisfactory. The water-supply is good and abundant, but liable to contamination by soakage. The total treated was 2,410 out-door and 38 in-door patients against 2,543 and 30 in 1888, and 2,984 and 25 in 1887 respectively. The most prevalent diseases were of the eye, skin and digestive system, but worms and malarial fevers also were common. Three cases of cholera occurred. One major operation was performed. Vaccination is carried on by the táluka vaccinator. Seven post-mortem examinations were made at the request of the police. The dispensary was inspected by the Civil Surgeon in May and by the Deputy Sanitary Commissioner in November. The total cost was Rs. 905-12-8, the cost per patient Re. 0-5-11 against Rs. 942-11-10 and Re. 0-5-10 in 1888, and Rs. 866-3-4 and Re. 0-4-7 in 1887 respectively.

PARNER.—*In charge of* Hospital Assistant NARAYEN GOVIND SATHE.

The dispensary building is quite unsuitable for the purpose. The Committee hold their meetings every three months, but individual members visit the dispensary frequently. There is no system of conservancy. The water-supply is abundant and good. The total treated was 3,033 out-door and 35 in-door patients as compared with 2,667 and 15 in 1888 and 2,580 and 7 in 1887 respectively. Diseases of the digestive system, skin and eye and malarial fevers were the most prevalent. A few cases of cholera occurred in September. One major operation was performed. Vaccination is carried on by the táluka vaccinator. One post-mortem examination was made, and opinion given in several medico-legal cases. The total cost was Rs. 714-4-5, the cost per patient Re. 0-3-8 against Rs. 790-15-8 and Re. 0-4-8 in 1888, and Rs. 776-10-4 and Re. 0-4-9 in 1887. The dispensary was inspected by the Civil Surgeon, Ahmednagar.

AKOLA.—*In charge of* Hospital Assistant DAVID AARON.

The dispensary was opened on the 2nd January 1888. It is in a fair state of repair. A dead-house, a female ward and a small room for examining patients are required. The committee visited the dispensary once. The sanitation is defective. The water-supply is abundant but liable to pollution by soakage. The total treated was 4,591 out-door and 27 in-door patients against 3,990 and 2 respectively in 1888. The most common complaints were skin-diseases, malarial fevers, worms and ophthalmia. Cholera, said to have been imported from Násik, gave 93 cases. Eleven major operations were performed. Vaccination is performed by the táluka vaccinator. Three post-mortem examinations were made and opinion given in several medico-legal cases at the request of the police. The dispensary was inspected by the Civil Surgeon, Ahmednagar. The total cost was Rs. 675-0-6, the cost per patient Re. 0-2-4 against Rs. 1,280-11-6 and Re. 0-5-1 respectively in 1888.

NA'SIK COLLECTORATE.

CIVIL HOSPITAL, NA'SIK.—*In charge of* Surgeon-Major M. L. BARTHOLOMEUSZ *till 27th April, afterwards* Assistant Surgeon J. P. WADIA, L.M.&S.

Conservancy.—Satisfactory under the efficient supervision of the Municipal Health Superintendent. A few latrines on the Crawford system are provided. Night soil is carted away to a distance from the town.

Water-supply.—From the rivers Godavery and Nasurdi; is abundant, but liable to pollution. A scheme for improving the water-supply and for drainage has long been deferred for want of funds.

Hospital Buildings.—Continue to be the old, wretched and unsuitable ones that have been in use for the last 49 years, but a new building has been sanctioned by Government at a total estimated cost of Rs. 35,225, of which the District Local Board and Municipality have contributed a third each.

General Health.—Satisfactory on the whole. There were 50 cases of small-pox with 6 deaths in January and 205 of cholera with 103 deaths from April to August.

Attendance of patients.—There were 243 in-door and 5,336 out-door patients treated against 263 and 6,214 respectively in 1888. The decrease is attributed to the fact that the year 1889 was healthier than 1888 and much more so than 1887.

Prevailing diseases.—Malarial fevers rank first on the list, then follow skin-diseases intestinal parasites, respiratory, eye and ear affections, ulcers, diarrhœa and dysentery.

Surgical cases.—10 major operations were successfully performed of which 8 were lateral lithotomies, 1 amputation of the arm and 1 removal of fibrous tumour of the jaw.

Mortality and its causes.—There were 24 deaths in the hospital—7 from diarrhœa, 4 from cholera, 2 from debility, 2 from pneumonia, 1 each from paralysis, dysentery, scurvy, tetanus, fracture of the skull, compound fracture of the leg, dropsy, remittent fever and gangrene.

Vaccination.—By the municipal vaccinator under the Deputy Sanitary Commissioner. There were 957 primary and 40 re-vaccinations.

Medico-legal.—12 post-mortem examinations and 3 of cattle poisoning were made and 88 medico-legal cases examined and reported upon at the request of the police.

Conduct of establishment.—Good. 1st Class Hospital Assistant Ramsingh is commended for zeal and steadiness.

Cost.—The total cost was Rs. 8,166-1-10, the cost per patient Rs. 1-7-5 against Rs. 10,083-15-1 and Rs. 1-8-10 respectively in 1888. The cost of each diet was Re. 0-2-3 against Re. 0-1-11 in 1888.

GRANT-IN-AID DISPENSARIES.

Malegaon.—*In charge of* Assistant Surgeon K. T. Gokhale, L.M. & S.

The building is in good repair. Steps have been taken to build a dead-house. The committee held their meetings four times. The sanitation of the town is indifferent. The water-supply is very deficient. The total treated was 16,037 out-door and 26 in-door patients as compared with 15,434 and 26 in 1888, and 13,267 and 38 in 1887 respectively. The prevailing diseases were malarial fevers, ophthalmia, skin diseases, respiratory affections, dysentery and worms. There occurred 345 cases of cholera with 194 deaths in surrounding villages. Six major operations were performed. Vaccination is carried on by a municipal vaccinator. Nine post-mortem examinations were held, evidence given in 8 medico-legal cases and several certificates granted at the request of the police. The dispensary was inspected, twice by the Civil Surgeon, Násik, in June and December, and once by the Deputy Sanitary Commissioner in December. The total cost was Rs. 2,485-0-10, the cost per patient Re. 0-2-5 against Rs. 2,679-13-4 and Re. 0-2-8 in 1888, and Rs. 4,718-11-6 and Re. 0-5-8 in 1887 respectively.

Yeola.—*In charge of* Hospital Assistant Shaik Surfraz Hakim.

The buildings are in good repair. The committee visited the dispensary six times. The sanitation of the town is satisfactory. The water-supply from wells is deficient during hot season. The total treated was 12,100 out-door and 33 in-door patients as compared with 17,045 and 3 in 1888, and 14,674 and none in 1887 respectively. The most common diseases were ophthalmia, malarial fevers, skin-diseases, respiratory affections and worms. Small-pox was prevalent from January to July and cholera from March to October. Seven major surgical operations were performed. Vaccination is carried out by the municipal vaccinator. Four post-mortem examinations were held and opinion given in 20 medico-legal cases. The dispensary was inspected twice by the Civil Surgeon, Násik, in May and December. The total cost was Rs. 1,275-10-9, the cost per patient Re. 0-1-8, as compared with Rs. 1,417-6-3 and Re. 0-1-3 in 1888 and Rs. 1,503-13-3 and Re. 0-1-7 in 1887 respectively.

Dindori.—*In charge of* Hospital Assistant Busantsingh.

The dispensary is in good repair. The committee held their meetings monthly. The sanitary condition of the town is fair considering that there is no municipality. The water-supply is deficient. The total treated was 4,508 out-door and 24 in-door patients as compared with 4,451 and 11 in 1888, and 5,347 and 16 in 1887 respectively. The prevailing diseases were ophthalmia, malarial fevers, worms and skin-diseases. There was only one case of cholera in Dindori, but many in its surrounding villages. Vaccination is performed by the táluka vaccinator. Three post-mortem examinations were made and several medico-legal cases reported on. The dispensary was inspected by the Deputy Sanitary Commissioner on the 28th April, and by the Civil Surgeon, Násik, in May and November. The total cost was Rs. 1,213-1-10, the cost per patient Re. 0-4-3 against Rs. 1,105-8-9 and Re. 0-3-11 in 1888 and Rs. 1,336-3-2 and Re. 0-3-11 in 1887 respectively.

Sinnar.—*In charge of* Hospital Assistant Narayen Dhondoo.

The dispensary is in a fair state of repair. The committee visited the dispensary monthly. The sanitation is fairly looked after. The water-supply is good. The total treated was 9,752 out-door and 58 in-door patients against 6,237 and 31 in 1888, and 5,534 and 27 in 1887 respectively. The most common diseases were ophthalmia, skin diseases, malarial fever, worms and bowel affections. A few cases of cholera occurred in the town and its vicinity. Vaccination is carried out by the táluka vaccinator. Five post-mortem examinations were held, and opinion given on six medico-legal cases. The dispensary was

inspected by the Civil Surgeon, Násik, in May and December, and by the Deputy Sanitary Commissioner in November. The total cost was Rs. 1,055-15-5, the cost per patient Re. 0-1-8 as compared with Rs. 889-1-2 and Re. 0-2-3 in 1888, and Rs. 1,294-3-9 and Re. 0-3-8 in 1887 respectively.

SATA'NA.—*In charge of* Hospital Assistant EBRAHIM KHAN.

The building is in good repair. The committee visited the dispensary 15 times. They also held quarterly meetings regularly. The sanitation of the town is defective. The water supply is good and abundant. The total treated was 7,880 out-door and 26 in-door patients as compared with 9,036 and 32 in 1888, and 7,034 and 28 in 1887 respectively. The diseases most prevalent were ophthalmia, malarial fevers, worms, skin diseases, respiratory affections and bowel complaints. Forty-six cases of cholera occurred with 22 deaths. 818 cases were attacked in the táluka of which 365 proved fatal. Vaccination is performed by the táluka vaccinator. Opinion was given on 17 medico-legal cases sent by the Magistrate and the police. Two post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Násik, in January and June, and by the Deputy Sanitary Commissioner in December. The total cost was Rs. 859-8-7, the cost per patient Re. 0-1-8 as compared with Rs. 1,294-3-1 and Re. 0-2-3 in 1888 and Rs. 1,260-1-3 and Re. 0-2-10 in 1887 respectively.

PIMPALGAON BASWANT.—*In charge of* Hospital Assistant VINA'YEKRAO DEVAKAR.

The buildings require repair. The furniture is insufficient. The committee meet regularly. The sanitation is defective. The water supply is good and abundant. The total treated was 8,268 out-door and 31 in-door patients against 8,058 and 33 in 1888, and 8,601 and 41 in 1887 respectively. The most common diseases were ophthalmia, worms, skin-diseases, malarial fevers and ulcers. Small-pox and cholera were prevalent in the town and its vicinity. Twenty-one major surgical operations were performed. Vaccination is carried on by the Sanitary Department. Ten post-mortem examinations were held and reports made on 19 medico-legal cases at the request of the police. The dispensary was inspected by the Civil Surgeon, Násik, in April and November, and by the Deputy Sanitary Commissioner. The total cost was Rs. 1,421-14-7, the cost per patient Re. 0-2-9 as compared with Rs. 1,483-15-9 and Re. 0-2-11 in 1888 and Rs. 2,113-6-10 and Re. 0-3-10 in 1887.

TRIMBAK.—*In charge of* Hospital Assistant VISHNU NARAYEN.

The dispensary was opened on 27th March 1888, and is in good repair. A cook-house and a dead-house are required. Furniture is insufficient. The committee visited the dispensary thrice. The sanitation of the town is not satisfactory. The water supply from Visoba's tank is good though insufficient. The total treated was 2,103 out-door and 8 in-door patients, against 1,664 and 7 in 1888 respectively. The most common complaints were worms, malarial fevers, skin-diseases and ophthalmia. There were 3 cases of cholera in April of which 1 was fatal. Vaccination is performed from house to house. The dispensary was inspected by the Civil Surgeon, Násik, in May and December. The total cost was Rs. 646-6-6, the cost per patient Re. 0-4-10, as compared with Rs. 361-10-8 and Re. 0-3-5 in 1888 respectively.

GOVERNMENT DISPENSARY.

PEINT.—*In charge of* Hospital Assistant RAJARAM DAMODAR.

The building is in a fair state of repair. An operating table, a store-room and a private room for patients are required. The Mámletdar visits the dispensary frequently. Sanitation is not attended to. The water supply is generally bad in quality and insufficient. The total treated was 5,997 out-door and 32 in-door patients as compared with 6,983 and 36 in 1888, and 4,073 and 36 in 1887 respectively. The prevailing diseases were worms, eye and skin diseases and malarial fevers. There was no epidemic. Two cases of cholera appeared in the town. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner in May and by the Civil Surgeon, Násik, in November. The total cost was Rs. 857-9-7, the cost per patient Re. 0-2-3 against Rs. 1,057-1-10 and Re. 0-2-4 in 1888, and Rs. 1,357-14-10 and Re. 0-5-3 in 1887 respectively.

KHA'NDESH COLLECTORATE.

CIVIL HOSPITAL, DHULIA.—*In charge of* Surgeon-Major K. A. DALAL.

Conservancy.—Has been much improved. Public latrines are insufficient. Night-soil is buried in trenches at a distance from the town. Many dust-bins have been erected.

Water-supply.—From wells and river. The wells allow of soakage and are therefore impure. River water is good but liable to contamination. The water-works, which have been commenced and which are expected to be finished in about two years, will yield an abundant supply of water.

Hospital buildings.—In very good order.

General health.—Satisfactory, except that cholera was prevalent from June to August. There were reported 85 cases with 33 deaths.

Attendance of patients.—In-door 381, out-door 4,342, against 376 and 4,533, respectively, in 1888.

Prevailing diseases.—Ague, itch, eczema, inflammation of external meatus, worms, venereal and rheumatism.

Mortality and its causes.—36 deaths, most of which were admitted in a moribund state. 7 were due to cholera, 9 to diarrhœa, 3 to starvation, 3 to calculi in bladder, 2 to gangrene, 2 to pneumonia, 1 each to dysentery, tubercle, remittent fever, heart disease, paraplegia, secondary syphilis, ulcer, debility and hypertrophy of spleen.

Surgical operations.—61 major operations were performed, including 33 lateral lithotomies, with 2 deaths.

Vaccination.—Is carried on by the Municipal Vaccinator very satisfactorily.

Conduct of establishment.—Fairly good. First Class Hospital Assistant Shaik Dadoo and Third Class Hospital Assistant Ramchandra Gangadhar are highly spoken of.

Cost.—The total cost was Rs. 12,230-13-3, the cost per patient Rs. 2-9-5, against Rs. 11,325-4-10 and Rs. 2-4-10, respectively, in 1888. The cost of each diet was Re. 0-2-6 or the same as last year.

MUNICIPAL DISPENSARY.

BRANCH DISPENSARY, DHULIA.—*In charge of* Hospital Assistant SHIVRAM NARAYAN.

The building is in good repair and its situation is convenient to the people. The dispensary committee visited once a month. Water-supply is derived from the river, but it is contaminated. The total treated was 6,653 out-door against 7,067 in 1888 and 5,734 in 1887. The most prevalent diseases were malarial fevers, conjunctivitis, chest affections and skin diseases. Seventy-six cases of cholera with 27 deaths occurred. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 936-12-10, the cost per patient Re. 0-2-3 against Rs. 923-13-2 and Re. 0-2-1 in 1888 and Rs. 981-10-9 and Re. 0-2-8 in 1887 respectively.

GRANT-IN-AID DISPENSARIES.

PAROLA.—*In charge of* Hospital Assistant NARAYAN BAPUJI.

The building is in a fair state of repair. One operating table is needed. The committee visited the dispensary twice. The sanitary condition of the town is indifferent; the water-supply from wells is deficient and liable to pollution by soakage. The total treated was 6,038 out-door and 31 in-door patients against 7,873 and 11 in 1888 and 8,534 and 8 in 1887 respectively. The most common diseases were malarial fevers, intestinal worms, rheumatism, conjunctivitis and skin diseases. One hundred and twelve cases of cholera with 36 deaths occurred. One major surgical operation was performed. The dispensary was inspected by the Civil Surgeon in October. The total cost and the cost per patient were Rs. 1,229-2-7 and Re. 0-3-2 against Rs. 1,761-8-2 and Re. 0-3-6 in 1888 and Rs. 1,687-7-0 and Re. 0-3-1 in 1887, respectively.

ERANDOL.—*In charge of* Hospital Assistant MAHADEO MANOHER.

The building requires repairs. The committee visited the dispensary quarterly. The water-supply from wells and river is good and abundant except in hot season. The total treated was 5,614 patients against 7,809 in 1888 and 8,154 in 1887. The most common diseases were malarial fevers, ophthalmia, respiratory affections and diseases of the ear and skin. One hundred cases of cholera with 36 deaths occurred Three major operations were performed. The dispensary was inspected by the Civil Surgeon. The total cost and the cost per patient were Rs. 1,452-6-6 and Re. 0-4-2 against Rs. 799-4-1 and Re. 0-1-7 in 1888 and Rs. 1,668-2-2 and Re. 0-3-3 in 1887, respectively.

CHOPDA.—*In charge of* Hospital Assistant HANUMAN SING.

The building is in good repair. A post-mortem table is required. The committee visited the dispensary monthly. The sanitary condition of the town is fair; the water-supply from wells sufficient. The total treated was 5,795 out-door and 9 in-door patients against 6,540 and 8 in 1888 and 5,516 and 6 in 1887, respectively. The most common diseases were fevers, syphilis, rheumatism, and affections of the skin, eye, chest and bowels. Seventy cases of cholera occurred with 22 deaths. One major operation was performed. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 849-9-1 and the cost per patient Re. 0-2-4 against Rs. 1,339-0-9 and Re. 0-3-3 in 1888 and Rs. 1,266-11-8 and Re. 0-3-8 in 1887, respectively.

SUNDER MULJI DISPENSARY, JALGAON.—*In charge of* Assistant Surgeon M. M. MODY, L. M. & S.

The dispensary buildings are in a sound condition. The dispensary committee visited twice. The sanitary and conservancy arrangements are satisfactory; the water-supply insufficient. The total treated was 7,236 out-door and 33 in-door patients against 8,108 and 31 in 1888 and 7,385 and 19 in 1887. The most common diseases were skin affections, malarial fevers, ophthalmia and worms. There were 43 cases of cholera with 18 deaths: seven major operations were performed. Six post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 2,537-4-6 and the cost per patient Re. 0-5-7 against Rs. 8,002-6-2 and Re. 0-15-8 in 1888 and Rs. 3,382-15-8 and Re. 0-7-3 in 1887, respectively.

NANDURBA'R.—*In charge of* Hospital Assistant SUCCARAM LUXMAN.

The dispensary building requires repairs. The committee visited the dispensary monthly. The sanitary condition of the town is unsatisfactory; the water-supply, chiefly derived from wells, scanty and bad. The total treated was 6,500 out-door against 7,113 and 14 in-door in 1888 and 6,926 and 1 in 1887, respectively. The most common diseases were malarial fevers, worms, skin, respiratory affections and ophthalmia. Cholera was prevalent in the town and the district. There were 303 cases, of which 167 proved fatal. One major surgical operation was performed. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 1,028-12-6, the cost per patient Re. 0-2-6 against Rs. 1,102-10-10 and Re. 0-2-5 in 1888 and Rs. 1,655-14-11 and Re. 0-3-9 in 1887, respectively.

SHIRPUR.—*In charge of* Hospital Assistant RAJARAM BALKRISHNA.

The building is unsuitable. The committee visited the dispensary several times. The sanitary condition of the town is unsatisfactory; the water-supply good and abundant except in hot season. The total treated was 6,047 out-door and 15 in-door patients against 6,812 and 19 in 1888 and 5,915 and 20 in 1887, respectively. The most common diseases were malarial fevers, respiratory affections, ophthalmia, skin and ear diseases and bowel-complaints. There was no epidemic in the town, but cholera and small-pox prevailed in the surrounding villages. Ten major operations were performed. Vaccination is carried out by the táluka vaccinator. Seven post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 1,133-8-0, the cost per patient Re. 0-2-10 as compared with Rs. 1,092-7-3 and Re. 0-2-6 in 1888 and Rs. 2,539-2-11 and Re. 0-6-10 in 1887, respectively.

BHADGAON.—*In charge of* Hospital Assistant DAJEE DHONDEO.

The building is in good repair. The committee visited the dispensary every month. The sanitary condition of the town is unsatisfactory. Water-supply from the river and wells is good and abundant. The total treated was 4,100 out-door and 33 in-door patients as compared with 4,115 and 39 in 1888 and 4,288 and 28 in 1887, respectively. The most common diseases were malarial fevers, rheumatism, syphilis, ophthalmia, worms, and diseases of the respiratory and digestive systems. There was no epidemic. Five major operations were performed. Five post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 966-7-8, the cost per patient Re. 0-3-8 against Rs. 1,145-3-6 and Rs. 0-4-4 in 1888 and Rs. 1,313-13-7 and Re. 0-4-10 in 1887, respectively.

PIMPALNER.—*In charge of* Hospital Assistant BHASKER GOVIND.

The building is in good order. The committee visited the dispensary five times. The sanitary condition of the town is not satisfactory. Water-supply is good and abundant. The total treated was 4,026 out-door and 20 in-door as compared with 4,838 and 16 in 1888 and 4,562 and 22 in 1887, respectively. The most common diseases were malarial fevers, worms, ophthalmia, respiratory affections and skin diseases. Cholera broke out in the town and its vicinity. Fifty cases were treated at the dispensary. Vaccination is conducted by the táluka vaccinator. One post-mortem examination was made. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 1,423-5-10, the cost per patient Re. 0-5-7 against Rs. 1,428-8-2 and Re. 0-4-8 in 1888 and Rs. 1,464-0-4 and Re. 0-5-1 in 1887, respectively.

SHA'HA'DA.—*In charge of* Hospital Assistant AMRUT GOVIND.

The building is unsuitable. A dissecting table is badly needed. The sanitary condition of the town is unsatisfactory and the water-supply from the river sufficient but liable to contamination. The total treated was 2,732 out-door and 2 in-door patients against 3,948 and 9 in 1888 and 4,200 and 30 in 1887, respectively. The most common complaints were malarial fevers, ear and skin diseases, diarrhœa and dyspepsia. Cholera broke out in a mild form; 9 cases were treated in the dispensary. One major surgical operation was performed. Six post-mortem examinations were made. The total cost was Rs. 1,040-11-7, the cost per patient Re. 0-6-1, as compared with Rs. 1,180-4-10 and Re. 0-4-9 in 1888 and Rs. 1,252-6-1 and Re. 0-4-8 in 1887, respectively.

TALODA.—*In charge of* Hospital Assistant WAMAN GANESH.

The present building is unsuitable, but the new buildings are nearly completed. The committee visited the dispensary every month. The sanitary and conservancy arrangements are unsatisfactory. The water-supply is abundant but not of good quality. The total treated was 2,344 out-door patients as compared with 3,032 in 1888 and 3,610 and 3 in-door in 1887. The prevailing diseases were malarial fevers, ophthalmia, bowel-complaints, skin diseases, dyspepsia and ulcers. Eighty-two cases of cholera occurred. Vaccination is carried out by the táluka vaccinator. Five post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 1,464-2-5, the cost per patient Re. 0-9-11 as compared with Rs. 4,257-14-5 and Rs. 1-6-5 in 1888 and Rs. 1,475-8-4 and Re. 0-6-6 in 1887, respectively.

AMALNER.—*In charge of* Hospital Assistant GANPAT NILOBA.

The building is unsuitable. A compounding table is needed. The committee visited the dispensary seven times. The sanitation of the town is unsatisfactory. The water-supply from the river is of inferior quality in hot season. The total treated was 3,861 out-door and 1 in-door patients as compared with 4,293 and 1 in 1888 and 4,301 and none in 1887, respectively. The most common diseases were ague, ophthalmia, respiratory affections, worms and skin diseases. Two major operations were performed. Vaccination is carried out by the táluka vaccinator. Six post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 717-8-8, the cost per patient Re. 0-2-11 as compared with Rs. 4,447-1-8 and Rs. 1-0-6 in 1888 and Rs. 953-4-9 and Re. 0-3-6 in 1887, respectively.

DHARANGAON.—*In charge of* Hospital Assistant MAHADEO CHOODAMAN.

The dispensary was opened on 1st May 1887. The building is in good repair and suitable. The committee visited the dispensary nine times. The sanitary condition of the town is not satisfactory. The water-supply is derived from wells only, some of which are brackish and allow of soakage. The total treated was 4,108 out-door and 7 in-door patients as compared with 3,036 and 4 in 1888 and 1,783 and 2 in 1887, respectively. The most common diseases were malarial fevers, ophthalmia, skin diseases, ulcers, inflammation of the external ear and bowel-complaints. There occurred 265 cases of cholera with 112 deaths and 99 of small-pox with 19 deaths. Vaccination is performed by the local fund vaccinator. Nine post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 1,108-3-0, the cost per patient Re. 0-4-4 against Rs. 1,185-11-10 and Re. 0-6-2 in 1888 and Rs. 697-10-10 and Re. 0-6-3 in 1887, respectively.

SINDKHEDA.—*In charge of* Hospital Assistant VISHNU SHIVRAM.

The dispensary was opened on 15th December 1887. The building is unsuitable. A dissecting table is needed. The committee visited the dispensary monthly and held quarterly meetings. The sanitary condition of the town is not satisfactory. The water-supply from wells and river is brackish. The river water is contaminated by the people washing themselves in it. The total treated was 2,544 out-door and 13 in-door patients as compared with 2,635 and 9 respectively in 1888. The most common diseases were malarial fevers, skin diseases and digestive, respiratory and nervous affections. Cholera was not epidemic, but a few cases occurred in the surrounding villages. Two major operations were performed. Vaccination is carried on by the municipal vaccinator. Four post-mortem examinations were made. The total cost was Rs. 1,103-3-7 and the cost per patient Re. 0-6-10 against Rs. 1,186-11-11 and Re. 0-7-2 respectively in 1888.

NAVA'PUR.—*In charge of* Hospital Assistant BAHÁDUR KHAN.

The dispensary was opened on 23rd October 1889. The building is unsuitable. The sanitary and conservancy arrangements are unsatisfactory; the water-supply from wells sufficient but liable to contamination. The total treated was 550 out-door patients. The most common diseases were malarial fevers and diseases of spleen, lung, skin, respiratory and digestive systems. One major operation was performed. Vaccination is performed by the local fund vaccinator.

SA'VDA.—*In charge of* Hospital Assistant MAGANLAL NAROTAMDAS.

The dispensary was opened on 10th November 1889. The building is suitable. The chairman visited the dispensary twice. The sanitary condition of the town is unsatisfactory. The water-supply is abundant. The total treated was 1,745 out-door patients. The most common diseases were ague, skin diseases and bowel-complaints.

SÁTÁRA COLLECTORATE.

SA'TA'RA CIVIL HOSPITAL.—*In charge of* Surgeon-Major D. C. DAVIDSON.

Conservancy.—The main streets are fairly clean and well looked after, but many parts of the town are not kept clean. It is hoped that the new suburban municipality will improve the conservancy of the town.

Water-supply.—From two sources, Kas and Yateshvar, the latter gives the best water but runs short in the dry weather. The means of distribution is faulty and open to pollution, and it is to be hoped that this will receive attention from the new municipality.

Hospital Buildings.—The latrines have been detached from the main building and improved; minor repairs and alterations have been made. Quarters are greatly needed in the hospital for the 2nd class establishment, they having to live in the city; an infectious ward and one for special surgical cases is also needed.

General Health.—Cholera was prevalent in the city and districts during the rains: 85 cases were reported, of which 28 proved fatal. Strict sanitary measures were adopted to prevent its spread. Small-pox was also prevalent in some of the tálukas, and at the end of the year broke out in the civil station, but was not of a virulent type, and at the end of the year had almost disappeared.

Attendance of Patients.—There were 588 in-door patients and 12,944 out-door, as compared with 555 and 14,457 respectively in the preceding year.

Prevailing diseases.—The most common diseases were malarious fevers, scabies, diseases of the eyes, and respiratory system, local injuries, abscesses and boils and rheumatic affections in the order named.

Surgical operations.—84 major and 716 minor operations as compared with 57 major and 603 minor in the previous year. Amongst the major there were 13 lithotomies, removal of larger tumours 6, foreign bodies from cornea 6, for imperforate anus 2, and reduction of 11 dislocations.

Mortality and its causes.—Twenty-six deaths occurred during the year in hospital—4 from dysentery, ascites 3, Bright's disease 3, cholera 2, phthisis 2, diarrhœa 2, and one each from ague, debility, dementia, bronchitis, enteritis, burn, compression of the brain, exhaustion, spreading gangrene, perineal abscess.

Medico-legal.—Total 28 cases, *viz.* 7 post-mortems, 2 examination of human bones, 1 human viscera sent for analysis, 3 viscera of cattle sent for analysis, seminal stains 2, blood stains 6, cooked food 5, an alleged case of rape, and a post-mortem examination of a patient who was brought in a comatose state and died.

Vaccination.—By the public vaccinator.

Conduct of Establishment.—3rd Class Hospital Assistant Ramchandra Succaram Purbhoney and Passed Medical Pupil Manicum are spoken of very highly.

Cost.—The total cost was Rs. 13,840-2-10, the cost per patient Re. 1-0-4 against Rs. 12,311-7-9 and Re. 0-13-9 respectively in 1888. The cost of each diet was Re. 0-3-2 or 1 pie more than in the previous year.

CIVIL HOSPITAL, MÁHA'BLESHVAR—*In charge of* Surgeon-Major P. MURPHY *till 15th June, afterwards* Surgeon H. P. DIMMOCK.

Conservancy—Is carried out on the same principles as described in previous reports. A Crawford latrine of 5 sections has been erected on a site further away from the bázár and if possible a large number of the same pattern will be erected, so that the old stone wall latrines may be removed. This makes a total of 53 seats, which are kept clean by a special staff of municipal sweepers. Arrangements have been made to remove all night-soil from the compounds to a depôt below the crown of the hill, instead of its being buried above the water-catchment area as it is at present. The street sweepings and refuse are carted to a remote place and burnt.

Water-supply—Is good and abundant from Yenna lake, tanks, wells and openings, except at the end of hot season.

Hospital Buildings—Are in good repair except that the Hospital Assistant's quarters require new roofing.

General health—Good. There was no epidemic.

Attendance of patients—7,964 out-door and 33 in-door as compared with 6,352 and 35 respectively in 1888.

Prevailing diseases.—Diseases of the digestive system attributable to impure water, bad food and want of salt, head the list, after which come worms, skin diseases, malarial fevers and ophthalmia.

Surgical operations—Two major (obstetric) operations for difficult labour, one being application of forceps and the other version, and 73 minor operations were performed.

Mortality and its causes.—Only 1 in-door patient, an old man, died of malarial fever.

Vaccination—Is carried out satisfactorily by the táluka vaccinator.

Medico-legal.—Only 1 case of an old man dying suddenly of acute enteritis.

Conduct of establishment.—Reported to be satisfactory.

Cost.—The total cost was Rs. 9,798-1-6, the cost per patient Re. 1-3-7 against Rs. 10,411-3-1 and Re. 1-10-0 respectively in 1888.

GRANT-IN-AID DISPENSARIES.

WAI.—*In charge of* Hospital Assistant CHINTAMON BALLAL.

The building is in good repair. The committee visited the dispensary 11 times. The conservancy of the town is good. The water-supply is abundant but contaminated. The total treated was 11,166 out-door and 27 in-door patients as compared with 12,482 and 22 in 1888 and 12,270 and 14 in 1887 respectively. The most common diseases were worms, skin diseases, malarious fevers, rheumatic and chest affections and ophthalmia. Cholera prevailed in the town and its vicinity in September, October and November. There were 73 cases with 22 deaths. The dispensary was inspected by the Civil Surgeon, Sátára, in February, and by the Deputy Sanitary Commissioner in May. Vaccination is carried on by the táluka vaccinator. Four post-mortem examinations were made. The total cost was Rs. 1,545-8-10, the cost per patient Re. 0-2-2 against Rs. 1,453-1-2 and Re. 0-1-10 in 1888, and Rs. 2,241-1-11 and Re. 0-2-11 in 1887 respectively.

KARA'D.—*In charge of* Hospital Assistant VINAYEK SUKHARAM.

The building is in good repair. The quarters for the Hospital Assistant are under construction. The committee visited the dispensary four times. The sanitary condition of the town is fair. The water-supply is ample. The total treated was 6,631 out-door and 85 in-door patients as compared with 7,170 and 55 in 1888 and 8,029 and 54 in 1887 respectively. The prevailing diseases were worms, malarious fevers, eye and skin affections. Cholera prevailed in the town in July and August; eleven cases were treated in the dispensary. Eighteen major surgical operations were performed. Vaccination was performed by the táluka vaccinator. Eight post-mortem examinations were made at the request of the police. The dispensary was inspected twice by the Civil Surgeon, Sátára, and once by the Deputy Sanitary Commissioner. The total cost was Rs. 1,228-1-8, the cost per patient Re. 0-2-11 against Rs. 2,404-3-3 and Re. 0-5-3 in 1888 and Rs. 1,171-7-1 and Re. 0-2-3 in 1887 respectively.

ISLAMPUR.—*In charge of* Hospital Assistant BALAJI KUSHABA.

The buildings are in a bad state of repair. There are no quarters for the 2nd class establishment. The committee visited the dispensary four times. The sanitary condition of the town is unsatisfactory. The water-supply is from 4 tanks, inferior in quality and deficient in the hot weather The total treated was 7,908 out-door and 37 in-door patients, as compared with 7,736 and 53 in 1888 and 8,837 and 64 in 1887 respectively. The most common diseases were malarious fevers, worms, eye, bowel complaints and skin diseases. There was no epidemic. Twenty-two major surgical operations were performed. Vaccination was conducted by the táluka vaccinator. Eleven post-mortem examinations were made at the request of the police. The dispensary was inspected by the Deputy Sanitary Commissioner in May and by the Civil Surgeon, Sátára, in December. The total cost was Rs. 1,245-14-6, the cost per patient Re. 0-2-6 against Rs. 756-11-6 and Re. 0-1-6 in 1888 and Rs. 1,455-9-3 and Re. 0-2-7 in 1887 respectively.

PUSESÁVLI.—*In charge of* Hospital Assistant GOVIND ANNAJI.

The dispensary building is in good order. The committee visited the dispensary 11 times. The conservancy of the town is not good; the water-supply good and abundant. The total treated was 3,987 out-door and 13 in-door patients as compared with 5,792 and 24 in 1888 and 4,137 and 14 in 1887 respectively. The prevailing diseases were malarious fevers, worms, eye and respiratory affections and skin diseases. There was no epidemic. Eight post-mortem examinations were made at the request of the police. The Civil Surgeon, Sátára, inspected the dispensary in December. The total cost was Rs. 949-15-11, the cost per patient Re. 0-3-9 against Rs. 823-9-9 and Re. 0-2-3 in 1888 and Rs. 786-8-7 and Re. 0-3-0 in 1887 respectively.

MHASVAD.—*In charge of* Hospital Assistant VASUDEO BALKRISHNA.

The building badly wants repairs, as well as the compound hedge and the dead-house. The committee visited the dispensary 7 times. The sanitary condition of the town is not good. The water-supply is good but deficient in hot weather. The total treated was 4,691 out-door and 12 in-door patients, as compared with 4,776 and 23 in 1888 and 4,835 and 17 in 1887 respectively. The most common diseases were ophthalmia, malarious fevers, worms, and diseases of the skin. Cholera made its appearance in the town and its surrounding villages in July and August. Four cases were treated and they proved fatal. Two major surgical operations were performed. One hundred and eighty-six vaccinations were performed and 4 post-mortem examinations made at the request of the police. The dispensary was inspected by the Civil Surgeon, Sátára, in December. The total cost was Rs. 742-6-2, the cost per patient Re. 0-2-6 against Rs. 1,065-1-10 and Re. 0-3-6 in 1888 and Rs. 686-1-5 and Re. 0-2-3 in 1887 respectively.

PÁTAN.—*In charge of* Hospital Assistant MOHANLAL NANEKRAM.

The building is in want of repair. The verandah roof has been injured by white ants. The committee visited the dispensary ten times. The sanitation is extremely bad. The water-supply is abundant and of fair quality but liable to pollution. The total treated was

4,884 out-door and 28 in-door patients as compared with 5,031 and 14 in 1888 and 4,577 and 9 in 1887 respectively. The most common diseases were eye affections, malarious fevers, worms and skin diseases. There was no epidemic in the town. Two major surgical operations were performed. One hundred and twenty-three children were vaccinated by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Sátára, in March. The total cost was Rs. 1,103-10-6, the cost per patient Re. 0-3-7 against Rs. 1,440-7-0 and Re. 0-4-6 in 1888 and Rs. 1,855-15-1 and Re. 0-6-5 in 1887 respectively.

TA'SGAON.—*In charge of* Hospital Assistant VITHAL BHIKAJI.

The building is in good repair. The committee visit the dispensary occasionally. The sanitary condition is bad. The water-supply is good but deficient in hot season. The total treated was 3,763 out-door and 7 in-door patients as compared with 4,162 and 11 in 1888 and 3,709 and 4 in 1887 respectively. The most common diseases were malarial fevers, worms, diseases of the eye, ear and skin, and injuries. Cholera broke out during the year. Two major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Nine post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Sátára, in December and by the Deputy Sanitary Commissioner in May. The total cost was Rs. 1,377-1-1, the cost per patient Re. 0-5-10, against Rs. 1,331-0-7 and Re. 0-5-1 in 1888 and Rs. 1,440-5-2 and Re. 0-6-2 in 1887 respectively.

PA'NCHGANI—*In charge of* Hospital Assistant J. F. DE JOSS.

The buildings are in good repair and suitable for the purpose. Sanitary arrangements are satisfactory and the water-supply good and ample. The total treated was 7,646 patients as compared with 7,819 in 1888 and 8,372 in 1887. Malarious fevers, worms, rheumatic affections and eye, ear and skin diseases were the most common complaints. Small-pox made its appearance in March. One major surgical operation was performed. Vaccination has been attended to by the municipal vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner in May. The total cost was Rs. 685-5-7, the cost per patient Re. 0-1-5 against Rs. 597-5-5 and Re. 0-1-2 in 1888 and Rs. 354-6-0 and Re. 0-0-8 in 1887 respectively.

RAHIMATPUR.—*In charge of* Hospital Assistant HANMANTRAO CHOWAN.

The dispensary was opened on 17th February 1887. The building, a hired one, is unsuitable for the purpose. The committee visited the dispensary 7 times. The water-supply is good and sufficient but liable to pollution. The conservancy arrangements are far from satisfactory. The total treated was 4,018 out-door and 21 in-door patients as compared with 4,564 and 10 in 1888 and 4,890 and 11 in 1887 respectively. The prevailing complaints were diseases of the skin, eye and digestive system, malarious fevers, worms and injuries. Cholera prevailed during September and October. There were 44 attacks and 14 deaths. Twelve major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Five post-mortem examinations were made. The dispensary was inspected by the Deputy Sanitary Commissioner in March and by the Civil Surgeon, Sátára, in February and December. The total cost was Rs. 904-2-0, the cost per patient Re. 0-3-6 as compared with Rs. 1,202-6-0 and Re. 0-4-2 in 1888 and Rs. 1,301-8-1 and Re. 0-4-3 in 1887 respectively.

SHOLÁPUR COLLECTORATE.

SHOLÁPUR CIVIL HOSPITAL.—*In charge of* Mr. W. R. SCROGGIE, M.R.C.S.

Conservancy.—The conservancy arrangements are carried out satisfactorily by the establishment kept for the purpose, but the small lanes are not kept sufficiently clean, and a general efficient drainage of the city is much needed.

Water-supply—From Ekruk tank, about 3 miles off, is good and abundant.

Hospital Buildings—Are in good order, except that the floors of the wards require to be paved with Sháhábad stone and cloth ceiling put up to prevent the annoyance caused by birds. An operating and examining room, bath-rooms for patients, and quarters for civil medical pupils are much needed. Cholera wards should also be provided, as the present chupper grass ones tumble down yearly. A dead-house has been provided with a good table and cesspool, also an iron tank reservoir for water. The hospital latrine is bad, and requires replacement.

General Health—Good on the whole. Cholera broke out in a virulent form during the months from June to October. There were 257 deaths.

Attendance of Patients—9,160 out-door and 448 in-door patients against 9,286 and 376 respectively in the previous year.

Prevailing Diseases—Malarial fevers, ophthalmia, bronchitis, rheumatism, skin diseases, eczema and injuries.

Surgical Operations—74 major and 646 minor against 64 and 492, respectively, in 1888. Of the major operations the most important were 1 ovariotomy, 1 removal of abdominal tumour, 9 cataracts, 5 iridectomies, 1 fibro-myoma of uterus and several amputations of limbs and breasts, and midwifery operations.

Mortality and its causes.—There were 40 deaths among in-door patients—11 due to cholera, 5 to dysentery, 3 to hemiphlegia, 1 to diarrhœa, 2 to opium poisoning, 1 to epilepsy, 2 to multiple injuries, 1 to burn, 2 to gangrene, 1 to debility, 1 to multiple fracture, 1 to congestion of brain, 1 to hydrophobia, 1 to peritonitis, 1 to wound of head, 1 to nephritis, 1 to fracture of skull, 1 to calculus in the kidney, 1 to sarcoma of abdomen and 2 to volvulus.

Vaccination—By the municipal vaccinator. There were 2,217 primary and 185 secondary vaccinations.

Medico-legal.—129 cases were examined and reported upon, and 20 post-mortem examinations made.

Conduct of Establishment—Satisfactory. 1st Class Hospital Assistant Wassudev Rámchandra and 2nd Class Hospital Assistant Gungárám Abuna are commended for zeal and ability.

Cost.—The total cost was Rs. 9,269-8-2, the cost per patient Re. 0-15-5, against Rs. 8,752-8-9 and Re. 0-14-5 respectively in 1888. The cost of each diet was Re. 0-2-8, or 1 pie more than in 1888.

MUNICIPAL DISPENSARIES.

SHOLA'PUR.—*In charge of* Hospital Assistant HANMANTRA'O GHORPARE.

The building is in good repair. The committee met five times. Conservancy arrangements are good, and the water-supply, mainly derived from the Ekruk tank, is good. The total treated was 15,179 out-door and 78 in-door patients as compared with 19,056 and 82 in 1888 and 18,502 and 86 in 1887 respectively. The most common diseases were those of skin, eyes and lungs, then come worms, diarrhœa, dysentery and rheumatic affections. Cholera and small-pox of a mild type occurred in the city and its vicinity during July and August. Of the former there were 138 cases with 41 deaths. Twelve major surgical operations were performed. Vaccination is carried on by the táluka vaccinator, who vaccinated 2,217 children, The dispensary was inspected by the Civil Surgeon, Sholápur, in July and November and by the Deputy Sanitary Commissioner in December. The total cost was Rs. 2,827-7-1, the cost per patient Re. 0-2-11 against Rs. 3,206-11-4 and Re. 0-2-8 in 1888 and Rs. 2,767-9-8 and Re. 0-2-4 in 1887 respectively.

PANDHARPUR—*In charge of* Assistant Surgeon G. G. BOPARDIKAR, L. M. & S.

The buildings are in excellent condition. The committee met twice. The conservancy of the town is well looked after. The total treated was 10,838 out-door and 102 in-door patients as compared with 11,327 and 87 in 1888, and 12,028 and 85 in 1887 respectively. The most common diseases were ophthalmia, worms, skin affections and malarious fevers. Cholera and small-pox prevailed, as usual, during the year. Of the former there occurred 472 cases with 139 deaths. Forty-three major surgical operations were performed. Vaccination is conducted by the municipal vaccinator. There were 594 primary vaccinations and 14 re-vaccinations. Eleven post-mortem examinations were made at the request of the Police. The dispensary was inspected by the Deputy Sanitary Commissioner. The total cost was Rs. 3,317-2-9, the cost per patient Re. 0-4-10 against Rs. 5,804-14-9 and Re. 0-8-1 in 1888 and Rs. 4,920-8-11 and Re. 0-6-6 in 1887, respectively.

BA'RSI.—*In charge of* Hospital Assistant NARSU GURA'PPA'.

The building is in good order, but ventilation to the female wards is still required. The committee met frequently. The water-supply is from tanks and wells. The sanitary condition of the town is good. The total treated was 15,802 out-door and 54 in-door patients as compared with 16,589 and 61 in 1888 and 15,752 and 62 in 1887, respectively. The prevailing diseases were worms, ophthalmia, malarial fevers, diseases of the digestive and respiratory systems, and skin and rheumatic affections. Cholera made its appearance in June, July and August. There were 153 cases and 44 deaths. Five major surgical operations were performed. Forty-three post-mortem examinations were made: 8 human and 13 animal visceras were sent to the Chemical Analyser. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon, Sholápur, in February and December. The total cost was Rs. 2,689-15-1, the cost per patient Re. 0-2-8 against Rs. 1,736-5-6 and Re. 0-1-8 in 1888 and Rs. 2,694-13-7 and Re. 0-2-8 in 1887, respectively.

GRANT-IN-AID DISPENSARIES.

KARMA'LA.—*In charge of* Hospital Assistant SHAIK AHMED PATEL.

The building although too small is in a fair state of repair. Accommodation for in-door patients is insufficient. Cots and benches have not been as yet provided in sufficient number. The compound wall is still left unaltered. The committee met every month. The water-supply is insufficient. The sanitary condition of the town is fair and well looked after. The total treated was 9,451 out-door and 19 in-door patients as compared with 9,773 and 12 in 1888 and 9,911 and 22 in 1887, respectively. The most common diseases were ophthalmia, worms, skin affections, malarious fevers, and diseases of the respiratory and digestive organs. Cholera prevailed to a slight extent during July and August. Eleven major surgical operations were performed, 4 post-mortem examinations made, and opinion given in 17

medico-legal cases. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Sholápur, in August and November. The total cost was Rs. 1,313-2-9, and the cost per patient Re. 0-2-2 as compared with Rs. 1,485-11-0 and Re. 0-2-5 in 1888, and Rs. 1,804-9-8 and Re. 0-2-10 in 1887, respectively.

AKLUJ.—*In charge of* Hospital Assistant SHRIPAT NICKUM.

The building is in good condition. A dead-house, a female ward and servants' quarters are required. The committee met six times. The conservancy of the town is bad. Water-supply from the river Nira and a well is abundant, but liable to pollution. The total treated was 9,825 out-door and 39 in-door patients as compared with 10,293 and 48 in 1888 and 8,863 and 43 in 1887, respectively. The most common diseases were malarial fevers, rheumatic affections, diseases of the eye, digestive and respiratory systems, diarrhœa, dysentery, skin diseases and worms. Five cases of cholera occurred, of which 1 was fatal. Sixteen major surgical operations were performed. Vaccination is carried on by the municipal vaccinator, who performed 314 primary and 34 re-vaccinations. Eight post-mortem examinations were made, and opinion given in 15 medico-legal cases. The dispensary was inspected by the Civil Surgeon, Sholápur, in March and December. The total cost was Rs. 1,443-11-1, the cost per patient Re. 0-2-4 against Rs. 1,556-9-9 and Re. 0-2-4 in 1888 and Rs. 1,504-3-1 and Re. 0-2-8 in 1887, respectively.

NATIVE STATE DISPENSARY.

AKALKOT.—*In charge of* Hospital Assistant GANGADEEN.

The building is in a good state of repairs. The Political Agent and his Assistants visit the dispensary occasionally. The total treated was 7,272 out-door and 15 in-door patients as compared with 6,858 and 11 in 1888 and 5,689 and 12 in 1887, respectively. The prevailing diseases were malarious fevers, ophthalmia, dysentery, diarrhœa, worms and skin diseases. Cholera of a virulent type presented itself in the town and the surrounding districts; 109 cases were treated with 48 deaths. The total cost was Rs. 2,678-2-9, the cost per patient Re. 0-5-10 as compared with Rs. 2,382-11-9 and Re. 0-5-6 in 1888, and Rs. 2,252-2-4 and Re. 0-6-3 in 1887, respectively.

BELGAUM COLLECTORATE.

CIVIL HOSPITAL, BELGAUM.—*In charge of* Surgeon-Major J. P. GREANY, M.D.

Conservancy.—A large establishment is kept up, but sanitation in the town is still far from satisfactory. The new site for the disposal of night-soil has not yet been acquired. To this site the poudrette depôt is to be removed from the Dhárwár road.

Water-supply—From wells, which are liable to pollution. A good water-supply is greatly wanted.

Hospital Buildings.—Are in good repair, and a sky light has been added to the operating room, but the defects mentioned in previous reports still exist, *viz.*, quarters for the hospital establishment, a detention ward for supposed lunatics, and wards for better class patients, Eurasians, &c., a private examination room, and improved ventilation.

General Health.—Has not been good. Cholera prevailed from 9th June to 23rd October throughout the Collectorate. In the town of Belgaum 143 cases with 91 deaths were reported. Small-pox was also prevalent; 321 cases with 76 deaths were reported in the town from 5th January to 18th May. Seven cases of cholera and 4 of small-pox were treated at the Civil Hospital.

Attendance of Patients.—231 in-door and 7,213 out-door patients were treated during the year, as compared with 285 and 4,273 in the previous year. The daily average of in-door patients was 10·3 and out-door 74·4, as compared with 11·9 and 33·1 in 1888. The increase in the out-door patients being due to the closure of the city municipal dispensary.

Prevailing Diseases.—Malarious fevers, diseases of respiratory and digestive systems, intestinal worms, skin, eye and ear diseases, rheumatic affections, ulcers and injuries.

Mortality and its causes.—Twenty in-door patients died during the year. The causes were debility 6, cholera and diarrhœa 3 each, pneumonia 2, and small-pox, remittent fever, ascites, gangrene, stricture, and Bright's disease one each.

Surgical operations.—42 major and 297 minor operations were performed, as compared with 30 and 184 in the previous year.

Vaccination.—Municipal, under the direction of the Sanitary Department.

Medico-Legal.—74 cases were examined. Of these 27 were post-mortem examinations, 45 the examination of apparel for blood and seminal stains, 1 for poisons, 1 for supposed rape.

Conduct of establishment.—Reported good.

Cost.—The total cost was Rs. 14,053-15-3, the cost per patient Rs. 1-14-2 against Rs. 14,425-7-5 and Rs. 3-2-7 respectively in 1888. The cost of each diet was Re. 0-2-3 against Re. 0-1-10 in 1888.

GRANT-IN-AID DISPENSARIES.

BELGAUM.—*In charge of* Hospital Assistant HARI VITHAL.

The dispensary was closed on 1st April 1889 as per Government Resolution No. 351 dated 25th January 1889. During the quarter ending 31st March 1889, 1,714 out-door patients were treated, and one major surgical operation was performed. The total cost was Rs. 357-6-10, and the cost per patient Re. 0-3-3.

GOKA'K.—*In charge of* Hospital Assistant SHIVA BHAGU.

The building has been repaired. There are no quarters for servants. The committee visited the dispensary 13 times. The sanitary condition of the town is good. The water-supply is from the river and wells, the latter is brackish. The total treated was 4,038 out-door and 18 in-door patients, as compared with 4,383 and 32 in 1888, and 4,232 and 43 in 1887, respectively. The prevailing diseases were malarious fevers, ophthalmia, rheumatic affections, worms and skin-diseases. Cholera prevailed during the year. 142 cases were treated in the dispensary. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Belgaum, in April and December. The total cost was Rs. 1,069-10-11, the cost per patient Re. 0-4-2, as compared with Rs. 1,548-11-3, and Re. 0-5-7 in 1888, and Rs. 1,743-9-8 and Re. 0-6-6 in 1887, respectively.

ATHNI.—*In charge of* Hospital Assistant RAMCHANDRA DAJI.

The buildings are in good repair. The committee met thirteen times. The town is kept fairly clean. The water-supply is sufficient and is chiefly derived from wells and a tank. The total treated was 5,309 out-door and 13 in-door patients as compared with 7,109 and 23 in 1888 and 5,970 and 16 in 1887 respectively. The most common diseases were ophthalmia, worms, diseases of the skin, bowel complaints, rheumatic affections, and malarious fevers. Cholera was prevalent during June and August in the town—24 cases with 10 deaths. Vaccination is carried on by the municipal vaccinator. One post-mortem examination was made and opinion given in several medico-legal cases. The dispensary was inspected by the Civil Surgeon, Belgaum, in December. The total cost was Rs. 1,351-12-11, the cost per patient Re. 0-4-0 as compared with Rs. 1,507-14-2 and Re. 0-3-4 in 1888 and Rs. 1,713-14-11 and Re. 0-4-6 in 1887 respectively.

SAUNDATTI.—*In charge of* Hospital Assistant MORO RAMCHANDRA.

The building is in good order. A compound wall is required. Drainage and surface conservancy of the town are good. The water-supply is good and sufficient. The total treated was 2,390 out-door and 9 in-door patients as compared with 2,501 and 7 in 1888 and 2,271 and 3 in 1887 respectively. The most common diseases were malarious fevers, worms, diseases of the eye, skin, respiratory and digestive systems, and ulcers. Cholera prevailed in the town and in the vicinity to a small extent. Seventeen cases were treated in the dispensary and 9 proved fatal. Vaccination is carried on by the táluka vaccinator. Three post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Belgaum, and the Deputy Sanitary Commissioner during the year. The total cost was Rs. 1,072-3-10, the cost per patient Re. 0-7-1 as compared with Rs. 2,629-0-2 and Re. 1-0-9 in 1888 and Rs. 2,539-14-8 and Re. 1-1-10 in 1887 respectively.

CHIKODI.—*In charge of* Hospital Assistant BHAU TUKARAM.

The building has been repaired, but the roof is in a dilapidated condition. The committee visited the dispensary nineteen times. Conservancy of the town is bad, there being no municipality. The water-supply is good and abundant. The total treated was 3,272 out-door and 28 in-door patients as compared with 3,553 and 28 in 1888 and 4,038 and 54 in 1887 respectively. The prevailing diseases were malarious fevers, worms and diseases of the eyes and skin. Cholera appeared in the town and the surrounding villages in July and August; 74 cases were treated in the dispensary. Vaccination was carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Belgaum, in March and December. The total cost was Rs. 1,085-8-6, the cost per patient Re. 0-5-3 against Rs. 997-9-1 and Re. 0-4-5 in 1888 and Rs. 1,461-15-7 and Re. 0-5-8 in 1887 respectively.

KHÁNA'PUR.—*In charge of* Hospital Assistant NARAYEN VITHAL.

The building is in bad repair. There is no accommodation for in-door patients. The committee met twelve times. The water-supply from the river and well is good and ample. Conservancy is fairly attended to. The total treated was 2,464 out-door patients as compared with 2,850 in 1888 and 1,533 in 1887. The most common diseases were dysentery, malarious fevers, diseases of the eyes and skin, respiratory affections, bowel-complaints, ulcers and injuries. Vaccination is carried on by the táluka vaccinator. Two post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Belgaum, in January and June, and by the Deputy Sanitary Commissioner in July. The total cost was Rs. 694-5-6, the cost per patient Re. 0-4-5 as compared with Rs. 683-0-2 and Re. 0-3-10 in 1888 and Rs. 988-0-4 and Re. 0-10-3 in 1887 respectively.

DHÁRWÁR COLLECTORATE.

CIVIL HOSPITAL, DHA'RWA'R.—*In charge of* Surgeon-Major W. MCCONAGHY, M.D.

Conservancy.—Street sweepings and refuse are collected in dust-bins &c. and carted to a distance outside the town instead of being deposited in holes, which give out very offensive smell by the westerly breeze passing over them. Night-soil is also removed in iron carts, deposited in pits on the southern side of the town and covered with earth till it is fit for agricultural purposes. The general sanitary condition of the town is unsatisfactory and it will not improve until the discontinuance of the use of pit privies, of which there are 2,200, is enforced.

Water-supply.—Was deficient owing to want of rains. To meet this scarcity a well was sunk by the municipality in April at Madihal.

Hospital buildings—In excellent repair. The municipality paid one-third of the cost for repairs, and the Local Fund contributed Rs. 1,000 towards the maintenance of the hospital.

General health.—Fairly good. Cholera was prevalent from March to July; 52 cases were reported with 42 deaths.

Attendance of patients.—10,246 out-door and 270 in-door against 9,843 and 304 in 1888 respectively.

Prevailing diseases.—Fevers, worms, ophthalmia, respiratory affections, dysentery, diarrhœa, bowel-complaints, ulcers, skin diseases and rheumatism.

Surgical cases.—Twelve major of which were 2 paracentesis abdominis, 1 removal of vesical calculus by lithotrity, 2 reductions of dislocation of shoulder joint, 3 reductions of dislocation of lower jaw, 1 podalic version, 1 delivery by forceps, 1 opening of perineal fistula and 1 removal of fatty tumour. 557 minor operations were performed.

Mortality and its causes.—Fifteen deaths, *viz.* cholera 4, dysentery 3, ascites 2, laryngitis 1, secondary syphilis 1, rheumatism 1, hydrophobia 1, tetanus resulting from compound fracture of both bones of right leg 1, and splenitis 1.

Medico-legal.—Fifteen post-mortem examinations were made and 61 cases examined and reported upon.

Vaccination—By the municipal vaccinator.

Conduct of establishment.—Satisfactory. First Class Hospital Assistant Woodaji Raiker and Third Class Hospital Assistant Anantrao Santaram are commended.

Cost.—The total cost was Rs. 17,344-14-8, the cost per patient Re. 1-10-4 against Rs. 16,522-3-0 and Re. 1-10-0 respectively in 1888. The cost of each diet was Re. 0-2-8, being the same as last year.

GRANT-IN-AID DISPENSARIES.

HUBLI.—*In charge of* Assistant Surgeon D. CARDOZ.

The present building is quite unsuitable. It has been proposed to build a new building and Rs. 19,000 have been allotted for the purpose. The committee visited the dispensary monthly. The sanitation of the town is fair. The water-supply is good and abundant. The total treated was 16,027 out-door and 94 in-door patients as compared with 15,939 and 97 in 1888, and 17,880 and 134 in 1887 respectively. The prevailing diseases were malarial fevers, ophthalmia, skin diseases, worms, diarrhœa, syphilis, respiratory affections and rheumatism. Cholera and small-pox were imported by the pilgrims from distant parts where they were prevalent in a virulent form. Forty-eight major operations were performed. Twelve post-mortem examinations were made and numerous medico-legal cases examined and reported upon. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Dhárwár, in February and December. The total cost was Rs. 6,557-7-3, the cost per patient Re. 0-6-6 against Rs. 5,939-1-1 and Re. 0-5-11 in 1888 and Rs. 6,399-13-10 and Re. 0-5-8 in 1887.

GADAG.—*In charge of* Assistant Surgeon ABDUL GHANI HAKIM, L.M.

The building is in good repair. The committee visited the dispensary five times. The sanitary condition of the town is fairly good. The water-supply is good and abundant. The total treated was 9,583 out-door and 41 in-door patients against 10,511 and 55 in 1888 and 16,373 and 58 in 1887 respectively. The most common diseases were worms, ophthalmia, malarial fever, skin diseases and diseases of the respiratory and digestive systems. There were 226 cases of cholera, of which 110 died. Twenty-nine major operations were performed. Eighteen post-mortem examinations were held and opinion given on sixty medico-legal cases. Vaccination is not favourably received by the people. The dispensary was inspected in February and July by the Civil Surgeon, Dhárwar. The total cost was Rs. 5,036-14-1, the cost per patient Re. 0-8-4 against Rs. 5,189-11-9 and Re. 0-7-10 in 1888 and Rs. 5,309-6-7 and Re. 0-5-2 in 1887 respectively.

HA'VERI.—*In charge of* Hospital Assistant LAXUMON SAWANT.

The buildings are in good repair. A few cots, country blankets and cooking pots are wanted. The committee met seven times. The water-supply is insufficient. The sanitary con-

dition of the town is indifferent. The total treated was 4,610 out-door and 60 in-door patients as compared with 5,380 and 51 in 1888 and 5,240 and 35 in 1887 respectively. The most common diseases were malarious fevers, worms, ulcers, rheumatic and chest affections, bowel-complaints and diseases of the skin. Cholera and small-pox broke out in the town and surrounding villages. Thirteen major surgical operations were performed. Twenty post-mortem examinations were made and opinion given in several medico-legal cases. Vaccination is carried out by the local fund vaccinator. The dispensary was inspected by the Civil Surgeon, Dhárwár, in February and November. The total cost was Rs. 1,651-0-0, the cost per patient Re. 0-5-7 against Rs. 1,162-6-0 and Re. 0-3-5 in 1888 and Rs. 1,551-1-11 and Re. 0-4-8 in 1887 respectively.

NAVALGUND.—*In charge of* Hospital Assistant VENKAJI DEOJI.

The building is excellent and quite convenient. It requires a compound wall and a well. Individual members visited the dispensary several times. Conservancy of the town is not attended to. The water-supply is from tanks and wells and of inferior quality. The total treated was 2,809 out-door and 17 in-door patients as compared with 2,671 and 12 in 1888 and 3,286 and 16 in 1887 respectively. The most common diseases were malarial fevers, bowel-complaints, ophthalmia and skin diseases. Cholera broke out in the town and several villages in September. There were 271 primary vaccinations and 25 re-vaccinations. Four post-mortem examinations were made and opinion given in several medico-legal cases. The dispensary was inspected by the Civil Surgeon, Dhárwár, in January and December. The total cost was Rs. 1,225-9-3, the cost per patient Re. 0-6-11 against Rs. 1,429-14-8 and Re. 0-8-6 in 1888 and Rs. 1,665-12-10 and Re. 0-8-0 in 1887.

RA'NEBENUR.—*In charge of* Hospital Assistant PARSHURAM NAGESH.

The dispensary was opened in December 1887. The building is a hired one. The committee visited the dispensary occasionally. The sanitary condition of the town is indifferent. The water-supply is from tanks and wells; the latter is brackish. The total treated was 4,027 out-door and 7 in-door patients as compared with 3,759 and 5 in 1888 respectively. Dysentery, malarious fevers, worms, rheumatic affections, diseases of the eye and skin, and ulcers were the most common diseases. Small-pox made its appearance in the town and surrounding villages. Vaccination is carried on by the local fund vaccinator. The Civil Surgeon, Dhárwár, inspected the dispensary in December. The total cost was Rs. 1,318-5-5, the cost per patient Re. 0-5-2 as compared with Rs. 1,619-1-0 and Re. 0-6-10 respectively in 1888.

BIJÁPUR COLLECTORATE.

CIVIL HOSPITAL, BIJÁPUR.—*In charge of* Surgeon-Major C. T. PETERS.

Conservancy.—There are 8 public latrines which are seldom, if ever, used, people still resorting to the city walls for natural purposes. Much still requires to be done towards the improvement of the town.

Water-supply.—From wells, is fairly good and ample.

Hospital buildings.—The new buildings were occupied on 24th July 1888, which afford accommodation for 40 patients. They are in good order.

General health.—Has been good with the exception of November and December, when malarial fevers and small-pox were prevalent.

Attendance of patients.—In-door 314 and out-door 8,726 against 356 and 8,896 respectively in 1888.

Prevailing diseases.—Malarial fevers, worms, ophthalmia, and skin, respiratory and ear affections.

Surgical cases.—Twenty major and 168 minor operations were performed. Of the major, the most important were operations for cataract, lithotomy, reductions of dislocation and obstetric operations.

Mortality and its causes.—There were 12 deaths, *viz.*, tetanus 1, compression of brain 1, pneumonia 1, epidemic diarrhœa 1, cholera 2, dysentery 1, ascites 1, obstruction of bowels 1, anæmia with enlargement of liver and spleen 1, and burn 1.

Vaccination.—Is conducted by the municipal vaccinator under the directions of the Sanitary Department.

Medico-legal.—Seventeen post-mortem examinations were made and 21 assault cases examined and reported on at the request of the police. Also 7 lunatics sent by Magistrates were treated, 4 of whom were handed over to their friends having apparently recovered, and 3 transferred to the Dhárwár Lunatic Asylum.

Conduct of establishment.—The Civil Surgeon remarks:—I am glad to testify to the able manner in which Hospital Assistants Babaji Suntoo and Ganesh Vinayek are discharging their duties.

Cost.—The total cost was Rs. 13,746-14-7, the cost per patient Re. 1-8-3 against Rs. 9,325-0-10 and Re. 1-0-1 respectively in 1888. The cost of each diet was Re. 0-1-11 or 4 pies more than in the previous year.

GRANT-IN-AID DISPENSARIES.

ILKAL.—*In charge of* Hospital Assistant RUNGAPA JAGANNATH.

The building is in good order. The committee visited the dispensary four times. The sanitary condition of the town is not very good; the water-supply from wells good and abundant. The total treated was 3,150 out-door and 12 in-door patients as compared with 3,194 and 27 in 1888 and 3,899 and 26 in 1887 respectively. The most common diseases were ague, intestinal worms and eye diseases. There were 61 cases of cholera with 28 deaths and 201 of smallpox with 75 deaths. Five major operations were performed. Vaccination is conducted by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Bijápur, in January. The total cost was Rs. 1,275-7-2, the cost per patient Re. 0-6-5 as compared with Rs. 1,318-4-8 and Re. 0-6-6 in 1888 and Rs. 1,447-10-6 and Re. 0-5-10 in 1887 respectively.

BAGALKOT.—*In charge of* Hospital Assistant BHAGOO MAHADOO.

The building is in want of repairs. Some of the articles of dead stock requires repairs and some to be replaced. The committee visited the dispensary occasionally. The sanitary condition of the town is fairly good. The water-supply is abundant and fairly good. The total treated was 10,125 out-door and 17 in-door patients as compared with 10,500 and 21 in 1888 and 10,552 and 47 in 1887 respectively. The most common complaints were malarial fevers, worms, ophthalmia, skin diseases, ulcers, and local injuries. One hundred and forty-six cases of cholera were treated in the dispensary. Five major operations were performed. Vaccination is carried out by the municipal vaccinator. Fifteen post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Bijápur, in January. The total cost was Rs. 1,722-12-11, the cost per patient Re. 0-2-8 against Rs. 1,844-1-3 and Re. 0-2-9 in 1888 and Rs. 2,005-11-2 and Re. 0-3-0 in 1887 respectively.

MUDDEBIHÁL.—*In charge of* Hospital Assistant PANDURANG GUNESH.

The building is in good repair. The committee visited the dispensary quarterly. The sanitary condition of the town is fairly good; the water-supply from wells good and abundant. The total treated was 2,140 out-door and 21 in-door patients, as compared with 2,421 and 21 in 1888 and 1491 and 26 in 1887, respectively. The prevailing diseases were malarial fevers, worms, ophthalmia and diseases of the digestive system, skin and ulcers. Cholera and smallpox were epidemic—970 and 381 cases occurred with 471 and 32 deaths, respectively. Vaccination is carried out by the táluka vaccinator. Two post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Bijápur, in January. The total cost was Rs. 890-1-11, the cost per patient Re. 0-6-7 as compared with Rs. 733-8-8 and Re. 0-4-9 in 1888 and Rs. 1,205-2-0 and Re. 0-12-8 in 1887, respectively.

BÁGEVÁDI.—*In charge of* Hospital Assistant DATTU PANDURANG.

The building is in good repair. The fittings are in want of repairs. The committee visited the dispensary occasionally. The sanitary and conservancy arrangements are unsatisfactory. The water-supply is abundant and fairly good. The total treated was 3,093 out-door and 15 in-door patients as compared with 3,406 and 26 in 1888 and 3,345 and 28 in 1887, respectively. The most common complaints were ophthalmia, worms, skin-diseases, respiratory affections, diseases of the digestive system, dyspepsia and malarial fevers. Cholera was epidemic in the táluka giving 981 cases with 452 deaths. Two major operations were performed. Vaccination is conducted by two vaccinators. Four post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Bijápur, in January. The total cost was Rs. 796-4-7, the cost per patient Re. 0-4-1 against Rs. 847-13-7 and Re. 0-3-11 in 1888, and Rs. 817-1-10 and Re. 0-3-10 in 1887, respectively.

SINDGI.—*In charge of* Hospital Assistant CHATURJI NARAYEN.

The building is in thorough repair. The committee visited the dispensary quarterly. The sanitary condition of the town is fairly good and the water-supply from wells good and abundant. The total treated was 1,983 out-door and 7 in-door patients as compared with 2,026 and 3 in 1888 and 2,086 and 11 in 1887, respectively. The prevailing diseases were ophthalmia, worms, skin-diseases, malarial fevers, diseases of the digestive system, ulcers and local injuries. Three major operations were performed. Vaccination is conducted by the local fund vaccinator. Seven post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Bijápur, in December. The total cost was Rs. 690-9-4, the cost per patient Re. 0-5-6 as compared with Rs. 513-11-6 and Re. 0-4-0 in 1888, and Rs. 627-8-10 and Re. 0-4-9 in 1887, respectively.

INDI.—*In charge of* Hospital Assistant CHINTAMAN SUCCARAM.

The building is in good repair. The committee visited the dispensary five times. The sanitary condition of the town is fairly good; the water-supply is good and abundant. The total treated was 2,947 out-door and 17 in-door patients as compared with 2,805 and 18 in 1888 and 2,937 and 15 in 1887, respectively. The most common diseases were ophthalmia,

worms, ague and skin-diseases. Cholera prevailed in the táluka in a virulent form; 1,136 cases with 505 deaths were registered of which 94 cases with 38 deaths occurred in Indi. Eight major operations were performed. Vaccination is carried on by the Hospital Assistant. Four post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Bijápur, in April. The total cost was Rs. 831-7-2, the cost per patient Re. 0-4-5, as compared with Rs. 904-8-11 and Re. 0-5-1 in 1888, and Rs. 674-15-5 and Re. 0-3-7 in 1887, respectively.

KOLHA'PUR AND SOUTHERN MARÁTHA AGENCY.

ALBERT EDWARD HOSPITAL AND DISPENSARY, KOLHA'PUR.—*In charge of* Darbár Surgeon G. SINCLAIR.

Conservancy.—Continues to receive every attention, but its hygienic condition is far from satisfactory from the amount of subsoil soakage due to the large delivery of water, two-thirds of which, it is estimated, finds its way into the ground. The widening and improvement of roads, construction of drains and filling up a portion of the fort ditch are the only works of public utility which have been carried out by the Municipality during the year.

Water-supply.—Good and abundant.

Hospital Buildings.—In good repair. No additions or alterations have been made.

General Health.—Good throughout the year. There was a marked decrease in the birth and death-rate of the town. Cholera was epidemic in April causing in all 1,151 attacks and 522 deaths against 216 and 153, respectively, in 1888. There were 396 cases of small-pox with 25 deaths.

Attendance of Patients.—38,698 out-door and 1,724 in-door patients against 39,460 and 1,635 respectively in 1888. The decrease in the former is due to the opening of a new dispensary in the town.

Prevailing Diseases.—Bowel-complaints, worms, malarial fevers and respiratory, skin and eye affections.

Surgical cases.—215 major and 1,602 minor operations against 181 and 1,280, respectively, in 1888.

Mortality and its causes.—65 deaths, *viz.*, pneumonia 9, dysentery 6, diarrhœa 5, calculus in the bladder 3, valve disease 2, leprosy 2, hemiphlegia 2, hypertrophy liver 2, burns 2, wounds 2, small-pox 1, ague 1, beri-beri 1, pyæmia 1, septicæmia 1, anæmia 1, meningitis 1, abscess-brain 1, mania 1, melancholia 1, fatty degeneration of heart 1, croup asthma 1, obstruction of bowels 1, ascites 1, acute peritonitis 1, abortion 1, necrosis 1, caries 1, ulcer 1, carbuncle 1, fracture of the ribs 1 and fracture of both bones of the leg 1.

Vaccination.—There were 2,304 primary and 458 secondary vaccine operations against 2,331 and 547, respectively, in 1888. The success of vaccination was 88·4 against 95·0 in the previous year.

Medico-legal.—89 cases were referred for examination and report.

Conduct of establishment.—Reported to be very satisfactory.

Cost.—The total cost was Rs. 23,818-0-0, the cost per patient Re. 0-9-5, against Rs. 21,710-15-3 and Re. 0-8-5, respectively, in 1888.

GAD HINGLAJ.—*In charge of* Mr. R. Y. DHANOWTY.

The building is suitable. The dispensary was visited by the officials of the State. The sanitary condition of the town is looked after. The water-supply is not good but abundant except in hot season. The total treated was 7,780 out-door and 36 in-door patients as compared with 8,387 and 24 in 1888 and 8,182 and 29 in 1887, respectively. The most common diseases were malarial fevers, worms, rheumatic affections, ophthalmia, bowel-complaints, skin-diseases and injuries. Twenty-three major operations were performed. Vaccination is carried out by the táluka vaccinator. Nine post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon in December. The total cost was Rs. 1,122-4-4, the cost per patient Re. 0-2-3 as compared with Rs. 1,223-1-5 and Re. 0-2-3 in 1888, and Rs. 1,192-13-3 and Re. 0-2-3 in 1887, respectively.

MIRAJ.—*In charge of* Mr. TRIMBAK SAKHARAM, L.M.

The building is in good repair. The committee visited the dispensary regularly every month. The sanitary and conservancy arrangements are satisfactory; the water-supply good and abundant. The total treated was 14,351 out-door and 56 in-door patients, as compared with 15,654 and 58 in 1888 and 14,979 and 56 in 1887, respectively. The prevailing diseases were ophthalmia, worms, fevers, dyspepsia, skin-diseases, rheumatic and bronchial affections and injuries. Thirty-five major operations were performed. Vaccination is carried out by the State vaccinator. Thirty-two post-mortem examinations were made. The dis-

pensary was inspected by the Darbár Surgeon. The total cost was Rs. 4,766-6-0, the cost per patient Re. 0-5-3, as compared with Rs. 4,895-5-9 and Re. 0-4-11 in 1888, and Rs. 5,954-0-4 and Re. 0-6-4 in 1887, respectively.

MUDHOL.—*In charge of* Mr. S. C. PASCAL, L.M. & S.

The dispensary is quite unsuitable. The sanitary and conservancy arrangements are satisfactory; the water-supply good and abundant. The total treated was 12,759 out-door and 22 in-door patients, as compared with 12,238 and 18 in 1888 and 11,497 and 15 in 1887, respectively. The most common complaints were malarial fevers, worms, diseases of the stomach and intestines, skin-diseases, ophthalmia, rheumatism and respiratory affections. Cholera was epidemic in the district. There were registered 472 cases with 233 deaths. In Mudhol 39 cases were reported with 24 deaths. Thirteen major operations were performed. Vaccination is conducted by the State vaccinator. Thirteen post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon, Kolhápur. The total cost was Rs. 3,020-7-0, the cost per patient Re. 0-3-9 against Rs. 3,367-9-7 and Re. 0-4-4 in 1888, and Rs. 2,942-9-10 and Re. 0-4-1 in 1887, respectively.

MALKÁPUR.—*In charge of* Mr. G. K. GUNE.

The building is unsuitable. The committee consisting of officials of the Kolhápur State visited the dispensary occasionally. The sanitary condition of the town is unsatisfactory. The water-supply is not good but abundant except in dry weather. The total treated was 9,630 out-door and 38 in-door patients, as compared with 9,015 and 18 in 1888 and 6,995 and 31 in 1887, respectively. The most common diseases were malarial fevers, worms, neuralgia, ophthalmia, lung and skin affections and bowel-complaints. Twenty-one major operations were performed. Vaccination work is carried out by the State vaccinator. Nine post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon, Kolhápur. The total cost was Rs. 1,084-11-10, the cost per patient Re. 0-1-9 against Rs. 1,169-11-2 and Re. 0-2-0 in 1888, and Rs. 1,206-14-4 and Re. 0-2-8 in 1887, respectively.

RÁMDURG.—*In charge of* Mr. VASUDEO V. CHHATRE, L. M. & S.

The building is in good repair. The dispensary was visited by the State officials. The sanitary and conservancy arrangements are satisfactory; the water-supply good and abundant. The total treated was 5,610 out-door and 23 in-door patients, as compared with 8,749 and 28 in 1888 and 10,703 and 51 in 1887 respectively. The prevailing diseases were malarial fevers, skin-diseases, respiratory affections, ulcers, worms and bowel complaints. There were 46 cases of cholera from April to June, of which nearly 50 per cent. proved fatal. Twenty-four major operations were performed. Vaccination is carried on by the State vaccinator. Two post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon in December. The total cost was Rs. 2,795-7-3, the cost per patient Re. 0-7-11 as compared with Rs. 2,955-0-6 and Re. 0-5-4 in 1888, and Rs. 3,174-4-8 and Re. 0-4-8 in 1887, respectively.

KAGÁL.—*In charge of* Mr. NARSOO LINGOO.

The present building is in good repair; the new dispensary is in course of erection. The dispensary was frequently visited by the State Kárbhári, Kolhápur. The sanitary and conservancy arrangements of the town are satisfactory; the water-supply good and abundant. The total treated was 3,333 out-door patients as compared 2,909 in 1888 and 2,798 in 1887. The most common diseases were ague, bronchitis, bowel-complaints, worms, ophthalmia and skin affections. Cholera prevailed in an epidemic form. There were 36 attacks with 20 deaths. One major operation was performed. Vaccination is conducted by the State vaccinator. The dispensary was inspected by the Darbár Surgeon in December. The total cost was Rs. 904-0-8, the cost per patient Re. 0-4-4 as compared with Rs. 840-11-2 and Re. 0-4-7 in 1888 and Rs. 850-3-0 and Re. 0-4-10 in 1887, respectively.

AJRA.—*In charge of* Mr. DATTATRAYA RAMCHANDRA.

The building is suitable. The dispensary was inspected by the officers of the Kolhápur State. The sanitary and conservancy arrangements of the town are unsatisfactory; the water-supply from wells abundant, but liable to pollution by soakage. The total treated was 6,549 out-door and 26 in-door patients as compared with 5,305 and 23 in 1888 and 5,169 and 41 in 1887, respectively. The most common complaints were malarial fevers, worms, rheumatism, nervous affections, ophthalmia, diseases of the digestive system and skin. Twenty-one cases of cholera occurred. Thirty major operations were performed. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in December. The total cost was Rs. 1,081-3-7, the cost per patient Re. 0-2-7 as compared with Rs. 1,050-9-1 and Re. 0-3-1 in 1888, and Rs. 1,067-15-7 and Re. 0-3-3 in 1887, respectively.

GARGOTI.—*In charge of* Mr. MARUTI NANA.

The building is suitable. A dead-house and a post-mortem table are needed. The dispensary was visited occasionally by the officers of the Kolhápur State. The sanitary condition of the town is not satisfactory. The water-supply from the river is abundant but inferior

in quality and liable to contamination in the hot season. The total treated was 6,740 out-door and 40 in-door patients as compared with 6,157 and 35 in 1888 and 5,840 and 36 in 1887, respectively. The most common diseases were malarial fevers, worms, rheumatic affections, ophthalmia and skin-diseases. There were recorded 37 cases of cholera with 26 deaths. Nineteen major operations were performed. Vaccination is carried out by the táluka vaccinator. Five post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in November. The total cost was Rs. 1,219-3-11, the cost per patient Re. 0-2-10 against Rs. 1,162-7-7 and Re. 0-3-0 in 1888, and Rs. 1,117-5-0 and Re. 0-3-0 in 1887, respectively.

LAKSMESHVAR.—*In charge of* Mr. W. BHATEVADEKAR.

The building is in good repair. The committee visited the dispensary once during the year. Sanitary and conservancy arrangements are satisfactory. The water-supply is abundant. The total treated was 4,990 out-door and 14 in-door patients, as compared with 4,638 and 17 in 1888 and 3,965 and 4 in 1887, respectively. The prevailing diseases were ophthalmia, worms, skin-diseases, local injuries, ulcers, nervous affections, malarial fevers and rheumatism. Six cases of cholera were treated. Thirteen major operations were performed. Vaccination is carried out by the State vaccinator. Fifteen post-mortem examinations were made. The dispensary was inspected by the Chief of Miraj in February and by the Deputy Sanitary Commissioner in September. The total cost was Rs. 2,089-1-8, the cost per patient Re. 0-6-8 against Rs. 1,880-4-6 and Re. 0-6-5 in 1888, and Rs. 1,896-7-0 and Re. 0-7-7 in 1887, respectively.

RA'YBA'G.—*In charge of* Mr. K. B. LIKTAY.

The building is suitable. The dispensary was visited by the officials of the Kolhápur State. The sanitary condition of the town is unsatisfactory. The water-supply is abundant. The total treated was 5,925 out-door and 8 in-door patients as compared with 6,253 and 11 in 1888 and 6,089 and 3 in 1887, respectively. The most common diseases were malarial fevers, eye, ear, respiratory, rheumatic and syphilitic affections, diseases of the nervous system, bowel-complaints and skin affections. Cholera was epidemic. There were 85 attacks and 37 deaths in the district and 69 and 24 respectively in the town. Nine major operations were performed. Vaccination is conducted by the State vaccinator. Five post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in February. The total cost was Rs. 1,038-12-2, the cost per patient Re. 0-2-9, as compared with Rs. 998-7-3 and Re. 0-2-6 in 1888, and Rs. 936-4-0 and Re. 0-2-5 in 1887, respectively.

SHIROL.—*In charge of* Mr. H. R. GUNE.

The building is in good repair. The dispensary was visited by the State officers. The sanitary condition of the town is not satisfactory; the water-supply from the well and river is fair in quality. The total treated was 5,827 out-door and 11 in-door patients as compared with 6,650 and 24 in 1888 and 6,346 and 2 in 1887, respectively. The most common complaints were malarial fevers, respiratory affections, dyspepsia, worms, ophthalmia and skin-diseases. There was no epidemic in the town itself but there were registered 16 cases of cholera with 6 deaths in the village of Shiruti. Ten major operations were performed. Vaccination is carried on by the táluka vaccinator. Three post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in November. The total cost was Rs. 991-13-11, the cost per patient Re. 0-2-8, against Rs. 987-2-0 and Re. 0-2-4 in 1888, and Rs. 993-8-3 and Re. 0-2-6 in 1887, respectively.

KATKOL.—*In charge of* Mr. L. M. BHAGWUT.

The building is unsuitable. The dispensary was occasionally visited by the State officers, Kolhápur. The sanitary arrangements are satisfactory; the water-supply from the reservoir good and abundant. The total treated was 6,354 out-door and 10 in-door patients as compared with 6,355 and none in 1888 and 5,929 and 2 in 1887 respectively. The prevailing diseases were malarial fevers, worms, eye, ear and respiratory affections and bowel-complaints. Six major operations were performed. Vaccination is carried out by the táluka vaccinator. Four post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon in December. The total cost was Rs. 1,016-4-1, the cost per patient Re. 0-2-6 against Rs. 947-6-4 and Re. 0-2-4 in 1888, and Rs. 859-14-11 and Re. 0-2-3 in 1887 respectively.

INCHALKARANJI.—*In charge of* Mr. D. PURUSHRAM.

The building is unsuitable. The dispensary was visited by the Political Agent and chief officers of the Kolhápur State occasionally. The sanitary condition of the town is not satisfactory; the water-supply from the river good and abundant. The total treated was 10,237 out-door and 2 in-door patients, as compared with 9,894 and 2 in 1888, and 9,800 and 2 in 1887 respectively. The most common diseases were malarial fevers, rheumatism, ophthalmia, lung affections, bowel-complaints and skin diseases. Nine cases of cholera occurred, all of which recovered. Eight major operations were performed. Vaccination is performed by the State vaccinator. Three post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon, Kolhápur, in November. The total cost was Rs. 1,136-2-6 and the cost per patient Re. 0-1-9 against Rs. 1,199-15-1 and Re. 0-1-11 in 1888, and Rs. 1,081-12-4 and Re. 0-1-9 in 1887 respectively.

SURIBAN.—*In charge of* Mr. POCHUTTA HEERAPA.

The building is not in good repair. The dispensary was visited by the officials of the State. The sanitary condition of the town is not satisfactory; the water-supply is abundant but not good. The total treated was 2,722 out-door patients as compared with 3,087 in 1888 and 1,763 in 1887. The most common complaints were malarial fevers, dysentery, bronchitis, diarrhœa, scabies, worms, and ear, eye and skin affections. 59 cases of epidemic cholera were treated of which 34 proved fatal. The dispensary was visited by the Assistant Political Agent, Southern Marátha Country. The total cost was Rs. 590-0-0, the cost per patient Re. 0-3-5, as compared with Rs. 568-5-0 and Re. 0-2-11 in 1888 and Rs. 397-9-0 and Re. 0-3-7 in 1887 respectively.

KOLHÁPUR CITY.—*In charge of* Mr. G. K. PENDARKER.

The dispensary was opened in July 1889. The State authorities visited the dispensary. The total treated was 7,976 out-door patients. The prevailing diseases were malarial fevers, respiratory affections and skin diseases. Five major operations were performed. The dispensary was inspected by the Darbár Surgeon four times. The total cost was Rs. 2,465-10-0 and cost per patient Re. 0-4-11.

GUDGERI.—*In charge of* Mr. GUNPATRAO.

The dispensary was opened in August. The water-supply is insufficient. The total treated was 1,312 out-door patients. The most common complaints were fevers, skin diseases, worms and eye affections. Seven cases of cholera occurred. The total cost was Rs. 2,305-14-7 and the cost per patient Re. 1-12-1.

BUDHGAON.—*In charge of* Mr. SUKHARAM.

The dispensary was opened in April. The building is in good repair. The total treated was 8,817 out-door patients. The most common diseases were ague, ophthalmia, dyspepsia and worms. One case of cholera occurred. Eight post-mortem examinations were made. The dispensary was inspected by the Darbár Surgeon, Kolhápur. The total cost was Rs. 3,037-11-1 and the cost per patient Re. 0-5-6.

GUJARA'T.

SURAT COLLECTORATE.

SIR COWASJI JEHANGIR CIVIL HOSPITAL, SURAT.—*In charge of* Surgeon-Major K. S. NARIMAN.

Conservancy.—The city is very dirty. The conservancy of the hospital is well attended to. The municipality is doing its best to prevent the construction of open privies which give out most offensive and deleterious effluvia by the night-soil mixing with urine and ablution water.

Water-supply.—Abundant but brackish. Different schemes for supplying the city with pure drinking water have been devised by the Municipality, but owing to financial pressure they have all been held in abeyance.

Hospital Buildings.—In excellent repair. The floors of the diarrhœa ward, of bath-room and of a part of the south verandah were paved with Porebunder stone.

General health—Was not satisfactory. Cholera broke out in January and continued till the end of June. There were in all 804 cases of which 619 proved fatal. During the previous year there were 738 cases with 484 deaths.

Attendance of patients.—There were 566 in-door and 9,323 out-door patients against 565 and 9,468 respectively in 1888.

Prevailing diseases.—Malarial fevers, worms, skin, eye, ear and respiratory affections and bowel-complaints.

Surgical operations.—There were 97 major and 904 minor operations, as compared with 61 and 711 respectively in the previous year. Among the major the most important were extraction of cataract from the eye, amputation at the wrist joint, amputation of penis, removal of calculi from the bladder and paracentesis of the abdomen.

Mortality and its causes.—73 deaths occurred amongst in-patients—23 from cholera, 8 from diarrhœa, 7 from malarial fevers, 6 from tubercular diseases, 14 from other causes, 3 from dysentery and 4 each from debility, nervousness and lung diseases.

Vaccination.—By the municipal vaccinator at the civil hospital twice a week. There were 2,846 primary vaccinations of which 2,776 were successful, 68 unsuccessful and 2 doubtful.

Medico-legal cases.—Six post-mortem examinations were made and opinion given in 112 cases.

Conduct of establishment.—First Class Hospital Assistant Narayenrao Jadow is highly commended. Third Class Hospital Assistant Ramkrishna Sookeshwar has also given much satisfaction. The conduct of the second class establishment is reported to be fairly good.

Cost.—The total cost was Rs. 14,178-2-7, the cost per patient Re. 1-6-11 against Rs. 14,722-15-7 and Re. 1-7-5 in 1888 respectively. The cost of each diet was Re. 0-2-11, against Re. 0-3-3 in 1888.

MUNICIPAL DISPENSARY.

CURSETJI FURDUNJI PARAK DISPENSARY, SURAT.—*In charge of* Assistant Surgeon Khán Báhádur DOSSABHOY PESTONJI, G.G.M.C., Honorary Assistant Surgeon to His Excellency the Viceroy.

The building is in good repair. The dispensary committee visited the dispensary four times. The sanitary condition of the town is fairly good. Almost all the wells in the city being brackish, the water is not fit for drinking purposes. The total treated was 8,540 out-door and 2 in-door patients against 10,016 and 4 in 1888 and 9,603 and 4 in 1887 respectively. The prevailing diseases were ague, dysentery, diarrhœa, bronchitis, worms, ophthalmia and ear diseases. Four major operations were performed. Vaccination is carried on by the municipal vaccinator. 58 cases of cholera were treated of which 10 proved fatal. The dispensary was inspected by the Civil Surgeon in September. The total cost was Rs. 5,895-8-2, the cost per patient Re. 0-11-0 as compared with Rs. 5,437-3-7 and Re. 0-8-8 in 1888 and Rs. 5,179-7-2 and Re. 0-8-7 in 1887 respectively.

GRANT-IN-AID DISPENSARIES.

OLPAD.—*In charge of* Hospital Assistant SYED ABDUL RAHIMAN.

The building has not been kept in repair. The committee visited the dispensary five times. The sanitation is unsatisfactory. The water-supply from wells is very deficient.

The total treated was 3,437 out-door and 57 in-door patients, as compared with 3,548 and 46 in 1888 and 3,932 and 50 in 1887 respectively. The most common diseases were malarial fevers, diseases of the eye, ear, skin and respiratory and digestive systems and local injuries. There were 57 cases of cholera in the town and 385 in adjacent villages of which 33 and 209 respectively were fatal. 3 major operations were performed. Vaccination is carried out by the táluka vaccinator. Five post-mortem examinations were made at the request of the Police, and opinion given on 31 medico-legal cases. The dispensary was inspected by the Civil Surgeon on 12th October. The total cost was Rs. 833-13-10, the cost per patient Re. 0-3-9 against Rs. 1,075-1-3 and Re. 0-4-9 in 1888, and Rs. 1,016-8-3 and Re. 0-4-1 in 1887 respectively.

BARDOLI.—*In charge of* Hospital Assistant WAMON RAMCHANDRA.

The building has not been repaired. The committee visited the dispensary four times. The sanitary condition of the town is fairly good. The water-supply is brackish but abundant. The total treated was 3,167 out-door and 67 in-door patients against 4,062 and 46 in 1888 and 3,653 and 45 in 1887 respectively. The most common complaints were malarial fevers, ophthalmia, skin diseases, and diseases of the respiratory and digestive functions. There were 212 attacks from cholera in the town and surrounding villages with 117 deaths. Fourteen major operations were performed. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon on 29th December. The total cost was Rs. 1,264-13-0, the cost per patient Re. 0-6-3 as compared with Rs. 1,359-5-7 and Re. 0-5-3 in 1888 and Rs. 1,066-4-5 and Re. 0-4-7 in 1887 respectively.

SIR DINSHAW MANECKJI PETIT DISPENSARY, CHIKHLI.—*In charge of* Hospital Assistant MULLOO SAYEE.

The building is in a very bad state of repair. The committee visit the dispensary often. The sanitation of the town is not satisfactory. The water-supply from wells is good and abundant. The total treated was 5,215 out-door and 22 in-door patients as compared with 5,277 and 26 in 1888 and 6,125 and 20 in 1887 respectively. The prevailing diseases were malarial fevers, diarrhœa, ophthalmia, skin diseases and respiratory affections. Cholera broke out in a mild form during August and September. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon in September. The total cost was Rs. 966-8-1, the cost per patient Re. 0-2-11 against Rs. 933-11-6 and Re. 0-2-9 in 1888, and Rs. 1,420-7-1 and Re. 0-3-8 in 1887 respectively.

PARDI.—*In charge of* Hospital Assistant NASSARVANJI PALLONJI.

The building is in good repair except the glass-roof which leaks. A store-room and a private room are required. The committee visited the dispensary six times. The conservancy arrangements are not satisfactory. The water-supply is abundant but not of good quality owing to the wells being in close proximity to the tank-water which is contaminated. The total treated was 5,835 out-door and 6 in-door patients as compared with 6,559 and 32 in 1888 and 5,724 and 17 in 1887 respectively. The most common complaints were ague, diarrhœa, worms, ophthalmia and skin diseases. Three major operations were performed. Vaccination is carried on by the táluka vaccinator. Two post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon in October. The total cost was Rs. 964-12-5, the cost per patient Re. 0-2-7 against Rs. 1,923-9-0 and Re. 0-4-8 in 1888 and Rs. 1,756-10-8 and Re. 0-4-10 in 1887 respectively.

MANDVI.—*In charge of* Hospital Assistant GOVIND TANTIA.

The dispensary building is in good repair. The committee met ten times and the individual members visited twice. The sanitary condition of the town is fairly good. The water-supply is bad but abundant. The total treated was 3,056 out-door and 35 in-door patients against 3,928 and 62 in 1888 and 3,482 and 71 in 1887 respectively. The prevailing diseases were malarial fevers, worms, ophthalmia, skin diseases and mumps. Vaccination is carried out by the local fund vaccinator. Four major operations were performed. The dispensary was inspected by the Deputy Sanitary Commissioner in May and by the Civil Surgeon in December. The total cost was Rs. 1,260-11-3, the cost per patient Re. 0-6-6 against Rs. 1,305-15-5 and Re. 0-5-2 in 1888 and Rs. 1,141-8-2 and Re. 0-5-1 in 1887 respectively.

RANDER.—*In charge of* Hospital Assistant HORMUSJI EDALJI.

The building, a hired one, is in good repair but not suitable for the purpose. The committee visit monthly. Conservancy arrangements are not very satisfactory. The water-supply is abundant but not good in quality. The total treated was 12,062 out-door patients as compared with 11,334 and 12,926 in 1888 and 1887 respectively. The most common diseases were malarial fevers, ophthalmia, skin-diseases, respiratory affections, diarrhœa, and diseases of the digestive system. There were 150 cases of cholera, of which 75 died. Forty-two major operations were performed. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon on April 30th. The total cost was Rs. 1,089-4-8, the cost per patient Re. 0-1-5 as compared with Rs. 1,137-5-2 and Re. 0-1-7 in 1888 and Rs. 1,059-8-2 and Re. 0-1-3 in 1887 respectively.

The accommodation is too limited to admit of in-patients being treated and a new building is therefore necessary.

NASSARVANJI MANECKJI PETIT DISPENSARY, KHERGAUM.—*In charge of* Hospital Assistant NARSAPPA ERRAPPA.

The buildings require repairs. A dead-house is needed. The dispensary was visited by the committee 8 times. The sanitation of the town is not satisfactory. The water-supply is good and ample. The total treated was 2,983 out-door and 1 in-door patients against 3,149 and 3 in 1888, and 3,316 and 1 in 1887 respectively. The prevailing diseases were malarial fevers, worms, skin-diseases and respiratory affections. Vaccination is performed by the local fund vaccinator. The dispensary was inspected by the Civil Surgeon in November. The total cost was Rs. 894-3-6, the cost per patient Re. 0-4-9 against Rs. 727-9-5 and Re. 0-3-8 in 1888 and Rs. 846-15-6 and Re. 0-4-1 in 1887 respectively.

SELF-SUPPORTING DISPENSARY.

VICTORIA DISPENSARY, NAVSARI.—*In charge of* Assistant Surgeon M. J. MISTRI, L.M. & S.

The building is in good repair. The committee held three meetings and the chairman visited frequently. The sanitary condition of the town is fairly good. The water-supply is good and sufficient. The total treated was 5,604 out-door and 29 in-door patients against 4,759 and 27 in 1888, and 7,237 and 28 in 1887 respectively. The prevailing diseases were malarial fevers, skin-diseases, respiratory affections, ophthalmia, dyspepsia and diseases of the digestive functions. There was no epidemic. Nineteen major operations were performed. Vaccination is conducted by the local fund vaccinator. Five post-mortem examinations were made and opinion given on numerous medico-legal cases at the request of the police. The dispensary was inspected by the Civil Surgeon on September 24th. The total cost was Rs. 2,477-4-2, the cost per patient Re. 0-7-0 as compared with Rs. 2,966-3-3 and Re. 0-9-10 in 1888 and Rs. 3,541-3-0 and Re. 0-7-9 in 1887 respectively.

GOVERNMENT DISPENSARY.

SIR DINSHAW MANECKJI PETIT DISPENSARY, BULSAR.—*In charge of* Assistant Surgeon R. R. DADINA, L.M. & S.

The building is in a fair state of repair. Seven meetings of the dispensary committee were held. The sanitation of the town is fairly good. The water-supply is good and ample. The total treated was 15,008 out-door and 85 in-door patients as compared with 16,290 and 91 in 1888, and 15,943 and 80 in 1887 respectively. The most common complaints were worms, ague, ophthalmia, respiratory affections, skin and ear diseases and diarrhœa. Twelve major operations were performed. Vaccination is carried on by the Municipality under the supervision of the Assistant Surgeon. Six post-mortem examinations were held. The dispensary was inspected by the Civil Surgeon in September. The total cost was Rs. 4,992-14-9, the cost per patient Re. 0-5-3 against Rs. 5,065-5-11 and Re. 0-4-11 in 1888 and Rs. 6,039-9-2 and Re. 0-6-0 in 1887 respectively.

NATIVE STATE DISPENSARY.

DUMAS.—*In charge of* Hospital Assistant NARAYEN BHAWRAO VAIDYA.

The building is in good repair. The dispensary committee visit monthly. The sanitary condition of the town is fairly good. The water-supply is good and abundant. The total treated was 3,751 out-door and 1 in-door patients against 3,855 and 3 in 1888, and 3,153 and 1 in 1887 respectively. The most common diseases were ague, respiratory and rheumatic affections, skin-diseases and bowel-complaints. Cholera gave 39 cases, of which 10 were fatal. Twenty-nine major operations were performed. Vaccination is carried on by the local fund vaccinator. The dispensary was inspected in May by the Civil Surgeon. The total cost was Rs. 993-9-4, the cost per patient Re. 0-4-2, against Rs. 954-8-2 and Re. 0-3-11 in 1888 and Rs. 1,028-6-10 and Re. 0-5-2 in 1887 respectively.

BROACH COLLECTORATE.

CIVIL HOSPITAL, BROACH.—*In charge of* Assistant Surgeon SORABJI FARDUNJI GHANDHI, L.M. & S.

Conservancy.—The town is kept clean by the municipality. There are 1,800 cesspools and 700 open privies which are cleaned once a day.

Water-supply—From the river Nerbudda, wells and tanks. Is brackish and deficient during summer.

Hospital Buildings—Are in good repair. The floor of the female and police wards requires stone pavement.

General Health.—Was fair. Cholera was prevalent in a virulent form during the first six months. 577 cases were reported with 332 deaths.

Attendance of patients.—499 in-door and 11,490 out-door patients were treated against 427 and 10,873 respectively in 1888.

Prevailing diseases.—Malarial fevers, diseases of the skin, digestive system, ear, eye, lung, syphilitic and rheumatic affections.

Surgical Operations—35 major and 977 minor against 15 and 668 respectively in 1888. The most important were herniotomy, amputation, craniotomy, reductions of dislocations and turning.

Mortality and its causes.—There were 13 deaths among in-door patients due to diarrhœa, hepatic abscess, burn, dysentery, starvation and pericarditis.

Vaccination—Is conducted by the municipal vaccinator, who is under the control of the sanitary department.

Medico-legal.—About 392 cases were examined and reported upon and 7 post-mortem examinations made at the instance of the police.

Conduct of Establishment.—Second Class Hospital Assistant Ballaji Moocund is well reported on. The conduct of the second class servants is reported to be fairly good.

Cost.—The total cost was Rs. 5,766-4-8, the cost per patient Re. 0-7-8 against Rs. 5,636-13-10 and Re. 0-7-11 in 1888 respectively. The cost of each diet was Re. 0-3-0, being the same as in the previous year.

GRAINT-IN-AID DISPENSARIES.

Ankleshwar.—*In charge of* Hospital Assistant Luxumon Anant.

The building is in a good state of repair except the floors of the receiving, compounding and private rooms. An operating table is badly needed. The dispensary was visited ten times by the committee. The sanitary arrangements of the town are fairly good. The water-supply is good and plentiful. The total treated was 12,269 out-door and 57 in-door patients as compared with 11,325 and 48 in 1888 and 12,117 and 37 in 1887 respectively. The prevailing diseases were malarial fevers, syphilitic, eye, ear, and respiratory affections, skin-diseases, and diseases of the digestive system. Cholera and small-pox were prevalent both in the town and surrounding villages. Ten major operations were performed. Vaccination is carried out by the táluka vaccinator. Two post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon in June and December. The total cost was Rs. 1,499-11-4, the cost per patient Re. 0-1-11 against Rs. 1,562-9-5 and Re. 0-2-2 in 1888, and Rs. 2,387-10-5 and Re. 0-3-1 in 1887 respectively.

Ardesar Hormusji Wadia Dispensary, Ilav.—*In charge of* Hospital Assistant Phirozesha D. Cooper.

The dispensary is in good repair. A dead-house is badly wanted. The committee visited the dispensary fifteen times. The conservancy arrangements are very unsatisfactory. The water-supply is good and copious. The total treated was 4,514 out-door patients against 4,121 in 1888 and 4,526 in 1887. One in-door patient was treated in each of the years 1888 and 1887. There were 23 cases of cholera in the town and its vicinity of which 10 proved fatal. The most common complaints were malarial fevers, diseases of the skin, eye, digestive and respiratory systems. Four major operations were performed. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon in June and December. The total cost was Rs. 1,266-11-0, the cost per patient Re. 0-4-5 as compared with Rs. 1,252-8-4 and Re. 0-4-10 in 1888 and Rs. 1,341-11-4 and Re. 0-4-8 in 1887 respectively.

Hansot—*In charge of* Hospital Assistant Essoobjee Salamonjee.

The building, a hired one, is quite unsuitable for the purpose. There is no accommodation for in-door patients, nor is there a dead-house, and the dissection has therefore to be made in an open place outside the town. The committee visit the dispensary monthly. The sanitation of the town is good. The water-supply from wells outside the town is both good and abundant. The total treated was 6,005 out-door against 4,879 in 1888, and 3,015 in 1887. The most common diseases were malarial fevers and diseases of the ear, eye, skin and digestive system. There were 92 cases of small-pox with 6 deaths. Of the 5 cases of cholera, 2 that were imported from Broach proved fatal. Seven major operations were performed. Vaccination is carried out by the táluka vaccinator. One post-mortem examination was made and certificates granted in 28 medico-legal cases. The Civil Surgeon inspected the dispensary in May and December. The total cost was Rs. 1,514-10-1, the cost per patient Re. 0-4-0 as compared with Rs. 901-6-9 and Re. 0-2-11 in 1888 and Rs. 889-6-5 and Re. 0-4-8 in 1887 respectively.

JAMBUSAR.—*In charge of* Hospital Assistant ANNAJI PANDURANG.

The building is very nicely situated and in good repair. The dispensary was visited 15 times by the committee. The sanitary condition of the town is fairly good. The water-supply is good and plentiful. The total treated was 5,901 out-door and 122 in-door patients as compared with 6,996 and 102 in 1888 and 8,918 and 102 in 1887 respectively. The prevailing diseases were malarial fevers, diseases of the skin, eye, ear and digestive system, and local injuries. One major operation was performed. Vaccination is carried out by the táluka vaccinator. Four post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 1,370-0-4, the cost per patient Re. 0-3-7 as compared with Rs. 1,184-1-11 and Re. 0-2-8 in 1888 and Rs. 1,362-0-7 and Re. 0-2-4 in 1887 respectively.

AMOD.—*In charge of* Hospital Assistant BHASKER SITARAM.

The building is in a good state of repair. The dispensary was visited 12 times by the committee. The conservancy arrangements are not satisfactory. The water-supply from wells is good and abundant, but liable to contamination by soakage. The total treated was 3,547 out-door and 15 in-door patients against 3,628 and 17 in 1888 and 3,631 and 21 in 1887 respectively. The most common complaints were malarial fevers, skin diseases, bowel-complaints and rheumatic affections. There occurred 18 cases of cholera. Vaccination is performed by the táluka vaccinator. Two post-mortem examinations were made and opinion given on several medico-legal cases at the request of the police. The dispensary was inspected by the Civil Surgeon in January, May and November. The total cost was Rs. 1,470-8-10, the cost per patient Re. 0-6-7 as compared with Rs. 1,448-14-6 and Re. 0-6-4 in 1888 and Rs. 1,550-5-7 and Re. 0-6-9 in 1887 respectively.

WAGRA.—*In charge of* Hospital Assistant KESHAVLAL CHOTALAL.

The building is in good repair. The construction of a store-room has been sanctioned, but the work has not been taken in hand. The committee visited the dispensary 28 times. The sanitation of the town is fairly good. The water-supply from wells outside the town is good and ample. The total treated was 4,717 out-door and 42 in-door patients as compared with 5,323 and 41 in 1888 and 5,188 and 13 in 1887 respectively. The prevailing diseases were skin diseases, ophthalmia, malarial fevers, ulcers, and diseases of the digestive and respiratory functions. A very few cases of cholera occurred. Three major operations were performed. Vaccination is conducted by the táluka vaccinator. Opinion was given on 28 medico-legal cases and one post-mortem examination held at the request of the Police. The dispensary was inspected in June and December by the Civil Surgeon. The total cost was Rs. 1,311-9-8, the cost per patient Re. 0-4-4 against Rs. 1,230-0-9 and Re. 0-3-8 in 1888 and Rs. 1,391-14-9 and Re. 0-14-3 in 1887 respectively.

KAVI.—*In charge of* Hospital Assistant ISAAC AARON.

The building, a hired one, is in a bad state of repair. The committee visited the dispensary 20 times. The sanitary arrangements are not satisfactory. The water-supply is abundant and of good quality but liable to pollution from soakage. The total treated was 3,147 out-door and 5 in-door patients as compared with 4,130 and 10 in 1888 and 5,237 and 6 in 1887 respectively. The most common diseases were skin-diseases, malarial fevers, ophthalmia, rheumatic affections and bowel-complaints. Seven major operations were performed. Two post-mortem examinations were made at the request of the police. The dispensary was inspected by the Civil Surgeon. The total cost was Rs. 1,095-8-0, the cost per patient Re. 0-5-6 against Rs. 1,060-5-0 and Re. 0-4-1 in 1888, and Rs. 1,676-9-9 and Re. 0-5-1 in 1887 respectively.

DEHEJ.—*In charge of* Hospital Assistant PURSON SINGH.

The building, a hired one, is unsuitable and requires a dead-house, a store-room and a latrine. A new building is highly desirable. Individual members of the committee visit the dispensary monthly. The sanitation of the town is unsatisfactory. The water-supply from wells is good and abundant but liable to contamination by soakage. The total treated was 2,573 out-door and 7 in-door patients against 1,540 and 4 in 1888 and 1,842 and 0 in 1887 respectively. Four major operations were performed. Vaccination is carried out by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon in May and December. The total cost was Rs. 757-11-0, the cost per patient Re. 0-4-8 against Rs. 637-9-4 and Re. 0-6-7 in 1888 and Rs. 902-2-4 and Re. 0-7-10 in 1887 respectively.

KAIRA COLLECTORATE.

CIVIL HOSPITAL, KAIRA.—*In charge of* Assistant Surgeon B. E. GHASVALA, L. M. & S.

Conservancy—The town looks clean, but the nuisance of the night-soil depôt remains unabated. The large sickness in the jail is mainly due to the depôt being in its close proximity. The want of funds does not permit of its removal.

Water-supply—From rivers and wells, is good and abundant.

Hospital buildings—Are in good order, but ventilation is defective owing to there being no windows.

General health—Bad. 43 deaths from cholera were registered in the town. One that was admitted into the hospital recovered. Malarial fevers due to the unusually great rainfall account for great many deaths.

Attendance of patients.—3,726 out-door and 451 in-door against 3,729 and 363 respectively in 1888.

Prevailing diseases—Malarial fevers, skin, syphilitic, rheumatic, eye and ear affections, diarrhœa and dysentery.

Surgical operations.—Six major and 165 minor against 5 and 177 respectively in 1888. The major operations were amputation of fore-arm, reduction of dislocation of jaw, lateral lithotomy, removal of pharyngeal tumour and incision of 2 perineal abscesses.

Mortality and its causes.—16 deaths occurred in hospital,—2 due to sunstroke, 8 to pneumonia, 1 to abdominal wound, 1 to calculus in bladder, 1 to shock and hæmorrhage, 1 to peritonitis, 1 to phthisis, and 1 to starvation.

Medico-legal—17 post-mortem examinations were made.

Vaccination.—By a táluka vaccinator.

Conduct of Establishment—Satisfactory.

Cost.—The total cost was Rs. 7,119-10-2, the cost per patient Rs. 1-11-3 as compared with Rs. 6,886-5-2 and Rs. 1-10-11 in 1888 respectively. The cost of each diet was Re. 0-2-9, being the same as in 1888.

GRANT-IN-AID DISPENSARIES.

MEHMADABAD—*In charge of* Hospital Assistant VITHAL BALWANT.

The building is unsuitable for the purpose. The committee visited four times. The sanitary condition of the town is fair. The water-supply is good and abundant. The total treated was 7,522 out-door and 147 in-door patients against 7,966 and 89 in 1888, and 10,453 and 109 in 1887 respectively. The most common diseases were ophthalmia, skin diseases, malarial fevers, ulcers, diseases of the ear and digestive system. There were 10 cases of cholera in and outside the town of which 4 were fatal. Vaccination is performed by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon on September 10th. The total cost was Rs. 1,253-14-4, the cost per patient Re. 0-2-7 as compared with Rs. 1,380-12-5 and Re. 0-2-8 in 1888 and Rs. 1,359-2-7 and Re. 0-2-0 in 1887 respectively.

NADIA'D.—*In charge of* Hospital Assistant RAM SINGH.

The building is in good repair. The dead-house requires improvement. The committee visited the dispensary nine times. The sanitation of the town is satisfactory. The water-supply from wells is abundant and of good quality. The total treated was 15,744 out-door and 187 in-door patients, as compared with 21,477 and 173 in 1888 and 20,400 and 149 in 1887 respectively. The most common complaints were skin diseases, ophthalmia, ear, rheumatic and respiratory affections, malarial fevers, diarrhœa and dysentery. 11 cases of cholera occurred with 5 deaths. 29 major operations were performed. The vaccination is carried on by the municipal vaccinator. 116 medico-legal cases were examined and reported on and 7 post-mortem examinations made at the request of the police. The dispensary was inspected by the Civil Surgeon in February and July. The total cost was Rs. 2,319-12-1, the cost per patient Re. 0-2-3 as compared with Rs. 2,592-6-5 and Re. 0-1-10 in 1888 and Rs. 2,401-4-2 and Re. 0-1-10 in 1887 respectively.

BORSAD.—*In charge of* Hospital Assistant MAHABIR PRASADA.

The building is in good repair. The committee held quarterly meetings and the chairman visits the dispensary frequently. The sanitary condition of the town is fair. The water-supply is good and ample but liable to soakage. The total treated was 5,750 out-door and 81 in-door patients against 6,734 and 130 in 1888 and 7,649 and 224 in 1887 respectively. The prevailing diseases were skin diseases, ophthalmia, malarial fevers, ulcers and diseases of the digestive system. There were 21 attacks from cholera of which 5 proved fatal. Vaccination is performed by the taluka vaccinator. 8 post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon in January and November. The total cost was Rs. 1,352-15-10, the cost per patient Re. 0-3-8 against Rs. 1,621-11-7 and Re. 0-3-9 in 1888 and Rs. 1,689-0-11 and Re. 0-3-5 in 1887 respectively.

MAHUDHA.—*In charge of* Hospital Assistant GANPAT KAKDAY.

The building is in a good state of repair. A dead-house is much needed. The committee visited the dispensary every three months. The sanitation of the town is bad. The water-supply is good and abundant but liable to contamination by soakage. The total treated was 7,713 out-door and 69 in-door patients, against 8,272 and 77 in 1888 and 8,856 and 87 in 1887 respectively. The prevailing diseases were ophthalmia, skin

diseases, malarial fevers, dyspepsia, bowel-complaints and ear diseases. The town was entirely free from cholera, but it appeared in a virulent form in surrounding villages. Eleven major operations were performed. One post-mortem examination was made and opinion given on 29 medico-legal cases at the request of the police. Vaccination is conducted by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon in January and July. The total cost was Rs. 1,166-4-5, the cost per patient Re. 0-2-4 against Rs. 1,514-1-4 and Re. 0-2-10 in 1888 and Rs. 1,350-9-1 and Re. 0-2-5 in 1887 respectively.

DAKOR.—*In charge* of Hospital Assistant SHANKER HARI.

The building is in good repair. The committee visited the dispensary six times. The sanitary state of the town is fair. The water-supply is ample but inferior in quality. The total treated was 8,299 out-door and 94 in-door patients against 8,205 and 80 in 1888 and 8,640 and 110 in 1887 respectively. The prevailing diseases were malarial fevers, skin diseases, ophthalmia, worms, diseases of the ear and digestive system and ulcers. There was no epidemic. Two major operations were performed. Vaccination is carried out by the táluka vaccinator. Seven post-mortem examinations were made and several medico-legal cases examined and reported upon. The dispensary was inspected by the Civil Surgeon in February and September. The total cost was Rs. 1,373-9-4, the cost per patient Re. 0-2-7 as compared with Rs. 2,197-2-11 and Re. 0-4-2 in 1888 and Rs. 2,304-3-8 and Re. 0-4-2 in 1887 respectively.

KAPADVANJ.—*In charge* of Hospital Assistant ABRAHAM SHALLOM.

The building is in a good state. The committee visited the dispensary every month. The sanitation of the town is good. The water-supply is good and abundant. The total treated was 18,217 out-door and 59 in-door patients as compared with 18,629 and 32 in 1888 and 19,054 and 45 in 1887 respectively. The most common diseases were malarial fevers, ophthalmia, skin diseases, local injuries, diseases of the ear, respiratory and digestive functions and ulcers. There was only one case of cholera. 17 major operations were performed. Vaccination is favourably received. Three post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon in January and September. The total cost was Rs. 1,915-7-2, the cost per patient Re. 0-1-8 against Rs. 2,144-9-0 and Re. 0-1-10 in 1888 and Rs. 1,444-12-3 and Re. 0-1-2 in 1887 respectively.

ANAND.—*In charge* of Hospital Assistant BEHRAMJI JIVAJI.

The dispensary was opened on the 2nd January 1888. The buildings are in a good state of repair. Fittings in the dispensary and a store-room are wanted. The committee visited the dispensary five times. The sanitary condition is fair and likely to improve as the town has been made into a municipality. The water-supply is ample and of good quality. The total treated was 6,581 out-door and 81 in-door patients as compared with 5,730 and 72 in 1888 respectively. The most common complaints were skin diseases, malarial fevers, diseases of the eye, ear and digestive system and diarrhœa. There was no epidemic but 2 cases of small-pox occurred among the European members of the Salvation Army. Two major operations were performed. Vaccination is conducted by the táluka vaccinator. 203 medico-legal cases were examined and reported upon and 11 post-mortem examinations made. The dispensary was inspected in February and November by the Civil Surgeon. The total cost was Rs. 1,166-9-1, the cost per patient Re. 0-2-9 as compared with Rs. 1,311-14-0 and Re. 0-3-7 respectively in 1888.

PANCH MAHA'LS COLLECTORATE.

CIVIL HOSPITAL, GODHRA—*In charge* of Assistant Surgeon J. P. WADIA, L. M. & S., *till 14th February*, Surgeon K. H. MISTRI *up to 15th November, afterwards* Assistant Surgeon P. P. MOOLAN, L. M. & S., acting.

Conservancy—Is bad. The nuisance from the distillery, the pit-privies and cesspools continues, and the sanitary condition of most of the houses, especially of the Ghanchis and Bhils, is as bad as ever.

Water-supply.—Mostly from wells, river and tank. The wells with the exception of a few contain impure water and are liable to contamination. The tank and river water is very often defiled by people resorting to them for purposes of nature.

Hospital buildings.—Remain the same as in 1886. Rough plans and estimates for increased accommodation are lying with the Public Works Department.

General health.—Was fair on the whole. Cholera, said to have been imported from Dákor, prevailed, there being 65 cases with 38 deaths of which 6 were treated in hospital with 4 deaths. Three cases of small-pox were also treated.

Attendance of patients.—8,617 out-door and 462 in-door patients against 10,886 and 376, respectively, in 1888. The decrease in out-patients was due to the less prevalence of fevers, and increase of in-patients to a large number of pilgrims and paupers seeking admission during the year

Prevailing diseases.—Malarial fevers head the list, after which come skin diseases, ophthalmia, ear diseases, respiratory affections, bowel-complaints, and worms.

Surgical operations.—Thirteen major and 428 minor. The major operations were 1 reparative operation for cicatrix, 1 excision of eye-ball, 1 removal of necrosed bone, 1 thumb amputation, 7 incisions for large abscesses, and 1 incision for sinus.

Mortality and its causes.—There were 81 deaths among in-door patients—35 due to remittent fever with privation, 12 to privation, 10 to diarrhœa, 5 to pneumonia, 4 to cholera, 1 to debility, 1 to old age, 1 to convulsion, 1 to cerebral hæmorrhage, 1 to burns, 1 to anæmia, 1 to phthisis, 1 to small-pox, 1 to hydrophobia, 1 to miscarriage, 1 to dysentery, 1 to tetanus idiopathic, 1 to secondary syphilis, 1 to abortion, and 1 to chronic bronchitis. Of these, 74 occurred among pilgrims and paupers within 24 hours after admission.

Vaccination.—By the local fund vaccinator.

Medico-legal.—Six post-mortem examinations were made and opinion given in 31 medico-legal cases.

Conduct of establishment.—3rd Class Hospital Assistant Bapuji Jadow is highly commended for zeal and ability. The conduct of the second class servants was good.

Cost.—The total cost was Rs. 8,216-12-9, the cost per patient Re. 0-14-5, against Rs. 5,172-1-8 and Re. 0-7-4, respectively, in 1888. The cost of each diet was Re. 0-1-7 or 2 pies less than in the previous year.

GRANT-IN-AID DISPENSARIES.

DOHAD.—*In charge of* Assistant Surgeon T. C. KHANDVALA, L. M. & S.

The buildings are in good repair. An operating table is badly required. The dispensary was visited by the Collector, the District Superintendent of Police, and the District Deputy Collector. The sanitary arrangements are defective. The water-supply from wells is good but insufficient. The total treated was 6,874 out-door and 336 in-door patients against 6,272 and 350 in 1888 and 8,315 and 316 in 1887, respectively. The prevailing diseases were malarial fevers, worms, bowel-complaints and skin and eye diseases. There occurred a few cases of cholera. Thirteen major operations were performed. Vaccination is carried on from house to house. Seven post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon in May. The total cost was Rs. 2,735-1-10, the cost per patient Re. 0-6-0, against Rs. 2,351-11-8 and Re. 0-5-8 in 1888 and Rs. 3,251-9-1 and Re. 0-6-0 in 1887, respectively.

KA'LOL.—*In charge of* Hospital Assistant BALKRISHNA PANDURANG.

The dispensary was opened on 23rd December 1889. The building is well situated and suitable. The sanitary condition of the town is reported to be good. The water-supply is deficient. The total number of out-door and in-door patients treated was 202 and 3 respectively. The most common complaints were skin diseases, malarial fevers, ophthalmia and respiratory affections. The total cost was Rs. 35-0-0 and the cost per patient Re. 0-2-8.

AHMEDABAD COLLECTORATE.

HATHESING AND PREMABHAI HOSPITAL, AHMEDABAD.—*In charge of* Surgeon-Major J. ROBB *till April, afterwards* Surgeon-Major M. L. BARTHOLOMEUSZ.

Conservancy.—Good. The night-soil is removed by tram cars to a considerable distance outside municipal limits and now buried in pits as suggested by the Sanitary Commissioner.

Water-supply.—Is ample but inferior. The scheme for supplying the town with wholesome water has recently taken a practical turn. The supply wells at Dudheshwar have been completed, but the delay in further progress is the non-arrival of the pipes and machinery from England. A drainage scheme for disposal of sullage water is now under consideration, and there is every hope of a practical solution of the question.

Hospital buildings.—In good repair. No additions and alterations were made except that a few canvas sun screens were put up in the verandah where surgical operations continue to be performed. A consulting room, an operating theatre, a store-room and servants' quarters are the most urgent wants, which if supplied, would, it might with reason be said, make the hospital very popular and useful, as, in the absence of a private room, the hospital staff have to examine patients and hear their history in a public room exposed to the gaze of persons of all sexes assembled for advice. Considering that there is a large number of medical pupils always eager to watch the operations, an operating theatre is absolutely necessary to prevent their crowding round the patients, thereby shutting out the light and embarrassing the operator. These two cardinal defects require to be remedied. The second class servants, whose presence is always required in the hospital, have no quarters allotted to them, which also is a great drawback.

General health.—Was better than in the previous year. Although cases of cholera did occur, the disease did not assume a severe epidemic form as it did last year.

Attendance of patients.—18,731 out-door and 1,894 in-door patients were treated against 18,968 and 1,991 repectively in 1888.

Prevailing diseases.—Malarial fevers, skin diseases, ophthalmia, bowel-complaints, venereal diseases, bronchitis, rheumatism and local injuries.

Surgical operations.—137 major and 795 minor operations were performed. Of the former the most important were 20 amputations of various kinds, 21 operations on the eye including 10 for cataract, 14 lateral lithotomies, 9 reductions of dislocation, 10 excisions of tumours, 3 perineal sections, and 1 abdominal section.

Mortality and its causes.—There were 124 deaths in hospital, or 6·6 per cent. of the total treated against 161 or 8 per cent. in 1888. A large number of deaths occurred among those who were brought to the hospital in a hopeless and dying condition, chiefly the mendicant class, who suffer from chronic diseases complicated with diarrhœa, dysentery, or chronic lung affections aggravated by their irregular modes of life.

Vaccination.—Is carried on by the municipal vaccinator regularly and carefully under the supervision of the Civil Surgeon. There were 4,823 primary and 715 re-vaccinations.

Medico-legal.—Seventeen post-mortem examinations were made and 582 medico-legal cases examined and reported upon.

Conduct of establishment.—The Civil Surgeon brings to prominent notice the valuable services rendered by 1st Class Hospital Assistant Luxumon Singh Arjun Singh in connection with the hospital and the medical school, and reiterates the praise bestowed upon him by Surgeon-Major Robb in previous reports. The conduct of the second class servants was satisfactory.

Cost.—The total cost was Rs. 33,537-3-6, the cost per patient Rs. 1-10-0, as compared with Rs. 22,435-8-11 and Rs. 1-1-1, respectively, in 1888. The cost of each diet was Re. 0-2-5, being the same as in 1888.

GRANT-IN-AID DISPENSARIES.

RA'IPUR.—*In charge of* Hospital Assistant BHAO SUCCARAM.

The buildings are in good repair. The committee visited the dispensary regularly every month. The sanitation is not satisfactory, but the municipality has lately employed a Licentiate of Medicine to look after sanitation and has a scheme to supply the people with sufficient and good potable water. The present supply is derived from wells which are liable to soakage. The total treated was 15,325 out-door and 52 in-door patients as compared with 14,696 and 33 in 1888, and 15,439 and 45 in 1887 respectively. The prevailing diseases were malarial fevers, diseases of the skin, eye, respiratory and digestive systems, local injuries and rheumatic affections. There were a few cases of cholera and small-pox. Of the former six cases were treated, of which 2 died. Eleven major operations were performed. Vaccination is carried on by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon on 7th June. The total cost was Rs. 2,745-12-8, the cost per patient Re. 0-2-10 against Rs. 2,283-12-5 and Re. 0-2-5 in 1888 and Rs. 3,680-15-9 and Re. 0-3-9 in 1887 respectively.

SA'NAND.—*In charge of* Hospital Assistant RAMA MALUP.

The buildings have not been repaired. A room for surgical operations and a cook-room for in-patients are much needed. Furniture and fittings are not sufficient. The conservancy arrangements are unsatisfactory. The committee visited the dispensary monthly. The water-supply from wells is said to be good and ample, but as it is liable to soakage can hardly be considered good at all times. The most common diseases were malarial fevers, ophthalmia, skin diseases, ulcers and dyspepsia. The total treated was 8,091 out-door and 133 in-door patients, as compared with 7,405 and 126 in 1888, and 8,523 and 62 in 1887 respectively. There was no epidemic in the town, but cholera prevailed in the district. Seven major operations were performed. Vaccination is carried on by the táluka vaccinator from house to house. Eleven post-mortem examinations were made and opinion given on several medico-legal cases at the request of the police. The dispensary was inspected by the Civil Surgeon in May. The total cost was Rs. 1,495-9-11, the cost per patient Re. 0-2-10 against Rs. 1,192-6-10 and Re. 0-2-6 in 1888 and Rs. 1,618-1-4 and Re. 0-3-0 in 1887 respectively.

VIRAMGA'M.—*In charge of* Hospital Assistant POPUTLAL LALLUBHAI.

The building is in good repair. The committee visited the dispensary occasionally. The sanitation of the town is unsatisfactory. The water-supply is ample and fairly good, but some is liable to soakage. The total treated was 7,439 out-door and 151 in-door patients, as compared with 7,664 and 166 in 1888 and 9,657 and 78 in 1887 respectively. The most common diseases were malarial fevers, ophthalmia, skin diseases and bowel-complaints. Small-pox and cholera were prevalent in March and April; of the latter 23 cases were

treated in the dispensary. Eleven major operations were performed. Vaccination is carried out by the táluka vaccinator. Eight post-mortem examinations were made and opinion given in numerous medico-legal cases. The dispensary was inspected by the Civil Surgeon in May. The total cost was Rs. 1,883-9-3, the cost per patient Re. 0-3-11 against Rs. 1,383-11-1 and Re. 0-2-9 in 1888 and Rs. 1,732-0-11 and Re. 0-2-10 in 1887 respectively.

DHOLKA.—*In charge of* Hospital Assistant RAMCHANDRA GOVIND NICUM.

The building requires repairs. The committee met thrice. The sanitation is defective. The water-supply from wells outside the town is abundant but of indifferent quality. The total treated was 6,556 out-door and 169 in-door patients against 7,264 and 105 in 1888 and 7,207 and 83 in 1887 respectively. The prevailing diseases were malarial fevers, ophthalmia, skin diseases and bowel-complaints. Small-pox and cholera were prevalent in a severe form. Of the former there were 19 cases with one death, and of the latter 87 cases with 37 deaths. Two major operations were performed. Vaccination is carried on by the municipal vaccinator. Ten post-mortem examinations were made and 146 medico-legal cases examined and reported on at the instance of the police. The dispensary was inspected by the Civil Surgeon in January and December. The total cost was Rs. 886-12-6, the cost per patient Re. 0-2-1 as compared with Rs. 2,067-9-4 and Re. 0-4-5 in 1888 and Rs. 1,396-9-10 and Re. 0-3-0 in 1887 respectively.

DHANDHUKA.—*In charge of* Hospital Assistant BABURAO NARAYAN.

The buildings are in good repair. The committee visited the dispensary monthly. The conservancy arrangements of the town are satisfactory. The water-supply is good and ample. The total treated was 5,429 out-door and 110 in-door patients as compared with 5,973 and 110 in 1888 and 6,320 and 78 in 1887 respectively. The most common diseases were malarial fevers, skin diseases, ulcers and bowel-complaints. Two major operations were performed. Vaccination is conducted from house to house by the municipal vaccinator. Seven post-mortem examinations were made and opinion given on several medico-legal cases. The dispensary was inspected in December by the Civil Surgeon. The total cost was Rs. 1,292 4-3, the cost per patient Re. 0-3-8 against Rs. 1,630-10-7 and Re. 0-4-3 in 1888 and Rs. 1,626-13-10 and Re. 0-4-0 in 1887 respectively.

PARA'NTI'J.—*In charge of* Hospital Assistant RAMJI BAPUJI.

The building is in a bad state. The committee visited the dispensary frequently. The sanitary arrangements of the town are fairly good. The water-supply is fair and abundant. The total treated was 6,075 out-door and 61 in-door patients against 7,043 and 75 in 1888 and 6,748 and 53 in 1887 respectively. The prevailing diseases were ophthalmia, malarial fevers, skin affections and bowel-complaints. A few cases of cholera and small-pox occurred in the town. Of the former there occurred 36 cases with 11 deaths. Three major operations were performed. Vaccination is conducted by the táluka vaccinator at the dispensary. Four post-mortem examinations were made and opinion given on thirty-two medico-legal cases. The dispensary was inspected in December by the Civil Surgeon and by the Deputy Sanitary Commissioner. The total cost was Rs. 703-5-6, the cost per patient Re. 0-1-9 as compared with Rs. 1,444-1-10 and Re. 0-3-2 in 1888 and Rs. 1,367-3-2. and Re. 0-3-2 in 1887 respectively.

GOGHA.—*In charge of* Hospital Assistant HARI KRISHNA RAYAKAR.

The building requires repair. The committee visited the dispensary six times. The sanitary condition of the town is very good. The water-supply from two wells is bad in quality and not sufficient. The total treated was 8,323 out-door and 51 in-door patients as compared with 10,542 and 64 in 1888 and 11,473 and 84 in 1887 respectively. The most common diseases were malarial fevers, ophthalmia, worms, skin and respiratory affections, dyspepsia and bowel-complaints. Thirteen major operations were performed. Vaccination is conducted by the táluka vaccinator. Six post-mortem examinations were made at the request of the police. The Civil Surgeon inspected the dispensary in January. The total cost was Rs. 1,514-4-11, the cost per patient Re. 0-2-10 against Rs. 1,868-1-8 and Re. 0-2-9 in 1888 and Rs. 2,257-3-7 and Re. 0-3-1 in 1887, respectively.

MODA'SA.—*In charge of* Hospital Assistant JOSEPH BENJAMIN.

The dispensary building is in good repair. The committee met regularly every month. The conservancy arrangements are not satisfactory. The water-supply from wells is good but deficient. The total treated was 5,839 out-door and 76 in-door patients against 7,560 and 51 in 1888 and 8,817 and 82 in 1887 respectively. The prevailing diseases were malarial fevers, ophthalmia, skin diseases and bowel-complaints. Small-pox, measles and cholera appeared in the town in a very mild form. Eight major operations were performed. Vaccination is carried on by a local fund vaccinator. Three post-mortem examinations were made and several medico-legal cases examined and reported upon. The total cost was Rs. 935-12-2, the cost per patient Re. 0-2-6 as compared with Rs. 1,814-10-8 and Re. 0-3-9 in 1888 and Rs. 1,386-11-3 and Re. 0-2-5 in 1887 respectively.

RANCHHODLAL DISPENSARY, AHMEDABAD.—*In charge of* Assistant Surgeon P. H. DADACHANJI, L.M. & S.

The building is in good repair. The committee visited the dispensary regularly every month. The sanitary state of the town is fair. The water-supply from a well in the premises of the dispensary building is good and free from soakage. The total treated was 14,813 out-door and 135 in-door patients against 13,654 and 122 in 1888 and 13,493 and 115 in 1887 respectively. The most common diseases were eye, ear, skin and respiratory affections, malarial fevers, diarrhœa and dysentery. Cholera broke out during summer and monsoon. There were 95 cases with 72 deaths. Thirty-seven major operations were performed. Vaccination is conducted by a municipal vaccinator in the dispensary twice a week. The total number of vaccine operations performed was 916, of which 827 were successful. The total cost was Rs. 5,181-13-8, the cost per patient Re. 0-5-6 against Rs. 10,345-1-3 and Re. 0-12-0 in 1888 and Rs. 4,927-8-3 and Re. 0-5-9 in 1887 respectively.

VICTORIA JUBILEE DISPENSARY, AHMEDABAD.—*In charge of* Miss MOTIBAI R. KAPADIA.

The dispensary was opened in April 1889. The building is in good repair. A cook-room for in-patients and cooking utensils are the principal wants. The committee visited the dispensary twice. The sanitary condition of the town is fair. The total treated was 3,004 out-door patients. The most common diseases were malarial fevers, ophthalmia, bowel-complaints, respiratory affections, skin diseases and diseases of the generative system. The total cost was Rs. 2,749-10-4, and the cost per patient Re. 0-14-7.

ENDOWED DISPENSARY.

BAICHARDAS DISPENSARY, AHMEDABAD.—*In charge of* Assistant Surgeon K. B. COOPER, L.M.

The dispensary building is in excellent repair. The committee met regularly at their quarterly meetings, and individual members visited frequently. The sanitation of the town is fair. The water-supply from the wells and river is of fair quality but liable to pollution. The total treated was 18,015 out-door and 81 in-door patients against 19,037 and 77 in 1888 and 19,805 and 86 in 1887 respectively. The most common diseases were malarial fevers, skin diseases, ophthalmia, respiratory affections, ear diseases, ulcers and bowel-complaints. Cholera broke out in a very mild form. Eighty-one major operations were performed. Vaccination is carried out by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon in May. The total cost was Rs. 5,239-0-0, the cost per patient Re. 0-4-7 against Rs. 4,995-0-9 and Re. 0-4-2 in 1888 and Rs. 5,106-4-5 and Re. 0-4-1 in 1887 respectively.

GOVERNMENT DISPENSARY.

KHA'RA'GHODA.—*In charge of* Assistant Surgeon BHAU GOVIND.

The buildings are in good repair. The sanitary arrangements are fairly good. The water-supply is brackish and abundant. The total treated was 3,842 out-door and 31 in-door patients as compared with 2,750 and 28 in 1888, and 3,418 and 23 in 1887 respectively. The prevailing diseases were malarial fevers, ophthalmia, skin diseases, respiratory affections and bowel-complaints. Two cases of small-pox and 5 of cholera occurred in the town and they broke out in a severe form in the surrounding districts. Eleven major operations were performed. Vaccination is carried on by the Assistant Surgeon at the dispensary. One hundred and three children were primarily vaccinated of which 68 were successful. Two medico-legal cases were examined and reported upon. The dispensary was inspected by the Civil Surgeon in June. The total cost was Rs. 2,607-14-1, the cost per patient Re. 0-10-9 as compared with Rs. 3,133-4-11 and Rs. 1-2-0 in 1888 and Rs. 4,679-4-10 and Rs. 1-5-9 in 1887 respectively.

SELF-SUPPORTING DISPENSARY.

DHOLERA.—*In charge of* Hospital Assistant BANKAY BEHARI.

The building, a hired one, is in good repair. A store-room is badly required. The committee visited the dispensary twelve times. The sanitation of the town is defective. The water-supply is deficient and brackish. The total treated was 6,019 out-door and 41 in-door patients as compared with 4,789 and 73 in 1888, and 5,153 and 55 in 1887 respectively. The most common diseases were malarial fevers, ear and skin diseases, respiratory affections, ulcers and bowel-complaints. The town was entirely free from epidemic. Vaccination is performed by the Hospital Assistant in the dispensary. The total number of vaccine operations were 252, of which 10 were unsuccessful. Six post-mortem examinations were made and several medico-legal cases examined and reported upon. The dispensary was inspected by the Civil Surgeon in December. The total cost was Rs. 1,333-10-11, the cost per patient Re. 0-3-6 against Rs. 1,161-5-8 and Re. 0-3-9 in 1888 and Rs. 1,388-14-11 and Re. 0-4-3 in 1887 respectively.

MAHI KÁNTHA.

CIVIL HOSPITAL, SADRA.—*In charge of* Assistant Surgeon D. E. ANKLESARIA, L.M. & S.

Conservancy.—Fairly satisfactory as regards cleanliness and road repairs of the camp which are well attended to, but the erection of a few latrines will much improve its sanitation. That of the village, though improved, is still unsatisfactory.

Water-supply—Is good and abundant from the river Sábarmati and wells but liable to contamination. The use of river water during the prevalence of cholera is very dangerous, as the people wash the clothes soiled with cholera excretæ.

Hospital Buildings—In a very dilapidated state though well situated. A new female ward was built during the year from a liberal donation of Rs. 2,000 given by Mr. Nassarvanji Maneckji Petit.

General health.—Good. Cholera was epidemic during the months of April, May and June.

Attendance of Patients.—The total treated was 9,884 out-door and 197 in-door patients as compared with 9,338 and 220 respectively in 1888.

Prevailing diseases.—Skin diseases, malarial fevers, ophthalmia, respiratory affections, dysentery and local injuries.

Surgical operations.—30 major and 619 minor operations were performed.

Mortality and its causes.—There were 7 deaths among in-patients, 4 due to cholera, 1 to compound fracture of the leg, 1 to small-pox and 1 to leprosy. Of these 5 belonged to the detachment of Native Infantry and the Agency Police.

Vaccination—Is performed once a week.

Conduct of Establishment.—Very satisfactory.

Cost.—The total cost was Rs. 3,540-7-3, the cost per patient Re. 0-5-7 against Rs. 3,194-4-3 and Re. 0-5-4 respectively in the previous year. The cost of each diet was Re. 0-2-0, being the same as in the previous year.

KA'THIA'WA'R.

WEST HOSPITAL, RA'JKOT.—*In charge of* Surgeon-Major F. C. BARKER *till 15th April*; Surgeon-Major J. HOWELL *up to 14th June*; *afterwards* Surgeon W. H. QUICKE.

Conservancy.—Satisfactory.

Water-supply.—Good and sufficient. A large well being 22 feet in diameter at the bottom has been sunk in the hospital compound but is not yet in working order. The Thákor Sáheb of Rájkot contributed a large sum of money towards the construction of this well.

Hospital Buildings—Are new ones and in good order. A new cholera shed has been built. The Hospital Assistant's quarters are not habitable. The store-room is very unsuitable for its requirements and much damage to the stores and clothing results therefrom.

General Health.—Tolerably good. Ninety cases of cholera occurred in the Rájkot City during July, August and September.

Attendance of Patients.—7,791 out-door and 744 in-door patients were treated as compared with 6,969 and 689 respectively in 1888.

Prevailing Diseases.—Skin diseases, malarial fevers, worms, syphilis, ophthalmia, ear diseases, bowel-complaints and respiratory affections.

Surgical Operations.—Ninety-two major operations were performed against 100 in 1888. Among these were 18 for vesical calculus including 2 lithotopaxies and 1 supra-pubic lithotomy, 14 for amputations and 2 for vesico-vaginal fistula. Six cases were unsuccessful.

Mortality and its causes.—Forty-nine deaths occurred in the hospital, cholera 9, debility 4, diarrhœa 4, remittent fever 4, dysentery 2, pneumonia 2, phthisis 2, paraphlegia 2, 14 from various causes and 6 after operations.

Vaccination.—As usual by the station vaccinator.

Medico-legal.—Ten cases including 3 of corpses, 4 wounds, 2 burns, 1 alleged procuring abortion.

Conduct of Establishment.—Satisfactory.

Remarks.—Three nurse probationers render valuable assistance under the careful training of Miss Goldney. There is every facility for training nurses at this hospital, but the Chiefs of Káthiáwár do not seem to take the opportunity of getting more women trained as nurses. The female ward is always well filled with patients and this department of the hospital is daily becoming more popular, the number having increased from 91 in 1888 to 124 in 1889.

Cost.—The total cost was Rs. 12,511-15-3, the cost per patient Rs. 1-7-5 against Rs. 16,664-15-2 and Rs. 2-2-9 respectively in 1888. The cost of each diet was Re. 0-2-10 or 3 pies more than in 1888.

WADHWÁN.—*In charge of* Assistant Surgeon Ráo Bahádur THÁKORDÁS KIKÁBHÁI, L.M. & S.

The dispensary building is in good repair. The post-mortem room requires chunam flooring. The dispensary is under the direct supervision of the Political Agent, Jhálawár Pránt, who visits it frequently. The sanitation of the town is good. The water-supply is abundant and of good quality. The total treated was 6,635 out-door and 131 in-door patients against 5,701 and 161 in 1888 and 5,545 and 132 in 1887, respectively. The most common diseases were skin-diseases, ophthalmia, malarial fevers, worms and bowel-complaints. Fifteen cases of cholera were treated, of which 6 were fatal. Sixteen major operations were performed. Vaccination is carried out by the district vaccinator. Two post-mortem examinations were made, and 13 medico-legal cases were examined and reported upon. The total cost was Rs. 5,618-9-11, the cost per patient Re. 0-13-3 as compared with Rs. 5,189-6-0 and Re. 0-14-1 in 1888, and Rs. 5,338-1-6 and Re. 0-15-0 in 1887, respectively.

CUTCH.

CIVIL HOSPITAL, BHU'J.—*In charge of* Mr. BHIKÁJI JIVÁJI DAMANIA, L.M. & S.

Conservancy.—Is satisfactory.

Water-supply.—Abundant from wells and tanks.

Hospital Buildings.—In good order.

General Health.—Tolerably fair. Cholera broke out in summer and small-pox in cold weather in a mild form.

Attendance of Patients.—532 in-door and 15,152 out-door patients were treated against 494 and 14,990 respectively, in 1888.

Prevailing Diseases—Malárial fevers, worms, rheumatic, skin and bronchial affections, diarrhœa, dyspepsia and ulcers.

Surgical Operations.—123 major surgical operations were performed, among which were 16 extraction of cataracts, 12 amputation of limbs, 43 removal of stones from bladder, 1 external urethrotomy and 7 paracentesis abdominis. Minor operations numbered 1,166.

Mortality and its causes.—Among in-door patients there were 25 deaths—due to dysentery, debility, cystic tumour, sarcoma, scirrhous tumour, diabetes, mellitus, valvular disease of the heart, diarrhœa, chronic nephritis, vesical calculus, caries of bones, compound fracture of bones and old age.

Vaccination.—There were 869 primary and 139 secondary vaccinations, 864 and 103 respectively being successful.

Conduct of Establishment—Satisfactory.

Cost.—The total cost was Rs. 11,713-2-5, the cost per patient Re. 0-11-11 against Rs. 11,239-4-1 and Re. 0-11-7 respectively in 1888.

NATIVE STATE DISPENSARIES.

CUTCH MÁNDVI DISPENSARY.—*In charge of* Mr. A. DÁDÁBHÁI, L.M. & S.

The building is in good repair. The sanitary arrangements are satisfactory. A scheme is under consideration for bringing good fresh water-supply from a short distance by means of pipes, as the water from the wells in the town is brackish and deficient. The total treated was 15,408 out-door and 118 in-door patients against 15,696 and 143 in 1888 and 14,615 and 128 in 1887, respectively. The most common diseases were worms, skin-diseases, ulcers, malarial fevers, diseases of the eye, ear, and respiratory system and bowel-complaints. A very few cases of cholera occurred in the town and its vicinity. 14 major operations were performed. The total number of vaccine operations was 926, of which 863 were successful. The total cost was Rs. 6,574-5-9, the cost per patient Re. 0-6-9 against Rs. 6,474-10-0 and Re. 0-6-6 in 1888, and Rs. 6,293-15-6 and Re. 0-6-9 in 1887, respectively.

SHET DATTUBHAI IBRAHIM DISPENSARY, CUTCH MÁNDVI.—*In charge of* Mr. PRÁNLÁL.

The building, a hired one, is in good repair; a new and suitable one is under construction at the expense of the State. The sanitation of the town is unsatisfactory. The water-supply is ample, but brackish. The total treated was 10,097 out-door patients as compared with 8,777 and 7,800 in 1888 and 1887 respectively. The prevailing diseases were worms, ophthalmia, skin-diseases and bowel-complaints. Cholera broke out in a mild form in August and September. The dispensary was inspected by Mr. A. Dadabhai, medical officer in charge of the Cutch Mándvi Dispensary. The total cost was Rs. 2,787-13-9, the cost per patient Re. 0-4-5 as compared with Rs. 2,505-13-0 and Re. 0-4-6 in 1888 and Rs. 2,004-7-9 and Re. 0-4-1 in 1887, respectively.

CUTCH ANJAR.—*In charge of* Mr. ATMA'RA'M KESHAV.

The building is in good order. The conservancy arrangements are well looked after. The water-supply is good and ample. The total treated was 19,296 out-door and

55 in-door patients against 17,680 and 57 in 1888 and 16,072 and 76 in 1887, respectively. The most common complaints were worms, malarial fevers, ulcers, and diseases of the ear, eye, connective tissue and respiratory and digestive systems. 266 cases of cholera occurred in the town and its vicinity, of which 158 proved fatal. Five major operations were performed. The dispensary was inspected by Mr. A. Dadabhai. The total cost was Rs. 2,868-2-3, the cost per patient Re. 0-2-4 against Rs. 3,106-2-10 and Re. 0-2-9 in 1888 and Rs. 3,198-9-0 and Re. 0-3-2, in 1887, respectively.

CUTCH NALIYA.—*In charge of* Mr. JENATALLY PYRMAHOMED.

The building is in good repair. Much attention is paid by the Municipality to sanitation. The water-supply from the tank was deficient. The total treated was 5,752 out-door patients as compared with 5,528 in 1888 and 5,808 in 1887. The prevailing diseases were ophthalmia, skin diseases, ulcers, worms, respiratory affections and bowel-complaints. There was no cholera. Five major operations were performed. Vaccination is conducted by a State vaccinator. The dispensary was inspected by Mr. A. Dadabhai. The total cost was Rs. 1,271-6-9, the cost per patient Re. 0-3-6 as compared with Rs. 1,522-10-2 and Re. 0-4-4 in 1888 and Rs. 1,365-9-8 and Re. 0-3-9 in 1887, respectively.

CUTCH RAPUR.—*In charge of* Mr. HIRJI HANSRA'J.

The building is in good repair. The sanitation is well looked after. The water-supply is good and ample. The total treated was 4,519 out-door and 45 in-door patients against 4,500 and 52 in 1888 and 3,511 and 66 in 1887, respectively. The most common diseases were skin diseases, malarial fevers, worms, ulcers, ophthalmia and bowel-complaints. 180 cases of cholera occurred in the surrounding villages. The dispensary was inspected by a medical officer of the State in February 1889. The total cost was Rs. 2,080-9-0, the cost per patient Re. 0-7-3 against Rs. 1,519-15-1 and Re. 0-5-4 in 1888, and Rs. 1,623-9-11 and Re. 0-7-3 in 1887, respectively.

CUTCH BHACHAO—*In charge of* Mr. ROOGNA'THJI MUNCHA'RA'M.

The building is in good repair. The sanitary state of the town is fair considering that there is no municipality. The water-supply is good and abundant. The total treated was 5,622 out-door patients, as compared with 5,398 in 1888 and 4,949 in 1887. The prevailing diseases were skin diseases, malarial fevers, ulcers, ophthalmia, worms and bowel-complaints. There was no epidemic. Two major operations were performed. More than 1,000 vaccine operations were performed by the State vaccinator. The dispensary was inspected by Mr. A. Dadabhai in February. The total cost was Rs. 991-14-1, the cost per patient Re. 0-2-9 against Rs. 1,057-6-11 and Re. 0-3-1 in 1888, and Rs. 1,016-15-3 and Re. 0-3-3 in 1887, respectively.

CUTCH MUNDRA.—*In charge of* Mr. RAMCHANDRA DALPATRÁM.

The building is in good repair. A dead-house is badly wanted. The sanitation of the town is good. The water-supply is abundant and of very good quality. The total treated was 12,231 out-door and 88 in-door patients against 12,189 and 84 in 1888 and 11,045 and 68 in 1887, respectively. The most common complaints were skin diseases, worms, malarial fevers, eye, ear and respiratory affections and bowel-complaints. 128 cases of cholera and 60 of small-pox occurred in the town and neighbourhood. 2,280 children were vaccinated by the State vaccinator. Several post-mortem examinations were made, and opinion given on numerous medico-legal cases. The dispensary was inspected by Mr. A. Dadabhai. The total cost was Rs. 2,570-14-5, the cost per patient Re. 0-3-4, as compared with Rs. 2,494-8-11 and Re. 0-3-3 in 1888, and Rs. 2,243-13-2 and Re. 0-3-2 in 1887, respectively.

CUTCH NÁRÁYAN SAROVAR.—*In charge of* Mr. ROWJI JA'DOWJI.

The dispensary building, a hired one, is in good repair, but not adequate for the purpose. The sanitary arrangements require much improvement. The water-supply is very scanty in summer and liable to contamination. The total treated was 3,608 out-door patients as compared with 4,011 in 1888 and 3,580 in 1887. The prevailing diseases were skin diseases, malarial fevers, ulcers, ophthalmia, respiratory affections and bowel-complaints. One major operation was performed. Vaccination is conducted by the State vaccinator. The dispensary was inspected by Mr. Dadabhai. The total cost was Rs. 1,022-10-9, the cost per patient Re. 0-4-6 against Rs. 981-8-7 and Re. 0-3-11 in 1888, and Rs. 960-2-4 and Re. 0-4-3 in 1887, respectively.

MHOW.

DORABJI PESTONJI DISPENSARY, MHOW.—*In charge of* Surgeon M. S. A. HARDING.

The building is in excellent order and repair. The cleanliness and conservancy of the town are most carefully attended to. The water-supply is good and abundant. The total treated was 8,935 out-door and 72 in-door patients, as compared with 9,053 and 60 in 1888 and 8,657 and 74 in 1887, respectively. The prevailing diseases were malarial fevers, bowel-complaints, respiratory affections, ophthalmia, skin diseases and local injuries. Small-pox occurred in April amongst the garrison, but was not of a virulent type. The total cost was Rs. 2,264-9-7, the cost per patient Re. 0-4-0, as compared with Rs. 2,418-6-2 and Re. 0-4-2 in 1888, and Rs. 2,315-9-5 and Re. 0-4-2 in 1887, respectively.

KARA'CHI COLLECTORATE.

CIVIL HOSPITAL, KARA'CHI—*In charge of* Surgeon-Major G. BAINBRIDGE.

Conservancy amd Water-supply.—The conservancy arrangements in the private houses of the Sadar Bazár and native town are unsatisfactory. The removal of night-soil, sweepings, &c., is efficiently done. The water-supply from the Mulir river still continues to be of excellent quality. The supply has been extended during the last year, and is now ample for the population.

Hospital Buildings.—Two new latrines were erected, the ventilation of all the wards on the ground floor improved, and Portland cement laid down in one of the wards of the south wing.

General Health.—Small-pox was prevalent from January to August. Otherwise the health of the native population was good. Dengue attacked a great number of the European community during the last four months of the year.

Attendance of Patients.—The total treated was 7,546 out-door and 750 in-door patients as compared with 6,609 and 674 respectively in the previous year.

Prevailing Diseases.—Malarious fevers, skin diseases, eye affections, bronchitis, bowel-complaints, injuries and dysentery.

Surgical Operations.—There were 83 major and 771 minor operations. The major comprised 17 lithotomies, 4 lithotopaxy and 9 amputations.

Mortality and its causes.—67 deaths occurred among in-door patients—13 from dysentery, 7 from tubercle of the lung, 6 from pneumonia and debility each, and the remainder from various causes.

Vaccination—Is carried on by the municipal vaccinator who has a station at the Civil Hospital.

Medico-legal Cases.—Four dead bodies were examined for the Police.

Conduct of Establishment—Is favourably reported.

Cost.—The total cost was Rs. 23,072-10-11, the cost per patient Rs. 2-12-6, as compared with Rs. 20,321-7-6 and Re. 2-12-7, respectively, in 1888. The cost of each diet was Re. 0-5-9 for Europeans and Re. 0-2-9 for natives against Re. 0-5-4 and Re. 0-2-7 respectively in 1888.

GRANT-IN-AID DISPENSARIES.

KOTRI.—*In charge of* Hospital Assistant PEERÁJI KÁMÁJI.

The dispensary was opened on 1st August 1887 under Government Resolution No. 1546, dated 21st May 1887. The building is not suited for the purpose. The committee visited the dispensary four times. The sanitary condition of the town is fair. The water-supply from the river Indus is good and abundant. The total treated was 4,958 out-door and 51 in-door patients as compared with 4,630 and 26, respectively, in 1888. The prevailing diseases were malarious fevers, skin and eye diseases and ulcers. Cholera and small-pox made their appearance in the town. One major operation was performed. Vaccination is carried on by the táluka vaccinator. Opinion was given in 10 medico-legal cases. The dispensary was inspected by the Deputy Surgeon-General, Sind, in March, and by the Deputy Sanitary Commissioner in October. The total cost was Rs. 2,138-15-4, the cost per patient Re. 0-6-10 as compared with Rs. 1,925-2-10 and Re. 0-6-7 respectively in 1888.

BACHUBAI EDALJI DINSHA DISPENSARY, KEAMARI.—*In charge of* MR. MULCHAND GANGÁRÁM, L.M. & S.

The dispensary was opened on 15th January 1888. The building is in good order. The committee visited the dispensary every two months. The sanitary condition of the town is fair. The water-supply is good. The total treated was 4,326 out-door and 12 in-door patients as compared with 1,463 out-door patients in 1888. The most common diseases were malarial fevers, diseases of the eye and skin, ulcers, bronchitis and rheumatic affections. Small-pox appeared in an epidemic form in March, April and May. Two major surgical operations were performed. Vaccination is carried on by the Sanitary Depart-

ment. The total cost was Rs. 2,241-11-9 and the cost per patient Re. 0-8-3 against Rs. 2,828-1-1 and Re. 1-14-11, respectively, in the previous year.

JERRUCK.—*In charge of* Hospital Assistant NA'RA'YEN LAXUMON.

The building is in good order. The committee visited the dispensary every month. The conservancy of the town is good. The water-supply from the river Indus is good and abundant. The total treated was 1,932 out-door and 1 in-door patients as compared with 1,574 and 8 in 1888 and 1,666 and 10 in 1887, respectively. The most common diseases were malarial fevers, eye and respiratory affections, bowel-complaints, skin diseases and ulcers. Small-pox occurred in the town. There were 59 primary vaccinations and 9 re-vaccinations. The dispensary was inspected by the Civil Surgeon, Karáchi, in March, and by the Deputy Sanitary Commissioner in November. The total cost was Rs 1,009-6-11, the cost per patient Re. 0-8-5 against Rs. 701-12-10 and Re. 0-7-1 in 1888, and Rs. 974-12-4 and Re. 0-9-3 in 1887, respectively.

PURMAL KHUBCHAND DISPENSARY, SEHWAN—*In charge of* Hospital Assistant E. BENJAMIN.

The buildings are in thorough repair. The committee meets regularly. The sanitary condition of the town is fairly satisfactory. The water-supply from the river and wells is good and ample. The total number treated was 5,137 out-door and 93 in-door patients as compared with 4,125 and 93 in 1888 and 4,551 and 94 in 1887, respectively. The prevailing diseases were malarious fevers, rheumatic affections, ophthalmia, respiratory affections, abscesses, skin diseases and ulcers. The epidemic of cholera prevailed; there were 23 cases and 7 deaths. Eighteen major surgical operations were performed. Vaccination is carried on by the Sanitary Department. Seven post-mortem examinations were held. The dispensary was inspected by the Civil Surgeon, Káráchi, on the 25th June, and by the Deputy Sanitary Commissioner on the 20th October. The total cost was Rs. 1,997-13-5, the cost per patient Re. 0-6-1 as compared with Rs. 2,049-8-11 and Re. 0-7-9 in 1888, and Rs. 2,533-14-7 and Re. 0-8-8 in 1887, respectively.

MUNICIPAL DISPENSARIES.

KARA'CHI BANDAR ROAD.—*In charge of* Hospital Assistant SHIVU PIRA'JI.

The buildings are in good order. The committee visit the dispensary every month. The conservancy of the town is well attended to. The water-supply is good and abundant. The total treated was 12,335 out-door patients as compared with 11,152 in 1888 and 11,433 in 1887. Malarious fevers, ophthalmia, rheumatism, respiratory affections, bowel complaints and ulcers were the most common diseases. Five major surgical operations were performed. Vaccination is carried on by the Sanitary Department. The Deputy Surgeon-General, Sind, and the Civil Surgeon, Karáchi, inspected the dispensary from time to time. The total cost was Rs. 1,462-0-2, the cost per patient Re. 0-1-11 against Rs. 2,243-12-1 and Re. 0-3-2 in 1888 and Rs. 2,507-3-0 and Re. 0-3-6 in 1887, respectively.

KARÁCHI LYARI DISPENSARY.—*In charge of* Hospital Assistant M. D'SILVA.

No change in the building except a new cesspool has been built. The committee visited the dispensary seven times. The sanitary condition of the Lyari quarter is fair. The water-supply is abundant and good. The total treated was 10,609 out-door patients against 9,539 in 1888 and 8,768 in 1887. The prevailing diseases were malarious fevers, ophthalmia, inflammation of the ear, respiratory affections, skin diseases and ulcers. 47 cases of small-pox with 13 deaths were reported. Four major operations were performed. The dispensary was inspected by the Deputy Surgeon-General, Sind, in August, and by the Civil Surgeon, Karáchi, in June and December. The total cost was Rs. 1,361-8-10, the cost per patient Re. 0-2-1, as compared with Rs. 1,539-13-11 and Re. 0-2-6 in 1888, and Rs. 1,843-3-8 and Re. 0-3-4 in 1887, respectively.

EDULJEE DINSHAW DISPENSARY, KARA'CHI—*In charge of* Hospital Assistant R. RODRIGUES.

The building is in good repair. The committee meet regularly every month. The sanitary condition of the quarter fairly good. The water-supply is good and abundant. The total treated was 12,619 out-door patients as compared with 11,239 in 1888 and 12,029 in 1887. The prevailing diseases were malarial fevers, ophthalmia, skin diseases, respiratory and rheumatic affections, and inflammation of the ear. Small-pox prevailed in January, February, March, April and May. Three major surgical operations were performed. Vaccination is carried on by the Sanitary Department. The dispensary was inspected by the Deputy Surgeon-General, Sind, in August, and by the Civil Surgeon, Karáchi, in June and December. The total cost was Rs. 1,339-3-1½, the cost per patient Re. 0-1-8 as compared with Rs. 1,902-14-4 and Re. 0-2-8 in 1888, and Rs. 2,231-5-0 and Re. 0-2-11 in 1887, respectively.

JAMNA'BA'I DISPENSARY, TATTA.—*In charge of* Assistant Surgeon J. B. UNWALA, L.M. & S.

The dispensary buildings have not been repaired as yet. Some improvements suggested have been carried out. The committee met three times. Individual members visited the

dispensary frequently. Conservancy and water-supply are fair. The total number of patients treated was 7,705 out and 28 in-patients as compared with 7,252 and 21 in 1888 and 5,603 and 11 in 1887, respectively. The prevailing diseases were malarial fevers, eye affections, skin diseases, diseases of digestive organs, and ulcers. Three major surgical operations were performed. Twenty-six cases of small-pox occurred. Vaccination is carried on by the municipal vaccinator. The dispensary was visited by the Civil Surgeon, Karáchi, in February and inspected in June. The total cost was Rs. 2,551-6-11 and the cost per patient Re. 0-5-3 as compared with Rs. 2,372-1-0 and Re. 0-5-2 in 1888 and Rs. 2,904-8-10 and Re. 0-8-3 in 1887, respectively.

KETI BANDAR.—*In charge of* Hospital Assistant CHINTA'MAN YADOW VAIDYA.

The buildings are in good repair. The committee visited the dispensary six times. The sanitary condition of the town is fair. The water-supply from the river Indus is good and abundant. The total treated was 1,722 out-door and 1 in-door patients as compared with 2,147 and 8 in 1888 and 2,457 and 9 in 1887, respectively. The most common diseases were malarial fevers, ophthalmia, diseases of the skin and digestive system and ulcers. Two major surgical operations were performed. One post-mortem examination was made. The total cost was Rs. 1,516-14-6, the cost per patient Re. 0-14-1 against Rs. 719-9-10 and Re. 0-5-4 in 1888, and Rs. 992-5-10 and Re. 0-6-5 in 1887, respectively.

MIRPUR BATORO.—*In charge of* Hospital Assistant PARMA'NAND VISHINDA'S.

The new dispensary building was occupied in August last. It is quite suited for the purpose. The committee met seven times. Conservancy is fairly attended to. The water-supply is ample and of fairly good quality. The total treated was 3,082 out-door and 7 in-door patients as compared with 3,399 and 18 in 1888 and 2,840 and 35 in 1887, respectively. The most common diseases were malarious fevers, diseases of the eye and skin, and ulcers. Vaccination is carried on by the táluka vaccinator. Two post-mortem examinations were made, and opinion given in many medico-legal cases. The dispensary was inspected by the Deputy Sanitary Commissioner in January and by the Civil Surgeon, Karáchi, in February. The total cost was Rs. 1,321-13-2, the cost per patient Re. 0-6-10 against Rs. 5,351-0-0 and Re. 1-9-0 in 1888, and Rs. 5,060-4-1 and Re. 1-12-1 in 1887 respectively.

GOVERNMENT DISPENSARIES.

THANO BULA KHA'N.—*In charge of* Hospital Assistant KHIAMAL HUSHMATRAI.

The dispensary buildings are in a fair state of repair. The new huts for servants will be built soon, as the old ones are fallen down. A compound wall is very necessary. The dispensary has no committee at present, but the members will be appointed as soon as the dispensary has been made over to the District Local Board, Karáchi. The water-supply is plentiful and of good quality. The total treated was 14 in-door and 1,220 out-door patients as compared with 8 and 1,129 in 1888 and 13 and 1,198 in 1887, respectively. The most common diseases were ophthalmia, malarious fevers, diseases of the digestive system, skin diseases, ulcers, diseases of the ear and rheumatic and respiratory affections. The dispensary was inspected by the Deputy Sanitary Commissioner in November. One major surgical operation was performed. Two post-mortem examinations were made. There was no epidemic. The total cost was Rs. 869-6-9, the cost per patient Re. 0-11-3 as compared with Rs. 820-12-5 and Re. 0-11-6 in 1888 and Rs. 932-4-1 and Re. 0-12-3 in 1887, respectively.

MANORA.—*In charge of* Assistant Surgeon E. MACKENZIE, Honorary Assistant Surgeon to H. E. the Viceroy.

Want of better accommodation at the dispensary is again brought to notice. The total number of patients treated was 4,243, being 367 in excess of the previous year, due to an increase in the military strength of the station. The average daily attendance was 41. A compounder has been added to the establishment temporarily. The prevailing diseases were ague, sub-acute rheumatism, conjunctivitis, bronchitis, diarrhœa and dysentery, also surgical injuries. State of the public health was good. The two cases of small-pox treated were imported. The dispensary was inspected by the Civil Surgeon, Karáchi, twice Three major and 334 minor operations were performed. Total cost was Rs. 4,756-12-2, and cost per patient Re. 1-1-11. 194 vessels were inspected for the purpose of issuing bills of health, and 98 steamers and country craft, arriving from ports infected with cholera, were intercepted and examined, also 2 steamers with cases of small-pox on board. 24 samples of petroleum were tested.

HYDERABAD COLLECTORATE.

CIVIL HOSPITAL, HYDERABAD.—*In charge of* Surgeon-Major J. F. KEITH, M.D.

Conservancy and Water-supply.—The general conservancy of the town is carried out under the orders of the Municipal Engineer and Secretary. Latrine accommodation requires much improvement. There are only 12 public latrines, a provision which for a

city of 45,000 inhabitants is inadequate. The drainage of the town is being carried out, and will eventually be equal to its wants. The water-supply from the river Indus is good and abundant.

Hospital Buildings.—No addition or alteration was made.

General Health.—The health of the town and district was better than in the previous year, although the river Indus rose more than usual, and flooded the surrounding country. There was a mild epidemic of cholera. Small-pox was very prevalent; 554 deaths were reported from this disease.

Attendance of Patients.—There were treated 566 in-door and 13,751 out-door patients as compared with 622 and 13,613, respectively, in the previous year.

Prevailing Diseases.—Ague, conjunctivitis, respiratory affections, bowel-complaints, ulcers, skin diseases and vesical calculus.

Surgical Operations.—304 major operations were performed, of which no less than 194 were cases of lithotomy. There were 1,952 minor operations.

Mortality and its Causes.—Thirty-seven deaths occurred in hospital as compared with 30 in the previous year. The principal causes of deaths were calculus of the bladder 19, diarrhœa 6, dysentery, anæmia and ascites 2 each.

Medico-legal cases.—Two bodies and one other medico-legal case were examined.

Vaccination—Is carried on by the municipal vaccinator.

Conduct of the Hospital Establishment.—The Civil Surgeon speaks very highly of Assistant Surgeons Aquino and Bocarro. Hospital Assistant E. Jacob is reported to be a hardworking, trustworthy and valuable assistant.

Cost.—The total cost was Rs. 15,565-0-0, the cost per patient Re. 1-1-4 as compared with Rs. 13,469-8-8 and Re. 0-15-1 in the previous year. The cost of each diet was Re. 0-2-0, being the same as in 1888.

GRANT-IN-AID DISPENSARIES.

TANDO ALAHYAR.—*In charge of* Hospital Assistant TEJUMAL DHALAMAL.

The building is in good repair and convenient. The committee visits the dispensary every month. The sanitary condition of the town is good. The water-supply is abundant and of good quality. The total treated was 3,257 out-door and 11 in-door patients as compared with 2,962 and 4 in 1888 and 3,447 and 6 in 1887, respectively. The prevailing diseases were malarious fevers, rheumatic affections, conjunctivitis, respiratory affections, skin diseases and ulcers. One major surgical operation was performed. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Hyderabad, in May and December, and by the Deputy Sanitary Commissioner in January and December. The total cost was Rs. 1,423-8-10, the cost per patient Re. 0-6-11 as compared with Rs. 1,651-14-6 and Re. 0-8-10 in 1888 and Rs. 1,861-7-6 and Re. 0-8-7 in 1887, respectively.

TANDO MUHAMMAD KHA'N.—*In charge of* Hospital Assistant GANU ARJUN.

The buildings are in good repair; no quarters for 2nd class servants. The committee meets regularly once a month. The conservancy of the town is fairly good. The water-supply is good and abundant. The total treated was 4,600 out-door and 28 in-door patients as compared with 4,190 and 25 in 1888 and 4,398 and 45 in 1887, respectively. The most common diseases were malarial fevers, ophthalmia, rheumatic and respiratory affections, ulcers, skin diseases and local injuries. There were 3 cases of cholera. Two major surgical operations were performed. Vaccination is conducted by the local fund vaccinator. The dispensary was inspected by the Civil Surgeon, Hyderabad, in June and December, and by the Deputy Sanitary Commissioner in January and November. The total cost was Rs. 1,017-0-3, the cost per patient Re. 0-3-6 against Rs. 1,344-14-0 and Re. 0-5-1 in 1888 and Rs. 1,242-8-6 and Re. 0-4-5 in 1887, respectively.

HA'LA.—*In charge of* Hospital Assistant THA'KURDA'S PHABIASING.

The buildings are in good repair. The committee hold monthly meetings. The conservancy of the town is good. The water-supply is good and plentiful. The total treated was 3,512 out-door and 31 in-door patients as compared with 3,371 and 52 in 1888 and 4,310 and 48 in 1887, respectively. The prevailing diseases were malarious fevers, ophthalmia, rheumatic and respiratory affections, diarrhœa, diseases of the skin, ulcers and abscess. Ten cases of small-pox occurred in the town and 7 cases of cholera in the surrounding villages. Seven major surgical operations were performed. Three post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Hyderabad, in May and December, and by the Deputy Sanitary Commissioner in February. The total cost was Rs. 1,319-14-11, the cost per patient Re. 0-5-11 against Rs. 1,292-9-7 and Re. 0-6-0 in 1888, and Rs. 1,105-8-9 and Re. 0-4-0 in 1887, respectively.

THA'RU SHA'H.—*In charge of* Hospital Assistant REUBEN SUDKEIL.

The building is in good repair. The committee meets monthly, and individual members frequently visit the institution. The sanitary condition of the town is on the whole fairly good. The water-supply from well is abundant and good, but is liable to contamination. The total treated was 3,163 out-door and 55 in-door patients as compared with 3,518 and 72 in 1888 and 4,272 and 90 in 1887, respectively. The prevailing diseases were ophthalmia, malarious fevers, ulcers, skin diseases and respiratory affections. Eight major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. The dispensary was inspected by the Civil Surgeon, Hyderabad, in March. Nine post-mortem examinations were made, and opinion was given in several medico-legal cases. The cost was Rs. 909-15-6 and the cost per patient Re. 0-4-6 as compared with Rs. 1,101-14-5 and Re. 0-4-10 in 1888 and Rs. 1,136-8-3 and Re. 0-4-2 in 1887, respectively.

MIRPUR KHA'S.—*In charge of* Hospital Assistant S. A. RYMON.

The ordinary and petty repairs are in progress. The furniture is not sufficient. The committee meets every month regularly and individual members frequently visit the institution. The sanitary condition of the town is fair. The water-supply is good and abundant. The total treated was 3,567 out-door and 11 in-door patients, as compared with 3,150 and 15 in 1888 and 3,003 and 12 in 1887 respectively. The prevailing diseases were malarious fevers, ophthalmia, ulcers, bowel-complaints and skin diseases. Five cases of small-pox occurred in March. Vaccination is conducted by the táluka vaccinator. Four major surgical operations were performed. One post-mortem examination was made and opinion given in one medico-legal case. The dispensary was inspected by the Civil Surgeon of Hyderabad in May and December, and by the Deputy Sanitary Commissioner in January and December. The total cost was Rs. 904-0-0, the cost per patient Re. 0-4-0 as compared with Rs. 894-8-0 and Re. 0-4-6 in 1888 and Rs. 966-11-10 and Re. 0-5-1 in 1887 respectively.

BOULTON DISPENSARY, TANDO BAGO.—*In charge of* Hospital Assistant JOHN JOEL.

Buildings are kept in good condition. A cook-room is much needed for in-patients. The committee meets regularly every month. The sanitary condition of the town is not satisfactory. The water-supply from canals and wells is abundant, that from the latter is liable to contamination. The total treated was 2,532 out-door and 87 in-door patients as compared with 2,428 and 92 in 1888 and 2,348 and 87 in 1887 respectively. The most common diseases were malarious fevers, conjunctivitis, bowel-complaints, respiratory affections and ulcers. Cholera broke out in the town. Four major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Two post-mortem examinations were made and opinion given in one case. The dispensary was inspected by the Civil Surgeon, Hyderabad, in June and December. The total cost was Rs. 1,262-10-9, the cost per patient Re. 0-7-9 against Rs. 922-9-1 and Re. 0-5-10 in 1888 and Rs. 1,190-12-7 and Re. 0-7-9 in 1887 respectively.

MUNICIPAL DISPENSARY.

TANDO ADAM.—*In charge of* Hospital Assistant HARILAL CHHAGANLAL.

The building is in good repair. The committee visits the dispensary every month. The water-supply is abundant. The total treated was 3,297 out-door and 49 in-door patients as compared with 3,484 and 49 in 1888 and 3,008 and 30 in 1887 respectively. The most common diseases were malarious fevers, conjunctivitis, ulcers and skin diseases. 148 cases of small-pox occurred with 22 deaths. The dispensary was inspected by the Civil Surgeon, Hyderabad, in May and December. Four major surgical operations were performed. The number of children vaccinated was 86. Seven post-mortem examinations were made. The total cost was Rs. 891-1-11 and the cost per patient Re. 0-4-3 as compared with Rs. 888-5-3 and Re. 0-4-0 in 1888 and Rs. 1,062-0-10 and Re. 0-5-7 in 1887 respectively.

THAR AND PA'RKAR.

GRANT-IN-AID DISPENSARIES.

UMARKOT.—*In charge of* Hospital Assistant BALAJI CUDDUM.

The buildings are well situated. The committee meets every month. Conservancy is attended to. The water-supply is abundant and of good quality. The total number of patients was 2,350 out-door and 131 in-door as compared with 2,123 and 161 in 1888 and 1,566 and 159 in 1887 respectively. The most common diseases were dysentery, malarious fevers, rheumatic and respiratory affections, ophthalmia, skin diseases and ulcers. There were 20 cases of small-pox in February, March, April and May. Vaccination is carried on by táluka vaccinator. The dispensary was inspected by the Deputy Sanitary Commissioner in December. The total cost was Rs. 1,392-3-3, the cost per patient Re. 0-8-11 against Rs. 1,094-14-6 and Re. 0-7-8 in 1888 and Rs. 1,080-7-3 and Re. 0-10-0 in 1887 respectively.

KHIPRA.—*In charge of* Hospital Assistant TEKCHAND RACHUMAL.

Buildings are in good repair. Several instruments are old and out of order. The committee met twice during the year. The sanitary condition is fair; water-supply from a well good and sufficient. The total treated was 2,902 out-door and 54 in-door patients as compared with 2,452 and 32 in 1888 and 2,482 and 54 in 1887 respectively. The prevailing diseases were malarious fevers, ophthalmia, respiratory affections, skin diseases and ulcers. Four major surgical operations were performed. Vaccination is carried on by the táluka vaccinator. Five post-mortem examinations were made and opinion given in 19 medico-legal cases. The Deputy Sanitary Commissioner inspected the dispensary in February. The total cost was Rs. 1,138-12-5, the cost per patient Re. 0-6-2 against Rs. 933-0-8 and Re. 0-6-0 in 1888 and Rs. 1,072-6-0 and Re. 0-6-9 in 1887 respectively.

MITTI.—*In charge of* Hospital Assistant MAUGHANMAL.

Buildings are in good condition. The committee visits the dispensary every month. The sanitary condition is fair. The water-supply from wells is brackish. The total treated was 1,347 out-door and 24 in-door patients as compared with 1,250 and 42 in 1888 and 1,429 and 42 in 1887 respectively. The most common diseases were fevers, rheumatic affections, diseases of the digestive system and skin and ulcers. Four major operations were performed. Vaccination is conducted by the táluka vaccinator. The dispensary was inspected by the Deputy Commissioner, Thar and Párkar, in January and December. The total cost was Rs. 977-10-2 and cost per patient Re. 0-11-4 as compared with Rs. 1,051-10-1 and Re. 0-13-0 in 1888 and Rs. 1,065-10-1 and Re. 0-11-7 in 1887 respectively.

NAGAR PÁRKAR.—*In charge of* Hospital Assistant GIRDHARI DANAJI.

The buildings are in a fair state of repair. The committee visited the dispensary regularly every third month. The sanitary and conservancy arrangements are unsatisfactory. The water-supply is good and abundant. The total treated was 1,671 out-door and 57 in-door patients as compared with 1,599 and 36 in 1888 and 2,760 and 97 in 1887 respectively. The most common diseases were malarial fevers, syphilis, gonorrhœa, ophthalmia, skin diseases and ulcers. The dispensary was inspected by the Deputy Commissioner in February and November, and by the Deputy Sanitary Commissioner in December. The total cost was Rs. 1,014-6-8, the cost per patient Re. 0-9-5 as compared with Rs. 982-0-10 and Re. 0-9-7 in 1888 and Rs. 1,252-7-9 and Re. 0-7-0 in 1887 respectively.

SHIKA'RPUR COLLECTORATE.

CIVIL HOSPITAL, SHIKA'RPUR.—*In charge of* Assistant Surgeon M. S. POSTWA'LLA', L.M., *till 5th February*; Surgeon W. A. CORKERY *up to 8th September*; *afterwards* Assistant Surgeon M. S. POSTWA'LLA', L.M.

Conservancy and water-supply.—Is as efficient as possible and on the dry earth system. Public latrines are carefully attended to by the municipality. Main streets are daily cleaned; but the private enclosures and bye-lanes are dirty. Forty-four bye-lanes were paved with pucka bricks during the year. Water is abundant and good from wells but "it would be a great improvement if suction pumps were substituted for the present wheel and its rope."

Hospital buildings.—Are in a satisfactory state.

General health.—There was no epidemic. 43 cases of small-pox occurred in the town, of which 4 proved fatal. Two cholera cases among police sepoys with one death. The disease was contracted at Sukkur, where cholera was prevalent.

Attendance of patients.—322 in-door and 3,456 out-door patients were treated during the year against 397 and 2,991 respectively in 1888. The increase in out-patients was due to more prevalence of febricula, diarrhœa, and skin diseases.

Prevailing diseases.—Ague, diseases of the skin, ulcers, ophthalmia, local injuries, bronchitis, rheumatic affections and diarrhœa.

Surgical operations.—50 major and 386 minor operations were performed during the year. Major surgery comprises 15 lithotomies and 2 removal of large sarcomatus tumours from the neck.

Mortality.—There were 16 deaths from the following causes:—1 dysentery, 1 simple remittent fever, 1 erysipelas, 1 meningo-encephalitis, 4 pneumonia, 1 snake-bite, 1 sporadic cholera, and 6 calculus.

Vaccination.—Carried on by the municipal vaccinator.

Conduct of Hospital establishment.—The hospital staff have performed their duties in a satisfactory manner.

Cost.—The total cost was Rs. 6,845-8-4 and the cost per patient Rs. 1-12-11 as compared with Rs. 6,710-6-0 and Rs. 1-15-8 respectively in the previous year. The cost of each diet was Re. 0-2-0, being the same as in 1888.

CIVIL HOSPITAL, SUKKUR.—*In charge of* Surgeon W. A. COEKERY *till 3rd February*, Surgeon H. P. DIMMOCK *till 10th September*, and Surgeon W. A. CORKERY *till the end of the year.*

Conservancy and water-supply.—The general sanitary condition of the town is fair. If the halálkhor system were adopted many evil results would be avoided, also if urinals were conveniently placed, some of the bye-lanes would cease to emit the unpleasant effluvia which they now give out. The water-supply from the river Indus and several municipal and private wells is good and abundant.

Hospital buildings.—The buildings consist of two detached barracks for the treatment of Europeans and natives. Since last report the buildings used exclusively for natives has recently undergone thorough repairs, and been re-roofed with tiles and iron girders. Roof ventilation was provided and the old and ill-fitting doors and windows replaced by new ones.

General health.—Not quite so favourable as last year, due in a great measure to a severe epidemic of cholera which raged in August and September, giving 347 cases with 210 deaths.

Attendance of patients.—The total treated was 377 in-door and 8,081 out-door patients as compared with 361 and 7,443 respectively in the previous year.

Prevailing diseases.—Malarial fevers, diseases of the skin, respiratory affections, venereal diseases, injuries and rheumatism.

Mortality and its causes.—There were 28 deaths among in-patients. The causes were pneumonia 5, lithotomy 4, dysentery and heat apoplexy 3 each, diarrhœa 2, &c.

Surgical operations.—Ninety-five major operations were performed of which 64 were cases of lithotomy. The minor operations numbered 650.

Vaccination.—Conducted by the municipal vaccinator.

Conduct of the establishment.—Is very satisfactory. Hospital Assistant Shaik Shahbuddin is a hard-working and intelligent medical subordinate and has given entire satisfaction.

Cost.—The total cost was Rs. 15,195-13-2, the cost per patient Re. 1-12-8 against Rs. 12,442-2-0 and Re. 1-9-6 respectively in 1888. The cost of each diet for Europeans was Re. 0-8-0 and for natives Re 0-2-0, being the same as in the previous year.

MUNICIPAL DISPENSARIES.

SHIKA'RPUR.—*In charge of* Assistant Surgeon M. S. POSTWALLA, L.M.

The building is suitable. The dispensary committee met once a month. The sanitary and conservancy arrangements are not satisfactory. The water-supply derived from wells is abundant and of good quality. The total treated was 9,857 out-door and 94 in-door patients against 9,930 and 104 in 1888 and 9,844 and 101 in 1887 respectively. The most common diseases were inflammation of the internal ear, malarial fevers, diseases of the digestive system, ophthalmia, ulcers, bronchitis and rheumatic affections. Twenty major surgical operations were performed. Vaccination is carried out by the municipal vaccinator. The dispensary was inspected by the Civil Surgeons, Sukkur and Shikárpur, in January and July respectively. The total cost was Rs. 4,772-6-5, the cost per patient Re. 0-7-8 as compared with Rs. 4,009-7-9 and Re. 0-6-4 in 1888 and Rs. 3,489-15-6 and Re. 0-5-7 in 1887 respectively.

SUKKUR.—*In charge of* Hospital Assistant MORDECAI SHALLUM.

The buildings are in good repair. The dispensary committee meets regularly every month. The sanitary and conservancy arrangements are satisfactory. The water-supply, obtained from the river Indus is of good quality and abundant. The total treated was 7,330 out-door and 67 in-door patients as compared with 7,169 and 99 in 1888 and 6,761 and 115 in 1887, respectively. The prevailing diseases were malarial fevers, and eye, ear and skin affections. Two hundred and thirty-eight cases of cholera occurred, of which 150 proved fatal. Vaccination is performed by the municipal vaccinator. The dispensary was inspected by the Civil Surgeon, Sukkur, in May and December. The total cost was Rs. 2,195-13-3 and cost per patient Re. 0-4-9 against Rs. 2,379-7-3 and Re. 0-5-2 in 1888, and Rs. 2,273-13-3 and Re. 0-5-3 in 1887, respectively.

ROHRI.—*In charge of* Hospital Assistant SHIVRAM NARAYEN.

The buildings are in good repair. The committee visited the dispensary eleven times. The sanitary condition of the town is fair. The water-supply from the river Indus, is good

and abundant. The total treated was 4,722 out-door and 109 in-door patients as compared with 3,471 and 100 in 1888, and 2,938 and 85 in 1887, respectively. The prevailing diseases were fevers, eye and ear diseases, chest and bowel-complaints, skin-diseases, ulcers and injuries. One major surgical operation was performed. Vaccination is carried on by the town vaccinator. Five post-mortem examinations were made. The dispensary was inspected thrice by the Civil Surgeon, Sukkur. The total cost was Rs. 994-1-6, the cost per patient Re. 0-3-3 against Rs. 852-8-1 and Re. 0-3-9 in 1888, and Rs. 1,424-8-3 and Re. 0-7-5 in 1887, respectively.

LÁRKHÁNA.—*In charge of* Assistant Surgeon M. M. VAKIL, L. M. & S.

The buildings are in good repair. The committee visited the dispensary regularly once a month. The sanitary and conservancy arrangements of the town are satisfactory. The water-supply from wells is abundant. The total treated was 10,991 out-door and 150 in-door patients against 10,847 and 174 in 1888, and 11,042 and 217 in 1887, respectively. The prevailing diseases were malarial fevers, conjunctivitis, skin-diseases, inflammation of eye and ear, bronchitis and injuries. One case of cholera occurred. Thirteen major surgical operations were performed. The vaccination work is carried out thrice in a week. Six post-mortem examinations were made. The dispensary was inspected twice by the Civil Surgeon, Sukkur, and once by the Civil Surgeon, Shikárpur, and the Deputy Sanitary Commissioner. The total cost was Rs. 2,485-1-10, the cost per patient Re. 0-3-6, and Rs. 2,564-12-1 and Re. 0-3-8 in 1888, and Rs. 3,358-12-5 and Re. 0-4-9 in 1887, respectively.

GRANT-IN-AID DISPENSARIES.

MEHAR.—*In charge of* Hospital Assistant S. A. MIR MAHOMED.

The buildings are not in good repair. The committee visited the dispensary every month. The sanitary and conservancy arrangements are unsatisfactory. The water-supply from wells is good and abundant. The total treated was 3,503 out-door and 91 in-door patients as compared with 3,101 and 79 in 1888, and 4,039 and 88 in 1887, respectively. The prevailing diseases were malarial fevers, ophthalmia, diseases of the digestive system, and skin-diseases. Seventeen major operations were performed. Vaccination is performed by the táluka vaccinator. Five post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Sukkur, in February, September and December, and by the Deputy Sanitary Commissioner in March. The total cost was Rs. 1,725-5-6, the cost per patient Re. 0-7-8 against Rs. 1,901-1-11 and Re. 0-9-6 in 1888, and Rs. 1,524-8-6 and Re. 0-5-10 in 1887, respectively.

KAMBAR.—*In charge of* Hospital Assistant JOSEPH ISRAEL.

The annual repairs of the buildings have been commenced but not yet completed. A cook-room is needed for in-door patients. The committee visited the dispensary every month. The sanitary condition of the town is fair. The water-supply is good and abundant. The total treated was 7,685 out-door and 144 in-door patients as compared with 7,601 and 143 in 1888, and 6,715 and 268 in 1887, respectively. The most common diseases were malarial fevers, ophthalmia and diseases of the respiratory, digestive and cutaneous systems. Three major surgical operations were performed. Vaccination is carried out by the táluka vaccinator. Nine post-mortem examinations were made. The dispensary was inspected by the Civil Surgeon, Sukkur, in January and December, and by the Civil Surgeon, Shikárpur, in June. The total cost was Rs. 2,047-4-3, the cost per patient Re. 0-4-2 against Rs. 1,946-2-8 and Re. 0-4-0 in 1888, and Rs. 2,436-15-5 and Re. 0-5-7 in 1887, respectively.

GHOTKI.—*In charge of* Hospital Assistant KHUSHALDAS KHEMCHAND.

The buildings are in good repair. The committee visited the dispensary regularly every month. The sanitary condition and conservancy are fair. The water-supply is good and abundant. The total treated was 3,367 out-door and 49 in-door patients as compared with 3,572 and 58 in 1888, and 3,285 and 20 in 1887, respectively. The prevailing diseases were malarial fevers, ophthalmia, bronchitis, ulcers, boils and ear and rheumatic affections. Seven surgical major operations were performed. Vaccination is conducted by the táluka vaccinator. Six medico-legal cases were examined and reported upon at the request of the police. The dispensary was inspected by the Civil Surgeon, Sukkur, in January, April and November. The total cost was Rs. 2,004-5-0, the cost per patient Re. 0-9-4 against Rs. 1,004-15-1 and Re. 0-4-5 in 1888, and Rs. 1,756-2-11 and Re. 0-8-6 in 1887, repectively.

DOKRI.—*In charge of* Hospital Assistant SAVALSING MANIKRAI.

The dispensary was opened on 1st June 1888. The buildings are in need of repair. The dispensary committee meet once a month. The sanitary and conservancy arrangements are fair. The water-supply from wells is good and sufficient. The total treated was 3,248 out-door and 34 in-door patients. The most common diseases were malarial

fevers, ophthalmia, bowel-complaints, skin-diseases, ulcers, and respiratory and rheumatic affections. One major surgical operation was performed. Vaccination is carried on by the táluka vaccinator. One post-mortem examination was made. The dispensary was inspected by the Civil Surgeon, Sukkur, in January. The total cost was Rs. 829-3-11 and the cost per patient Re. 0-4-1.

UPPER SIND FRONTIER.

GOVERNMENT DISPENSARY.

JACOBABAD.—*In charge of* Surgeon W. E. JENNINGS.

The buildings are in good repair. The sanitary condition of the town is good and the water-supply sufficient and of good quality. The Deputy Commissioner visits the dispensary often. The total treated was 4,299 out-door and 216 in-door patients, as compared with 4,508 and 226 in 1888, and 3,812 and 228 in 1887, respectively. The prevailing diseases were malarial fevers, respiratory affections, eye diseases, rheumatic affections, dysentery, diarrhœa, ulcers and skin-diseases. Forty-two major surgical operations were performed. The total cost was Rs. 3,985-2-2, the cost per patient Re. 0-14-1 against Rs. 3,892-10-0 and Re. 0-13-1 in 1888, and Rs. 4,420-7-10 and Rs. 1-1-6 in 1887, respectively.

GRANT-IN-AID DISPENSARIES.

KASHMOR.—*In charge of* Hospital Assistant TUKARAM PANDHARINATH.

The building is in good repair. The committee visited the dispensary monthly. The sanitary condition of the town is fair and the water-supply abundant. The total treated was 2,088 out-door and 73 in-door patients, as compared with 1,175 and 73 in 1888, and 2,416 and 97 in 1887 respectively. The prevailing diseases were malarial fevers, conjunctivitis, respiratory affections and ulcers. One major surgical operation was performed. Vaccination is conducted by the táluka vaccinator. The dispensary was inspected by the Deputy Commissioner in February. The total cost was Rs. 1,111-11-11 and the cost per patient Re. 0-8-2 against Rs. 1,051-10-6 and Re. 0-13-5 in 1888, and Rs. 1,459-5-10 and Re. 0-9-3 in 1887, respectively.

VICTORIA DISPENSARY, SHAHDADPUR.—*In charge of* Hospital Assistant TAIJEE AHEER.

The dispensary was opened on 9th June 1889. The building is in good repair. The committee visited the dispensary once a month. The sanitary condition of the town is fair. The water-supply is good and abundant. The total treated was 1,811 out-door and 26 in-door patients. The prevailing diseases were malarial fevers and ophthalmia. Vaccination is carried on by the táluka vaccinator. The Civil Surgeon, Sukkur, inspected the dispensary in December. The total cost was Rs. 1,163-13-9 and the cost per patient Re. 0-10-1.

FOREIGN.

ADEN.

EUROPEAN GENERAL HOSPITAL, ADEN.—*In charge of* Brigade Surgeon E. SEXTON *till April*, Surgeon A. DODD *to May, afterwards* Surgeon C. MONKS.

Conservancy and water-supply.—Conservancy is well looked after. Water used is condensed.

Hospital building.—The same dilapidated condemned old building is still used as a hospital. It has been reported on by various officers as unsuitable. An excellent site has been selected for a new hospital, the ground marked out, and the plan and estimates recently submitted to Government.

General health.—Has been very good ashore and afloat.

Attendance of patients.—The total treated was 3,410 out-door and 141 in-door patients as compared with 3,028 and 142, respectively, in 1888.

Prevailing diseases.—Injuries, fevers, dysentery, diarrhœa, ulcers, and rheumatic, lung, ear and eye affections.

Surgical operations.—There were 13 major and 216 minor operations.

Mortality and its causes.—Eleven deaths occurred. The causes were dysentery 3, fever 1, debility 1, hepatitis 1, sclerosis 1, hemiphlegia 1, delirium tremens 1, phthisis 1 and empyema 1.

Vaccination.—Is carried on by the municipal vaccinator.

Conduct of establishment.—Excellent.

Cost.—The total cost was Rs. 9,821-0-6, the cost per patient Rs. 2-12-3, against Rs. 8,264-9-4 and Rs. 2-9-8, respectively, in 1888. The cost of each diet was Re. 1-5-1, or 1 pie less than in 1888.

CIVIL HOSPITAL, ADEN.—*In charge of* Surgeon J. W. T. ANDERSON.

Conservancy.—No new sanitary works were executed during the year, and the present system of filth cesspits in houses is gradually being replaced by privies in those houses that are re-built. In the whole Settlement the excreta is removed to places appointed outside the limits of each township and there dried for a few days and burnt and reduced to ashes.

Water-supply.—From four sources:—*I. Condensed.*—From Government or private condensers; *II. Banian well water* from a well situated in the north-west of the Crater and for which the Municipality levy a fee; *III. Aqueduct water*, brought from Shaikh Othman by means of a masonry aqueduct some seven miles in length; *IV. Rain water* collected in the famous tanks. The water from the condensers is as a rule good; that from the Banian well and aqueduct is brackish, but potable. Rain water is uncertain owing to the small annual rainfall, but is much prized by the natives. The water issued to the patients in the Civil Hospital is a mixture of equal parts of condensed and brackish from the Banian well. No deleterious effects arise from this admixture.

Hospital buildings.—The hospital buildings were thoroughly repaired during November and December, and the following improvements effected during the past year:—The ulcer ward, which contains 38 beds, was scraped, plastered and oil-painted; all the doors, windows, and wood-work japanned, and from being a source of annoyance owing to the difficulty of keeping it clean and sweet, it is at present the most cheerful and brightest ward in the whole hospital. The Police ward, which had a large open archway from the principal entrance, was provided with doors to keep out the strong winds, and the interior as well as exterior of the whole hospital has been repaired and colour-washed. A new iron latrine has been ordered from Bombay for the ulcer ward; it is to be erected 10 yards to the south-east of the hospital, so that patients might resort to it without having to crawl over 100 yards of rough ground to reach the present building. As the dry earth system can be carried out in all its details owing to the habits of the Arabs and Somalis, there is reason to believe that there will be no nuisance from having it in such close proximity to the hospital. Thirty iron cots were obtained from the Municipality to replace some old wooden ones which were objectionable in every way; and all cots were japanned instead of oil-painted, as the former dries quicker and is much easier to keep clean than the latter.

General health.—Good. The small-pox epidemic raging in the Settlement during 1888 was completely stamped out, and with strict regulations for isolation, disinfection and vaccination, the fear of any severe outbreak in Aden itself is much diminished. The few cases admitted into the small-pox hospital during the year were principally importations from Berbera.

Attendance of patients.—The total number of in-patients treated was 785 against 537 in 1888 and of out-patients 3,407 against 1,678 for the same year.

Surgical operations.—The total number of major operations was 86 with 4 deaths against 31 for 1888, and of minor 589 against 105 for 1888.

Mortality and its causes.—There were 67 deaths against 108 and 116 during the preceding years, a very considerable decrease, which can only be attributed to the removal of the poorer classes to Shaikh Othman and the great demand for labour in Aden. The principal causes of mortality were privation, ulcers with debility and phthisis.

Vaccination.—Is carried on in Aden by a vaccinator and vaccinatrix and in Shaikh Othman by a vaccinator, all of whom are paid by the Municipality.

Conduct of establishment.—The Civil Surgeon reports:—"The past year has been an exceptionally busy one, and a great portion of the heavy work has fallen on 1st Class Hospital Assistant Moses Samuel who, in addition to carrying on most of the clerical work, has had the general supervision of the hospital and issuing of rations, a task of considerable labour in such a large hospital. He has carried out his duties to my entire satisfaction."

Cost.—The total cost was Rs. 17,871-8-5 and the cost per patient Rs. 4-4-2, against Rs. 14,900-6-8 and Rs. 6-11-7, respectively, in 1888. The cost of each diet was Re. 0-3-11, or 2 pies more than in 1888.

The Civil Hospital was inspected by Deputy Surgeon-General Cates on 26th December.

MUNICIPAL DISPENSARIES.

PRINCE OF WALES' DISPENSARY, ADEN.—*In charge of* Assistant Surgeon JAMSHEDJI POCHAJI POCHA, L.M. & S.

The building remains as before. The committee visited the dispensary monthly. The sanitary condition of the town is fairly good. The water-supply is condensed and limited in quantity. The total treated was 5,350 out-door patients as compared with 5,771 in 1888 and 6,630 in 1887. The prevailing diseases were affections of the skin, ear, eye and digestive system, also ulcers, respiratory affections and malarial fevers. Forty-four major surgical operations were performed. The dispensary was inspected by Deputy Surgeon-General Cates in December. The total cost was Rs. 2,954-2-0, the cost per patient Re. 0-8-10 against Rs. 3,539-15-6 and Re. 0-9-9 in 1888 and Rs. 3,429-15-9 and Re. 0-8-3 in 1887, respectively.

SHAIKH OTHMAN.—*In charge of* Hospital Assistant CHUNILAL RAMDAS.

The building is in good repair. There is no committee, but the Civil Surgeon, Aden, visits the dispensary every month. The sanitary condition of the town is fairly good and the water-supply from wells plentiful and of fairly good quality. The total treated was 2,440 out-door and 131 in-door patients as compared with 2,878 and 126 in 1888 and 2,169 and 25 in 1887 respectively. The most common complaints were ague, rheumatic and respiratory affections, bowel-complaints, skin and ear diseases, ulcers and local injuries. Eight major surgical operations were performed. Vaccination is carried on by the municipal vaccinator. Two post-mortem examinations were made. The dispensary was inspected by Deputy Surgeon-General Cates in December. The total cost was Rs. 2,498-2-4, the cost per patient Re. 0-15-6 against Rs. 2,652-5-9 and Re. 0-14-1 in 1888 and Rs. 1,699-4-6 and Re. 0-12-4 in 1887, respectively.

GOVERNMENT DISPENSARY.

BERBERA.—*In charge of* Hospital Assistant JAGJIVAN MAHASHANKER.

The building is unsuitable. There is no dispensary committee, but the Assistant Political Resident and Consul, Somali Coast, occasionally visits the dispensary. The sanitary condition of the town is looked after. The water-supply is abundant. The total treated was 1,660 out-door and 11 in-door patients as compared with 1,928 and 13 in 1888 and 3,442 and 9 in 1887, respectively. The prevailing diseases were ulcers, ophthalmia, local injuries, and bowel-complaints. Three hundred and fifty-seven cases of small-pox occurred. Four major surgical operations were performed. Vaccination is conducted by the District Vaccinator. The dispensary was inspected by the Senior Medical Officer, Aden District. The

total cost was Rs. 891-15-3, the cost per patient Re. 0-8-6, as contrasted with Rs. 996-13-10 and Re. 0-8-2 in 1888 and Rs. 1,144-7-8 and Re. 0-5-3 in 1887, respectively.

PERSIAN GULF.

CIVIL HOSPITAL, MUSKAT.—*In charge of* Surgeon-Major A. S. G. JAYAKAR.

Conservancy.—Conservancy and sanitation generally neglected.

Water-supply.—Good and abundant.

Hospital buildings.—Underwent slight repairs during the year; accommodation sufficient.

General health.—Measles and small-pox prevailed during the first half of the year, and chicken-pox also prevailed during the early months of the year. In other respects public health was good.

Attendance of patients.—The total number of in-door and out-door patients treated was 51 and 4,270 against 24 and 3,814 respectively for the previous year.

Prevailing diseases.—Malarious fevers, rheumatic and respiratory affections, diseases of the stomach and intestines, ulcer and skin-diseases.

Surgical operations.—Seven major operations were performed.

Mortality and its causes.—Eight deaths occurred among in-door patients. The causes were fever, tetanus, pneumonia, phthisis, cystitis, anæmia, ulcer and fracture.

Vaccination.—Two hundred and fifty-one operations. 236 successful and 15 unsuccessful.

Conduct of establishment.—Good.

Medico-legal.—One post-mortem examination was made at the request of the Political Agent.

Cost.—The total cost was Rs. 13,437-2-8, the cost per patient Rs. 3-1-9 against Rs. 12,824-5-10 and Rs. 3-5-5 respectively in 1888. The cost of each diet was Re. 0-2-0, being the same as in the previous year.

CIVIL HOSPITAL, BUŞHIRE.—*In charge of* Surgeon-Major D. FFRENCH MULLEN, M.D.

Conservancy.—No attention is paid to the cleanliness of the town.

Water-supply.—Good from wells some miles away: those in the town are brackish.

Hospital buildings.—In good repair. There is no accommodation for in-door patients.

General health.—Good. Eight of the passengers from Busrah where cholera was raging, who landed at Bushire developed the disease and died.

Attendance of patients.—There were treated 5,009 out-door patients against 5,347 in 1888.

Prevailing diseases.—Malarial fevers, intestinal worms, and eye, respiratory and rheumatic affections.

Surgical operations.—Fourteen major and 397 minor surgical operations were performed against 8 and 378 respectively in 1888.

Vaccination.—Three hundred and ninety-eight vaccinations were performed successfully.

Conduct of establishment.—Good. Assistant Apothecary Rodrigues is commended for zeal and ability.

Cost.—The total cost was Rs. 14,123-10-2, the cost per patient Rs. 2-13-1, as compared with Rs. 13,176-9-8 and Rs. 2-7-5 respectively in 1888. The increased expenditure is due to a Surgeon-Major holding charge of the hospital, the previous incumbent being a Surgeon only.

APPENDIX II.

SUMMARIES OF THE ANNUAL REPORTS

OF THE

MEDICAL SCHOOLS.

Byrámji Jijibhoy Medical School, Poona.

This school was under the superintendence of Brigade-Surgeon D. E. Hughes, M.D., till 26th February, Surgeon G. H. Bull till 22nd April, Brigade-Surgeon Henry Cook till 12th May, Surgeon G. H. Bull till 16th June, Surgeon-Major P. Murphy up to 31st October, afterwards Brigade-Surgeon H. Cook.

The total number of pupils undergoing instruction at the beginning of the year was 71, *viz.*, 43 first year's, 15 second year's, and 13 third year's. Of these there were 13 military, 9 civil medical, 15 stipendiary, 29 paying and 5 Native State pupils.

Thirty-six of the first year's pupils were examined in March; of these 29 passed and 7 failed, of whom 5 were put back and 2 dismissed. At the second examination of the first year's pupils 36 presented themselves, of whom 19 passed and 17 who failed were put back as first year.

Of the second year's pupils 14 presented themselves at the first terminal examination, of whom 11 passed and 3 failed. At the second terminal examination the same number appeared, of whom 10 were found qualified and 4 failed, *viz.*, 2 stipendiary and 2 paying pupils. One stipendiary pupil was dismissed, and the stipend of the other withheld, pending his passing in 1890. This lad with the 2 paying pupils who failed have been put back as second year's pupils.

A special examination for the third year's pupils who failed to pass their final examination in 1888 was held in March. Four lads presented themselves, of whom 3 passed—2 military and 1 State pupil. The pupil who failed was dismissed.

The final examination of third year's pupils was held in September. Nine lads presented themselves and were all found qualified. Of these 6 were stipendiary, 1 State and 2 paying pupils.

The following prizes were awarded at the final examination in September. The Balkrishna Chintoba prize of Rs. 30 for proficiency in medicine and therapeutics, to third year paying pupil Shankar Kanoji; the Balkrishna Chintoba prize of Rs. 30 for proficiency in medical jurisprudence, to stipendiary pupil Anant Suntram; the Balkrishna Chintoba scholarship of Rs. 5 per mensem, tenable for 12 months, to State pupil Vithal Moreshwar for proficiency in anatomy and physiology.

No changes were made in the course of instruction during the year under report. At the entrance examination held in October, 105 candidates appeared, including 2 civil medical pupils, both of whom passed. 6 were granted stipends, 10 were taken on as military pupils and 20 as paying pupils, including a lady pupil, a European. At the end of the year there were 19 native military, 12 civil medical, 13 stipendiary, 41 paying and 3 State pupils, giving a total of 88 pupils. Of these 1 was European, 55 Bráhmins, 11 Maráthás, 6 Native Christians, 5 Mussulmáns, 4 Goanese, 3 Pársis, 1 Jew, 1 Telegu and 1 East Indian, by caste. The total cost amount to Rs. 13,872-6-2 as compared with Rs. 16,256-14-9 in 1888. The amount of fees received from paying pupils was Rs. 747 against Rs. 498 in 1888. The Superintendent speaks in high terms of Surgeon G. H. Bull, Teacher of Surgery and Midwifery, who performed his duties with great care and ability. Senior Apothecary Fearn and Assistant Surgeons Ráo Sáheb Bhikáji Amrut Chobbe and D. G. Sabnis performed their duties with their usual zeal and ability. The conduct of the students is reported to be satisfactory.

Byrámji Jijibhoy Medical School, Ahmedabad.

This school was under the superintendence of Surgeon-Major Robb up to the end of April when he proceeded on furlough, and Surgeon-Major M. L. Bartholomeusz took over charge from that date. The tenth year of this school opened with the winter session on 1st November 1888 with 47 names on the roll, comprising 12, 10, 25 students of the third, second and first years, respectively. Two of the first year's pupils resigned during the early part of the winter season. Of the remaining 23 that were examined in April, 18 passed out and 5 failed, of whom 1 died of cholera, 1 was dismissed and 1 resigned and became a paying student, but subsequently retired. Of the 10 second year's pupils examined, 9 passed and 1 broke down owing to illness. A third year civil medical pupil was specially examined, and passed out successfully in May.

Thus at the commencement of the summer session there were 42 lads on the register, *viz.*, 21 first, 10 second and 11 third year's students. These were examined in September.

Of the first year's students 15 passed satisfactorily, 4 having failed in one subject only were passed along with the 15, and 2 who failed in 2 subjects were kept back. All the second year's pupils were found qualified on examination and were passed to the third year's class. Of the third year's pupils 10 passed creditably and were passed out of the school and one having failed was put back for another year. One paying pupil of second year's class absented himself in November without giving notice of, or reason for, withdrawal. At the entrance examination held in October, 97 candidates presented themselves; of these 47 passed, but 33 were admitted into the school, and 3 more without examination. At the end of the year the result was that there were on the roll 67 pupils—11 third, 18 second and 38 first year's pupils.

As regards caste, 58 were Hindus, 3 Mussulmáns, 2 Pársis, 2 Jews and 2 Native Christians. Scholarships and prizes were awarded, as usual, for proficiency in studies and for general good conduct and excellence in the discharge of hospital duties.

The total expenditure was Rs. 13,627-6-5 as compared with Rs. 13,481-11-0 in 1888, and the receipts from paying patients, &c., were Rs. 756-13-6 against Rs. 651-5-8.

The Superintendent reports very favourably of the teaching staff, and corroborates what Dr. Robb has said in previous reports, *viz.*, that they conduct their duties with praiseworthy zeal and regularity, and that they accord cordial and valuable assistance in the working of the school. First Class Hospital Assistant Laxumon Sing is commended for the efficient manner in which he teaches materia medica and pharmacy in the school. The conduct of the students has been reported to be satisfactory.

Hyderabad Medical School.

Surgeon-Major J. F. Keith was in charge of this school.

At the commencement of the year there were 23 students on the school roll, *viz.*, 3 native military, 1 paying and 19 stipendiary pupils; 8 were first, 6 second and 9 third year's class. At the end of May the number was reduced to 22, owing to the death of one first year stipendiary pupil. At the final examination in September the number was further reduced to 15, the one paying and 4 stipendiary third class pupils having left the school after passing the examination, and 2 third year military pupils having been dismissed, as they failed to pass for two successive years the final examination. At the entrance examination 13 candidates were added to the list, but one of them resigned. At the close of 1889 there were 25 paying, 1 native military and 1 civil medical pupils—total 27; of these 7 are in the third, 8 in the second and 12 in the first class. By caste they were 19 Hindu Sindhis, 3 Mahomedan Sindhis, 2 Maráthás and 1 Telegu. Deputy Surgeon-General Turnbull presided at the pass and sessional examinations held in September, and expressed himself pleased at the progress which the students had made.

The Superintendent brings to notice that Assistant Surgeons T. H. Aquino and J. E. Bocarro have, as usual, acquitted themselves with great zeal and ability, and that the conduct, general application and medical attainments of the students have been good.

The total expenditure was Rs. 8,157-6-11 against Rs. 8,793-14-6 in 1888.

APPENDIX III.

Annual Reports: *Administration and Progress Report on the Civil Hospitals and Dispensaries for the year 1889.*

No. 3513.

GENERAL DEPARTMENT.

Bombay Castle, 1st September 1890.

Letter from the Surgeon General with the Government of Bombay, No. S. B.—183, dated 20th May 1890—Submitting the Administration and Progress Report on Civil Hospitals and Dispensaries for the year 1889.

RESOLUTION.—In the year 1889 the number of hospitals in this Presidency remained unchanged; but in dispensaries there was a net increase of 7, one—at Belgaum—being closed, and 8—at Navápur, Sávda, Kálol, Ahmedabad, Shahdádpur, Kolhápur, Gadgeri, and Budgaon—being newly opened. The last three were Native State dispensaries, and the remainder were "grant-in-aid" institutions. The total number of hospitals and dispensaries at the end of the year was 244.

2. There was a small increase as compared with the year 1888 in the total number of in-door patients, but the out-door patients were decidedly less numerous, and the total number of cases—out-door and in-door combined—fell from 1,715,176 to 1,696,614. There was a marked decrease in the Konkan and Deccan, a slight decrease in Gujarát, and, on the other hand, an important increase from 179,149 to 197,834 in Sind. In Bombay City the cases treated rose from 95,431 to 98,292.

3. The year 1889 cannot, however, be regarded as appreciably more healthy than the previous year, even in the Presidency proper, except in the case of skin-diseases. In these there was an enormous decrease of 56,401 cases exclusive, or 54,258 inclusive, of Sind, where the cases were somewhat more numerous than in 1888.

Malarial fevers rose from 245,697 to 262,791. In this respect the season appears to have been more than ordinarily unhealthy in Gujarát, where there was an increase of 17,596 cases. In Sind and the Deccan there were comparatively unimportant increases, but in the Konkan a decrease of 7,604 is reported.

Cholera and small-pox cases were as usual few in number, but the former decreased from 7,833 to 5,318 and the latter rose from 741 to 944. This increase was entirely due to 357 cases at Berbera, which (apparently by mistake) are stated in the report to have occurred at Shaikh Othman.

The fluctuations in the classes of cases treated were in other respects unimportant, except in a few kinds of major surgical operations, especially "amputations," "incisions" and miscellaneous unclassified operations, which were considerably more numerous than in the previous year.

4. The total expenditure incurred by Government was Rs. 8,00,353 as compared with Rs. 8,01,398 in 1888. Owing apparently to reduction of grants-in-aid the expenditure on dispensaries decreased from Rs. 2,06,680 to Rs. 1,78,187, but, on the other hand, it was found necessary to spend Rs. 6,22,166, as compared with Rs. 5,94,718 in 1888, on Civil Hospitals, the chief items of increase being Rs. 14,883 and Rs. 8,044 at the Jamshedji Jijibhái and Káma Hospitals respectively.

The contributions of Local and Municipal Boards amounted to Rs. 48,889 on account of hospitals and Rs. 1,70,349 on account of dispensaries, as compared with Rs. 44,662 and Rs. 1,68,675 in 1888. In the course of the year under review orders were passed requiring several of these Boards to increase their contributions on account of hospitals.

The revenue from "miscellaneous sources," from "interest" and from "subscriptions" increased respectively from Rs. 48,959 to Rs. 57,100, from

Rs. 12,086 to Rs. 19,138, and from Rs. 18,834 to Rs. 36,863. The subscriptions were mainly on account of the Ránebennur Dispensary and the Victoria Jubilee Dispensary at Ahmedabad. Valuable contributions of Rs. 18,000 by His Highness the Gáikwár, Rs. 75,000 by Mr. Frámji Dinsha Petit, Rs. 1,00,000 by His Highness the Thákor Sáheb of Bhávnagar, and Rs. 2,000 by the Trustees of the Pársi Panchávat Fund were also made, during the year, in aid of medical institutions or to advance medical science.

The general increase of income other than that derived from Government may be regarded as sufficiently satisfactory.

5. It is presumed that the Surgeon General has communicated his remarks on the condition of the various medical institutions to the officers and committees concerned.

6. The Surgeon General has not explained why the actual strength of Military Hospital Assistants is shown in paragraph 3 (*a*) of his report as being in excess of the sanctioned scale, including the reserve. As regards Civil Hospital Assistants he remarks (paragraph 3) that "it is probable the present strength will be reached by the end of 1892." It is presumed, however, that he means that the *sanctioned strength* will be reached by that date. The present strength is now 32 less than the sanctioned number, the retirements in three years will be about 30; but on the other hand, 71 men will be qualified for appointment except the few who fail to pass their examinations. The requirements of the North-Western Railway appear to be 7 and not 11 as stated. The general question of increasing the number of Hospital Assistants is separately under the consideration of Government.

7. Government on a review of the circumstances under which the ward for incurables in the Jamshedji Jijibhái Hospital was built have decided to contribute the cost of accommodating more than twenty lepers, the number for which the ward was in part designed.

J. DEC. ATKINS,
Acting Under Secretary to Government.

ADMINISTRATION AND PROGRESS REPORT

ON THE

CIVIL HOSPITALS AND DISPENSARIES

UNDER THE

GOVERNMENT OF BOMBAY

FOR THE YEAR

1890.

Bombay:
PRINTED AT THE GOVERNMENT CENTRAL PRESS.
1891.

No. $\frac{S.B.}{240}$ of 1891.

FROM

THE SURGEON-GENERAL WITH THE GOVERNMENT OF BOMBAY;

TO

THE CHIEF SECRETARY TO GOVERNMENT, General Department.

Bombay, 25th May 1891.

SIR,

I have the honour to submit my report on the Civil Hospitals and Dispensaries for 1890.

2. In accordance with Government Resolution No. 2426, dated 17th August 1887, the summaries of the annual reports of medical officers and of the medical schools are omitted from this year's report.

Medical Schools.

3. At the close of 1890 there were 212 pupils in the three Provincial Medical Schools, and were distributed as follows:—

Classes of Pupils.	Poona.				Ahmedabad.				Hyderabad.				Total.			
	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.	3rd year.	2nd year.	1st year.	Total.
Native Military	6	12	10	28	2	3	5	10	...	...	1	1	8	15	16	39
Stipendiary	4	6	5	15	6	4	5	15	8	11	8	27	18	21	18	57
Native State	1	1	...	2	1	2	...	3	...	...	...	...	2	3	...	5
Paying	4	9	19	32	9	19	10	38	...	...	2	2	13	28	31	72
Civil Medical Pupils	7	5	14	26	...	4	6	10	...	1	1	2	7	10	21	38
Free Pupil	...	...	...	...	1	...	...	1	...	...	...	...	1	...	...	1
Total ...	22	33	48	103	19	32	26	77	8	12	12	32	49	77	86	212

4. The following estimates show the present prospects of recruiting the Military and Civil Hospital Assistants:—

(a)—Military Hospital Assistants.

Sanctioned strength, including 15 per cent. reserve ...		... 143
Actual strength on 31st March 1891		... 148
	Excess ...	5
In the Medical Schools, will pass in 1891		... 8
Do. do. will pass in 1892		... 15
	Total ...	28

At 10 casualties per annum, 20 will be absorbed in 1892.

The 10 Native Military pupils admitted at Poona, the 5 at Ahmedabad and the 1 at Hyderabad in 1890, should pass out in 1893, the excess then will be 24 if they all passed; but even allowing for failures at the examinations, the requirements of that year will probably be more than met.

There is a proposal before Government to increase the strength of the Military Hospital Assistant class to 160, and if this be sanctioned, the present excess will be absorbed at once. Some of the excess is employed in the Civil Department, Burmah.

(b)—Civil Hospital Assistants.

Sanctioned strength		... 253
20 per cent. reserve...		... 50
	Total ...	303
Present strength		... 250
	Deficiency ...	53

It is estimated the three medical schools will supply the following numbers:—

	1891.	1892.	1893.
Poona	11	11	19
Ahmedabad	6	8	11
Hyderabad	8	12	9
Total ...	25	31	39

Taking the casualties at 10 per annum and allowing for failures at the school examinations, the sanctioned strength may be reached about the end of 1893.

5. The teaching staff remained unchanged during the year at Hyderabad and Ahmedabad. At Poona, Brigade Surgeon H. Cook was Superintendent up to 10th September 1890, and from 11th September up to the end of the year Surgeon-Major J. Davidson performed the duties of Superintendent. Surgeon-Major G. Bull acted for Surgeon W. H. Burke from 1st January up to 31st May as teacher of Surgery and Midwifery.

6. As the summaries of the reports of Medical officers are not appended, I will briefly note some of the more important points in the reports on the hospitals at the Presidency and in the larger Civil Hospitals in the mofussil.

European General Hospital, Bombay.

7. The total number of patients treated in the European General Hospital, Bombay, was 3,009 against 4,039 in the previous year. The prevailing diseases were malarious fevers 601 to 497, dysentery 112 to 154, diseases of the nervous system 104 to 156, and diarrhœa 136 to 242. There were 21 cases of abscess of liver with 7 deaths to 9 and 6 in the previous year. Of phthisis 2 were treated and none died to 16 and 4 in 1889. Of enteric fever 33 were admitted and 7 died to 18 and 9 in preceding year. The number treated in the obstetric ward was 50 as compared with 53 in 1889. There were 66 major operations against 52 in 1889. There were 74 deaths as compared with 95 in the previous year. The income from Port Trust, paying patients, &c., was Rs. 28,125. The total cost was Rs. 72,472, the cost per patient Rs. 24-1-4, as compared with Rs. 73,289 and Rs. 18-2-3 respectively in 1889. The cost of each diet was Re. 0-8-4 to Re. 0-7-9 in the previous year. The physician in charge reports favourably on the hospital establishment and of the nursing arrangements of the All Saints Sisters.

Jamsetji Jijibhoy Hospital.

8. The in-patients at the Jamsetji Jijibhoy Hospital numbered 7,095 to 7,125 in 1889. Of these, 2,769 were cured, 2,662 were relieved, 512 discharged otherwise, and 775 died, giving 10·9 per cent. to total treated. The daily average number of sick was 358·3. There were 43,553 out-door patients treated against 43,435 in 1889, and the daily average attendance was 425·7. The principal diseases among in-door patients were ague, syphilis, phthisis, dysentery and diarrhœa. There were 281 cases of labour. 430 major and 5,927 minor operations were performed. Of the total number of deaths (775), 180 occurred within 24 hours of admission, 7 within 48, and 48 within 72 hours. The net cost was Rs. 1,59,219, the cost per patient Rs 3-2-3 against Rs. 1,72,126 and Rs. 3-6-5 respectively in 1889. Rs. 135 were received from paying patients against Rs. 145 in 1889. The Senior Medical Officer reports the great benefit the hospital has obtained from the order prohibiting the admission of infectious diseases such as cholera, small-pox and relapsing fever. The foundation stones of the Petit Hospital for women and children and the Avábái Nursing Home were laid early in the year. The latter institution has been finished and formally opened, and the former will soon be completed. Brigade Surgeon Gray reports well of the manner in which the Medical officers performed their duties, and expresses entire satisfaction with the conduct of the Apothecaries and the establishment generally of the hospital. The nursing has been ably carried out by the All Saints Sisters.

The Cowasji Jehangir Ophthalmic Hospital.

9. 506 in-door patients were treated in the Cowasji Jehangir Ophthalmic Hospital during the year and 8,833 out-door patients. The number of beds was 35. The Hindus, as usual, were the largest in numbers—4,210 out-patients and 265 in-patients being treated. Mussalmáns come next—3,101 out and 157 in-

patients. Diseases of the conjunctiva form over one-third of the total treated; diseases of the iris were 255 in the out-patient department, and 45 were treated in-door. There were 174 cases of glaucoma, 114 being males and 60 females. Diseases of the optic nerve and retina gave 101 cases and cataracts 886. If this hospital were larger, more operations could be done. It is impossible to operate on a patient unless there be a bed ready to put him in. The establishment is favourably reported on.

Gokuldás Tejpál Hospital.

10. The total number of in-door patients in the Gokuldás Tejpál Hospital was 2,648 against 2,257 in 1889. Of these, 1,894 were cured, 254 relieved, 127 discharged otherwise, and 261 died. The daily average sick was 105·5. 14,905 out-door patients were treated. The increase in the number of admissions of in-door patients was due to the large number of surgical injuries from accidents. The daily average of women and children continues to be unaffected by the presence of the special hospitals in the vicinity. The most common diseases were malarious fevers, scabies, bronchitis, ulcers, rheumatism, eye and ear diseases, dysentery and phthisis pulmonalis. There were 139 major operations performed during the year. Of these, 7 proved fatal, showing a mortality of 4·8 per cent.. The total cost was Rs. 45,019, the cost per patient Rs. 2-9-0 against Rs. 49,217 and Rs. 2-10-3 respectively in 1889. The cost of each diet was Re. 0-3-4, or 5 pies less than in the previous year. Four native women nurses have been employed in the male and female wards and so far are doing well. The hospital establishment has worked well.

The Pestonji Hormasji Cama Hospital and Jaffer Suleman Dispensary.

11. The Edulji Bomanji Allbless Hospital has been completed during the year. It stands in the compound of the Pestonji Hormasji Cama Hospital and is under its executive officers. In the latter the total number of in-patients was 808 against 781 in 1889. The number of lying-in-patients was 169 against 155 in 1889. Out-patients at Jaffer Suleman Dispensary numbered 8,207, and the daily average attendance was 100·4. There has been an increase in the number of in-patients, out-patients and lying-in-patients as compared with 1889. The diseases of women preponderate, forming more than one-third of the in-door cases. Next come diseases of the digestive and third those of the respiratory system. The number of deaths was 46, or 5·7 per cent. Amongst children the chief causes were atrophy and diarrhœa. There were 61 major operations with 5 deaths, *viz.*, 1 cæsarean section, 2 craniotomy, 1 long forceps, and 1 ovariotomy. Dr. Edith Pechey-Phipson reports favourably on the Medical officers under her and on the conduct of the hospital establishment.

12. The establishment of the Leper Home at Matunga in the city of Bombay in the year 1890 was mainly due to the influence and exertions of Mr. Acworth, the Municipal Commissioner of the city. This is a most beneficent work and has removed the lepers from the streets to the comforts of an excellent home.

13. In my report of 1888 I noted four pressing requirements of the city, and I am very glad to be able to report that three of them have been accomplished, *viz.*, the Leper Home, the Municipal hospitals for infectious diseases, and the nursing of the Gokuldás Tejpál Hospital.

Sassoon General Hospital, Poona.

14. The number of in-door patients treated in the Sassoon General Hospital, Poona, was 2,449 against 2,632 in the previous year : of out-door patients 10,909 against 11,433. Of the in-door patients 1,528 were cured, 255 relieved, 378 discharged otherwise, and 186 died. The principal causes of admissions were malarial fevers, local injuries, syphilitic affections, diseases of the urinary, respiratory, generative and nervous systems, and dysentery. There were 133 major and 706 minor operations. The total cost was Rs. 51,535-10-1, the cost per patient Rs. 3-13-8 against Rs. 44,469-13-6 and Rs. 3-2-7 respectively in 1889. The cost of each diet for Europeans was Re. 0-9-2, which is higher than in the European General Hospital, Bombay, and for Natives Re. 0-4-1. Rs. 2,933-5-6 were received from paying patients. Surgeon-Major Davidson reports favourably of Surgeon Burke, Captain Fearn, Senior Apothecary,

and praises the Wantage Sisters for their nursing of the patients.

Hattesing and Premábhái Civil Hospital, Ahmedabad.

15. The public health in Ahmedabad during the greater part of the year was unsatisfactory, an epidemic of influenza, which prevailed during the months of February and March, increased the death-rate considerably during the latter month. The admissions into civil hospital during the month of March showed an increase of nearly a thousand patients as compared with the same time in the previous year. Cases of sporadic cholera occurred during the months of June, July and August; and malarious affections were very prevalent during the months of September and October. The total number treated in hospital during the year was 22,467, of which 1,797 were in-door and 20,670 out-door patients against 1,894 and 18,731 respectively in the previous year. The most common diseases were injuries (a large number being police cases), ague, ulcers, diarrhœa and dysentery, venereal and rheumatic affections. 147 deaths, or 8·1 per cent., occurred among in-door patients. The total cost was Rs. 25,387-3-4, the cost per patient Rs. 1-2-0 as compared with Rs. 33,537-3-6 and Rs. 1-10-0 respectively in 1889. Rs. 125 were received on account of hospital stoppages during the year.

Civil Hospital, Karáchi.

16. The admissions into the Karáchi Civil Hospital were 7,901 out-door and 802 in-door to 7,546 and 750 respectively in 1889: the influenza epidemic caused some of the increase. Intermittent fevers, conjunctivitis, bronchitis, ulcers, scabies, eczema, and boils were the principal diseases. 40 deaths occurred in hospital. 95 major and 857 minor operations were performed during the year; of these 15 were lithotomies. The total cost was Rs. 20,518-3-2, the cost per patient Rs. 2-5-8 against Rs 23,072-10-11 and Rs. 2-12-6 in 1889. Rs. 74-11-0 were realized from paying patients.

Civil Hospital, Hyderabad.

17. In the Civil Hospital of Hyderabad there were 712 in and 14,739 out-patients treated during the year as compared with 566 and 13,751 respectively in the previous year. Of the in-door patients 622 were cured, 29 relieved, 3 discharged otherwise, and 28 died, or 3·9 per cent. to total treated. The most common diseases were ague, conjunctivitis, respiratory and bowel-affections, calculus of bladder and skin diseases, including abscess and ulcers. There were 332 major surgical operations. Of these, 159 were lithotomies, 151 cured and 7 died. Of 61 litholapaxies, 51 recovered and 9 died. The weights of stones varied from 20 grains in children to 4 oz. and 6 drams in adults; and in one case 9 large calculi were broken up in the bladder through the perineum weighing 17 ozs. and the patient recovered. The percentage of deaths in the 220 stone cases was 7·2. The total cost was Rs. 15,370-0-6, the cost per patient Re. 0-15-10 as compared with Rs. 15,565 and Rs. 1-1-4 in the previous year. The cost of each diet was annas two, the same as last year.

18. On the tables of figures which form Appendix I., I beg to submit the following remarks:—

Statement No I. shows the classification of hospitals and dispensaries. On 1st January 1890 there were 244 institutions open, 4 new dispensaries were opened during the year—at Lonávla in the Poona Collectorate, Mirajgaon in the Ahmednagar Collectorate, Yával in the Khándesh Collectorate, and Vadgaon in the Kolhápur State. Total now open 248.

Statement No. II. gives the number of patients treated. There were 38,512 in-door and 1,685,072 out-door patients as compared with 37,549 and 1,659,065 respectively in 1889. Of the in-door patients 26,237 were cured, 4,998 relieved, 2,829 discharged otherwise, and 2,611 died, or 6·7 per cent. to total treated of in-patients against 8 in the previous year. The daily average sick was 1,808·1 (men 1,382·3, women 313·8, and children 112). Last year it was 1,815·2. Of the out-door patients 1,517,007 attended personally and 168,065 were represented by friends. 393,280 patients were treated in the Civil Hospitals and 1,330,304 in dispensaries. The average daily attendance was 17,274 against 17,000 in

1889. The total number of beds was 3,612, or 47 more than in the previous year.

Statement No. III. gives the diseases for which the patients were treated. There were 247 cases of small-pox against 944 in 1889. Cholera gave 691 cases as compared with 5,318 in the previous year. There was a decrease of 2,669 cases of dysentery this year as compared with 1889. Malarial fevers gave as usual the largest numbers: of this disease there were 288,919, or 16·7 per cent. to total treated, against 262,791, or 15·4 in the previous year. In the Konkan the percentage was 20·6, in the Deccan 11·2, Gujarát 19·8, Sind 21·1, and Foreign 26. The figures in 1889 were 18·6, 10·9, 18·4, 19 and 18·7 respectively. Venereal affections gave 33,459, or 1·9 per cent. to total treated, against 30,028, or 1·7 respectively in 1889. Worms numbered 166,029, or 9·6 per cent., against 157,912, or 9·3 in the previous year. They were prevalent in the Deccan and Konkan, 15·6 per cent. in the former and 10·2 in the latter. There were 1,143 cases of leprosy, or 211 less than in 1889. No returns have been received from Matunga Leper Home. Diseases of the eye and ear give 178,620 and 67,819 cases, or 10·3 and 3·9 per cent. respectively. Skin diseases number 210,401, or 12·2 per cent., or 1·1 less than in 1889 to total treated; in the Konkan the percentage was 9·9, Deccan 12·4, Gujarát 15·1, Sind 9·2 and Foreign 5·7. Rheumatism gave 47,925 cases, or 2·8 per cent. to total treated, as compared with 46,469, or 2·7 per cent. in 1889. Diarrhœa returns 39,893, or 7,558 less than in 1889.

Statement No. III-A. shows the major surgical operations performed and their results. On 1st January 1890 there remained under treatment 116 cases which had undergone operations, 5,594 were performed during the year, making a total treated of 5,710 against 5,297 in 1889. Of these, 4,884 were cured, 211 relieved, 125 discharged otherwise, and 177 ended fatally, leaving 161 under treatment at the end of the year. The results of 152 operations performed on out-door patients being unknown are not recorded. 4,193 were performed in civil hospitals and 1,517 in dispensaries. 1,636, or about one-third of the total operations, were performed on the eye and at its appendages. Of these, 1,318 were performed in the Cowasji Jehangir Ophthalmic hospital. Next in order comes the removal of calculus with 863 and 55 deaths. Incisions gave 793 operations, on joints 601, removal of tumours 453, operations not classified 449, and amputations 386. The total number of minor operations was 81,872 as compared with 85,143 in 1889.

Statement No. IV. shows the sex and caste of the patients. The following tables give the ratios per cent. of men, women and children and of castes as compared with the previous year:—

	Men.		Women.		Children.	
	1889.	1890.	1889.	1890.	1889.	1890.
Konkan	48·0	47·6	19·6	19·9	32·4	32·5
Deccan	42·2	43·4	17·7	17·2	40·1	39·4
Gujarát	43·1	44·3	20·8	21·3	36·1	34·4
Sind	54·5	54·3	15·9	15·8	39·6	29·9
Foreign	64·3	61·5	16·1	20·3	19·6	18·2
Total ...	45·2	46·1	18·7	18·7	36·1	35·2

	1889.	1890.
Hindus	67·7	67·5
Mahomedans	26·2	26·5
Native Christians	2·6	2·7
Párśis	1·8	1·8
Europeans	0·6	0·4
Eurasians	0·2	0·2
Other Castes	0·9	0·9

Statement No. V., Part I, shows the income and expenditure during the year. The total income side was Rs. 12,85,955-1-6 against Rs. 12,48,078-15-0 in 1889. Of this Rs. 1,21,992-15-5 was cash balance at the beginning of the year. Rs. 8,34,117-7-10 were received from Government and Rs. 2,93,965-11-5 from Local and Municipal Funds and miscellaneous sources, such as hospital stoppages, sale of medicines, unserviceable articles, &c. Hospital stoppages amounted to Rs. 35,404 against Rs. 34,497 in 1889. The interest on invested capital yielded Rs. 17,858 and sale of securities Rs. 4,000. From Europeans Rs. 2,212 were received as subscription and from Natives Rs. 11,808. The total expenditure was Rs. 11,57,930, from which must be deducted Rs. 14,025 invested during the year, Rs. 46,287 realized from the sale of medicines and unserviceable articles, hospital stoppages, &c., and Rs. 952, the unexpended balance of the Government grant to the Dinshaw Manokji Petit Leper Asylum, Ratnágiri, lapsed to Government. After making these deductions the net expenditure was Rs. 10,96,665 against Rs. 10,36,240 in the previous year, the increase is mainly due to the payment of the medicine charges of the last two years. The average cost of each diet was Re. 0-2-6, or the same as last two years. The average cost of each patient was Re. 0-12-0, or 5 pies more than in the previous year. In the Konkan it was Rs. 1-8-3, in the Deccan Re. 0-8-4, in Gujarát Re. 0-7-10, in Sind Re. 0-8-4, and in the foreign institutions Rs. 2-0-11 as compared with Rs. 1-9-3, Re. 0-7-4, Re. 0-6-5, Re. 0-9-6 and Rs. 2-4-11 respectively in the previous year. The percentage of total cost paid by Government was 76·0 against 77·2 in 1889. If the cost of the Native State institutions be added, the percentage paid by Government would be 68·9 against 70·4 in the previous year. The cost of dispensaries alone to Government was 37·0 per cent. as compared with 39·7 in 1889.

The following discrepancies have been found between the closing balances of 1889 and the opening balances of 1890 :—

	Balance on 31st December 1889.	Balance on 1st January 1890.	Remarks.
	Rs. a. p.	Rs. a. p.	
Gokuldás Tejpál Hospital.	2,382 14 1	.....	The balance to the credit of the hospital lapsed as usual to the Bombay Municipality.
Cowasji Jehangir Dispensary, Bándra.	1,059 5 4	975 0 1	The present balance is correct and the discrepancy is due to Rs. 84-5-3 on account of voluntary contributions collected in 1889 being credited to the dispensary building funds.
Kelva Máhim Dispensary.	812 7 1	453 13 0	The present balance is correct.
Jejury Dispensary ...	557 15 11	553 13 7	Do. do.
Akola Dispensary ...	550 15 0	541 1 0	Do. do.
Sunder Mulji Dispensary, Jalgaon.	1,586 6 4	1,386 6 4	The present balance is correct and the discrepancy is due to Rs. 200 on account of invested capital being included in the cash balance.
Navápur Dispensary ...	.....	1,140 5 11	These balances are correct, as no expenditure was incurred last year by these dispensaries.
Sávda do. ...	.....	1,500 0 0	
Victoria Dispensary, Navsári.	1,838 11 11	1,987 13 6	The present balance is correct and the difference was due to an error in keeping accounts.

	Balance on 31st December 1889.	Balance on 1st January 1890.	Remarks.
	Rs. a. p.	Rs. a. p.	
Godhra Civil Hospital	451 6 6	.....	The balance shown in last year's report is incorrect, as there was no balance in hand.
Dohád Dispensary ...	0 15 0	.....	The present balance is nil.
Thano Bula Khán Dispensary.	.....	137 4 11	The present balance is correct. This discrepancy was pointed out by the Huzúr Deputy Collector, Karáchi.
Khipra Dispensary ...	166 11 10	287 9 6	The present balance is correct and that shown in the last year's report was incorrect. The error is due to the accounts not being correctly kept.
Mitti do. ...	349 12 3	358 10 7	Do. do.
Mehár do. ...	265 11 6	248 14 6	Do. do.

Statement No. V., Part II, shows the account of invested capital. On 1st January 1890 the balance was Rs. 4,45,875, Rs. 14,025 were invested during the year, making a total of Rs. 4,59,900. Of this, securities of Rs. 1,000 were sold and Rs. 3,000 were withdrawn, leaving a balance of Rs. 4,55,900 at the end of the year.

19. The following works were executed and paid for from the "discretionary grant" at the disposal of the Surgeon-General during the year 1890 :—

	Grants. Rs. a.
Second class servants' quarters at the Civil Hospital, Karáchi...	485 0
Raising the floors of the servants' quarters and cook-room of the nurses' quarters at the Sassoon Hospital, Poona ...	37 0
Providing a separate water connection from the Frere Road to the buffalo-shed in the compound of the European General Hospital, Bombay	41 0
Constructing rain gutters on each side of the buffalo-shed in the compound of the European General Hospital, Bombay .	152 0
Cloth ceiling and fixing iron-bars to the windows of the quarters of Hospital Assistant at the West Hospital, Rájkot ...	191 0
Improving the cooking places at the Lunatic Asylum, Ratnágiri	178 0
Putting cloth ceiling to the male and female wards and the compounding-room in the Civil Hospital at Sholápur ...	165 0
Removing the hydraulic lift in the Jamsetji Jijibhoy Hospital...	75 0
Special work in the West Hospital, Rájkot	227 0
Laying a $\frac{3}{4}$" pipe from the Municipal main to the tank near the gate of the Lunatic Asylum, Ratnágiri	17 0
Fixing 3 glass windows to the store and compounding-room in place of wooden shutters in the Khán Bahádur Pestonji Sorábji Dispensary, Poona	21 0
Removing and re-fixing doors and windows to the Khán Bahádur Pestonji Sorábji Dispensary at Poona	22 0
Fixing lead sheeting around the sky-lights in the Ripon Hospital at Ahmednagar	69 0

20. The following contributions have been given during the year under report by private individuals for medical institutions, or to advance medical science :—

(1). Rs. 1,25,000 from Sir Dinsha Máneckji Petit, Bart., K.C.I.E., for hospital for women and children.

(2). Rs. 1,00,000 from Sir Dinsha Máneckji Petit, Bart., K.C.I.E., for the Leper Asylum at Trombay.

(3). Rs. 13,000 from the late Surgeon-General Wyllie's legacy of Rs. 50,000 for the benefit of the community of Ahmedabad, to build the two detached wards in the Civil Hospital, Ahmedabad.

(4). Rs. 10,000 from Brigade Surgeon H. V. Carter for the institution of a Lectureship on medical subjects in the Grant Medical College.

21. The dispensaries at the following places are said to be in bad repair or unsuitable :—

Bassein.	Rahimatpur.	Dehej.
Pen.	Pandharpur.	Kotri.
Uran.	Khánápur.	Sehwan.
Pimpalgaon Basvant.	Hubli.	Manora.
Nandurbár.	Háveri.	Tando Alahyár.
Bhadgaon.	Ránebenur.	Umarkot.
Pimpalner.	Muddebihál.	Rohri.
Sháháda.	Olpád.	Mehár.
Navápur.	Chikhli.	Kambar.
Islámpur.	Kheirgaon.	Dokri.
Mhasvad.	Hánsot.	Shahdádpur.
Pátan.	Kavi.	Berbera.

22. The dispensaries at Junnar, Trimbak and Sávda have not been visited by the Dispensary Committees even once in the year.

MY INSPECTION TOUR.

23. Pánchgani dispensary was inspected on the 4th June 1890 and found in excellent order. On the same day the Wái dispensary was also inspected. The buildings at Wái were clean and in good repair, but are not suitable for a dispensary. The attendance here is very considerable, as many of the pilgrims come to this dispensary.

The Civil Hospital of Sátára was inspected on the 5th and 6th June. The buildings are clean and in good repair. The wards nicely arranged and all the sick carefully looked after. The instruments clean and carefully kept. Medicines sufficient and the clothing in good order. Surgeon-Major Davidson informed me the attendance, especially of surgical cases, is increasing, and he thinks the old Police ward, which fell down some years ago, should be re-built on the old plinth that is still standing. I requested him to get a rough estimate of cost from the Executive Engineer. The records are neatly and correctly written up to date. A few of the service books of the establishment were not quite correctly filled up.

The Roman Catholic Orphanage Dispensary was inspected on the 14th June and found in good order.

On the 4th September the Khán Bahádur Pestonji Sorabji Dispensary, Poona, was inspected. The attendance is large. The building is not very well suited for its purpose. The records, medicine and instruments were in good order.

On the 5th and 6th September the Sassoon Hospital, Poona, was inspected. The wards were in good order and the patients carefully nursed by the Wantage Sisters and their nurses. The stores and records were in good order.

On the 8th September the Hospital of the Yerrowda Central Jail was inspected and found in good order.

The Civil Hospital (Ripon) was inspected in Ahmednagar on the 23rd September and everything found in good order. This is a very good hospital, but a couple of bath-rooms added would be a great improvement, and they might be provided by partitioning the store-room at a very small cost. (This has been recently carried out.)

On the 5th November the Dispensary at Mátherán was inspected. The records were not numbered, the poisons not in a separate box and the medicine bottles too crowded on the press shelves. The instruments were all nearly new and in excellent order. The work done here is not much as the population is small.

On the 14th November the Civil and Jail Hospitals and Rustomji Wádia Charitable Dispensary at Thána were inspected and all found in good order. Records carefully kept, properly numbered and written up to date. The instruments clean and well-cared for, and there was plenty of medicines to meet all wants.

On the 27th I inspected the Government Dispensary at Alibág. This is really more of a civil hospital than a dispensary. The place was very clean and the male ward all nicely arranged, but there were no in-patients at the time of my visit. The instruments are well-cared for, but many are old and some require repairs. The stock of medicines is hardly sufficient. In future a more liberal supply will be indented for. The books were all in good order. For some years there has been a project for building a women's ward, but Mr. Sinclair, the Collector, showed me a disused dharmshála near the hospital which will do quite well for a women's ward after it is cleaned up and put in order: by making this the women's ward the municipality will avoid spending several thousand rupees on a new building.

On 2nd December the Surat Jail Hospital was inspected and found in good order. The following day the Civil Hospital was inspected. The place very clean, buildings in good

repair, wards nicely arranged, stores well arranged, plenty of medicines, instruments well-cared for, clean and in good order, the records correctly numbered, and neatly written up to date.

On the 4th the Párakh Charitable Dispensary, Surat, was inspected and everything found to be satisfactory.

On the 5th I inspected the Ránder Dispensary. It is a hired place of two rooms, quite insufficient for its purpose. The medicines and instruments are well-cared for, but a store-room is much required. The Hospital Assistant had rented a hole of a place, for which he paid Rs. 2½ out of his own pocket and there kept the stock. The instruments are old but serviceable.

On the 6th the Civil Hospital of Broach was inspected. The building of quarters for one Hospital Assistant had been begun. This will supply a much needed want. The buildings were clean and in good repair. The wards and beds in excellent order. The records neatly written and up to date. There was plenty of medicines and the instruments were clean and carefully kept.

The Civil Hospital of Godhra was inspected on the 8th December and everything found in good order. A new Police ward and dead-house are under construction and several houses for servants, a store-house and latrine are to be built. These will improve the hospital very much.

On the morning of the 10th I inspected the dispensary at Ánand. The buildings clean and in good repair. The stores, instruments and wards all in good order. This dispensary is too far from the town, which I believe keeps the attendance comparatively low.

In the afternoon the dispensary at Nadiád was inspected. The building was clean and in good repair. The dead-house is not suitable and quarters are required for servants. There is a piece of ground adjoining the dispensary compound which belongs to Government: if this could be added to the dispensary compound and the dividing wall knocked down, a proper dead-house and servants' quarters might be built on it. There was plenty of medicines, carefully kept in presses and the poisons are locked up in a separate box. The instruments are in good order and the books neatly written up to date and correctly numbered. The attendance is very large and the Committee take a keen interest in the dispensary.

On the 11th I inspected the Civil Hospital at Kaira. The compound and buildings very clean and everything very neat about the hospital. Recently the municipality have built a cholera ward in the hospital compound, but a good way off the general wards. The attendance at this hospital has never been very large, and female in-patients are rare. This may be partly due to there being no female servant on the hospital establishment; but the attendance of men is also small. The Police ward is appreciated by the Police. Surgeon Quicke was in acting charge; he has some reputation as a surgical operator and he says that, although he sees many surgical cases among the out-patients, it is extremely difficult to get them to come in for operation. Still he has done a few important operations, and it is probable more will follow. The books were all in good order. There was plenty of medicines. The instruments are well-cared for, but many are old though still serviceable.

On the 12th the jail hospital was inspected and found in good order. The deaths in this year have been 12 to 5 last year and 3 in 1888. The jail population was 169 on the day of my inspection, of whom only 3 were women. Only 2 men and 1 woman were sick. There is no Hospital Assistant attached to this jail. He was removed in October 1889. I am of opinion there should be a Hospital Assistant on the jail establishment. I am not able to say the increase of deaths is in any way connected with the absence of a Hospital Assistant, but they are obviously coincident. I think every jail should have a resident Hospital Assistant not merely for the sick in the jail hospital, but also for the purpose of constantly having his eyes on the prisoners so as to prevent serious illness and to bring feeble prisoners immediately under special care.

The dispensary at Mehmadabad was inspected on 14th. A new ward for 2 women's beds has been added to the end of the men's ward lately. The compound not quite as clean as it should be; buildings clean and in good repair. Some of the instruments are old, 2 are unserviceable and will be replaced; the others are still serviceable. Plenty of medicines. The records in good order. Hospital Assistant Balwant Vithal has been here seven years and though popular, the attendance has diminished somewhat since the introduction of the rules for hospital stoppages.

On the 15th the Civil Hospital, Ahmedabad, was inspected. The compound was clean and the buildings in good repair. The plans for adding 2 wards, an operating-room and store-room have been sanctioned. The wards were neatly arranged and everything in excellent order about the beds. Plenty of medicines and carefully looked after. The instruments were not quite as clean as they might be, but it is difficult to keep old instruments quite bright, though most of them are in good order and well-cared for. The books are all in good order, neatly written up to date and correctly numbered. In the evening the Police

hospital was inspected and found in good order. Next day the Ranchodlal dispensary was found all in good order. On the 17th the Jail Hospital was inspected in the morning. Very few sick. During the year there have been 22 deaths up to date. The jail is quite clean. I think it would be better to keep the prisoners in bed a little longer in the cold weather, and not put them to work until the sun has warmed the air a little. The temperature was 54° when I made my inspection. In the afternoon the Bechardás Dispensary was inspected. Clean and in good repair. Some very interesting surgical cases in the wards. Mr. Cooper does a good deal of operative surgery here. The medicines, stores, instruments and books are all in excellent order. On the 18th the Ráipur Dispensary was inspected. There were 2 in-patients. Everything in very good order. In the afternoon Dhuliakot Jail Hospital was inspected; it is in good order. On the 19th the Victoria Jubilee Dispensary for women was inspected. Miss Kápadia was in charge of it and had a large attendance of out-patients, and the 7 or 8 beds were full. Everything was in good order and there can be no doubt this dispensary meets a want. In the evening I visited the Leper Asylum where there were 20 men. The place is in charge of a pensioned Hospital Assistant. It was clean and in good order.

On the 22nd and 23rd the West Hospital at Rájkot was inspected. The wards require white-washing, the floors in some parts require repair. Several of the wards have still earth-floors, which is very objectionable; they should be paved. The buildings in other respects are in good repair. The compound has been very nicely laid out and a gardener is much wanted to attend to the grounds. The beds are nicely arranged in the wards. There was plenty of medicines, well-cared for both in presses and store-room. The instruments are clean, in good order and well taken care of. The books are all in good order. On the afternoon of the 22nd the jail hospital was inspected and found in good order. On the 24th I visited the Leper Asylum in which there were 25 men and 8 women. They are housed and fed, and a committee manages the asylum.

On the 28th I inspected the Wadhwán Dispensary. The buildings are clean and in good repair. There is plenty of everything. The medicines are well kept in presses. The instruments are mostly in good order, but a few require repair. The books are neatly kept up to date and correctly numbered. The in-patients numbered 9, of whom 1 is a woman. The out-patients' attendance is large.

On the 9th January 1891 I visited the Jaffer Suleman Dispensary in Bombay about 8 o'clock A.M. There were many women and children in the waiting-room and Dr. Isabella M. Macdonald was seeing the patients and prescribing for them. Since my last inspection 2 servants' house and a latrine have been built. The building was clean and in good repair. This women's dispensary is undoubtedly very much appreciated.

On the 12th the Gokuldas Tejpal Hospital was inspected and found to be in every respect in excellent order.

On the 13th the Kama Hospital was inspected and also found in excellent order. The new Allbless Hospital has been built near the Kama Hospital and will also be under the charge of Dr. Edith Pechey-Phipson.

On the 14th I inspected the Sir Jamsetji Jijibhoy Hospital. This is the largest Hospital in this Presidency. Everything is well arranged about it and the administration under Brigade Surgeon Gray is all that can be desired. I noticed considerable improvements in the garden due to the attention and botanical knowledge of Brigade Surgeon Gray. A nice garden about an hospital is a charming feature. The officer in charge is very anxious to get a new operating-room built, as the light in the present one is bad and the students cannot see well. A new store-room is also much wanted. The two new hospitals under construction here were proceeding satisfactorily. The quarters for the Lady Reay nurses were nearly ready and have since then been opened by His Excellency Lord Harris.

On the 15th I inspected the Cowasji Jehángir Ophthalmic Hospital and found it in good order. I agree with Brigade Surgeon Maconachie in thinking a new operating-room with a good light is much needed; so also is a store-room. On the same day the Obstetric Hospital was inspected. It was quite full of patients. It is not a good building and not suitable for its purpose, but there will soon be the Motlibái Hospital to put patients in.

On the 21st I inspected the hospital in the House of Correction and the dispensary at the Byculla Schools. Both were in good order.

On the 26th and 29th I inspected the European General Hospital. Brigade Surgeon Hojel had everything very nice and in good order. The buildings clean and in good repair. The wards clean and beds all nicely arranged. The books neatly written up to date and the instruments well-cared for. The building of St. George's Hospital is progressing, which is to replace the present European General Hospital.

On the 28th I inspected the hospital of the County Jail; hardly any sickness and all in good order.

On the 18th April I inspected the Civil Hospital in Mahábleshvar and found it all in good order. But the Hospital Assistant's house must either be re-built or extensive

repairs carried out; a consulting-room to see patients in and make examinations and also a store-room are additions which should be made as soon as possible. There should also be a dead-house even though it is seldom required.

24. Deputy Surgeon-General Cates inspected the Civil Medical institutions in Aden when there on military inspection duty, and his reports are favourable in all respects. Deputy Surgeon-General Turnbull inspected all the Civil Hospitals, Jail Hospitals and a number of dispensaries in Sind. His inspection reports are also favourable and he has named Surgeons-Major Keith, McCloghry and Surgeon Jennings as having done good and meritorious work in the past year.

25. Excepting the two dispensaries at Supa in the Kánara Collectorate and Bhadgaon in the Khándesh Collectorate, all the dispensaries in the Presidency and Sind were inspected by the Civil Surgeons. They report favourably on all of them.

26. I regret to state the cause of delay in the submission of this report is due to the very late receipt of the annual return and report of the E. F. Allbless Leper Home, Trombay. The late Superintendent of the Institution gave up his duties owing to ill health and subsequently died. His successor had some difficulty in completing the annual return from the records and could not submit it on the due date.

I have the honour to be,
Sir,
Your most obedient Servant,
J. PINKERTON, M.D.,
Surgeon-General.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT No. 1.

Showing the classification of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1890.

1	2	3	4	5	6	7
Population of the Province.	Class.	Number open on 31st December 1889.	Number open during the year.	Number closed during the year.	Number open on the last day of the year.	Remarks.

Annual Reports: Administration and Progress Report on Civil Hospitals and Dispensaries for the year 1890.

No. 2417.

GENERAL DEPARTMENT.

Bombay Castle, 7th July 1891.

Letter from the Surgeon General with the Government of Bombay, No. S.B.—243, dated 6th June 1891—Submitting the Administration and Progress Report on Civil Hospitals and Dispensaries for the year 1890.

RESOLUTION.—The total number of Hospitals and Dispensaries at the end of 1890 was 248, four new Dispensaries having been opened during that year at Lonávla, Mirajgaon, Yával and Vadgaon. The three former are grant-in-aid institutions and the last named is situated in the Kolhápur State. No Hospitals or Dispensaries were closed during the year.

2. The total number of patients treated was 1,723,584 against 1,696,614 in 1889. There was an increase in both classes, out-door and in-door, and this was spread over all the Divisions except Gujarát, in which there was a total decrease of 11,000 patients. Cases of cholera and small-pox were very few, the numbers being only 691 and 247 respectively against 5,318 and 944 in 1889. Cases of malarial fevers rose from 262,791 to 288,919 and the large increase in each division of the Presidency shows the general unhealthiness of the season in this particular respect. Cases of dysentery decreased considerably and under diarrhœa also there was a marked decrease. It is possible [redacted] influenza epidemic caused the rise of over 17,000 under the [redacted] general di[redacted] fuller info[redacted] asked if he can account for the [redacted] at the European General Hospital in the year under review as compared with those in the preceding year.

3. The table given below shows the opening balance of Hospitals and Dispensaries, the income of the year, and the sources from which it was derived :—

Opening balance	Rs.	1,21,993
From Government	„	8,34,118
„ Local Funds	„	80,520
„ Municipalities	„	1,54,590
„ Miscellaneous sources (including interest, &c.) ...	„	80,714
„ Subscriptions	„	14,020
Total ...	Rs.	12,85,955

The total expenditure was Rs. 11,57,931, the closing balance being Rs. 1,28,024. The amount contributed by Government exceeded by almost Rs. 34,000 the Government expenditure in the previous year. The greater portion of the increase was on account of salaries and medicines in Civil Hospitals in the Deccan. Such accidental causes entail considerable variations, and comparisons of Government expenditure year by year are in consequence of little value. The contributions from Local Boards and Municipalities were, it is satisfactory to notice, appreciably larger than in 1889. During the year two sums of Rs. 1,25,000 and Rs. 1,00,000 were contributed by Sir Dinsha Máneckji Petit, Bart., for the establishment of a Hospital for Women and Children, and of a Leper Asylum at Trombay respectively. Sums of Rs. 13,000 for expenditure on building two detached wards in the Civil Hospital, Ahmedabad, and Rs. 10,000 for the institution of a Lectureship in the Grant Medical College were also received.

4. The discrepancies in respect of the opening and closing balances noted in paragraph 18 of the report, show that the method of keeping accounts is not yet satisfactory. It is not however necessary to pass orders on the subject, as a scheme for including Dispensary accounts in Incorporated Local Funds is under the consideration of Government.

5. The number of Military Hospital Assistants is five in excess of the sanctioned strength and is apparently likely to remain so for some time to come. The proposals to increase the sanctioned strength have not been submitted to Government. It is hoped that by the end of 1893 the full sanctioned strength of Civil Hospital Assistants will be entertained.

6. The most noteworthy events during the year were the establishment of the Leper Home at Mátunga and the completion of the Edalji Bamanji Albless Hospital. Temporary hospitals for the treatment of infectious diseases were, according to paragraph 13 of the report, opened by the Corporation, but they have since been closed, and the final settlement of the question is still under consideration, and forms the subject of separate correspondence.

7. The tours of Surgeon General Pinkerton and Deputy Surgeon General Turnbull appear to have been sufficient. The remarks of the Surgeon General regarding the state of the Hospitals and Dispensaries visited by him show that the management has been efficient and the work well carried out. Only two Dispensaries remained uninspected by the Civil Surgeons.

W. L. HARVEY,
Acting Under Secretary to Government.
